Household Income Criteria Matrix and Overview

The purpose of the Household Income Criteria Matrix below is to help determine which income criteria is appropriate for Programs added to a Pre-K student's Early Childhood record based on the values for the Homeless indictor, Family Structure indicator, and IDEA Services indicator.

When the Homeless indicator value is "No" AND the Family Structure indicator value is not "Youth in Care", not all the available income criteria values are acceptable for all Early Childhood Programs, as indicated below:

- If the IDEA Services indicator value is "No", then the income criteria value of "Did not collect" is not acceptable for the "Preschool for All" program or the "Preschool for All Expansion" program.
- Regardless of the value for the IDEA Services indicator, the income criteria value of "Did not collect" is not acceptable for the "Head Start" program.

When either the Homeless indicator value is "Yes" OR the Family Structure indicator value is "Youth in Care", any of the available income criteria values are acceptable for any Early Childhood Program. This is true regardless of the value for the IDEA Services indicator.
