

## CSCI Sample Report Screenshots

The Comprehensive School Climate Inventory (CSCI) report shows your school's CSCI data represented in various ways. It is important to progress from the overall summary of responses to the subgroup data, followed by the individual survey items. This will allow you to begin peeling back the layers of information.

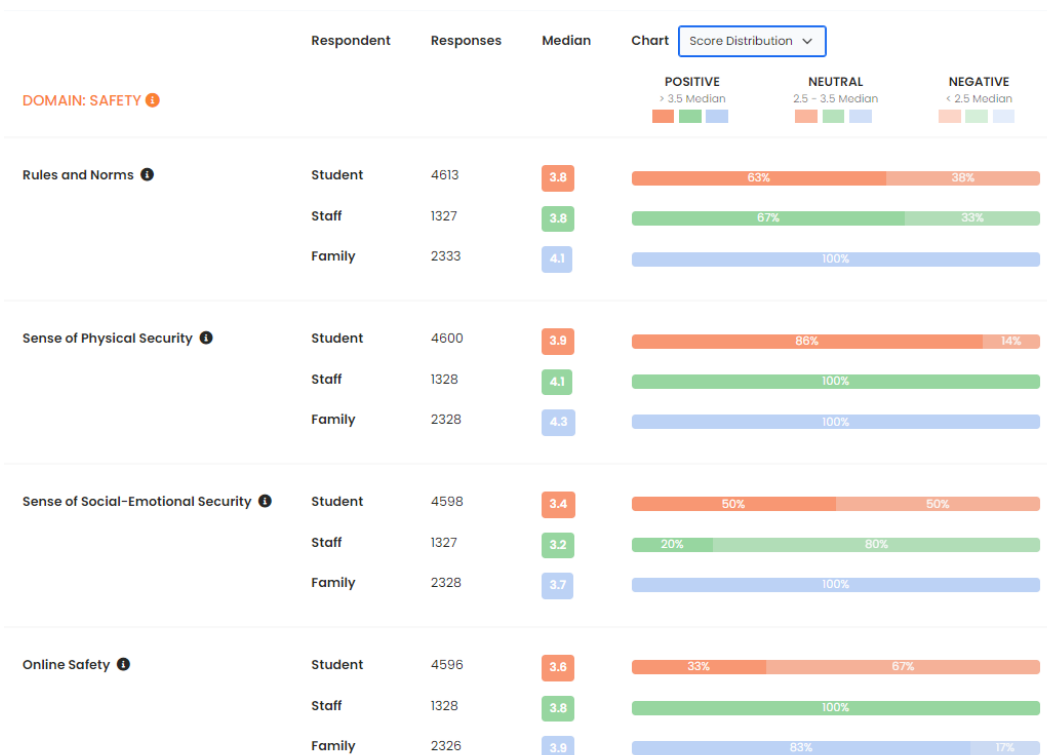

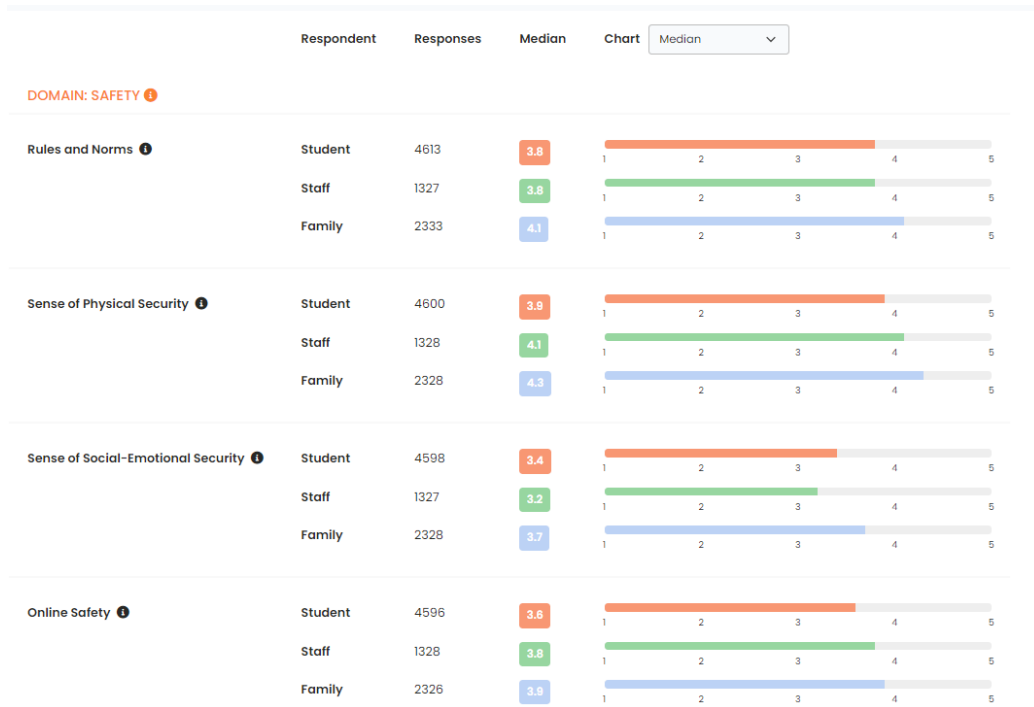

The real value in the data is the degree to which the information becomes a catalyst for discussion and planning for action.

The report will provide you with a snapshot of who –student, staff, and families– responded to the survey. It is important to understand and reflect the perceptions of distinct populations who were surveyed.

### Response Rates

The Domain and Dimension Summary outlines how each population group perceives the 14 dimensions based on the median score of each dimension of school climate. It will also give you an overview of the amount of variation within each group’s perception, ranging from positive, neutral, and negative.

