Kindergarten Individual Development Survey

USER’S GUIDE & INSTRUMENT

Kindergarten Individual Development Survey
Every Illinois Child Ready for Kindergarten

Illinois State Board of Education
The Desired Results Developmental Profile–Kindergarten (2015) for the Kindergarten Individual Development Survey© [KIDS (2015)©] was developed by the California Department of Education with additional enhancements created in collaboration with the Illinois State Board of Education. KIDS (2015) builds upon the progression for most measures of the DRDP–K (2015): A Developmental Continuum from Early Infancy up to Kindergarten Entry©. Two divisions of the California Department of Education jointly developed the DRDP (2015): the Early Education and Support Division (EESD) and the Special Education Division (SED). Lead agencies that participated in the development of the instrument include the WestEd Center for Child and Family Studies, the Napa County Office of Education, and the Berkeley Evaluation and Assessment Research (BEAR) Center at the University of California, Berkeley.

The complete KIDS (2015) instrument is available on the ISBE website at www.isbe.net

Welcome to the Kindergarten Individual Development Survey [KIDS (2015)]. KIDS (2015) is an assessment instrument designed for teachers to observe, document, and reflect on the learning, development, and progress of all children during the kindergarten year. KIDS (2015) was developed by the California Department of Education with additional enhancements created in collaboration with the Illinois State Board of Education.

Introduction to KIDS (2015)

The User’s Guide will assist teachers and administrators to:

- Observe, document, and reflect upon children’s development
- Use KIDS (2015) to plan curriculum for individual children and groups of children and to enhance classroom practices
- Share information about children’s progress in various learning and development domains with families

The User’s Guide is divided into three sections:

1. The 3 Views of the KIDS Instrument — Provides a general description of the measures
2. The 3 Steps to Completing KIDS (2015) — Provides detailed instructions on how to complete the assessment instrument
3. Using Information from the KIDS (2015) — Describes ways to use information from the assessment instrument

Key features of KIDS (2015) are described below.

Key Features of KIDS (2015)

- KIDS (2015) is administered through observation in natural settings either through teacher observations, family observations, or examples of children’s work. This is a recommended practice for early childhood assessment that includes ongoing documentation of children’s behavior in natural environments.

- KIDS (2015) represents a full continuum assessment instrument for all children in kindergarten, including children with Individualized Education Programs (IEPs).

- KIDS (2015) takes into consideration the specific cultural and linguistic characteristics of the diverse population of children enrolled in kindergarten, including dual language learners (see section below).

Information about Selected Key Features

The Kindergarten Individual Development Survey (KIDS) is an observational tool designed to help teachers, administrators, families and policymakers better understand the developmental readiness of children entering kindergarten. KIDS is aligned to the Illinois Early Learning and Development Standards (IELDS) and Illinois Early Learning Standards–Kindergarten (IELS-K). IELDS are the state’s expectations for children’s learning and development at kindergarten entry. IELS-K are the state’s expectations for children’s learning and development at the end of kindergarten. The 14 state readiness measures represent as sampling of key areas that kindergarten teachers routinely identify as key to children’s success in kindergarten.

Two of the key features that make up the instrument are described in more detail to help teachers better understand and rate the measures of KIDS (2015):

1. Consideration of children who are dual language learners
2. Detailed descriptions of the developmental domains

Dual Language Learners and KIDS (2015)

- Dual language learners are children learning two or more languages at the same time, as well as those learning a second language while continuing to develop their first (or home) language. English learner (EL) or English language learner (ELL) are other terms often used to describe dual language learners whose home language is a language other than English. A child’s experience with one or more languages is an asset to build on in the early childhood setting.

- It is critical to consider the child’s communication in all the languages that he or she is learning to have an accurate picture of a child’s knowledge and skills. Children, including those with disabilities, can successfully learn two or more languages. Learning two or more languages has linguistic, social, cognitive, academic, and cultural benefits. The path to learning one language shares many similarities with the path to learning two or more languages.

- There are also differences that must be taken into consideration when assessing children who are dual language learners. Children may have vocabulary for concepts in one language and vocabulary for other concepts in another language; so it is important to assess children in all of the languages that he or she understands and uses.

- Primarily, KIDS (2015) addresses cultural and linguistic responsiveness in three ways:
  1. Teachers observe and document children’s behavior in both the home language and English to obtain a more accurate profile of the children’s knowledge and skills across developmental domains.
  2. Teachers in a general education class rate children’s progress on two language and literacy development domains. The Language and Literacy Development (LLD) domain assesses all children’s progress in developing foundational
language and literacy skills. The English-Language Development (ELD) domain assesses progress in learning to communicate in English.

3. Teachers in a Spanish-English bilingual education program (e.g., dual language, transitional bilingual education) rate children’s progress on an additional language and literacy development domain that assesses progress in learning to communicate in Spanish: Language and Literacy Development in Spanish (SPAN).

The Three Views of KIDS (2015):
The Kindergarten Individual Development Survey (KIDS) is an observational tool designed for teachers to observe, document, and reflect on the learning, development, and progress of all children during the kindergarten year. KIDS encompasses all eleven domains and provides the opportunity to collect comprehensive data on whole-child development.

There are three different views of the KIDS instrument that are available.

1. 14 State Readiness Measures (required),
2. 5 Aligned Domains of School Readiness (29 measures), and
3. 11 Domains of Readiness representing full alignment to Illinois content standards (55 measures)

Teachers, schools, or districts may optionally choose for teachers to complete one or more full domains from either the “5 Aligned Domains” or “11 Domains” views of the instrument. Each view provides valuable feedback on individual and group student developmental progress and school readiness through measurement of knowledge, skills and behaviors. However, the more data that are collected through the in-depth versions of the survey, the more robust and informative the available reports will be to teachers, classroom, building, and district.

Both the Five Domains of Readiness and the Comprehensive view can be used as a formative assessment for teachers, schools, and districts and as a summative assessment rolled up to the state level. Within a developmental domain, reliable data exists for every measure. Teachers can use the data to plan for the class and support the child’s learning and development regardless of their level. The 14 State Readiness Measures View provides teachers with raw data for individual children and group data to inform their instruction on discreet skills at the beginning of the school year.

The KIDS 14 State Readiness Measures provide common indicators that can be used in all districts throughout Illinois. The primary value of statewide indicators is for common assessment of children’s readiness that is collected via the same rubric for all kindergarten children across the state. Looking at trends across the state within a given year, as well as how the trends change across years, will help the ISBE understand where children, schools, and districts may benefit from additional support in specific areas of development. This information can also guide the provision of additional strengths-based support for children and teachers from school and district-level administrators.

14 State Readiness Measures:
The Illinois State Board of Education (ISBE) requires all kindergarten classes to administer the 14 State Readiness Measures from the KIDS (2015) instrument during the first 40 days of school attendance (Data Entry Period 1).

14 State Readiness Measures expand across four domains: 1) Approaches to Learning - Self-Regulation (ATL-REG) 2) Social Emotional Development (SED), 3) Language and Literacy Skills (LLD) and 4) Cognition MATH (COG: Math). These readiness indicators measure those key knowledge, skills, and behaviors that are most predictive of later school success. State school readiness data provides teachers, parents and administrators with information about individual children and groups and where they fall within the range of developmental progressions for these 14 State Readiness Measures.

Ratings entered for the 14 State Readiness Measures reports can be accessed by teachers for individual students and for groups within their classroom. Individual student reports indicate where students fall on the developmental progression for each specific measure. Group summary reports indicating children's progress along the developmental progressions for the specific measures can be generated by percent and by count.

At the district level, the data for the 14 State Readiness Measures will result in three subset scores (ATL-REG and SED, LLD and COG: MATH). These data will also be rolled up to the state. A report showing the aggregated data of kindergarten readiness would be available at the state level.

The 5 Domains of Readiness:

The Five Domains of Readiness identify the essential domains of school readiness:
1) Approaches to Learning–Self-Regulation (ATL-REG), 2) Social Emotional Development (SED), 3) Language and Literacy Skills (LLD), 4) Cognition MATH (COG: MATH), and 5) Physical Development (PD). By entering ratings for all measures in the 5 Domains of Readiness, KIDS provides enough information for teachers to plan for the class and support the child's learning and development regardless of their level. Research shows that children who acquire these readiness skills have not only the foundations for school success but also later college and career readiness upon graduation.

Ratings for the Five Domains of Readiness can be entered during the 40th day of attendance (Data Entry Period 1), the 105th day of attendance (Data Entry Period 2), and the 170th day of attendance (Data Entry Period 3). After the ratings are entered for the Five Domains of Readiness, individual and group student reports can be generated by teachers for their own classroom. Individual student reports will show students' progress on the developmental progression for each domain.

A variety of scale reports will also be available for an individual child and for groups of children. These reports include Developmental Profile by Domain, Developmental Progress Over Time (after multiple rating periods), Group Difference Over Time (after multiple rating periods), Developmental Status and Scale Levels. Each child's progress across domains provides the child's overall learning and developmental profile.

KIDS (2015) is made up of eleven domains. The focus of each domain is on the acquisition of knowledge, skills, or behaviors that reflect each domain's developmental constructs. Because there are multiple measures for each domain, a completed KIDS (2015) instrument provides enough information to support assessment along a developmental continuum. A child's learning and development across domains provides the child's overall learning and developmental profile.

