Sample Task Mathematics Grade 5

- Present the primary task to the student. Say: **Here is a base ten model. Which number is less than the number represented by this base ten model?**

- Point to each option and say: 80, 50, 20

  The student receives a score of 4 for a correct response.
  If the student does not respond, repeat the primary task *only once* exactly as it appears.
  If the student responds correctly after the second presentation of the primary task, the student receives a score of 4.
  If the student chooses an incorrect answer or does not respond, move to Level 3.

- Turn the page to provide the general prompt.
- Re-present the primary task and answer options.

  The student receives a score of 3 for a correct response.
  If the student does not respond or responds incorrectly, move to Level 2.

- Indicate the correct answer and re-present the primary task and answer options.

  The student receives a score of 2 for a correct response.
  If the student does not respond or responds incorrectly, move to Level 1.

- If the student does not respond or responds incorrectly at Level 2, the student receives a score of 1.

Correct answer: 20
• Say: **Here is an example of a different base ten model. The number 10 is less than the number represented by this base ten model.**

• Turn back to the primary task page and re-present the primary task and answer options.