Dive deeper into the data by viewing the subgroups and individual items by using the filter functionality. These filters allow you to see how subgroups experience each school climate dimension and items. The screenshot below shows staff by current role.

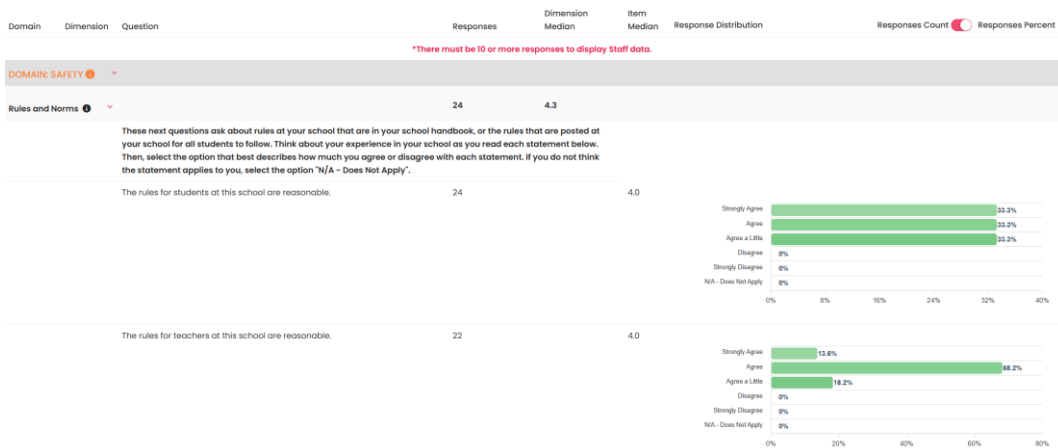

Domain	Dimension	Question	Staff Current Role	Responses	Dimension Median	Item Median	Response Distribution
*There must be 10 or more responses to display Staff data.							
DOMAIN: SAFETY							
Rules and Norms							
			Total	2823	4.0		
			Administrator	71	4.6		
			Educator	1955	3.9		
			Professional Staff	130	4.0		
			Support Staff	402	3.8		
			Other	214	3.6		
			No Response	51	3.3		

The Item Analysis allows you to view how each group responded to the individual survey items. They are grouped by school climate dimensions for you to understand the survey items that make up each dimension of school climate. The full text of the item is provided, along with a chart showing the percentage of respondents from that group who gave each of the five potential responses or did not respond at all.

### Students

Domain	Dimension	Question	Responses	Dimension Median	Item Median	Response Distribution	Responses Count	Responses Percent										
*There must be 10 or more responses to display Student data.
