

Introducing BigFuture School

A new mobile app that delivers scores and planning information right to students' phones.

The Power to Plan—in the Palm of Students' Hands

The SAT® Suite of Assessments is now digital, making the testing experience easier for educators and students.

The digital transition also means students get scores faster and have a new way to access them—through the **BigFuture® School** mobile app. The app is designed to spark students' interest in planning for their future with:

- Easy and direct access to their SAT with Essay and PSAT® 10 scores.
- Customized career information and guidance about planning and paying for college.

What to Expect

The **BigFuture School** app is available to SAT with Essay and PSAT 10 test-takers age 13 and over. Their mobile number will be used for limited purposes: to provide them information on how to download the app, allow them to authenticate into the app, and let them know via text when scores are ready to view in the app from the ISBE-provided spring 2024 administration.

IMPORTANT: Students will have the opportunity to provide their mobile number during the digital readiness check, in preparation for the ISBE-provided spring 2024 administration. Students will not be able to provide a mobile number to access the app after they complete the digital readiness check.

More About SAT Suite Score Insights

Students can access their scores and additional resources through a PDF score report provided by their school.

As always, students age 13 and older may use a personal College Board account at studentscores.collegeboard.org to get additional insights about their scores.
