Resilience Supportive Schools Illinois: Connecting School Nurses with School-Specific Data and Resources to Build Student Wellness and Resilience

Colleen Cicchetti, Ph.D., M.Ed.

Mashana Smith, Ph.D.

August 12, 2025

“Kassarian Inger”

“And how are the children?”

- Student proficiency in English Language Arts (ELA) has made noticeable gains. Students in grades 3-8 achieved a proficiency rate of 41.2%, the highest since 2019 (Advance Illinois, 2024).
- Highest graduation rate for Illinois' high school students in 14 years at 87.7%,
- Illinois has consistently improved its ranking in addressing youth mental health in the four years that REACH has been implemented (Mental Health America, 2024)

“And how are the children?”

- 42% of 9th-12th grade Illinoisans reported feeling sad or hopeless almost every day for ≥ 2 weeks in a row so that they stopped doing some usual activities, ever during the 12 months before the YRBS survey (CDC, 2021)
- Nearly 40% of Illinois youth who experienced major depressive episodes were unable to access necessary care (Mental Health America, 2024)

Remember this.....

- Can't mental health our way out of this
- Not every child requires mental health treatment
- Every child needs a caring relationship and environment and socio-emotional skill development

What is Resilience?

Resilience is a child's ability to bounce back from challenges and stressful situations, manage emotions, adapt to change, and keep moving forward

Resilient children possess....

American Academy of Pediatrics, 2006 ⁷

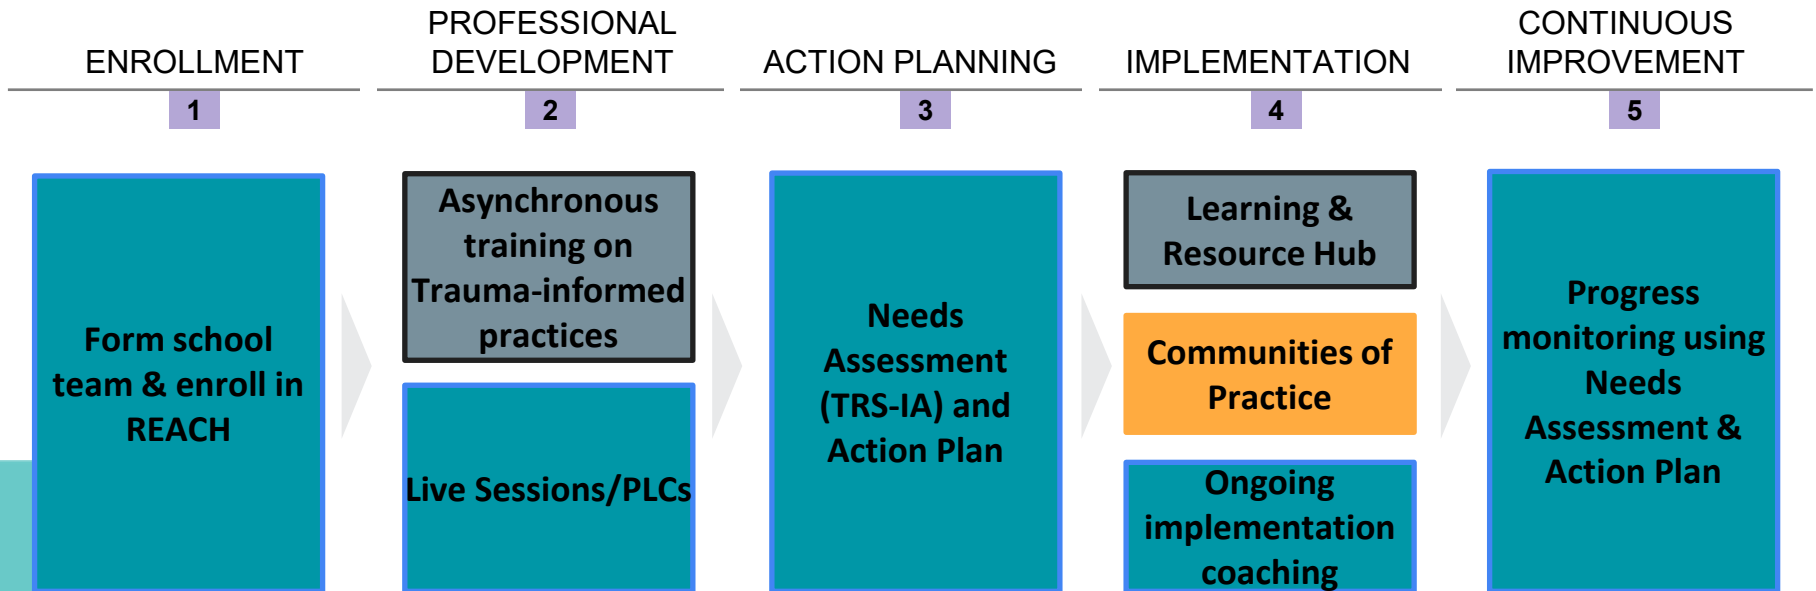

School Nurses are

- In a unique position to provide direct care and build connections with students.
- Among the first school staff to identify potential mental health concerns.
- Well positioned to collect and manage health data, which can include information related to attendance and social determinants of health to help build a complete picture of the student's health needs and inform referrals.
- Key to prevention, early identification, interventions, and referral for students with mental health concerns.
- In need more support to continue serving in these critical roles.

