Ms. Simhauser,
You previously provided a spreadsheet on information submitted by local districts to the Student Incident Reporting System, related to K-12 campus crimes. Since our story ran, some districts that previously did not report have begun reporting, so I am requesting an updated spreadsheet. However, I am requesting that the spreadsheet contain all information reported by districts each year (excluding info that would identify a student). This may include many more columns than the original spreadsheet, but I would like all information submitted, with each question/category in a separate column. If it is easier, please provide a separate spreadsheet for each year, beginning in 2006. And if necessary, based on time required to compile this info, please limit this request to only those districts reporting from the 6-county region, including Cook, DuPage, Kane, Lake, McHenry and Will. In addition, I understand that Hinsdale District 86 has just begun reporting into the system (for this past school year). Is it possible for me to get Hinsdale’s information first? If so, I’d appreciate it. Please let me know if there are any questions,
Diane