- The Approaches to Learning–Self-Regulation (ATL-REG) domain assesses two interrelated areas that are recognized as important for children's school readiness and success. Approaches to learning and self-regulation have been combined into one assessment domain because of the strong connections between these two areas of development. The approaches to learning skills include engagement and persistence and curiosity and initiative. The self-regulation skills include self-control of feelings and behavior and shared use of space and materials.
- The Social and Emotional Development (SED) domain assesses children's developing abilities to understand and interact with others and to form positive relationships with nurturing adults and their peers. The knowledge or skill areas in this domain include identity of self in relation to others, social and emotional understanding, relationships and social interactions with familiar adults, relationships and social interactions with peers, and symbolic and sociodramatic play.
- The Language and Literacy Development (LLD) domain assesses the progress of all children in developing foundational language and literacy skills. These skills can be demonstrated in any language and in any mode of communication. The LLD measures should be completed for all children, including those who are dual language learners. Language and literacy skills in a child's first language form the foundation for learning English. Therefore, dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages.
- The English-Language Development (ELD) domain assesses dual language learners' progress in learning to communicate in English. The developmental progression described in the four ELD measures is related to the child's experiences with English, not the child's age. Keep in mind that children acquire English in different ways and at different rates. Factors that affect English acquisition include degree of exposure to English, level of support provided in their home language, and the child's motivation to learn English.
- The Language and Literacy Development in Spanish (SPAN) domain assesses children's progress in learning to communicate in Spanish. The developmental progression described in the four SPAN measures is related to the child's experiences with Spanish as part of the kindergarten curriculum, not the child's age. Keep in mind that various factors affect a child's acquisition of Spanish, including degree of exposure to Spanish and a child's motivation to learn Spanish.

The LLD measures should be completed for all children, including those who are dual language learners.

The ELD measures should only be completed for children whose home language is other than English.

The SPAN measures should be completed for children who are in a kindergarten class where the curriculum provides opportunities for learning and development of Spanish.
• The Cognition: Math (COG: MATH) and Cognition: Science (COG: SCI) domains focus on observation, exploration of people and objects, and investigation of objects and concepts. The COG: MATH domain includes the following knowledge or skill areas: classification, number sense of quantity, number sense of math operations, measurement, patterning, and shapes. The COG: SCI domain includes the following knowledge or skill areas: cause and effect, inquiry through observation and investigation, documentation and communication of inquiry, and knowledge of the natural world.

• The Physical Development (PD) and Health (HLTH) domains assess motor development and the development of routines related to personal care, safety, and nutrition. The PD domain includes the following knowledge or skill areas: Perceptual-motor skills and movement concepts, gross locomotor movement skills, gross motor manipulative skills, and fine motor manipulative skills. The HLTH domain includes the following knowledge or skills areas: active physical play, nutrition, safety, personal care routines, and knowledge of wellness.

• The History–Social Science (HSS) domain focuses on learning about the expectations of social situations, how to participate within a group, and the relationship between people and the environment in which they live. The knowledge or skill areas in this domain include sense of time, sense of place, ecology, conflict negotiation, and responsible conduct.

• The Visual and Performing Arts (VPA) domain focuses on awareness and engagement in four areas of artistic expression. The knowledge or skill areas in this domain include visual art, music, drama, and dance.

Ratings for the Comprehensive View can also be entered during the 40th day of attendance (Data Entry Period 1), the 105th day of attendance (Data Entry Period 2) and 170th day of attendance (Data Entry Period 3). After each rating period, reports can be generated by teachers for individual students and for groups within their classrooms. A variety of scale reports will also be available for an individual child and for groups of children. These reports include Developmental Profile by Domain, Developmental Progress Over Time (after multiple rating periods), Group Difference Over Time (after multiple rating periods), Developmental Status and Scale Levels. Each child's progress across domains provides the child's overall learning and developmental profile.

About the Developmental Levels of KIDS (2015)
The number of levels in a measure varies depending on the competencies that are appropriate for that measure's developmental continuum. The levels are organized under two categories that reflect a developmental continuum for the kindergarten year. All but two domains, ELD and SPAN, include six developmental levels. ATL–REG, SED, LLD, COG: MATH, COG: SCI, PD, HLTH, HSS, and VPA include the following developmental levels:

| Building (Earlier, Middle, Later) | Knowledge, skills, or behaviors that demonstrate growing understanding of how people and objects relate to one another, how to investigate ideas, and how things work. Children use language to express thoughts and feelings, to learn specific early literacy and numeracy skills, and to increasingly participate in small group interactions and cooperative activities with others. |
| Integrating (Earlier, Middle, Later) | Knowledge, skills, or behaviors that demonstrate the increasing ability to connect and combine strategies in order to express, interpret, and explain complex thoughts and feelings, solve multi-step problems through systematic investigation and application of abstract ideas, and participate in a wide range of activities that involve social-emotional, self-regulatory, cognitive, linguistic, and physical skills. Children build their capacity to engage in mutually supportive relationships and interactions. |

Be sure to note that the developmental levels for the ELD and SPAN domains are different from the above format. The levels in the ELD domain represent the developmental progression for the acquisition of English as a second language. The levels in the SPAN domain represent the developmental progression for the acquisition of Spanish in the context of a kindergarten class where the curriculum provides opportunities for learning and development of Spanish.
Definitions of Terms in the Navigation Maps:

**Developmental Domain:** A crucial area of learning and development for children.

**Measure:** The developmental continuum along which a child’s observed behavior is assessed. Measures are the individual assessment items in KIDS.

**Definition:** Specifies the aspects of development to be observed.

**Developmental Level:** A point along a developmental progression for a particular measure that ranges from earlier to later levels of development.

**Descriptor:** A description that defines the behaviors that would be observed for a child at that developmental level.

**Example:** Specific behaviors you might see that would demonstrate that a child has reached mastery of a particular developmental level. Note that the examples provided in KIDS are not the only way a child can demonstrate mastery of a developmental level.
The 3 Steps to Completing KIDS (2015)

Before You Begin

Your knowledge of the KIDS (2015) instrument, and in particular the content related to the sequences of development, should guide your observations:

- Read and become familiar with all the domains and measures in KIDS (2015).
- Discuss strategies for using the KIDS (2015) instrument with the other teachers and administrators at your school.

If a child comes from a home where a language other than English is spoken and the teacher does not speak the child’s home language, recommended best practices include using an adult who speaks the child’s home language to assist the teacher with observation and documentation of the child. This may be another teacher, an assistant teacher, principal, parent, or other adult who knows the child.

Step 1: Observation and Documentation

Observations should occur over time, in typical settings:

- In the child’s typical settings such as the kindergarten classroom or home
- As the child interacts in familiar environments and routines with people he or she knows
- As the child engages in typical activities and routines

Be sure to prepare and plan for observation and documentation.

While observing and collecting documentation, remember that words, phrases, and sentences can be communicated and understood in a variety of ways; this includes communication spoken in the child’s home language, signed, or given through other communication modes (e.g., communication device). The teacher’s direct observations of a child are the primary method used to inform ratings. The teacher should also use other sources of evidence to capture a more complete picture of a child’s knowledge and skills. Other sources of evidence include the following:

- **Observations by others**—including teachers, family members/caregivers, and other service providers, obtained through interviews or conversations
- **Other documentation**—including samples of children’s work, photographs, and video/audio recordings of children’s communication and behavior

Tips for Documenting Children’s Development:

- Consider ways to document children’s behavior throughout the day.
- Use a variety of documenting techniques. Documentation may include anecdotal notes, photographs, audio or video documentation, and work samples.
- Label each piece of evidence with the date and the child’s name.
- Set aside time on a regular basis to organize documentation records and other forms of evidence.
- Consider using portfolios to keep documentation organized. Store portfolios in a secure place and accessible place.
- Use the results of other assessments of children’s learning and development to help complete KIDS (2015).

The following materials may be helpful for observing and documenting:

- Sticky notes
- Pre-printed labels with child’s name
- Charts
- Checklists or worksheets
- Clipboard, paper, pens, and pencils
- Photo/video camera
- Voice recorder

The Important Role of Families in the Documentation Process

Family members have repeated opportunities to observe their child’s activities and interactions over time and in a range of situations. Their perspectives, combined with teachers’ and service providers’ observations, help teachers arrive at a more complete and reliable picture of a child’s typical behaviors across settings. Inviting family members to share observations of their child’s development and behavior is recommended practice for KIDS (2015).

The opportunity to observe a child’s level of mastery is greatest when the child is interacting with a familiar adult. Because of this, it is helpful to observe children interacting with family members. These observations can inform assessment decisions for all domains. They are particularly important for the SED and LLD domains since social interaction and communication skills are learned through repeated interactions with familiar adults.
What is Mastery?
A developmental level is mastered if the child demonstrates the knowledge, behaviors, and skills defined at that level:

- Consistently over time
- In different situations or settings

Important notes about mastery:
- Children may demonstrate mastery of knowledge and skills through a variety of communication modes, languages, and behaviors.
- Many of the behaviors that you observe in determining a child’s mastery level may not appear on the list of examples, although they are consistent with the descriptor.

Dual Language Learners’ Use of Code Switching:

- Code switching is the use of multiple languages within a single conversation. It is a typical feature of learning two or more languages.
- As early as three years of age, children code switch to playfully experiment with the two languages and to serve their own social and communication goals. For example, children may code switch to emphasize or elaborate a point.
- Children might code switch when speaking with one person, or may use one language exclusively with one person and another language with another person.
- When children mix their two languages, they use the grammatical rules of each language. “I want leche” [“I want milk” in English] is an example of inserting a Spanish noun into a grammatically correct English sentence. “¡And then el niño se cayó!” [“And then the boy fell down” in English] is an example of using English linking words within a Spanish sentence.
- Code switching is a strategy used by children learning more than language.

The Descriptors and Examples
Consider the descriptors and then the examples to determine which developmental level is most consistent with your observations and other documentation of the child’s typical behavior. A child may demonstrate behaviors at more than one developmental level. Choose the level that most closely represents the knowledge, skills, or behaviors the child is demonstrating most consistently.

Descriptors:
The descriptors define the knowledge, skills, or behaviors expected at each level along the developmental continuum of the measure (see Navigation Map). Each descriptor is illustrated by several examples of behaviors that are consistent with that developmental level.

Most of the descriptors define discrete knowledge, skills, or behaviors. However, some of the descriptors include more than one behavior or skill, separated by “or” or a semicolon (;

Determining the Child’s Latest Level of Mastery
For each of the measures, determine the latest developmental level the child has mastered and mark it appropriately. All ratings will be entered into KIDStech®, the KIDS (2015) online system. Ratings may be entered directly into KidStech or recorded on the KIDS (2015) Rating Record and then entered into KidStech.

