

Percentage of High School Students Who Did Not Always Wear a Seat Belt,* by Sex, Grade, and Race/Ethnicity,† 2021

*When riding in a car driven by someone else

†B > A, B > H, B > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Did Not Always Wear a Seat Belt,* by Sexual Identity and Sex of Sexual Contacts, 2021

*When riding in a car driven by someone else
This graph contains weighted results.

Percentage of High School Students Who Did Not Always Wear a Seat Belt,* 2019-2021†

*When riding in a car driven by someone else

†No change 2019-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

This graph contains weighted results.

Percentage of High School Students Who Rode with a Driver Who Had Been Drinking Alcohol,* by Sex,† Grade, and Race/Ethnicity,† 2021

*In a car or other vehicle, one or more times during the 30 days before the survey

†F > M; B > A, H > A, W > A (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Rode with a Driver Who Had Been Drinking Alcohol,* by Sexual Identity and Sex of Sexual Contacts, 2021

*In a car or other vehicle, one or more times during the 30 days before the survey
This graph contains weighted results.

Percentage of High School Students Who Rode with a Driver Who Had Been Drinking Alcohol,* 1993-2021†

*In a car or other vehicle, one or more times during the 30 days before the survey

†Decreased 1993-2021, decreased 1993-2013, decreased 2013-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1997, 1999, 2001, 2003, 2005.

This graph contains weighted results.

Percentage of High School Students Who Drove a Car or Other Vehicle When They Had Been Drinking Alcohol,* by Sex, Grade,† and Race/Ethnicity,† 2021

*One or more times during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

†12th > 10th; H > A, W > A (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Drove a Car or Other Vehicle When They Had Been Drinking Alcohol,* by Sexual Identity and Sex of Sexual Contacts, 2021

*One or more times during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey
This graph contains weighted results.

Percentage of High School Students Who Drove a Car or Other Vehicle When They Had Been Drinking Alcohol,* 2013-2021†

*One or more times during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

†Decreased 2013-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

This graph contains weighted results.

Percentage of High School Students Who Texted or E-Mailed While Driving a Car or Other Vehicle,* by Sex, Grade,† and Race/Ethnicity,† 2021

*On at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

†11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th; W > A, W > H (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Texted or E-Mailed While Driving a Car or Other Vehicle,* by Sexual Identity and Sex of Sexual Contacts, 2021

*On at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey
This graph contains weighted results.

Percentage of High School Students Who Texted or E-Mailed While Driving a Car or Other Vehicle,* 2013-2021[†]

*On at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

[†]Decreased 2013-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

This graph contains weighted results.

Percentage of High School Students Who Carried a Weapon on School Property,* by Sex, Grade, and Race/Ethnicity, 2021

*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Carried a Weapon on School Property,* by Sexual Identity and Sex of Sexual Contacts, 2021

*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey
This graph contains weighted results.

Percentage of High School Students Who Carried a Weapon on School Property,* 1993-2021†

*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey

†Decreased 1993-2021, decreased 1993-2007, no change 2007-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1997, 1999, 2001, 2003, 2005.

This graph contains weighted results.

Percentage of High School Students Who Carried a Gun,* by Sex,† Grade, and Race/Ethnicity,† 2021

*Not counting the days when they carried a gun only for hunting or for a sport such as target shooting, on at least 1 day during the 12 months before the survey

†M > F; B > A, H > A (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Carried a Gun,* by Sexual Identity and Sex of Sexual Contacts, 2021

*Not counting the days when they carried a gun only for hunting or for a sport such as target shooting, on at least 1 day during the 12 months before the survey
This graph contains weighted results.

Percentage of High School Students Who Carried a Gun,* 2017-2021†

*Not counting the days when they carried a gun only for hunting or for a sport such as target shooting, on at least 1 day during the 12 months before the survey

†Decreased 2017-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

This graph contains weighted results.

