Background

What is Ed360?

The Illinois State Board of Education (ISBE) is excited to introduce Ed360, a new statewide dashboard for educators. Using Ed360, educators will be able to view near-real time student data to help them make data-driven instructional decisions. Additionally, Ed360 uses G Suite (formerly Google Apps for Education) and O365 as single sign-on solutions, so there is no need for users to create new login information.

A Brief History of Ed360

Ed360 is an innovative new component of the Illinois Data for Fiscal and Instructional Results, Study, and Transparency (Illinois Data FIRST) Project. Illinois Data FIRST synthesizes a series of connected efforts that enable state policymakers and educators to access information from the Illinois Longitudinal Data System quickly and easily to support and improve state and local resource allocations, instruction, and learner outcomes.

The goal of Ed360 is to provide administrators and teachers with active, live data on student performance to encourage data-driven instructional practice and provide instructional support resources for educators.

Benefits of Using Ed360

Using Illinois' Ed360 helps educators:

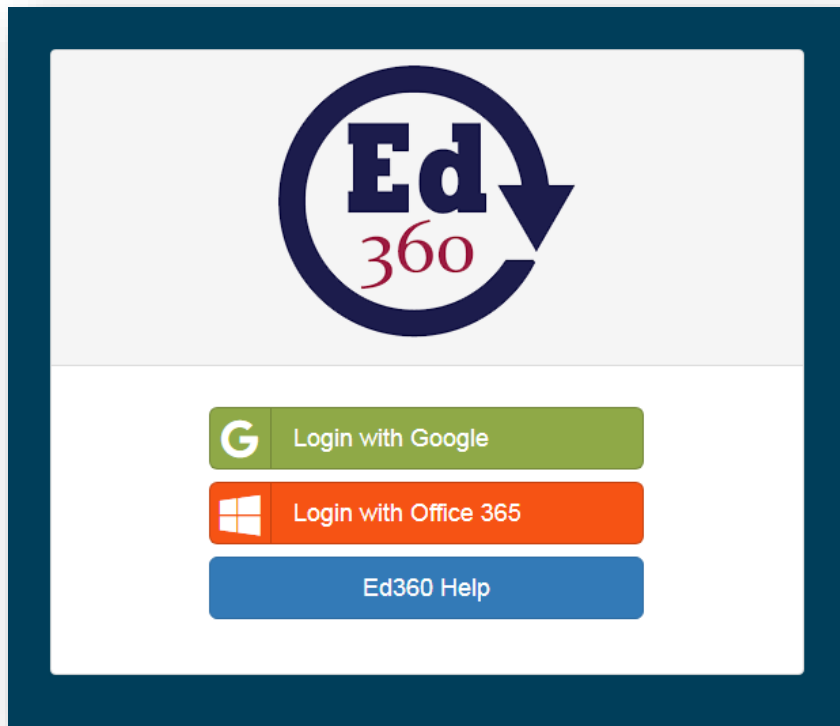

- Identify students' academic strengths and weaknesses
- Identify and address potential recurring impediments to student learning (e.g., problems with attendance or difficulty in mastering prerequisite knowledge or skills) before they negatively affect student success
- Make more informed, data-driven decisions designed to improve student learning
- Increase student achievement and close achievement gaps
- Quickly create targeted differentiation groups and cohorts

When should ROE administrators use Ed360?

- During continuous improvement planning with districts
- To review and evaluate programs
- To analyze strengths and areas in need of support for specific districts and schools

Accessing Ed360

Ed360 is an optional service provided by ISBE. Data from the Employment Information System (EIS) and the Student Information system (SIS) are refreshed nightly, providing near-real time access to important information. As a Regional Office of Education (ROE) Administrator, you have access to Ed360 at <https://ed360.isbe.net> without having to opt in. Your region's District Superintendents have access but need to opt in to provide access to other staff.

Logging in with your usual ROE email and password takes you through the secure connection and lands you on the data dashboard where you can view information related directly to your districts.

