Rec’d 2/11/2013

I am requesting the following data from the Illinois State Board of Education:

- High frequency attendance rates, preferably daily, by school and grade for Cook and DuPage counties with an identifier for school location (longitude/latitude or address).
- Personal info not required, can be aggregate rate at the grade or class level (e.g. 92 percent attendance).
- All years available are desired.

I am willing to help in any way and can pay applicable fees for compiling the data. The data will be used for academic research as part of my dissertation at UCSD. I am investigating the impact of coal plant emissions on student health, using daily wind patterns to determine areas of highest impact.

Sincerely,

Michael Futch
UCSD
