

Illinois State Board of Education

Illinois Early Childhood Outcomes Committee Faculty Newsletter

Volume I: Basics of Early Childhood Outcomes Issue 1

August 2018

The purpose of the Early Childhood Outcomes (ECO) System Stakeholders Committee is to assist the Illinois State Board of Education in the development and enhancement of the Early Childhood Outcomes Measurement System in Illinois. The ECO Faculty Training sub-committee was developed to work towards the goal of increasing knowledge and competencies of both higher education faculty and new graduates in understanding the federal and state ECO requirements.

Goal: Identify the three Early Childhood Outcomes and describe the uses of outcomes measurement.

Video	Description
Why Collect Outcomes Data? (6 min)	This introductory session provides a description of the three child outcomes. It is designed for learners to understand the development and content of the three child outcomes, differentiate among the three child outcomes, and differentiate between functional outcomes and discrete skills.
<u>Video Link:</u> https://unc-fpg-cdi.adobeconnect.com/_a992899727/whycollect/	
<u>Course integration Idea:</u> Ask students to view the video clip and submit a half-page to one-page summary of what the three outcomes are and why it is important to collect data on them.
