

# My Data Dashboard

ISBE has launched a new tool called My Data Dashboard, which is accessible via MyIRC, that replaces Ed360. My Data Dashboard provides the same features with faster loading times and a better user experience. The goal of the updated tool is to provide administrators and teachers with detailed data related to critical performance metrics to allow for data-driven programmatic decision-making and a deeper understanding of how data can be used within the state, districts, schools, and classrooms.

## My Data Dashboard Highlights:

- Redesign and branding
- MyIRC authentication and role management
- Minor enhancements to the financial budget forecasting tool
- Inclusion of new metrics visualization that allow users the ability to use and understand data reported publicly at a more detailed level, including the ability to see data via cohort, trend, and snapshot data, as well as a detailed filterable roster allowing users to analyze and dissect data at a nuanced level
- Inclusion of customizable home page and ability to save multiple dashboards that capture data important to you and the work you do on a regular basis

## On the Horizon:

- Inclusion of additional new metric visualization and access – in particular, academic assessments -- that will allow users the ability to use and understand data reported publicly at a more detailed level
- Summative designation details
- Ability to include draft AFRs/Budget (coordinated with agency initiative)