Percentage of High School Students Who Did Not Go to School Because They Felt Unsafe at School or on Their Way to or from School,* by Sex,[†] Grade, and Race/Ethnicity,[†] 2021

*On at least 1 day during the 30 days before the survey

[†]F > M; B > A, H > A, W > A (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Did Not Go to School Because They Felt Unsafe at School or on Their Way to or from School,* by Sexual Identity and Sex of Sexual Contacts, 2021

*On at least 1 day during the 30 days before the survey
This graph contains weighted results.

Percentage of High School Students Who Did Not Go to School Because They Felt Unsafe at School or on Their Way to or from School,* 1993-2021†

*On at least 1 day during the 30 days before the survey

†Increased 1993-2021, no change 1993-2007, increased 2007-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1997, 1999, 2001, 2003, 2005.

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Did Not Participate in at Least 60 Minutes of Physical Activity on at Least 1 Day,* by Sexual Identity and Sex of Sexual Contacts, 2021

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
This graph contains weighted results.

Percentage of High School Students Who Did Not Participate in at Least 60 Minutes of Physical Activity on at Least 1 Day,* 2011-2021†

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
†No change 2011-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.

Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on All 7 Days,* by Sex,† Grade, and Race/Ethnicity,† 2021

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey

†M > F; W > A, W > B, W > H (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on All 7 Days,* by Sexual Identity and Sex of Sexual Contacts, 2021

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
This graph contains weighted results.

Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on All 7 Days,* 2011-2021†

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey

†No change 2011-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

This graph contains weighted results.

Percentage of High School Students Who Spent 3 or More Hours Per Day on Screen Time,* by Sex,† Grade, and Race/Ethnicity, 2021

*In front of a TV, computer, smart phone, or other electronic device watching shows or videos, playing games, accessing the Internet, or using social media, not counting time spent doing schoolwork, on an average school day

†F > M (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Spent 3 or More Hours Per Day on Screen Time,* by Sexual Identity and Sex of Sexual Contacts, 2021

*In front of a TV, computer, smart phone, or other electronic device watching shows or videos, playing games, accessing the Internet, or using social media, not counting time spent doing schoolwork, on an average school day
This graph contains weighted results.

Percentage of High School Students Who Attended Physical Education (PE) Classes on 1 or More Days,* by Sex, Grade,[†] and Race/Ethnicity, 2021

*In an average week when they were in school

[†]11th > 10th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Attended Physical Education (PE) Classes on 1 or More Days,* by Sexual Identity and Sex of Sexual Contacts, 2021

*In an average week when they were in school
This graph contains weighted results.

Percentage of High School Students Who Attended Physical Education (PE) Classes on 1 or More Days,* 1993-2021†

*In an average week when they were in school

†Increased, 1993-2013, decreased, 2013-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1997, 1999, 2001, 2003, 2005.

Percentage of High School Students Who Attended Physical Education Classes on All 5 Days,* by Sex, Grade, and Race/Ethnicity, 2021

*In an average week when they were in school
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Attended Physical Education Classes on All 5 Days,* by Sexual Identity and Sex of Sexual Contacts, 2021

*In an average week when they were in school
This graph contains weighted results.

Percentage of High School Students Who Attended Physical Education Classes on All 5 Days,* 1993-2021†

*In an average week when they were in school
†No change 1993-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
Data not available for 1997, 1999, 2001, 2003, 2005.

Percentage of High School Students Who Played on at Least One Sports Team,* by Sex,† Grade,† and Race/Ethnicity,† 2021

*Counting any teams run by their school or community groups, during the 12 months before the survey

†M > F; 10th > 12th; W > H (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Played on at Least One Sports Team,* by Sexual Identity and Sex of Sexual Contacts, 2021

*Counting any teams run by their school or community groups, during the 12 months before the survey
This graph contains weighted results.

Percentage of High School Students Who Played on at Least One Sports Team,* 2007-2021†

*Counting any teams run by their school or community groups, during the 12 months before the survey

†No change 2007-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Percentage of High School Students Who Had a Concussion from Playing a Sport or Being Physically Active,* by Sex, Grade, and Race/Ethnicity,† 2021

*One or more times during the 12 months before the survey

†B > A, W > A (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Had a Concussion from Playing a Sport or Being Physically Active,* by Sexual Identity and Sex of Sexual Contacts, 2021

*One or more times during the 12 months before the survey
This graph contains weighted results.

