Discontinuous Data Collection

<u>Interval Recording</u>: (For behaviors that do not have discrete beginnings and endings, may be too frequent to make counting not feasible for someone with other responsibilities while observing)

Student		Week of (Dates)	

Behavior Label:	Definition of Behavior:

<u>Observation Period:</u> 10 m 15 m 20 m 30 m Other: _____ (Circle one)
<u>Interval Length</u>: 10 s 15 s 20 s 30 s 1 m 2 m 3 m 5 m Other: _____(Circle one)
<u>Select Type</u>:
____Partial: Record "+" in box if the behavior occurs any time during the interval. If no behavior occurs, record "-".
____Whole: Record "+" in box if the behavior occurs the entire interval. If no behavior occurs, record "-".
____Momentary Time Sampling: Record "+" if behavior is occurring at the beginning of each interval only (look for 1 second, record data, wait for signal of next interval, look 1 second, etc.) If no behavior occurs, write "-"

Date	1	2	3	4	5	6	7	8	9	10	% of intervals	Observer Initials
Example 12/5	+	-	+	+	+	-	-	+	+	+	*70%*	*CLS*
