

Climate Survey Participation – No Changes

1

- **Students Who Participated ÷ Total Students**
 - Student participation only
 - Although the law allows parents to opt students out, low participation itself is indicative of a culture & climate issue, thus opt outs should remain in the denominator
 - Why 95% (which is higher than the state average) & 50%?
 - 95% is a data quality standard for full representation and should be the target, even if it is not yet the state norm
 - 50% is the minimum participation rate to generate reports for 5 Essentials, the survey given in 95% of schools
- **Scoring: [(Survey Participation Rate* (20/9)) – 111.11]**
 - Ceiling of 95%, floor of 50%