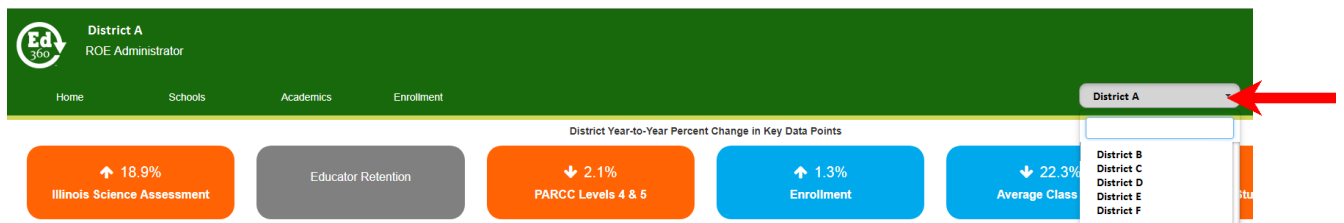

ROE Administrator Dashboard

Navigating through the dashboard is an intuitive process. Some of the main features are highlighted in the next section of this guide. The screenshot of your landing page displays the data elements for a district in your region and specific reference points are highlighted below. This landing page is similar to what a District Administrator views excluding educator- and student-level data.

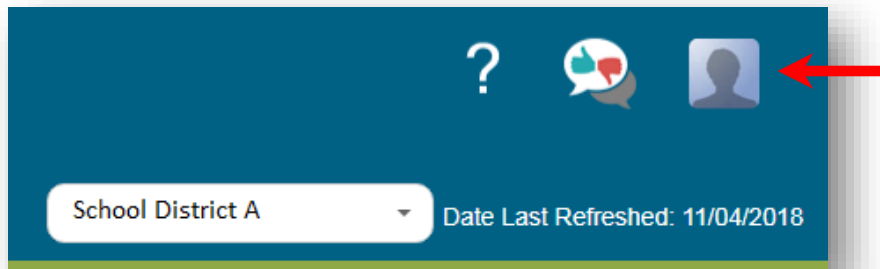

Navigation Toolbar and Special Features

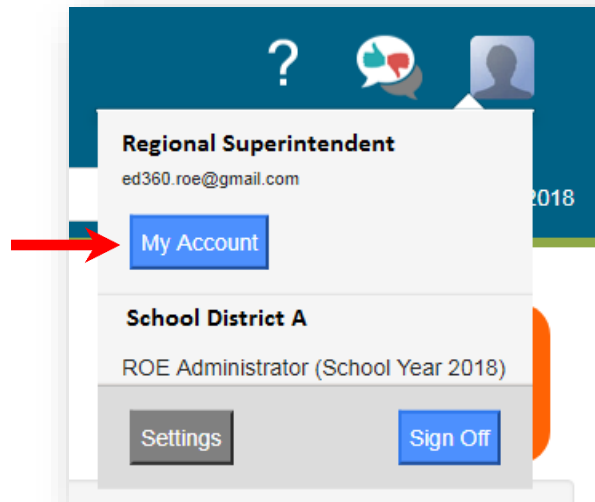

- The Navigation Toolbar includes menus to move through the administrator dashboard.
 - The districts in your region will appear on the lower right-hand side of the Navigation Toolbar of the dashboard by clicking on the white text box.

- Ed360 Toolbar: The icons in the upper right-hand corner of the dashboard, going left to right, provide the capability to find FAQs, provide feedback, and locate your profile. The profile icon is where you will find information about your professional license by selecting the My Account button.
- Click on the profile icon (person silhouette) in the upper right-hand corner of the landing page to view Your Profile and available Options.

- Click on the My Account blue button.

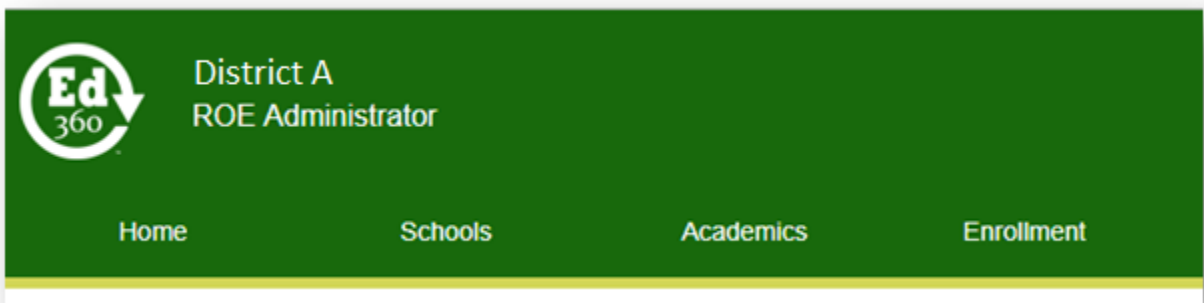

- Click the My Profile tab to view your profile information.

