

Activity 2.2 Planning Strategies

Activity Preview

The following activity has been developed in conjunction with the learning plan called *Come Together: Strategies for Improving Program Quality through the Incentive Funding Grant*. This activity is supplemental to Module 2. Local Advisory and assesses the following learned skill: *Implement different strategies for assessing program quality given specific quality indicator applications*. In this activity, teachers will review the IFG Planning Guide and model a chosen strategy for a given program.

Directions

1. Review **IFG Planning Guide**  and select one of the listed strategies to model in this activity.
2. Access your most recent IFG Quality Indicator Application [here](#). If new or not able to access your local program's QIA, use an application from someone else in your small group.
3. Discuss your findings with your small group once ready.

Essential Questions

1. How do we determine the best strategy for implementing a plan to improve program quality?
2. How much of this type of review work should be done before, during, or after an advisory meeting?