Step 2: Rating the Measures

The teacher who is collecting documentation should speak the child’s home language. If not, the teacher should receive assistance from another adult who does speak the child’s home language. This may be an assistant teacher, director, parent, or other adult who knows the child.

©2017 California Department of Education, with additional enhancements created in collaboration with the Illinois State Board of Education
Review and Reflect:

- It is a good idea to have a system to keep track of documentation to ensure a complete picture of the child. Halfway through the documentation period, check the measures of the KIDS (2015) instrument for which you have documentation. Plan to observe the child at times when the remaining measures can be documented.
- During the rating period, review the observations and documentation of the child's development collected (portfolio with work samples, anecdotal comments, photographs, video, other learning and development assessments, etc.). Reflect on what the evidence reveals about the child's development across the domains and measures of the KIDS (2015) instrument.
- If the documentation does not provide a clear picture of the child's development in one or more areas, determine how to gather additional evidence. Plan other opportunities to observe the child's behavior. Speak again with family members, staff, and others who know this child to ensure that you have the most complete and accurate picture of the child's skills and abilities.

If the descriptor says “or”:
The child only needs to demonstrate the behavior in one of the listed ways to demonstrate mastery for the developmental level. Either part of the descriptor may be observed to rate mastery at that level.

An example is the level descriptor for Building Earlier in the LLD 5: Interest in Literacy measure:

- Looks at books page by page
- or
- Participates, from beginning to end, in listening to stories, singing songs, or playing rhyming games, when supported by an adult

If the child EITHER looks at books page by page briefly OR participates, from beginning to end, in listening to stories, singing songs, or playing rhyming games, when supported by an adult, mastery can be rated at this level.

If a descriptor includes a semi-colon (;) followed by “and”:
The child must demonstrate all the behaviors listed to rate the level as mastered, but not necessarily during the same observation within a KIDS rating period.

An example is the level descriptor for Integrating Middle in the LLD8: Phonological Awareness measure:

- Matches initial and final sounds of words;
- and
- Segments and blends initial and final phonemes of words

To be rated as mastered at this level, the child must BOTH match initial and final sounds of words AND segment and blend initial and final phonemes of words, although the teacher does not have to observe both behaviors during the same observation. However, the teacher does have to observe both within a KIDS rating period.

Please note that key terms and phrases in the descriptors that may be new to the teacher or have specific meaning to the measures are defined in the glossary at the end of the instrument.

Examples:

Important points about examples:

- The examples are not a checklist of what the child must demonstrate to be rated at mastery of the knowledge, skills, or behaviors that reflect a developmental level.
- An example is one of many possible ways a child might demonstrate mastery of a developmental level. Teachers will identify other examples as they conduct their observations.
- Mastery is determined over time and across situations or settings.
- A child may not demonstrate any of the specific examples provided for a developmental level, but may demonstrate mastery in other ways that are consistent with the intent of the descriptor.
- Children demonstrate mastery in diverse and sometimes unique ways.

Additional Rating Options

Emerging to the Next Developmental Level:

If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level:

- First, mark the developmental level the child has mastered.
- Then, mark “emerging” if the child also demonstrates behaviors described for the next developmental level.

Notes about Emerging:

- Do not mark emerging if the child has mastered the last level on a measure or if the child does not yet demonstrate mastery of the earliest level.
- Marking that the child is emerging to the next level does not affect the rating of mastery for the measure.

Unable to Rate: In the rare instance that you are unable to rate a specific measure, ISBE has established KIDS Student Exemption Reason Codes. Student Exemptions are not applied through KIDStech, but submitted to ISBE separately AFTER KIDStech is closed. Superintendents and Principals receive information on Student Exemption Reason Codes after each fall rating period.
Step 3: Finalize the Assessment

To finalize, simply review the assessment to make sure that:

- You have entered a level rating for all required measures of KIDS (2015) into KIDStech. KIDStech will provide prompts to complete any missing information.
- The Information Page is complete and up-to-date.

Using Information from KIDS (2015)

When used on an ongoing basis, the KIDS (2015) instrument will provide teaching staff with information that will benefit children, families, and schools.

Information from KIDS (2015) can be reviewed and analyzed at the level of the individual child. In addition, KIDS (2015) results can be summarized to provide information on groups of children. Teachers and other staff will review, share, and analyze KIDS (2015) assessment results in their classroom and use conclusions in curriculum planning and development.

Because KIDS (2015) provides opportunities to observe and document children’s behavior systematically across many areas of development, the information it yields can be used to identify areas of development that may need to be addressed and supported, either for a specific child or group of children. Teaching staff may also find it useful to interpret a child’s ratings on individual KIDS (2015) measures. KIDS (2015) results may indicate that the child might benefit from additional support in one or more specific areas of development, such as in developing self control of feelings and behavior and with number sense of quantity. This information, together with other sources of information about the child’s development, can be used to plan curriculum tailored to the child’s interests and needs.

Thus, results from KIDS (2015) can assist teaching staff in supporting the learning and development of individual children and groups of children, and can inform overall school improvement efforts.

Communicating with Families about Children’s Progress

It is vital that schools work in reciprocal partnership with families to foster children’s learning and development. This requires ongoing and meaningful two-way communication. Family members should be involved in the KIDS assessment process from the beginning. Teachers who observe and document the child’s behaviors and rate KIDS (2015) measures are encouraged to seek input from families. Input from family members about the child’s behavior and development can enrich and complement evidence collected by staff.

The Child Developmental Profile that summarizes results from KIDS (2015) assessments can be found at KIDStech. Teachers and family members can use this summary as a tool for sharing information about the child’s development during parent-teacher conferences. Teachers should review the Child Developmental Profile with the family and verify that their input is accurately reflected in the summary. This information may be used to generate ideas about ways in which the family and the school can work together to support the child’s development both at home and in the school setting.

ISBE requires all kindergarten teachers to minimally complete the 14 State Readiness Measures in the KIDS (2015) instrument. These select measures are intended to provide population-based information about the overall readiness of a group of children at the beginning of kindergarten. The 14 State Readiness Measures represent a sampling of areas of learning that kindergarten teachers routinely identify as key to children’s success in kindergarten. The 14 Measures are completed within the first 40 days of instruction to document children’s development and learning at kindergarten entry. The 14 State Readiness Measures provide a means, at an aggregate level, to begin to understand in a general way the learning and support needs of an incoming cohort of kindergarten children and to observe trends in school readiness over time.

Bilingual kindergarten classrooms in Illinois provide instruction on phonological awareness and letter and word knowledge in different ways from classrooms with predominantly English-only instruction. For this reason, the subset of LLD measures in the 14 State Readiness Measures view was modified for use in bilingual classrooms in the following manner: measures LLD 1 and LLD 10 in the alternate LLD subset replace LLD 8 and LLD 9 from the original LLD subset in the 14 State Readiness Measures.

* 14 State Readiness Measures

The Five Domains of Readiness include the essential areas of development for children entering school. Evidence suggests that these five domains provide a strong foundation for long-term educational achievement, including college and career readiness much later in life. There are 29 measures across the five domains, including the 14 State Required Readiness Measures plus 15 additional measures.

As teachers are collecting evidence for the 14 measures, they often observe that much of the evidence can inform additional KIDS measures beyond those that are part of the 14 State Readiness Measures. Individual teachers, schools, and districts can choose to include one or more additional measures in the assessment, in order to have data for one or more full domains. Each full domain represents alignment to Illinois early learning and kindergarten content standards, and is grounded in research-based literature summaries developed by child development content experts. Each KIDS domain was carefully constructed to represent a distinct area of learning and development for children defined by child development research and practice. Reviewing a child’s level of development as indicated by specific measures can provide additional information to guide the individualization of instructional supports and classroom planning. The whole set of measures in each domain provide valid and reliable assessment of progress in essential domains of learning and development for children in kindergarten.

* 14 State Readiness Measures
KIDS (2015): A Developmental Continuum for Kindergarten for the Kindergarten Individual Development Survey

Child: ______________________  Date of assessment: ______________________  Observer: ______________________
Classroom: ______________________  District/Agency: ______________________  School or Site: ______________________

Note: The Rating Record is meant to be used together with the KIDS (2015) Instrument for keeping track of each child's developmental levels as you complete the study.

Instructions: Mark the developmental level the child has mastered for each measure. Check EM (emerging) if the child is "emerging" to the next level (optional). In the rare circumstance that you are unable to rate a particular Measure, check UR (unable to rate) and circle the reason why you are unable to rate this Measure (absence or other).

</tr>
<tr>
<td>Carries out multi-step investigations, using a variety of strategies, tools, or sources of information</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Carries out experiments with things or materials, by systematically modifying actions and reacting to the results</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Finds out about things, people, or events by comparing multiple sources of information, including experiments, books and pictures, and asking questions</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### Examples

- Watches the fish in the fish tank intently after a conversation about how fish breathe underwater.
- Drops a marble in a maze and uses hands to follow its path as it rolls to the bottom.
- Asks, “What’s that doing?” when seeing the compact disc player in the learning center.
- Compares leaves gathered on a nature walk by color or shape.
- Asks, “How do I make the story play?” while in the learning center.
- Manipulates pattern blocks to make different shapes.
- Squeezes a sponge to see how it works.
- Uses a magnetic wand to figure out which objects on a table it will lift up.
- Uses a magnifying glass to observe a caterpillar closely, and describes its pattern of colors and number of legs.
- Changes the compact disc to listen to a new story.
- Uses a communication device to learn about the new pet guinea pig.
- Examines images from informational books or a computer to learn about the habitats of different animals.
- Looks through a prism held up to the light, directing its motion until a rainbow of colors appears on the wall.
- Sets up a project, with an adult, that involves investigating the growth of lima bean plants with different amounts of water, and documents their growth.
- Makes a wooden block ramp steeper and steeper and runs a small metal car down it each time to find out what happens.
- Adds blue paint to a saucer of yellow paint a few drops at a time, stirring after each addition, to see how the green color changes.
- Kicks a ball into a play soccer goal repeatedly, placing the ball farther away (and at different angles) before each kick.
- Watches a cup of snow to see how long it takes to melt.
- Communicates, “But that’s different from what my daddy told me,” and asks, “Why?,” after hearing an adult’s response to a question about why plants are green.
- Sets up a ramp to experiment with whether it is true that objects roll down steeper ramps more quickly, after a peer shows that objects roll down steeper ramps more quickly than shallow ramps.
- Gathers information from books and the internet to create an environment for the classroom butterflies.
- Creates a model of a bridge, consulting pictures of bridges, talking with an adult, and experimenting with creating a bridge across a divide.
# Developmental Domain: ATL-REG — Approaches to Learning — Self Regulation