The screenshot shows the Ed 360 District A ROE Administrator interface. At the top, there is a green header with the Ed 360 logo and the text "District A ROE Administrator". Below the header is a navigation menu with links for "Home", "Schools", "Academics", and "Enrollment". The main content area has two tabs: "My Profile" (selected) and "Options". Under the "My Profile" tab, there is a section for "Last name, First name" with a profile picture placeholder, "Gender: Female", and "Race/Ethnicity: White". Below this, there is a prompt to click on links for more detailed information, followed by four buttons: "Licensure and Endorsement", "Years of Experience", "Postsecondary Degrees", and "Professional Development Credits". The "Licensure and Endorsement" button is selected, leading to a table titled "Licensure and Endorsement for Last name, First name".

Code	License	Expire Date	Code	Endorsement
PEL	Professional Educator License	06/30/2021	SCGE	Elementary Education (Self Contained General Education)
PEL	Professional Educator License	06/30/2021	GADM	General Administrative

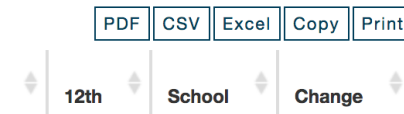

- Click on the Options tab to view available options like the Insider Previewer feature.
- Across the top, there are menus for Home, Schools, Academics, and Enrollment.

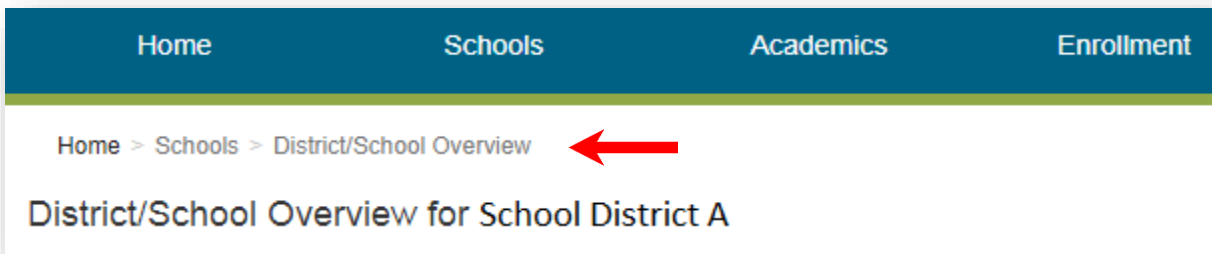

- Exporting and Printing - There are two ways to export and/or print.
 - “Hamburger” Feature - Clicking on the “hamburger” feature in the right-hand corner will allow you to export and print any of the information you see on the screen.