Percentage of High School Students Who Had a Concussion from Playing a Sport or Being Physically Active,* 2019-2021†

*One or more times during the 12 months before the survey

†Decreased 2019-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Were Ever Tested for Human Immunodeficiency Virus (HIV),* by Sex, Grade,† and Race/Ethnicity,† 2021

*Not counting tests done if they donated blood
†12th > 11th; B > A (Based on t-test analysis, $p < 0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Were Ever Tested for Human Immunodeficiency Virus (HIV),* by Sexual Identity and Sex of Sexual Contacts, 2021

*Not counting tests done if they donated blood
This graph contains weighted results.

Percentage of High School Students Who Were Ever Tested for Human Immunodeficiency Virus (HIV),* 2015-2021†

*Not counting tests done if they donated blood

†Decreased 2015-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Were Ever Tested for a Sexually Transmitted Disease (STD),* by Sex, Grade,† and Race/Ethnicity,† 2021

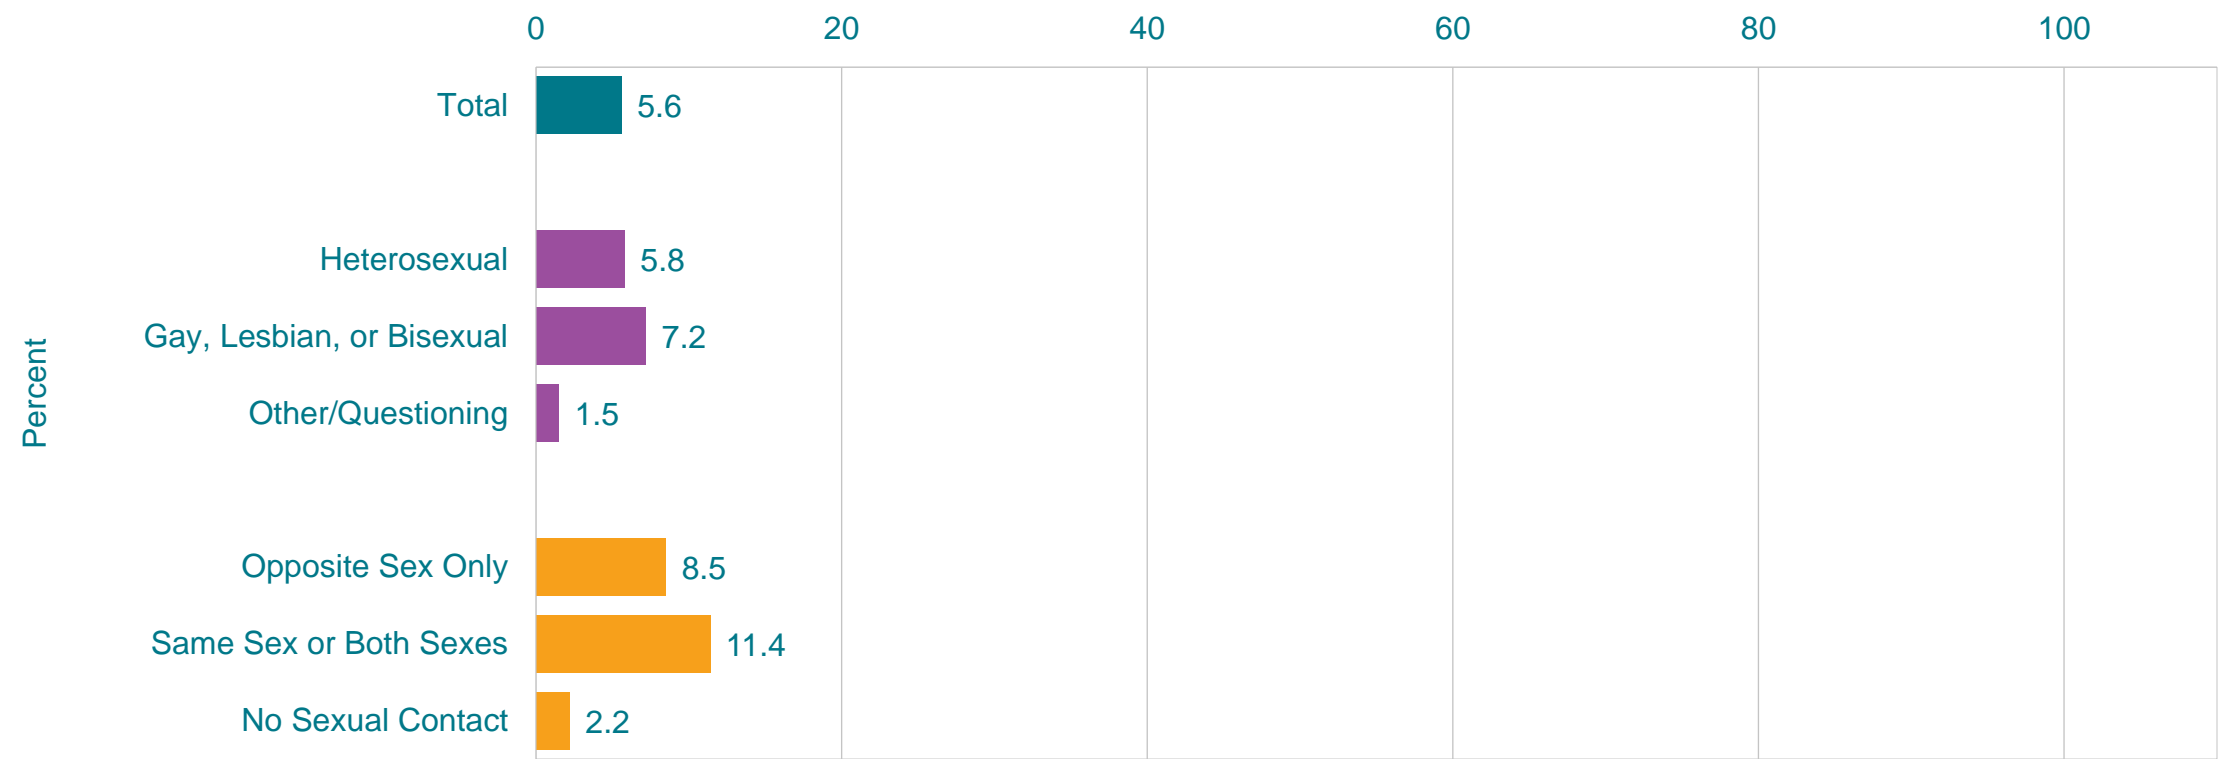

*Other than HIV, such as chlamydia or gonorrhea, during the 12 months before the survey

†12th > 9th, 12th > 10th, 12th > 11th; H > A, W > A (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Were Ever Tested for a Sexually Transmitted Disease (STD),* by Sexual Identity and Sex of Sexual Contacts, 2021

*Other than HIV, such as chlamydia or gonorrhea, during the 12 months before the survey
This graph contains weighted results.

Percentage of High School Students Who Were Ever Tested for a Sexually Transmitted Disease (STD),* 2019-2021†

*Other than HIV, such as chlamydia or gonorrhea, during the 12 months before the survey

†Decreased 2019-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Saw a Dentist,* by Sex, Grade, and Race/Ethnicity,† 2021

*For a check-up, exam, teeth cleaning, or other dental work, during the 12 months before the survey

†W > B, W > H (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Saw a Dentist,* by Sexual Identity and Sex of Sexual Contacts, 2021

*For a check-up, exam, teeth cleaning, or other dental work, during the 12 months before the survey
This graph contains weighted results.