## ATL-REG 2: Self-Control of Feelings and Behavior

Child increasingly develops strategies for regulating feelings and behavior, becoming less reliant on adult guidance over time.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Building</th>
<th>Middle</th>
<th>Later</th>
<th>Integrating</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Demonstrates capacity to regulate emotional or behavioral reactions in some moderately stressful situations, occasionally needing adult support</strong></td>
<td><strong>Expresses strong feelings through constructive forms of communication, seeking the assistance of familiar adults when needed</strong></td>
<td><strong>Uses simple strategies (e.g., leaving a difficult situation, offering an alternative toy to a friend) to regulate own feelings or behaviors</strong></td>
<td><strong>Uses socially appropriate strategies (e.g., negotiation, compromise, verbal reminders to self) to regulate own feelings or behaviors</strong></td>
<td><strong>Uses self-control strategies to regulate feelings and behaviors in order to prevent self from acting impulsively</strong></td>
<td><strong>Uses mental strategies (e.g., changing goals, reappraising the situation) to manage emotions, with some success</strong></td>
</tr>
</tbody>
</table>

### Examples

- **Earlier**
  - Waits to ride a favorite tricycle without trying to take it from another child.
  - Pauses and sighs after tower falls down, and then starts to rebuild it when an adult asks, “Do you want to make it again?”
  - Frowns, but goes to a different play center when an adult communicates that there are too many children at this play center.

- **Middle**
  - Insists that another child return a favorite item, but when refused, asks familiar adult for help.
  - Communicates feelings of anger, through words or gestures, to a familiar adult when another child takes the manipulative without asking.
  - Communicates, “I want to sit here,” when upset that there are no empty chairs near a friend.
  - Calls out, “Teacher!” when another child takes all the counting bears.

- **Later**
  - Offers an object in exchange when another child has a desired object.
  - Communicates, “Okay, but it’s my turn when you’re done,” while waiting for a drink at the water fountain.
  - Leaves the block area during free-choice play, after unsuccessfully attempting to join peers, and then moves to the dramatic play area to join other children playing there.

### Child is emerging to the next developmental level, explain here:

**Self-Control of Feelings and Behavior**

©2017 California Department of Education, with additional enhancements created in collaboration with the Illinois State Board of Education
Developmental Domain: ATL-REG — Approaches to Learning—Self Regulation

ATL-REG 3: Engagement and Persistence  
Child increasingly persists in understanding or mastering activities, even if they are challenging or difficult

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Earlier</td>
</tr>
<tr>
<td>Middle</td>
<td>Middle</td>
</tr>
<tr>
<td>Later</td>
<td>Later</td>
</tr>
</tbody>
</table>

- **Continues self-selected activities with adult support, even though interest briefly shifts to other activities**
- **Continues self-selected activities on own, seeking adult support to work through challenges**
- **Works through challenges on own while engaged in self-selected activities**
- **Returns to activities, including challenging ones, on multiple occasions to practice a skill or to complete the activity**
- **Pursues simple multi-step activities, following the steps through to completion**
- **Completes complex multi-step activities, making and adjusting plans as needed**

**Examples**

- Strings large wooden beads with an adult to make a necklace, briefly watches another child who brings magnets to the table, and then continues stringing beads.
- Stops looking at books and starts to move away from literacy area, but returns when an adult begins reading a familiar book.
- Pauses to watch children playing a board game, but returns to drawing when the adult offers markers to finish the drawing.
- Continues working on a difficult puzzle, asking an adult for help when needed.
- Continues looking at a book as an adult encourages other children entering the same area to find a book.
- Asks adult for headphones while listening to a story on a compact disc when other children begin to play noisily nearby.
- Starts to get ready to go outside with other children, and asks for adult assistance with zippers when putting on coat.
- Continues to build a structure with interlocking blocks even when having difficulty finding the “right” pieces.
- Glues a variety of materials together to create a three-dimensional collage, trying different ways to make them stick.
- Repeatedly tries to trace around own hand.
- Completes an obstacle course using a walker, even on bumpy ground.
- Continues to work on spinning a round hoop around own waist over successive days.
- Revisits a painting started on a previous day to add more detail and color.
- Writes own name, then writes it more clearly a second time at classroom sign-in table.
- Makes a necklace of tiny beads, following a chosen pattern and correcting any errors along the way.
- Makes a landscape on the sand table, planning roads, bridges and houses.
- Makes a neighborhood map, including familiar landmarks, such as houses, a park, the library, and the fire station.
- Creates a model of a bridge, consulting pictures, finding blocks of the right size, and getting other materials, as needed.
- Finishes current activity, puts away materials, and goes to the lunch table with no reminders after an adult announces it is time for lunch.
- Helps to create props and scenery in preparation for reenacting a story to present to the class.

Child is emerging to the next developmental level

**Examples**

- Keeps all of the crayons nearby even if only using one or two colors.
- Communicates, “It’s mine,” when another child reaches for a red counting bear.
- Places favorite dolls behind back when other children are playing in the doll area.
- Holds onto all the pencils while at the writing center, but then gives some to other children, with adult prompting.
- Keeps favorite crayons nearby, and pushes the basket of other colored crayons to the center of the table.
- Lets another child take a book from a pile nearby, but holds onto a few favorite books.
- Communicates to another child, “That’s mine [referring to a carpet square]. Go get one from the pile over there,” while getting ready for story time.
- Gets individual white boards off of the shelf to give to other children, according to the usual classroom practice.
- Communicates, “It’s my turn when you are done,” to a child who is using the water fountain.
- Puts name on waiting list when wanting to have a turn at the computer, after reminder by an adult that there is a waiting list.
- Communicates to another child, “That’s mine [referring to a carpet square]. Go get one from the pile over there,” while getting ready for story time.
- Makes room for another child who wants to join in the writing activity, and then offers a pencil to the child.
- Uses a communication device to ask another child to join in working with pattern blocks.
- Communicates, “It’s my turn when you are done,” to a child who is using the water fountain.
- Puts name on waiting list when wanting to have a turn at the computer, after reminder by an adult that there is a waiting list.
- Helps a peer find a favorite book in the classroom library.
- Communicates, “It’s not fair!” when a peer is excluded from a game.
- Passes the dice to another child who has been watching them play a math game.
- Uses a communication device to ask another child to join in working with pattern blocks.
- Communicates, “It’s not fair!” when a peer is excluded from a game.
- Passes the dice to another child who has been watching them play a math game.
- Helps a peer find a favorite book in the classroom library.
- Communicates, “It’s not fair!” when a peer is excluded from a game.
- Passes the dice to another child who has been watching them play a math game.
- Helps a peer find a favorite book in the classroom library.
- Communicates, “It’s not fair!” when a peer is excluded from a game.
- Passes the dice to another child who has been watching them play a math game.
- Helps a peer find a favorite book in the classroom library.
- Communicates, “It’s not fair!” when a peer is excluded from a game.
- Passes the dice to another child who has been watching them play a math game.
- Helps a peer find a favorite book in the classroom library.
- Communicates, “It’s not fair!” when a peer is excluded from a game.
- Passes the dice to another child who has been watching them play a math game.
### Developmental Domain: SED – Social and Emotional Development

#### SED 1: Identity of Self in Relation to Others

Child shows increasing awareness of self as distinct from and also related to others

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Building</th>
<th></th>
<th>Integrating</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Middle</td>
<td>Later</td>
<td>Earlier</td>

- **Expresses simple ideas about self and connection to others**
- **Describes self or others based on physical characteristics**
- **Describes own preferences or feelings;**
  - **and**
  - **Describes the feelings or desires of family members, friends, or other familiar people**
- **Compares own preferences or feelings to those of others**
- **Describes and compares self and others using personality characteristics**
- **Identifies and evaluates strengths and weaknesses by comparing self with others**

### Examples

- Acts out roles from own family in pretend play.
- Communicates, “I’m making cookies—just like Grandma!” while rolling play dough.
- Draws picture of a house and communicates, “This is my house.”
- Communicates, using communication board, “His hair is red!”
- Identifies own height, as indicated on a growth chart posted on the wall.
- Narrates details while drawing a picture of a friend.
- Draws a picture of own family, representing traits such as heights and hair colors.
- Communicates to an adult, “I was mad when it rained because we couldn’t go outside.”
- Communicates that a friend is happy because he is going to have a birthday party.
- Says, “I don’t want to touch the caterpillar. It scares me.”
- Communicates, “I’m making cookies—just like Grandma!” while rolling play dough.
- Communicates, using communication board, “His hair is red!”
- Identifies own height, as indicated on a growth chart posted on the wall.
- Narrates details while drawing a picture of a friend.
- Draws a picture of own family, representing traits such as heights and hair colors.
- Communicates to an adult, “I was mad when it rained because we couldn’t go outside.”
- Communicates that a friend is happy because he is going to have a birthday party.
- Says, “I don’t want to touch the caterpillar. It scares me.”