“We had a student whose teacher was concerned about their behavior and mental health. After an initial assessment, I gathered the school's mental health team, connected with the student's parents, and helped the student access crisis support services. On their last day as a senior, the student came into my office and shared a heartfelt thank you for listening to them that day two years ago.”

– Gloria E. Barrera, a school nurse in Illinois

SCHOOLS ILLINOIS

SEL HUBS SERVICE AREAS

Map provided by IARSS

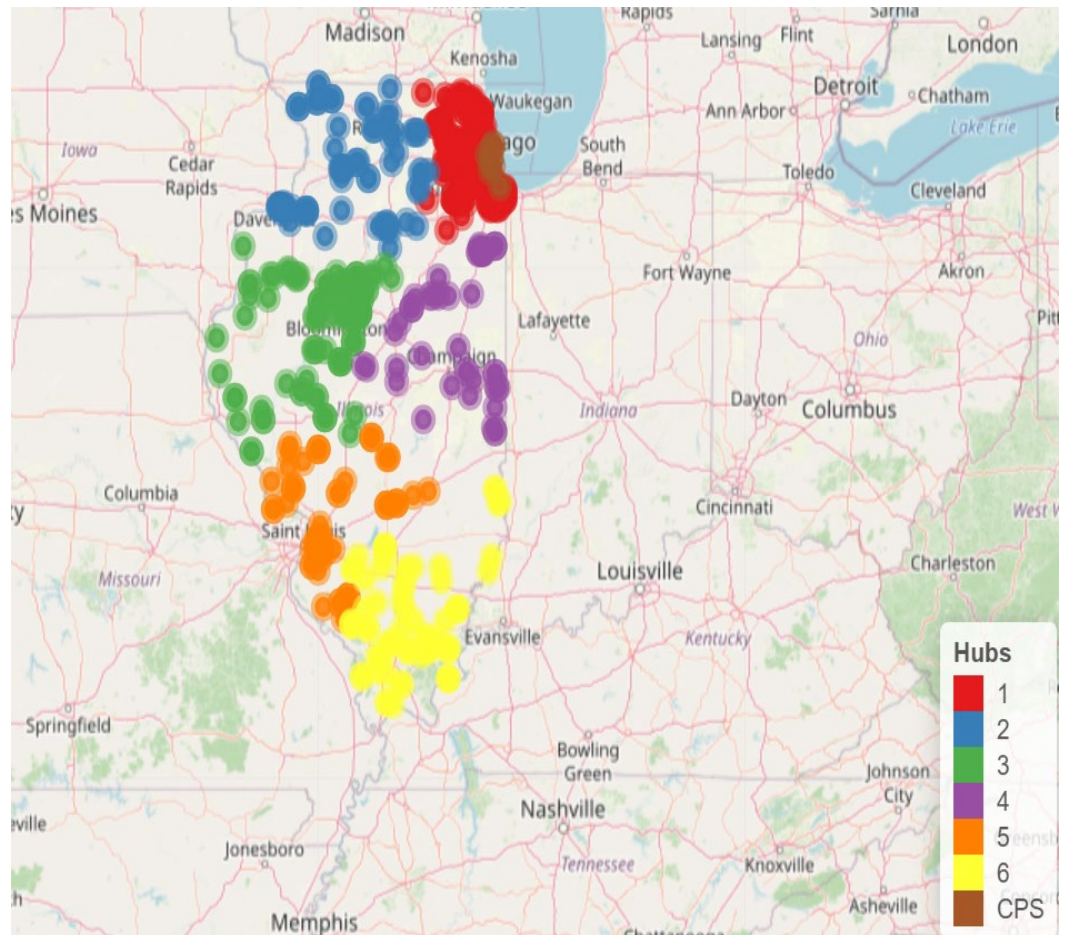

Seven Social-Emotional Learning (SEL) Hubs are housed within six Regional Offices of Education across the state and Chicago Public Schools.

SEL Hubs are providing professional development, training, and support to districts in their region to establish and expand SEL programs in Illinois schools.

They are assisting school-community leadership teams to implement data-driven strategies to address student trauma and mental health needs and build resilient communities.

REACH Team Survey Findings

There was an increase over time in the percentage of survey respondents who agreed that:

Schools were supported in doing the TRS-IA, found it valuable

REACH reduces staff stress, improves students' readiness to learn

Teachers understand and are skilled at trauma-responsive approaches

School leaders prioritize trauma responsiveness

Findings: Trauma Responsiveness

Do schools that participate in REACH become more trauma-responsive?

Time 1 to Time 2 TRS-IA Score Change

Findings: Teacher and Student Outcomes

Schools that participated in REACH had better **teacher retention** than schools that did not participate in REACH.

