

# Every Student Succeeds Act (“ESSA”) Required Site-Based Expenditure Reporting

## *Guidance Released!*

Beginning with 2018-19 school year data, all Illinois school districts will report per-pupil expenditure data at the school-level (including allocation of central services), disaggregated by source of funds. Guidance for completing this reporting has recently been released.

The newly released guidance answers the following key questions:

- Which entities must report?
- What does the reporting look like?
- What expenditures must be included / should be excluded?
- What student count should be used? Are there any exceptions?
- How do we handle special circumstances, such as students educated outside the district or in charter schools?
- What are alternatives and recommendations for handling centralized expenditures?

ISBE will be hosting an informational webinar for Superintendents and their teams on the guidance for Site-Based Expenditure Reporting:

**Friday, February 2, 1-2:30 p.m.**

**Register at: <http://isbe.site/reporting>**