**Examples**

- Communicates, “I like to listen to music, too; it makes me happy,” after noticing a child playing with a musical triangle.
- Communicates that a crying child is sad.
- Communicates, “She wants the big truck.”
- Points to “angry” picture on emotion chart while listening to a story about a character who is angry.
- Responds that a friend is sad, when an adult asks, “Why did your friend get his blanket?”
- Communicates that the turtle in the story was scared, when an adult asks, “Why did the turtle go into its shell?”
- Communicates, “She misses her mommy,” when adult asks, “What happened?”
- Communicates, “He’ll be mad if his bridge is knocked down again.”
- Uses a communication device to express, “I feel sleepy when it gets dark.”
- Communicates, “I’m tired. I don’t want to write anymore.”
- Communicates to a peer, “You’re silly,” when the peer starts giggling and other children join in.
- Communicates that a peer is shy when seeing her hide as an unfamiliar adult approaches.
- Communicates that another child plays with everyone because he is so friendly.
- Communicates to a new friend, “You’re nice, just like my sister.”
- Communicates to a child who is new to the class at pick-up time, “Don’t worry. Your mommy will come.”
- Describes self as a good friend and identifies other children who are also good friends.
- Communicates to a friend, “I think Joey left these crayons out. He’s always so messy,” after discovering crayons still out in the art area.
- Communicates to a friend, “I think Joey left these crayons out. He’s always so messy,” after discovering crayons still out in the art area.
- Gestures toward a specific child and communicates, “She can do it, she isn’t scared of anything,” when the adult asks who wants to hold the baby chick.
- Asks a peer, “Do you want to help me water the flowers and plants, I know you always like to help.”
- Communicates to a child who gets mad about a block tower that keeps falling to build it a different way.

**Examples**

- Communicates to a familiar adult, “Want to read with me?” during free-choice time.
- Completes a simple puzzle with a familiar adult, taking turns to fit pieces.
- Shows a drawing to a familiar adult and tells the adult what is happening in the drawing.
- Uses an electronic tablet to play a game with a familiar adult.
- Asks a familiar adult what they might see when they go on a field trip.
- Asks a teacher why another child is not going outside with the group.
- Asks a familiar adult for a suggestion about how to fold the paper to make a paper airplane fly.
- Asks a familiar adult, “Is that the zoo we went to?” while looking at photos of zoo animals.
- Offers to carry napkins and cups to the tables when a familiar adult begins preparing for snack.
- Brings a board game to a familiar adult and communicates an interest in playing together.
- Gives pretend food to a familiar adult and communicates, “I made some hamburgers for you. You tell me what you want to drink.”
- Works together with a familiar adult to complete a puzzle over several days, organizing pieces in different ways.
- Plans a writing activity with a familiar adult, communicating by signing the materials needed.
- Gathers possible construction materials, such as glue, paper, and scissors, from a supply shelf to contribute to a building project with a familiar adult.
- Works with a familiar adult and a group of children to make a prop for a class play over two days, offering ideas for its design and what materials to use.
- Communicates to peer who is talking loudly, “The teacher said to use our inside voices.”
- Communicates to peers, “It’s time to clean up and get ready for snack,” after noticing a familiar adult clearing off the lunch table.
- Opens door for a familiar adult who is carrying an armful of books.
- Quiets down at circle time after noticing the teacher is holding up a book to read aloud to the group.
- Laughs and communicates, “That was funny!” while watching as a familiar adult tells a joke and laughs.
- Asks a familiar adult what kinds of things they like to do together after the adult shares a picture of being outside with a dog.
- Asks a familiar adult, “Do you like to dance?” after the adult puts on dance music.
- Communicates, “Sometimes my mom is tired from working all day and doesn’t feel like playing games with me at night.”

<td>Later</td>
</tr>
</tbody>
</table>

### Examples

- Takes a few turns trying on hats with a peer.
- Plays chase briefly outside with two peers, and then goes to play alone on the slide.
- Plays cars with a peer for a short while.
- Builds a train track with two friends, taking turns connecting the track pieces.
- Laughs and makes funny noises or faces with a friend while singing a song together.
- Plays a game of telephone that involves having a conversation with a friend about going on a shopping trip together.
- Invites friends to build a castle with blocks, and, at clean-up time, asks to save it so they can continue building tomorrow.
- Invites friends to continue working on the art project from the day before.
- Plays school with friends, showing them the charts on the wall and pretending to read a book aloud.
- Plans how to design a large drawing on a poster with several peers, choosing materials and negotiating tasks.
- Acts out a familiar story with peers, planning different characters and scenarios.
- Joins peers in planning and gathering materials needed for small group writing activity.
- Asks a friend, “What should we play, blocks or puppets?” and plays the activity the friend chooses.
- Suggests taking turns when they both want to play on the swings.
- Defends a friend who is teased by another child.
- Tells another child to not sit on the carpet square because it is being saved for another friend.
- Shares with a friend that blue is the prettiest color and that’s why it is her favorite.
- Communicates to another child, “I was scared when the door slammed shut, I thought it was a stranger.”
- Communicates in agreement with a friend, “I like her, too. She is nice. But, he’s too loud and I don’t like to sit next to him during reading time.”

Child is emerging to the next developmental level

If you are unable to rate this measure, explain here:
Developmental Domain: SED – Social and Emotional Development

**SED 5: Symbolic and Sociodramatic Play**
Child develops the capacity to use objects to represent other objects or ideas and to engage in symbolic play with others

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>

<tr>
<td><strong>Later</strong></td>
<td><strong>Later</strong></td>
</tr>
</tbody>
</table>

**Engages in pretend-play sequences**
- Engages in pretend play with others around a shared idea
- Engages in roles in pretend-play sequences with others
- Engages in pretend-play sequences with others by organizing and negotiating roles or rules around a shared elaborated idea
- Adjusts pretend play activity as it proceeds, taking into consideration the ideas, interests, and preferences of other children in the play group
- Engages in complex pretend play, especially with friends, involving complicated roles and a well-coordinated activity based on a shared story line

**Examples**

- Pretends to be a doctor and takes care of a stuffed bear that is "sick."
- Makes a pretend cake and offers a "taste" to an adult.
- Makes a 'pizza' out of play dough and puts it in the play oven.
- Sits in a box, pretending it is a boat.
- Sits in a box with a peer, holding a "steering wheel," and communicates, "My turn to drive the bus."
- Pours "coffee" for friends while seated together at a table in the dramatic play area.
- Pretends to put out fires on the playground with others, using pretend hoses and wearing firefighter hats.
- Pumps arm while saying "Whoo-whoo," and then collects "tickets" from seated "passengers."
- Plays store, "scanning" items, placing them in bags, and collecting "money" from peers.
- Uses a hose to "pump gas" as other children wait in line with their tricycles.
- Agrees with peers on who will be the bus driver, who will be the mommy, while acting out school-bus play.
- Plans with peers to pretend to be a family going on a trip: using chairs as seats for a car, negotiating roles, and deciding where they will go.
- Assigns roles and acts out classroom routines (e.g., circle time, snack time) with other children.
- Communicates, "We can pretend we are in the jungle, instead of the beach, if we want to be lions," in response to another child's request to be a lion instead of a dolphin.
- Offers to stop being the bus driver when another child requests to be the bus driver.
- Communicates, "I don't want to go near the water because I'm scared of the water," while pretending to be a character in a story who is scared of the water.
- Enacts a complex story, using action figures, about rescuing townspeople from "bad guys" while overcoming obstacles.
- Communicates, "Let's pretend you have a long-lost sister who suddenly appears and she has lots of money!" and subsequently enacts the sister role.

      - Carries out multi-step requests that involve a new or unfamiliar activity, situation, or concept
        - Carries out multi-step detailed instructions that involve a new or unfamiliar sequence of events or directions

- **Middle**:
  - Responds to one-step requests or questions involving an action that will happen right away
  - Carries out one-step requests that relates to a new or an unfamiliar activity or situation
    - Carries out multi-step requests that involve a familiar activity or routine
      - Carries out multi-step requests that involve a new or unfamiliar activity, situation, or concept
        - Carries out multi-step detailed instructions that involve a new or unfamiliar sequence of events or directions

- **Later**:
  - Responds to one-step requests or questions involving an action that will happen right away
  - Carries out one-step requests that relates to a new or an unfamiliar activity or situation
    - Carries out multi-step requests that involve a familiar activity or routine
      - Carries out multi-step requests that involve a new or unfamiliar activity, situation, or concept
        - Carries out multi-step detailed instructions that involve a new or unfamiliar sequence of events or directions

- **Examples**
  - Picks up crayons after an adult says, “Please pick up the crayons.”
  - Brings a water bottle to the classroom plants after a peer says, “Let’s get water for the plants.”
  - Brings shoes after an adult requests, “Bring me your shoes. I’ll help you put them on.”
  - Uses a communication board to make a choice when an adult asks, “What would you like to do next?”
  - Puts used paper into recycling bin that was recently added to the room after adult communicates, “Please put used paper in the recycling bin.”
  - Follows simple direction to tag another child when learning a new game.
  - Gets drum after adult communicates, “Let’s get ready for the new music teacher.”
  - Puts toy in cubby and goes to rug when adult communicates it is time to put your toy in the cubby and go to the rug for storytime.
  - Follows the steps communicated by an adult at the end of an art activity to remove smock, hang it up, and then wash hands.
  - Follows adult’s request to “push your chair in, put your book in the cubby, and wash your hands.”
  - Chooses a book and then carries it to the library counter after an adult says, “Find a book and take it to the library counter.”
  - Gathers several materials from the science center and places them on a table, as suggested by an adult, to prepare to plant seeds for a class experiment.
  - Cares for a new pet for the first time by providing clean water, food, and fresh shavings for a guinea pig, after being told the steps by a peer.
  - Follows adult’s direction to find trapezoid, rhombus, and hexagon shapes, to check each off the list when it is found, and to draw a picture of each shape.
  - Follows adult’s directions to line up in a pair with another child next, wait for a turn, and then pass the ball back and forth with the peer while practicing soccer during gym or outside recess.
  - Follows instructions that explain how to construct a 100's day poster - by segmenting the poster into 10 sections, selecting 10 groups of items, and then gluing the items to the poster.
  - Participates in linking arms and moving body with a peer while standing back-to-back, in response to adult suggestion to be a “shadow” during a movement activity.
  - Repeats and writes down the rules of a new game a peer created.
  - Begins to assemble an igloo according to an elaborate plan for building it previously discussed by a group of peers.
**Developmental Domain: LLD — Language and Literacy Development**

