SUMMARY:

Cognia Surveys are designed for an educational institution to gather data on its stakeholders' perceptions, opinions, and overall knowledge of various facets of the institution. Administering the Climate/Culture surveys-student, staff, and parent- fulfills one accreditation requirement for all types of educational institutions: public, school system, private, international, faith-based, early learning centers, corporations, or distance learning. As part of the continuous improvement protocol, Cognia also conducts quality assurance reviews where likeminded professional educators and leaders look at the alignment of schools' processes and programs with Cognia performance standards which encompass the areas of leadership, learning and resource capacity in an effort to recognize schools' improvement efforts and provide valuable feedback for continued growth in student achievement.