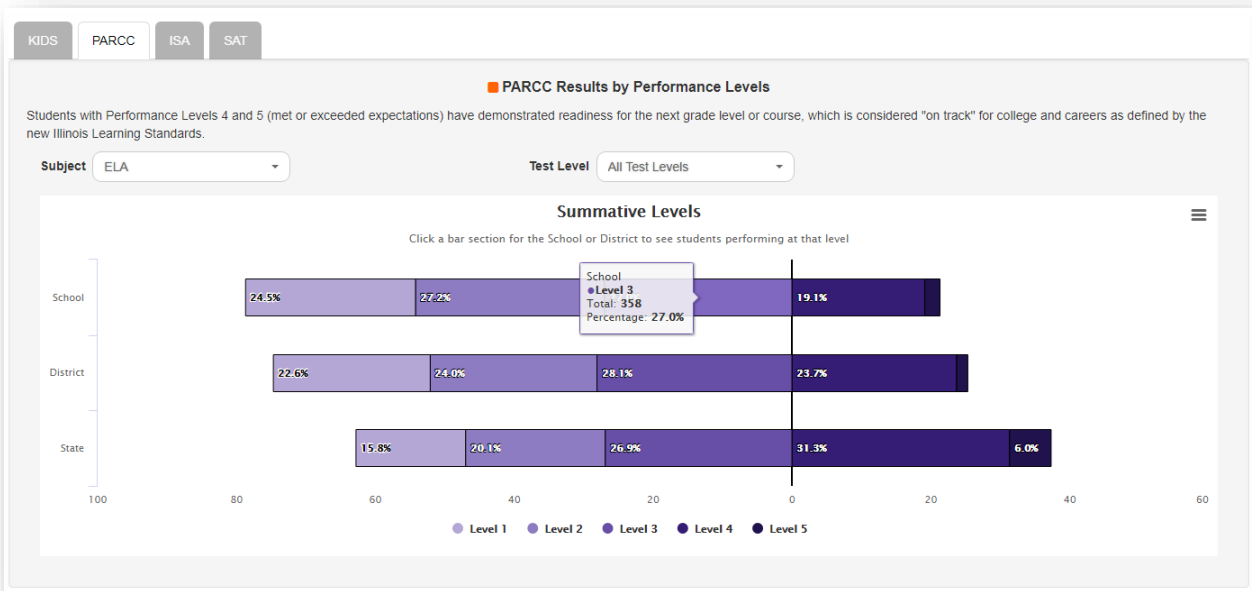

- Export Toolbar - Clicking on one of the export buttons in the upper right-hand corner of a display will allow you to export that information in a specific format and/or print the screen.

- Breadcrumbs - A trail of breadcrumbs can be found in the upper left-hand corner of each page. These breadcrumbs display your trail to the current page you are viewing.

- Hovering over a segment of a chart will highlight additional details.

Home Page

- Key Data Point Tiles
 - The top row of "tiles" provides an overview of the year-to-year percentage change related to key data points. Orange tiles represent previous year's data. Blue tiles represent the current year. Gray tiles are placeholders for future development. Pausing over a tile until the hover hand appears provides a pop-up legend. Clicking on a tile will take you to the report page.

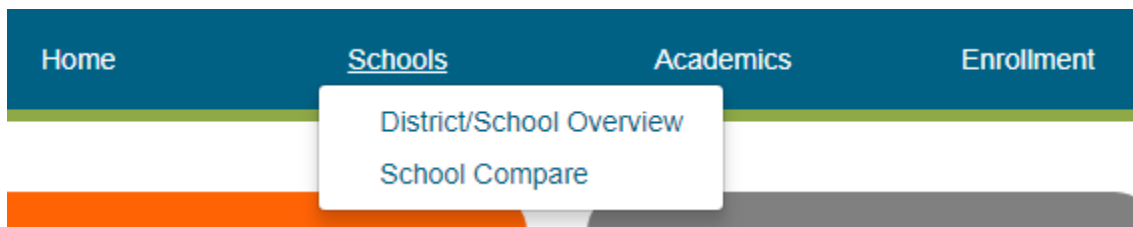

- At-A-Glance Overviews
 - At-a-glance overviews are provided for Student Demographics, Total Enrollment, and Teacher Demographics for the district or school you have selected from the

dropdowns.

Schools

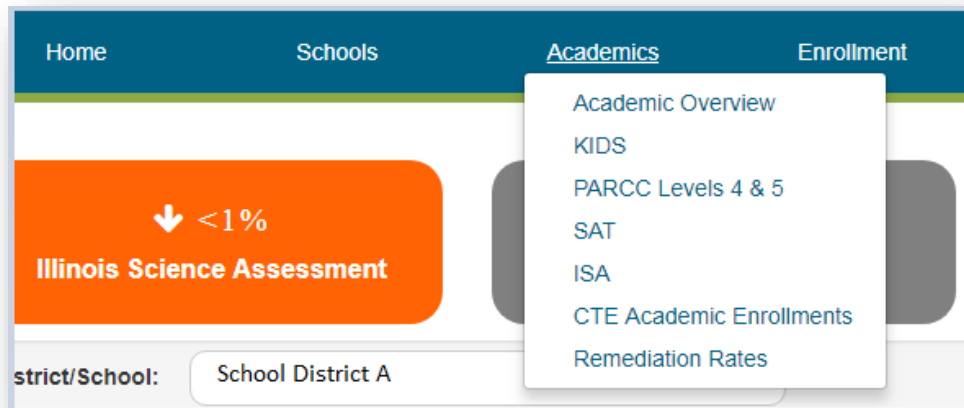

- The Schools menu provides two views: District/School Overview and School Compare.