Students in “very engaged” REACH schools tended to have slightly lower **out of school suspensions** (< 1%) compared to students in REACH schools that were “not yet engaged”

Students in “engaged” REACH schools tended to have lower **chronic absenteeism** rates (2.1 pp ~ 3 days) compared to students in REACH schools that were “not yet engaged”

Center for Childhood
Resilience (CCR)
REACH Learning and
Resource Hub (RLRH).

RSSI and the REACH Process

RSSI helps **guide schools through an evidenced-informed process**, even if they don't have support from a coach.

At the same time, RSSI enables schools to **choose their own path** through the key elements of the process - forming a team, choosing a focus pillar, taking an assessment, and building and implementing a plan

The screenshot shows the RSSI dashboard for a user named Danielle Kasongo. The dashboard is divided into several sections:

- Header:** "Welcome Back, Danielle!"
- Mission:** A section explaining the role of schools in building student resilience and the purpose of RSSI. It includes a video player icon.
- Your School's Journey:** A section with a "Take Guided Walkthrough" link.
- Guided Walkthrough:** A circular diagram showing the six steps of the REACH process:
 1. Build Your Team
 2. Review Your Data
 3. Choose Your Focus Pillar
 4. Take Pillar Assessment
 5. Build Your Plan
 6. Implement Your Plan
- Left Sidebar:** Contains navigation links for Dashboard, School Journey, Resources, Help Center, Contact Support, and Provide Feedback.
- User Profile:** Shows the user's name, Danielle Kasongo.

Making Connections Series

- Bridging the gap between Professional Educators and Child Psychiatrists
 - Supporting Students through 504 plans, IEPs, and Accommodations
 - An Overview of Autism Spectrum Disorder (ASD) and Intellectual Disability
 - ADHD and Accommodations
 - Battling School Avoidance

Suicide Screening, Risk Assessment and Safety Planning

- Screening tools
- Case Simulations on how to detect levels of risk

Case Study: Marquette Elem

- Area 3, District #102
- Introduced to RSSI by SEL Coach
- Team members:
 - principal
 - teachers
 - interventionist
 - special education
 - school social worker
- Required approximately 3 hours
- Appreciated ability to hover over metrics
- Pillar of Choice: SEL
- School-wide assessment tool completion
- Action Plan includes partnership with the Center for Prevention Abuse

Key Activity #1

What activity can help you achieve your goal?*

Review PBIS practices and focus more directly on teaching and rewarding specific expectations

By whom

By when

05/30/2026

What resources, training, or learning modules can help support this key activity?

Zones of Regulation

Why/Try Curriculum

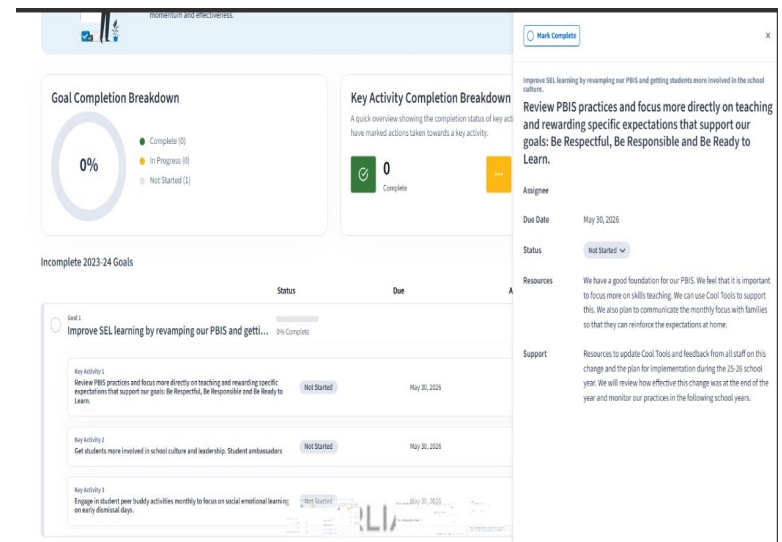

+ Explore resources library

We have a good foundation for our PBIS. We feel that it is important to focus more on skills teaching. We can use Cool Tools to support this. We also plan to communicate the monthly focus with families so that they can reinforce the expectations at home.

What (if any) expenses are associated with executing this action plan and addressing resource inequities? What funding source will cover these expenses?

What support and/or information do you need (from beyond the school leadership team) to implement this activity? How will you get the support and/or information? (e.g., District Office, Special Education)

Resources to update Cool Tools and feedback from all staff on this change and the plan for implementation during the 25-26 school year. We will review how effective this change was at the end of the year and monitor our practices in the following school years.

Poll

Ways to get Involved in RSSI

If you are an Administrator

The RSSI screener survey is available in **IWAS**.

1. To access the survey, click on the system listing link in the left -hand navigation bar, then select RSSI screener survey 2025.
1. After you submit your survey, RSSI will notify you when your data snapshot is ready.
1. Once it's available, you can invite other staff members to RSSI to view the snapshot and assist in developing your action plan

If you are not an Administrator

Check to see if your school has completed a survey.

- If they have, reach out to your administrator and encourage them to invite you to the team
- If they haven't yet, encourage them to complete the survey and invite you to join in.