**LLD 3: Communication and Use of Language (Expressive)**

Child's communication develops from nonverbal communication to using language with increasingly complex words and sentences

| Uses short phrases or sentences of more than two words to communicate | Uses short sentences that contain nouns, verbs, and other words, such as adjectives and recently encountered vocabulary, to communicate | Uses phrases and sentences with a variety of word forms, including past tense, future tense, plurals, pronouns, or possessives, to communicate, sometimes with errors | Combines phrases and sentences with a variety of word forms to communicate ideas or to describe people, objects, or events | Uses much of the grammar of adult-like speech, sometimes with grammatical errors; and Adapts own speech to the level of the listener | Uses most of the grammar of adult-like speech; and Converses about a broad range of abstract ideas and concepts |

---

**Examples**

- Communicates, “It’s my turn,” when an adult brings the pet rabbit for a visit.
- Communicates, “I want Mommy.”
- Communicates, “I like dogs,” while looking at an animal book.
- Communicates, “The rabbit is scared,” when sharing a story about a rabbit who went into the bushes. (“Scared” is an adjective.)
- Communicates using a communication board, “I need a tissue. My nose is runny.” (“Tissue” is a noun and “runny” is an adjective.)
- Communicates, “Our dog is huge,” after hearing a peer use the word “huge.” (“Huge” is a recently encountered vocabulary word.)
- Communicates to a peer, during play, “Yesterday, we made vegetable soup at my house.” (“We” is a pronoun; “made” is past tense.)
- Communicates, “His birthday is tomorrow. He will be five.” (“His” is a possessive pronoun; “he” is a pronoun; “will be” is future tense.)
- Communicates in sign language that the cat’s feet are wet.” (“Cat’s” is possessive; “feet” is plural.)
- Communicates, “He runned really fast [He ran really fast].” (“Runned” is past tense with grammatical error.)
- Communicates via spoken words, signs, or a communication device, “The dog ate the cat’s food, and then he got in trouble. We put him outside and he was very sad.”
- Communicates, “Dragons don’t need bikes ‘cause they can fly. They have really big wings.”
- Communicates to a peer, “Let’s hurry and clean up so we can go outside.”
- Communicates, “My grandma is really old. She has white hair and lots of wrinkles.”
- Communicates, “I used to like those cookies,” pointing to a cookie and then repeats to a friend who can’t see over the counter, “I used to like chocolate chip cookies, but now I like sugar cookies.”
- Begins communicating loudly and then lowers to a whisper, “I am going to read this book over there,” to an adult in the room.
- Asks another child, “Do you like the red dinosaur or the green dinosaur?” then communicates to adult, “She likes the stegosaurus.”
- Communicates, “I don’t always understand how to make the video player work, but if I think of it like my game player I figure out how to make it work.”
- Communicates to peer while looking at a book about the moon and planets, “I used to think the moon was following me. Now I understand that it looks like its moving because the earth is actually moving.”
- Communicates to adult away from peers, “I feel confused about what I should do when I see my best friend playing with someone else. Should I ask to play with them or find someone else to play with?”

---

Child is emerging to the next developmental level

If you are unable to rate this measure, explain here:
### LLD 4: Reciprocal Communication and Conversation

Child engages in back-and-forth communication that develops into increasingly extended conversations.

#### Mark the latest developmental level the child has mastered:

#### Examples

- Communicates, "I'm the baby," after a peer communicates, "I'm the mommy," while playing house.
- Hand a play dough to a peer. When the peer takes the play dough and says, "I'm gonna make a dog," responds, "I'm making a snake.
- Asks a peer for some pattern blocks from the peer. After a peer communicates, "I'm the baby," while playing house. Communicates, "That's my family," while sharing a family photo with a peer. When the peer says, "You have two sisters," responds, "I have a big sister, and that's my baby sister.
- Responds to an adult's comments about animals that live in the zoo, "I went to the zoo." When an adult replies, "There are lots of animals in the zoo," child says, "I like the alligators best," and continues to converse about other animals in the zoo.
- Has a brief conversation with a peer while looking at a caterpillar together. Comments, "That is really hairy." When peer responds, "Yeah, really hairy," child continues, "He has lots of legs, too.
- Has a conversation with a peer about things that they like to do together with their families. Says, "My family goes to the park on Sundays." When peer asks, "Every Sunday?" child responds, "Yeah, but sometimes we go to the park with the swimming pool and sometimes the park with the big playground." Then when peer says, "My grandma takes me to the park," child responds, "My grandma takes me to the store." Conversation continues.
- Has a conversation with an adult while planting sunflower seeds together, asking how to plant the seeds and making guesses about how big the plants will get and how long it will take before the plants begin to grow.
- Has a conversation with a peer before and while building a structure with blocks, including offering ideas on what materials they need and suggesting ways to make sure that the walls keep standing as they are building it.
- Has a conversation with an adult about how dinosaurs lived and how people live, providing suggestions about what it would be like if dinosaurs and people lived in the same place.
- Has a conversation with an adult about animals that live in the zoo, providing suggestions about what it would be like if dinosaurs and people lived in the same place.
- Asks a peer, "Would you like to come over to my house to play?" When peer asks, "Today?" child responds, "I'll ask my mom if it's okay to invite a friend over today." Conversation continues.
- Adds, "And then you lean forward to go again," during a conversation with a friend about how to ride a skateboard.
- Shares that they will need to bring really warm clothes when having a conversation with a peer about going on a camping trip to the North Pole.
- Asks an adult if it is a lie to tell your friend you don't feel well if you don't want to play with them. Listens to adult's ideas about making choices and being truthful about what you want. Responds to adult, "Maybe I will just say that I don't feel like playing.
- Asks a peer, "Why don't you like broccoli?" after a peer communicates liking all vegetables except broccoli. After listening to peer's response, adds, "I like broccoli with melted cheese on it. Would you like that?" Waits for peer to respond.
- Asks, "Do you think it would be okay if I eat three crackers?" after a peer communicates, "We have to make sure there are enough crackers for everyone." Then communicates, "I think there will be enough," after peer asks, "Are you sure there will be enough if everyone got three crackers?"

Note: Conversations can include communication using sign language or alternative communication systems.
**Developmental Domain: LLD — Language and Literacy Development**

**LLD 5: Interest in Literacy**

Child shows interest in books, songs, rhymes, stories, and other literacy activities in increasingly complex ways

</tbody>
</table>

**Examples**

- Pretends to read a book from start to finish.
- Explores book with Braille and tactile content with hands.
- Sings some words of a familiar song, from beginning to end, with an adult.
- Asks questions or communicates about why something happened in a story.
- Starts a song or rhyme with others while playing outside.
- Uses finger puppets while reciting a familiar rhyme.
- Uses flannel-board pieces to retell parts of a story after story time.
- Retells a familiar story to a peer while pretending to read from a book.
- Uses a communication device to tell the sequence of events in a favorite story.
- Pretends to be a character from a story using props.
- Chooses to read a book related to a particular theme or interest (e.g., dinosaurs or fairies).
- Asks for help finding a book about bugs after listening to a story about ladybugs.
- Participates, with others, in using the computer to create a story about a class trip.
- Makes up own version of rhyming song with peers’ names.
- Constructs a storybook about places to visit that includes pictures from a travel magazine.
- Looks at a book about the “phases” of the moon after moon phases had been introduced by an adult.
- Communicates that she is reading a book about the history of trains after hearing her grandmother talk about how she rode trains as a child.
- Communicates excitedly about the story of a baseball hero he read with an adult yesterday and asks for the book to be read during group reading.
- Resumes reading a chapter book from the library during free time.
- Takes turns discussing sections of a familiar story with peers, while an adult helps facilitate the discussion.
- Selects a book from the library about how to care for a puppy and communicates about wanting a puppy.

<td>Demonstrates understanding that print and symbols carry meaning</td>
</tr>
</tbody>
</table>

**Examples**

- **Building**
  - Moves fingers along print, from one end of the page to another.
  - Communicates, “There are two words on this sign,” while looking at a sign with the words “Writing Center.”
  - Creates a pretend grocery list with letters that look like words, then names the words as grocery items, such as “corn,” “milk,” and “bread.”
  - Communicates that the first letter or sound of a peer’s name is the same as the first letter or sound of child’s own name.
  - Communicates, “I got three birthday cards in the mail and one had a letter from my grandpa.”
  - Communicates, “For the scavenger hunt at my party, let’s leave clues on note cards or sticky notes so my friends know where to go for the next clue.”
  - Looks at the instructions of a board game, hands them to an adult, and asks who is supposed to.
  - Uses index finger to track the sentences in a story while an adult reads the story, pausing finger at the punctuation at the end of sentences.
  - Communicates, “This is the beginning of the sentence because the first word has a capital letter.”
  - Communicates, “There are three sentences on this page.”

- **Integrating**
  - Communicates, “That means stop,” while looking at pictures on a felt board.
  - Points to the first word on a page and then communicates, “Start here.”
  - Communicates, “I got three birthday cards in the mail and one had a letter from my grandpa.”
  - Communicates, “For the scavenger hunt at my party, let’s leave clues on note cards or sticky notes so my friends know where to go for the next clue.”
  - Looks at the instructions of a board game, hands them to an adult, and asks who is supposed to.
  - Uses index finger to track the sentences in a story while an adult reads the story, pausing finger at the punctuation at the end of sentences.
  - Communicates, “This is the beginning of the sentence because the first word has a capital letter.”
  - Communicates, “There are three sentences on this page.”

**Note:** Children who are familiar with print in languages other than English may demonstrate differences in how they approach print materials. Some languages (e.g., English, Spanish, Tagalog, Vietnamese) are written from left to right within a horizontal line of print and from top to bottom in books and other print media. Other languages (e.g., Arabic, Hebrew) are written from right to left within a horizontal line of print and from top to bottom in books and other print media.