- The District/School Overview page shows a summary glance on the left and compares the district summative performance levels to state summative levels on the state assessments.
- The School Compare page allows administrators to compare schools within the district or to compare schools with similar schools in the state. It is possible to sort on any column by clicking on the triangles in the upper right-hand corner of the desired column.

Academics

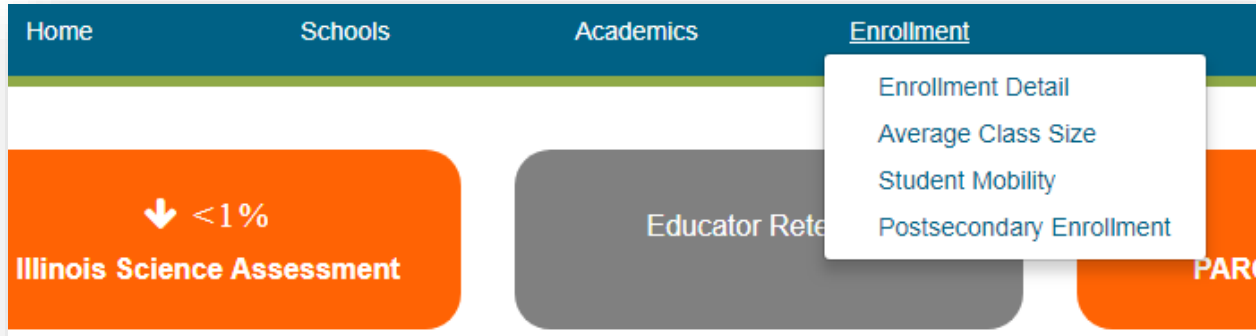

- The Academics menu provides seven options: Academic Overview, KIDS, PARCC Levels 4 & 5, SAT, ISA, Remediation Rates, and CTE Academic Enrollments.

- Academic Overview - This tab compares the state assessment results over time for the district and state. Results may be sorted by tested grade level, demographics, or race/ethnicity.
- KIDS – This tab shows the percentage of students who need additional support and those students who are demonstrating kindergarten readiness as measured by the 14 State Readiness Measures.
- PARCC Levels 4 & 5 - This tab shows the percentage of students who met or exceeded expectations as measured by the PARCC assessment. Column headings represent the grade level of the test taken, not the current grade level of the student.
- SAT - This tab compares the average SAT score for 11th-graders at the district and state levels. Click on the highlighted “More Info...” link to view an explanation of the SAT results.
- ISA – This tab shows the percentage of students who were proficient or were not proficient on the Illinois Science Assessment (ISA).
- CTE Academic Enrollments – This page shows students’ involvement in Career and Technical Education courses throughout high school. The table has an overall count of participants and concentrators based on the accumulation of CTE credits, as of the end of the prior year, for students currently enrolled in high school.
- Remediation Rates - This page provides a postsecondary report that shows the percentage of a graduating class of district students attending community college who enroll in remedial courses in math, reading, and communications.

Enrollment

- The Enrollment menu provides four options: Enrollment Detail, Average Class Size, Student Mobility, and Postsecondary Enrollment.

- Enrollment Detail - This page shows details for School level counts for the current school year based on current enrollment and exit dates reported for individual students in SIS.
- Average Class Size - The average class size data reported in this view includes only core subject courses (e.g., no PE, band, art, self-contained special education). It is possible to see average class size for each grade and for the high school level, the percentage change over time, and the school and district averages.
- Student Mobility - This page shows details for School level counts for the previous school year based on current enrollment and exit dates reported for individual students in SIS.
- Postsecondary Enrollment – This page provides postsecondary enrollment trends.
