The Partnership for Assessment of Readiness for College and Careers (PARCC), has released additional sample items for both English language arts/literacy and mathematics. The sample items show how PARCC is developing tasks to measure the critical content and skills found in the Common Core State Standards (CCSS). The sample items have undergone PARCC's rigorous review process to ensure quality and demonstrate the content that will be on the assessments in 2014-2015.

The release of paper-based items is the first of two that PARCC will be providing throughout the remainder of the calendar year. PARCC will provide a complementary set of paper-based items in October, so that there will be sample items in each grade level. In November, all sample items will be re-released on the technology platform that students will use for the spring field test, providing an early opportunity for students and educators to engage with the tools and functionalities on the assessment.

The primary purpose of sharing sample items is to provide information and to support educators as they continue the transition to the CCSS and the PARCC assessments. The sample items presented on the PARCC website demonstrate that core shifts at the heart of the CCSS are also integrated into the design of PARCC's assessments.

Assessment List Serve

If you would like to have access to the most up-to-date Illinois Assessment information, subscribe to the Student Assessment listserv.

Send a blank email to assessment@isbe.net with the word “SUBSCRIBE” in the subject line. The listserv will provide members with the most up-to-date information regarding Illinois state testing. For more information visit http://www.isbe.state.il.us/assessment/htmls/listserv.htm

Field Testing

Illinois will be a major participant in PARCC Field Testing next spring. As many as 800 schools in the state will participate. Most will take only a portion of the test, either the Performance-Based or the End-of-Year items, in English/Language Arts or Mathematics. Districts were initially contacted in September with follow up expected later in the year. The tests will be administered between March and May of 2014.

Student Achievement Partners

Student Achievement Partners (SAP) is a non-profit education reform organization which has developed resources to support and implement the Common Core State Standards (CCSS). Teachers can find useful tools for various subject areas and grade levels on their website.

Their resources for the ELA shifts include a document which explains the shifts and a PowerPoint presentation of an Overview of the Common Core State Standards. One can access a collection of professional development modules including PowerPoints, videos and hands-on activities for workshops.

Videos from the America Achieves video library display examples of Core-aligned teaching in the classroom. Common Core Sample Lessons and Assessment Questions cover the topics of close reading and of text complexity. Exemplars of literacy in the sciences, technical subjects and history classes are also provided.

The accounts of teachers representing various grade levels and subject areas provide insight into transitioning into the Common Core. Instructional Practice Guides

Materials Alignment for 8th Grade Literature Teachers

The Anthology Alignment Project (AAP) was designed for teachers of grades 6 through 10. The AAP is a free “library of revised lessons for common Anthologies (6th-10th grades), each carefully aligned to the Common Core State Standards. Each new lesson includes quality text-dependent questions, improved tasks, and a focus on academic vocabulary." You can access the AAP by visiting www.edmodo.com and joining group pkx4sp.

The AAP includes the following: HMH Reading/Medallion, Holt Elements of Literature, Holt Literature & Language Arts, MH Glencoe: The Reader’s Choice, ML Language of Literature, ML Literature, PH Literature, PH Timeless Voices, and Timeless Themes.

How To Achieve Deep Understanding of a Complex Text

The Achieve website includes a document from middle school ELA and social studies teacher Joanna Hawkins. She discusses the craftsmanship which is needed for teachers to create deep learning experiences for their students.

The article notes that the lessons of the teachers who teach students to learn how to understand complex text have the following components in common:

- Activities for deep reading that include writing
- A series of questions that leads to deep learning
- Tasks which require students to reread texts

"The goal of successful teaching is not teaching—it’s learning—and successful teachers, therefore, carefully design a learning plan beforehand to maximize the learning experiences of their students."
Illinois Math Curriculum Models

On August 29, 2013 ISBE released the newest material for the Illinois Math Curriculum Models. Scope and sequence documents, Unit plans, and an example lesson for Unit one of all grades (Kindergarten- High School Math 3) is now available at http://isbe.net/common_core/htmls/math-models.htm.

Example lessons for all units will be made available, in sequential order, every few weeks. Each unit will also contain several assessments. The curriculum models committee revised the scope and sequence for Math 1 and Math 2 and several units, due to the recent release of the Blueprint and Evidence Tables from PARCC. All curriculum models are aligned to the common core and consider relevant information from PARCC Model Content Frameworks, the Progression documents, EQuIP rubric, Publishers’ Criteria, and the PARCC Evidence Tables.

Eighth Grade Illustrative Mathematics

Find the Missing Angle

In the picture to the right, lines \( l \) and \( m \) are parallel. The measure of angle \( PAX \) is 30°, and the measure of angle \( PBY \) is 54°. What is the measure of angle \( APB \)?

This task aligns to content standard 8.G.5.

The widespread adoption of the common Core State Standards for Mathematics (CCSSM) presents an unprecedented opportunity for systemic improvement in mathematics education in the US.

August 2013, NCTM

"Supporting the Common Tool (AET). The complete toolkit also includes an introduction and overview, the EQuIP Rubric, additional resources for evaluating the alignment of materials, and the K-8 and HS Publishers’ Criteria. Links to specific sections of the toolkit can be found at http://www.achieve.org/toolkit.
By now, teachers are likely witnessing frustration as students tackle new strategies in regard to close reading, complex texts, and multiple revisions. Perhaps students are having trouble sticking with a new math concept. Common Core State Standards require perseverance more than ever before. Therefore, this skill can no longer be assumed.

Whether you call it tenacity, agency, resilience, or even motivation, perseverance is necessary not only for success in the classroom, but in students' personal and professional lives. At the same time, students have little practice in persevering in their technology-driven, instantly-gratifying world. Fortunately, perseverance is a skill that can be explicitly taught, and research findings indicate that this trait can be learned.

Yet this requires the adoption of a GROWTH MINDSET that assumes each student can improve their skills with ongoing effort. What does this look and sound like in the classroom? A class-wide adoption of a growth mindset is constantly reinforced by classroom messages.

Danielson's Framework (3e) highlights teacher “persistence” as a professional skill. Teachers can also help model persistence skills for students, such as:

- Setting appropriate goals and related tasks.
- Preplanning for potential obstacles with solution strategies.
- Shifting thought from “failures” to “challenges” that can be overcome.

Classroom Management

Danielson's Framework (3e) highlights teacher “persistence” as a professional skill. Teachers can also help model persistence skills for students, such as:

- Setting appropriate goals and related tasks.
- Preplanning for potential obstacles with solution strategies.
- Shifting thought from “failures” to “challenges” that can be overcome.

“Teachable moments” that cultivate student perseverance skills:

- Ensure match of student and content.
- Refrain from intervening prematurely with students’ struggle.
- Praise effort versus ability.

Classroom Messages That Promote A Growth Mindset

- **We believe** in our potential and are committed to taking responsibility for our own learning.
- **We value** (and encourage) taking on challenges, exerting effort, and surmounting obstacles. No matter the outcome, learning is also in the journey.
- **We model** that working hard grows new brain connections, making one’s capacities and skills malleable with effort.
- **We create and sustain** a safe learning environment, which is not a place of judgment, but a safe place to practice self-management and self-responsibility skills.

(Weinstein, 2010)

Making Connections

Common Core State Standards:

- Math Practice Standard 1
- Instructional shifts in English and Language Arts

Danielson Framework:

- **3E** Demonstrating Flexibility and Responsiveness

Conditions for Learning Indicators

- (Rising Star): CL10, CL7, CL4, CL8

Related Conditions for Learning Indicators are included in the Rising Star on IIRC school improvement tool and accessible at the ISBE Learning Supports website.
