- The adjusted cohort graduation rate will be calculated based on SIS data.
- The accuracy of student information reported to SIS is very significant because related information will be derived from such data. The adjusted cohort graduation rate will be calculated based on student enrollments and upon proper identification of Enrollment Exit Codes.
- The **Cohort Enrollment Exit Type Code** is essential in providing an accurate measure of high school graduation data. The Cohort Enrollment Exit Type Code is initially set to the student's general Enrollment Exit Type Code, but it can be updated (as appropriate) through the related online screens.
- **Cohort Enrollment Exit Type Codes** fall into 3 categories (Graduates, Non-Graduates, and "Removed from Cohort") that are used in calculating the adjusted cohort graduation rate.