### Examples

- Rhymes children's names with other words during a group sing-along.
- Sings “Twinkle, Twinkle, Little Star” with a group.
- Communicates the rhyming word “fall” after an adult says, “Humpty Dumpty sat on a wall. Humpty Dumpty had a great…”
- Uses signs to participate in a song such as “The Wheels on the Bus.”
- Drums out each word in “I am Matt” in a name game in the classroom, after an adult has modeled drumming while saying single words.
- Claps the syllables in familiar words, such as children’s names or days of the week with adult and peers.
- Moves arms each time the word “row” is said in the song “Row, Row, Row Your Boat” with adult and peers.
- Answers, “Goldfish,” after an adult asks, “If you put together the words ‘gold’ and ‘fish,’ what word does that make?”
- Communicates, “Rain,” after an adult communicates, “There are two words in ‘raincoat.’ What happens when we take away the word ‘coat’?” while moving a picture of a coat away from a picture of rain.
- Communicates, “Zebra,” after an adult separates the word into syllables, and says, “Ze-” and “-bra,” while looking at a wordless picture book about the zoo.
- Communicates, “Marker,” after an adult communicates, “What happens when I put the two syllables ‘mark-’ and ‘-er,’ together?”
- Communicates, “Cup,” at the snack table, after an adult says, “I have a cup. What do I have?”
- Communicates, “Ice,” after an adult asks what word is left when the “m” is removed from the word “mice,” while playing a word game.
- Communicates, “d” (letter sound), while looking at a picture of a dog, after an adult says, “What is the first sound you hear when you say ‘dog’?” while looking at pictures of dogs together.
- Chooses the picture of a mouse after an adult shows her a picture of milk and asks her to find another picture that begins with the same initial sound as milk.
- Selects a picture of a bat when asked to find the word that ends the same as ‘pet’.
- Points to and says the name of three objects found in the classroom as the teacher sounds out the individual phonemes of each object, (e.g., /j/-/u/-/g/ for jug).
- Communicates, “Ink, pink ink,” when adult playing sound game asks, “What little word do you have if I take off the initial sound of ‘PP’ from the word pink?”
- Sounds out the word cat, “/p/ /e/ /t/,” when adult playing sound game asks, “What are the sounds in ‘pet’?”
- Sings the name “Mary” then sings the name “Gary” by substituting “/G/” for “/M/” to make Gary, when playing the name game.
- Communicates to a peer, “No, my name is pronounced ‘Kim,’ not ‘Kam.’”

Note: Children who are deaf and learning American Sign Language will attend to elements of language (hand shapes and movements) in the early levels of learning, but eventually will be able to use finger spelling in relation to learning about sounds. For a child who is hard of hearing, has a cochlear implant, or is using cued speech, the sequence is very similar to that of a hearing child.

Child is emerging to the next developmental level

### Building

- **Demonstrates awareness of a few letters in the environment**
  - Identifies some letters by name
  - Identifies ten or more letters (not necessarily at the same time); and
  - Shows understanding that letters make up words

### Integrating

- **Identifies most uppercase letters and most lowercase letters (not necessarily at the same time); and**
  - Shows understanding that letters correspond to sounds in words
- **Demonstrates knowledge of all of the letters of the alphabet (upper and lower case) and corresponding sounds for the majority of consonants and many vowels; and**
  - Identifies frequently-used words (e.g., the, of, is, to, you, she, my)
- **Assembles or splits apart words to make new words; and**
  - Identifies both short vowel sounds and long vowel sounds for most vowels

### Examples

- **Holds up hand or communicates, “Me,” when an adult holds up a sign with child’s name.**
- **Finds the first letter of own name in the environment, such as on labels, artwork, cubbies, or chairs.**
- **Communicates, “I found the same letter,” when playing a letter matching game in print or Braille.**
- **Names some letters while looking at an alphabet book.**
- **Points and names some letters in an alphabet puzzle.**
- **Communicates some letter names in Braille.**
- **Identifies some letters in Braille.**
- **Names at least ten letters while placing them on a magnet board.**
- **Copies the word “cat” and communicates that it says “cat” (letters may not be written accurately).**
- **Says, “Fish,” after reading the word in Braille.**
- **Communicates, “I have two As in my name, one big A and one little a,” when reading own name, Anna, on cubby.**
- **Names, by sight or touch, most of the letters of the alphabet, when reading an alphabet book.**
- **Communicates, “Those both start with B,” after hearing the words “ball” and “bat” in a story.**
- **Looks at the word “mat” in large print and says “m” (letter sound).**
- **Communicates, “There are two ways you can say this letter,” while pointing to the lowercase letter “a.”**
- **Looks at the word “bait,” and accurately says “the second vowel means it’s not “bat,” it’s “bait.”**
- **Communicates, “If you take out the “o” in “come” and put in an “a” it becomes “came.””**

#### Examples

- Draws circles and lines and comments “Baby” and “Mommy.”
- Makes marks on paper and then explains that it is a birthday cake.
- Draws a series of lines to represent a house and a tree.
- Makes marks to represent the dog from a story by moving finger on screen of tablet or touch screen of computer.
- Makes scribble marks or simple drawings that represent people, things, or events
- Makes marks that are linear and spaced like letters or words while writing a pretend grocery list.
- Makes marks to write down a restaurant order in the dramatic play area.
- Uses an adaptive device to hold a marker to make marks on paper to represent the word “mom.”
- Writes letter-like shapes or a few letters to represent own name or words
- Signs a self-made card to grandma, using a few letters from own name.
- Uses a few letter stamps to represent own name.
- Writes own name on drawings made in class.
- Writes own name, but may make errors
- Writes several words or a few simple phrases, but may make errors
- Writes own name, but may make errors
- Writes several words or a few simple phrases, but may make errors
- Writes a simple sentence, e.g., “I want a dog,” when asked to write a letter to his parents.
- Writes a simple sentence, e.g., “I love you, Daddy and Mommy,” correctly on a drawing.
- Writes a simple thank you note, e.g., “Thank you for coming to visit,” after the dentist visits the classroom.
- Writes directions for how to get to his house from school.
- Writes a multi-sentence description of how to decorate a cake.
- Makes scribble marks or simple drawings that represent people, things, or events
- Makes marks on paper and then explains that it is a birthday cake.
- Draws a series of lines to represent a house and a tree.
- Makes marks to represent the dog from a story by moving finger on screen of tablet or touch screen of computer.

</tbody>
</table>

**Examples**

- Adds a block to the top of a tower in response to a question in the child’s home language, “Can you make it taller?”
- Passes a book to another child when requested in the child’s home language, having not responded to the same request in English.
- Seeks out and plays with peers who speak the child’s home language, while in the dramatic play area.

- Pauses to listen to peers speaking English for a short period of time while playing in the sandbox.
- Begins to put blocks on a shelf when a peer says in English, “Clean-up time.”
- Points to the ball when a peer says in English, “Where is the ball?” during outdoor play time.
- Goes to get markers after an adult asks in English if the child would like to use paint or markers to make a birthday card for a peer.
- Approaches the door to go inside when an adult says in English, “It is time to go in for a snack,” and adds, “¡Hora de comer!” (“Time to eat!” in Spanish).
- Adds more blocks to a road when a peer communicates in English, “We need a longer road.”
- Pretends to talk on the phone when a peer says in English, “Baby’s sick. Call the doctor.”
- Puts drawing on the counter after an adult points to the counter and requests in English, “Please put your drawing on the counter. It’s wet and it needs to dry.”
- Sorts orange and green counting bears after an adult says in English, “Let’s separate them by color.”
- Brings a bigger block to a peer in response to a question in English by the peer, “Could you bring me the bigger block?”
- Nods head excitedly when a peer asks in English if the child wants to ride bikes together outside.

<td>Communicates in English, often using complete sentences, about a variety of social and instructional concepts and topics (may contain grammatical errors and may mix English with home language)</td>
</tr>
</tbody>
</table>

### Examples

- Takes an adult’s arm and leads the adult to the drawing area, where several children are drawing, and reaches or gestures toward the paper container.
- Nods “Yes” and responds in home language in response to a routine question such as “Do you want more milk?” while an adult holds up a pitcher of milk.
- Communicates, “¿Puedo pintar contigo?” [“Can I paint with you?” in Spanish] while approaching a peer who is painting.
- Communicates, “¡Queso!” [“Cheese!” in Spanish] and puts some toy animals under a blanket in the dramatic play area.
- Communicates in English, “Bye,” to a peer when leaving at the end of the day.
- Greets peers in home language and joins in singing the words “good morning” in English during the daily morning song.
- Chimes in with “The end!” in English when an adult finishes reading a story to a small group of children.
- Communicates in English, “Marker,” to ask for a marker from a peer while playing a restaurant in the dramatic play area.
- Communicates in English, “I do a house,” when drawing. [“I made a house.”]
- Communicates to a peer in English, “My turn,” and gestures at the slide during outdoor play.
- Communicates, “The dog 变成一个 lady 了,” [“The dog turned into a lady in English and Mandarin”] while helping to put a dress on a stuffed dog in the dramatic play area.
- Communicates to a peer while playing with play dough, “I make galletitas [“cookies” in Spanish] and pan [“bread” in Spanish]. You like it?” [“I made cookies and bread. Do you like it?”]
- Communicates to a peer in English, “Come! I show you!” [“Come! I will show you!”] and brings the peer to child’s cubby, where child takes a stuffed animal out of bag.
- Communicates in English, “The end!” in English and Mandarin] while attempting to draw a horse.
- Communicates to a peer “My dad rides a horse,” [“My dad rides a horse”] while attempting to draw a horse.
- Communicates in English, “This is happy new year. This is mommy and me. We saw the dragon,” in response to an adult asking, “Tell me about your picture.”
- Communicates to a peer, “I ate huevitos [“little eggs” in Spanish]. The huevitos were really yummy! My papi [“daddy” in Spanish] and me, we get them at la tiendita [“the little store” in Spanish].”
- Communicates in English, “I’m going to cook them now,” while throwing play dough noodles into a toy pot, and later puts “cooked noodles” on a plate and communicates, “Here’s a plate for you,” while handing it to a peer.
- Communicates in English, “This is happy new year. This is mommy and me. We saw the dragon,” in response to an adult asking, “Tell me about your picture.”
- Communicates to a peer, “I ate huevitos [“little eggs” in Spanish]. The huevitos were really yummy! My papi [“daddy” in Spanish] and me, we get them at la tiendita [“the little store” in Spanish].”
- Communicates in English, “I’m going to cook them now,” while throwing play dough noodles into a toy pot, and later puts “cooked noodles” on a plate and communicates, “Here’s a plate for you,” while handing it to a peer.
**Developmental Domain: ELD — English Language Development**

