Meeting Educational Technology Challenges

August 30, 2017
Agenda

- Welcome
  - Mary Reynolds, Executive Director of Innovation & Secondary Transformation, ISBE
- Building a framework for digital learning
- Expanding reach
- How can we help you?
Educational Technology Framework

- ISBE staff want to work with stakeholders to develop a strategic framework that promotes equitable access and outcomes, digital learning programs, community partnerships, and regional support systems.
- The digital learning framework will drive innovative digital learning practices and optimize learning opportunities for students and educators statewide.
- Projects will capitalize on existing partnerships with state and national resources such as EducationSuperHighway, Future Ready, and #GoOpen.
Expanding Reach

- Statewide activities will include regional training opportunities, district E-rate support, and technical assistance to ensure access to equipment, systems, and infrastructure needed for digital learning.

- Models that support personalized learning will be explored.

- Sharing opportunities will include areas such as student privacy and data security best practices.
How Can We Help You?

- How can educational technology support teaching and learning?
- What services have you received that you want to see continued or discontinued?
- What supports could be added?
Next Steps

- ISBE wants to work with partners and stakeholders to develop a digital learning framework aligned to ESSA and improved learning outcomes.
- Please let us know how we can help support your work.
- Email suggestions and ideas to edtech@isbe.net.
- Email suggestions anonymously to https://goo.gl/1UJWCB.
Thanks for participating!
