The Infant Meal Pattern lists the food to be offered infants from birth through 11 months. The infant meal must contain each of the following components in the amounts indicated for the appropriate age group in order to qualify for reimbursement.

Child care institutions and family day care home providers should:

- Work closely with parents to decide what foods to serve infants.
- Offer food with texture and consistency appropriate for the development of the infant.
- Serve food during times consistent with the infant's eating habits. For example, lunch components may be served at two feedings between noon and 2 p.m.
- Solid foods are introduced at 6 months or when developmentally appropriate for the infant. The provider should work with the parent to determine when solid foods should be served.
