## Computer Science Courses and Assignability Recommendations

The following courses are designated as computer science courses that will satisfy the statutory requirement for all districts to offer at least one computer science course for grades $9-12$ beginning with the 2023-2024 school year. Every high school student must have the opportunity to take at least one computer science course that is aligned to rigorous learning standards of the State Board of Education in accordance with PA 101-0654, which requires ISBE to develop a list of existing course titles that are recommended for computer science.

Virtual computer science courses are offered through the 川linois Virtual Course Catalog (IVCC). Specific IVCC courses that meet ISBE's rigorous computer science learning standards will be designated as such in the course description found on the IVCC webpage.

Please see the ISBE State Course Catalog for a detailed description of each course listed.
The table below is intended to support districts in the identification of appropriately licensed educators to teach computer science courses and can be used as a guide when deciding who can teach different courses. This table indicates the alignment of endorsement type and course description. The alignment to the computer science course descriptions takes into consideration licensure test content and coursework required for the endorsement.

*Educators should have a transcript with at least one course with intensive instruction aligned to the content of the 9-12 computer science course for assignability. This pathway does not have a content area exam and requires 18 semester hours of coursework.
** Educators with a Business, Marketing and Management 5-8 endorsement can apply for approval for a Business, Marketing \& Computer Education 9-12 endorsement. Educators will need to take the content area test for Business, Marketing \& Computer Education.

Educators who hold a valid PEL who are endorsed in a teaching field can also apply for short-term approval if they have one of the following: 9 semester hours of coursework in the applicable content area or a passing score on the applicable content area test.

## Career and Technical Education Courses

The following CTE courses will count as a computer science course that provides an opportunity for every high school student to take at least one computer science course aligned to rigorous learning standards of the State Board of Education in accordance with 105 ILCS 5/2-3.185, which requires ISBE to develop a list of existing course titles that are recommended for computer science. CTE computer science courses have specific rules designating requirements for teachers.

Virtual computer science courses are offered through the $\Perp$ llinois Virtual Course Catalog. Specific IVCC courses that meet ISBE's rigorous computer science learning standards will be designated as such in the course description found on the IVCC webpage.

Please see the ISBE State Course Catalog for a detailed description of each course listed.