Percentage of High School Students Who Saw a Dentist,* 2015-2021[†]

*For a check-up, exam, teeth cleaning, or other dental work, during the 12 months before the survey

[†]No change 2015-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Never Saw a Dentist,* by Sex, Grade,† and Race/Ethnicity,† 2021

*For a check-up, exam, teeth cleaning, or other dental work
†9th > 11th, 10th > 11th, 12th > 11th; W > A, W > B (Based on t-test analysis, $p < 0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Never Saw a Dentist,* by Sexual Identity and Sex of Sexual Contacts, 2021

*For a check-up, exam, teeth cleaning, or other dental work
This graph contains weighted results.

Percentage of High School Students Who Never Saw a Dentist,* 2015-2021[†]

*For a check-up, exam, teeth cleaning, or other dental work

[†]No change 2015-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Reported That Their Mental Health Was Most of the Time or Always Not Good,* by Sex,† Grade, and Race/Ethnicity, 2021

*Including stress, anxiety, and depression, during the 30 days before the survey
†F > M (Based on t-test analysis, $p < 0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Reported That Their Mental Health Was Most of the Time or Always Not Good,* by Sexual Identity and Sex of Sexual Contacts, 2021

*Including stress, anxiety, and depression, during the 30 days before the survey
This graph contains weighted results.

Percentage of High School Students Who Got 8 or More Hours of Sleep,* by Sex,[†] Grade,[†] and Race/Ethnicity, 2021

*On an average school night

[†]M > F; 9th > 12th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Got 8 or More Hours of Sleep,* by Sexual Identity and Sex of Sexual Contacts, 2021

*On an average school night
This graph contains weighted results.

Percentage of High School Students Who Got 8 or More Hours of Sleep,* 2015-2021†

*On an average school night

†Decreased 2015-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Usually Did Not Sleep in Their Parent's or Guardian's Home,* by Sex, Grade, and Race/Ethnicity,† 2021

*During the 30 days before the survey

†H > A, W > A (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Usually Did Not Sleep in Their Parent's or Guardian's Home,* by Sexual Identity and Sex of Sexual Contacts, 2021

*During the 30 days before the survey

This graph contains weighted results.

Percentage of High School Students Who Usually Did Not Sleep in Their Parent's or Guardian's Home,* 2017-2021[†]

*During the 30 days before the survey

[†]No change 2017-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Reported That an Adult or Person at Least 5 Years Older Than Them Made Them Do Sexual Things They Did Not Want to Do,* by Sex,[†] Grade,[†] and Race/Ethnicity, 2021

*Counting such things as kissing, touching, or being made to have sexual intercourse

[†]F > M; 12th > 10th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Reported That an Adult or Person at Least 5 Years Older Than Them Made Them Do Sexual Things They Did Not Want to Do,* by Sexual Identity and Sex of Sexual Contacts, 2021

*Counting such things as kissing, touching, or being made to have sexual intercourse
This graph contains weighted results.

Percentage of High School Students Who Reported That Their Parents or Other Adults in Their Home Most of the Time or Always Slapped, Hit, Kicked, Punched, or Beat Each Other Up,* by Sex,† Grade, and Race/Ethnicity,† 2021

*During their life
†F > M; H > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Reported That Their Parents or Other Adults in Their Home Most of the Time or Always Slapped, Hit, Kicked, Punched, or Beat Each Other Up,* by Sexual Identity and Sex of Sexual Contacts, 2021

*During their life
This graph contains weighted results.

Percentage of High School Students Who Reported That a Parent or Other Adult in Their Home Most of the Time or Always Hit, Beat, Kicked, or Physically Hurt Them in Any Way,* by Sex,† Grade, and Race/Ethnicity, 2021

*During their life
†F > M (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

*During their life
This graph contains weighted results.

