

# Homework Help Strategies

School Building and District-Level Administrators

**As the building/district leader, you set the tone for homework expectations in your school. Thus, there are a few things you should consider:**

- 1** Are your grade level teams planning homework together to ensure consistency throughout the school?
- 2** Are teachers providing appropriate resources and instruction for students to complete the homework?
- 3** Is there consistency in time allotment, student effort and grading practices?
- 4** Have you set a clear policy regarding homework with student, family and staff input?
- 5** Are teachers following the board policy and the school policy on homework?
- 6** Have you reviewed your policies yearly to revise for any inequity or researched based updates?
