DLM Spring Testing Update
April 6, 2015

DLM Spring Testing Resumes

On Friday, April 3, ISBE emailed the coordinators and teachers of student(s) who received incorrect testlet(s) assignments during the first few weeks of DLM spring testing. DLM has identified the cause of the incident, which only impacted a small number of students statewide, and has implemented a fix moving forward. If you did not receive an email from ISBE, your students can resume testing. If you were contacted, please refrain from testing the identified students until further information is provided to you.

DLM Spring Testing Window Extended

ISBE has extended the DLM Spring testing window until Friday, May 29, to provide districts additional time to complete testing since the DLM system was temporarily closed last week.