Percentage of High School Students Who Reported That a Parent or Other Adult in Their Home Hit, Beat, Kicked, or Physically Hurt Them in Any Way One or More Times,* by Sex,† Grade, and Race/Ethnicity,† 2021

*During the 12 months before the survey
†F > M; B > W, H > W (Based on t-test analysis, $p < 0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Reported That a Parent or Other Adult in Their Home Hit, Beat, Kicked, or Physically Hurt Them in Any Way One or More Times,* by Sexual Identity and Sex of Sexual Contacts, 2021

*During the 12 months before the survey
This graph contains weighted results.

Percentage of High School Students Who Most of the Time or Always Felt That They Were Treated Badly or Unfairly Because of Their Race or Ethnicity,* by Sex,[†] Grade, and Race/Ethnicity,[†] 2021

*During their life

[†]F > M; B > A, B > W, H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Most of the Time or Always Felt That They Were Treated Badly or Unfairly Because of Their Race or Ethnicity,* by Sexual Identity and Sex of Sexual Contacts, 2021

*During their life
This graph contains weighted results.

Percentage of High School Students Who Most of the Times or Always Felt That They Were Treated Badly or Unfairly Because of Their Sexual Orientation,* by Sex,† Grade, and Race/Ethnicity,† 2021

*During their life

†F > M; W > A (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Most of the Times or Always Felt That They Were Treated Badly or Unfairly Because of Their Sexual Orientation,* by Sexual Identity and Sex of Sexual Contacts, 2021

*During their life
This graph contains weighted results.

Percentage of High School Students Who Ever Lived with Someone Who Was Having a Problem with Alcohol or Drug Use, by Sex,* Grade, and Race/Ethnicity,* 2021

*F > M; B > A, H > A, W > A (Based on t-test analysis, $p < 0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Ever Lived with Someone Who Was Having a Problem with Alcohol or Drug Use, by Sexual Identity and Sex of Sexual Contacts, 2021

This graph contains weighted results.

Percentage of High School Students Who Ever Lived with Someone Who Was Depressed, Mentally Ill, or Suicidal, by Sex,* Grade, and Race/Ethnicity,* 2021

*F > M; H > A, W > A (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Ever Lived with Someone Who Was Depressed, Mentally Ill, or Suicidal, by Sexual Identity and Sex of Sexual Contacts, 2021

This graph contains weighted results.

Percentage of High School Students Who Reported That Their Mental Health Was Most of the Time or Always Not Good During the Covid-19 Pandemic,* by Sex,† Grade, and Race/Ethnicity,† 2021

*Poor mental health includes stress, anxiety, and depression.
†F > M; W > H (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Reported That Their Mental Health Was Most of the Time or Always Not Good During the Covid-19 Pandemic,* by Sexual Identity and Sex of Sexual Contacts, 2021

*Poor mental health includes stress, anxiety, and depression.
This graph contains weighted results.

Percentage of High School Students Who Most of the Time or Always Went Hungry or There Was Not Enough Food in Their Home During the Covid-19 Pandemic, by Sex, Grade,* and Race/Ethnicity,* 2021

*11th > 10th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

Percentage of High School Students Who Most of the Time or Always Went Hungry or There Was Not Enough Food in Their Home During the Covid-19 Pandemic, by Sexual Identity and Sex of Sexual Contacts, 2021

This graph contains weighted results.

Percentage of High School Students Who Strongly Agree or Agree That Doing Their Schoolwork Was More Difficult During the Covid-19 Pandemic Than Before It Started, by Sex, Grade, and Race/Ethnicity,* 2021

*B > A, B > W (Based on t-test analysis, $p < 0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Strongly Agree or Agree That Doing Their Schoolwork Was More Difficult During the Covid-19 Pandemic Than Before It Started, by Sexual Identity and Sex of Sexual Contacts, 2021

This graph contains weighted results.

Percentage of High School Students Who Strongly Agree or Agree That They Used Drugs More During the Covid-19 Pandemic,* by Sex, Grade,† and Race/Ethnicity,† 2021

*Counting using marijuana, synthetic marijuana, cocaine, prescription pain medicine without a doctor's prescription, and other illegal drugs

†11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th; B > A, B > W, H > A, W > A (Based on t-test analysis, p < 0.05.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