</tr>
</tbody>
</table>

---

**Examples**

- Joins in with peers who are singing a song or chant in home language.
- Looks at pages of a picture book with a peer while an adult reads the book aloud in English.
- Watches a retelling of *The Three Bears* in English on the flannel board, after the story has been read in home language.
- Makes faces, gestures, or sounds like a tiger when an adult reads an illustrated poem in English about tigers.
- Gestures at a picture of a baby bear and says, “Baby,” while an adult is reading *The Three Bears* in English to a small group of children.
- Comments in home language about a picture in a book, after hearing other children making comments.
- Repeats the first line of “Five Little Monkeys Jumping on the Bed,” with accompanying hand motions.
- Draws a picture and communicates, “This is a caterpillar” in Spanish! Like the book!” while playing outside, after *The Very Hungry Caterpillar* was read aloud in English.
- Communicates most of the words of “Five Little Monkeys Jumping on the Bed” and uses flannel-board pieces to show each of the monkeys falling off the bed and bumping his head.
- Communicates to a peer, “Sharks have sharp teeth to bite, and they swim fast,” while paging through a book about the ocean.
- Communicates, “My mommy kiss me before I come to school. She say, ‘I love you, hijito.’ Then she goes to work,” while reading *The Kissing Hand* with an adult. [*Hijito* is a term of endearment that is often used with young children in some South American countries.]
- Communicates, “She sat in Papa Bear’s chair. It was enorme” [“enormous” in Spanish]. She sat in Baby Bear’s chair. It was teeny and she broke it! She was really scared,” while playing with flannel-board characters in *The Three Little Bears*.

Examples
- Shows an adult a book and requests, “Can you read me this book?” in Vietnamese.
- Gestures toward a Chinese character representing own name and says name.
- Asks an adult to read a note written in home language by a parent.
- Brings tricycle to a stop when a peer holds up a stop sign.
- Points to a caption written in English under a picture and asks an adult, in home language, what it says.
- Points to the printed word “flower” under a picture of a flower and says, in home language, “That says ‘flower.’”
- Gestures to the title of a book about trucks and communicates to an adult, in home language, “This book is about trucks.”
- Asks, in home language or in English mixed with home language, “What letter is this?” while pointing to the first letter of own name on cubby label.
- Communicates in English, “M,” while gesturing at a letter on a sign written in English during a neighborhood walk (the sign may or may not have the letter M).
- Gestures toward the letter 0 on a peer’s name tag after drawing an 0 in a sand tray.
- Gestures at name printed in English and communicates, in English or home language, “That’s my name.”
- Names four English letters correctly while playing with magnetic letters with a peer.
- Communicates, “I have a T, and you have a T. I have an A, but you don’t.” while gesturing at own name and a peer’s name.
- Names all the letters in own name correctly one by one, and then gestures at a friend’s name and names several letters, while standing at the name chart.
- Recognizes words posted in the writing center, such as “Mom,” “Dad,” and “love,” after a small group activity about writing letters to family members.
- Identifies labels such as “blocks,” “door,” “books,” or “art” while showing own grandma around the room.
- Communicates to a peer, “Mira, este dice ‘s–t–o–p’ [‘Look, this says’ in Spanish]” while pointing to a stop sign to a Spanish-speaking peer.

- Communicates to a peer, “Mira, este dice ‘s–t–o–p’ [‘Look, this says’ in Spanish]” while pointing to a stop sign to a Spanish-speaking peer.

Child is emerging to the next developmental level

| Follows simple (one-step) requests in Spanish;  
  or  
  Demonstrates understanding of simple questions and comments in Spanish in the context of activities and routines | Follows two to three step instructions in Spanish;  
  or  
  Shows understanding of sentences or phrases in Spanish that communicate two or more ideas in the context of activities and routines | Shows understanding of Spanish language that refers to location of people and objects (e.g., here, there, under, over, next to) and sequences of two events in Spanish (e.g., next, now, then) in the context of activities and routines | Shows understanding that Spanish language can be used to describe sequences of events or relationships between events and people’s feelings and intentions | Shows understanding that Spanish words and phrases can have different meanings depending on the context |

#### Examples
- Pulls out notebook and pencil box from backpack when teacher says, “Saquen su cuaderno y lápices para empezar a trabajar.”
- Gestures at the picture of the little bear when teacher holds up a Corduroy book and asks, “¿Dónde está el osito?”
- Leaves desk and moves towards dramatic play area when a peer says, “¡Hora de juego libre!”
- Puts a stuffed bunny in the cradle and takes out the baby doll after a peer emphasizes, “Soy un veterinario, no un doctor.”
- Raises hand when teacher asks, “¿Quién quiere pasar al pizarrón para escribir la respuesta?”
- Passes the soccer ball and runs up the field in response to a peer calling out, “¡Pásame la pelota y vete cerca de la portería!”
- Waters potted plant and puts it on the table next to the window after teacher says, “Hoy tenemos que regar nuestras plantas. Rieguen su maceta y pónganla en la mesa junto a la ventana.”
- Puts in order two cards that represent the beginning and end scenes of a story that was read aloud in Spanish.
- Gets plates and places them on the table; then gets forks and spoons and places them on the table, in response to a peer saying, “Bueno, ya va a estar la comida. ¿Puedes poner los platos y luego los cubiertos en la mesa?”
- Describes, “¡Enojados! ¡Asustados!” when teacher asks, “¿Cómo se sienten los osos cuando ven que alguien se comió su comida?” during a discussion about The Three Little Bears.
- Shares, “Es un lobo malo,” when teacher reads a passage where the wolf suggests to Little Red Riding Hood that she take a different path to get to her grandmother’s house.
- Raises hand when teacher asks, “¿Quién quiere pasar al pizarrón para escribir la respuesta?”
- Moves quickly to her cubby, gathers her belongings and joins her mother at the door in response to her mom saying, “¡Salimos volando, que tenemos que ir al dentista!”
- Chooses an apple, setting aside the radish, from a bowl of fruits and vegetables when the teacher says, “¿Qué podemos usar para la ensalada de frutas?”

- Child is emerging to the next developmental level

**Examples**

- Says, "Muñeca, se rompió," and brings a doll to the teacher.²
- Says to a peer, "Dame ball."³
- Asks, "¿Qué es eso?"¹
- Says, "No quiero ir afuera," when teacher tells children it is time for recess.
- Asks, "¿Me puedes ayudar?"¹
- Says, "Pintó mano," in response to teacher asking, "¿Qué le pasó al niño?" while reading a story.¹
- Says, "Mi mamá me llevó al parque a jugar," in response to an adult asking, "¿Te acuerdas de lo que hiciste el domingo?"¹
- Asks peer, "¿Tienes rojo para pintar la nariz del payaso?"¹
- Says, "Se ponió un sombrero muy grande con plumas," while looking at a book.²
- Says, "Me compró una hamburguesa y jugo con la arena," in response to an adult asking, "¿Qué hiciste con tu abuelito ayer?"¹
- Says, "El señor estaba pintando y el niño vino y se manchó toda la ropa y las manos," while turning the pages of a book.
- Says to a peer, "Me voy a comprar un regalo y después voy al birthday party. Tú te quedas aquí," during pretend play.
- Says, "Me puse la ropa y comí cereal y mamá me trajo a la escuela."²
- Explains, "A ella le duele la cabeza. La mamá la va a venir a buscar."²
- Says to a peer, "No la empujes. Se va a caer," while playing outside at recess.
- Says, "Está lloviendo y no vamos a poder jugar afuera. Nos vamos a mojar," while looking out the window. (Consequence)
- Says, "Tenemos que lavarnos los dientes para que no se piquen," in response to adult asking, "¿Por qué tienen que lavarse los dientes?" (Goal and cause)
- Says, "Estaba triste porque no podía encontrar su cat," and gestures at a picture in a storybook.
- Says, "Una vez vi una película de unos perros que viajaron a la luna. It was funny!" in response to the teacher asking "¿Qué película te gustó más?" (Opinion)
- Says, "Este perro está comiendo toda la comida que tiene en su plato. Tiene hambre," while drawing.
- Says, "Estaba triste porque no podía encontrar su cat," and gestures at a picture in a storybook.
- Says, "Una vez vi una película de unos perros que viajaron a la luna. It was funny!" in response to the teacher asking "¿Qué película te gustó más?" (Opinion)

¹ The term "utterance," as opposed to sentences, more accurately reflects how young children speak. Young children may combine words and produce language with different word combinations, but may not speak using complete sentences.

² "Elaborated language" refers to the use of more complex syntax, relative clauses, and vocabulary.

³ Grammatical error in the example is common at this level of a child’s Spanish language development.

● Child is emerging to the next developmental level
● If you are unable to rate this measure, explain here:
### SPAN 3: Phonological Awareness in Spanish

Child increasingly develops knowledge of sounds in Spanish

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Developmental Domain: SPAN – Language and Literacy Development in Spanish</th>
<th>SPAN 3: Phonological Awareness in Spanish</th>
<th>Child increasingly develops knowledge of sounds in Spanish</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Discovering Spanish</strong></td>
<td><strong>Exploring Spanish</strong></td>
<td><strong>Developing Spanish</strong></td>
</tr>
<tr>
<td>Engages in play with sounds in Spanish words through songs, poems, rhymes, chants, and riddles</td>
<td>Demonstrates awareness of larger units of language in Spanish, such as words in a phrase or a sentence</td>
<td>Segments or blends Spanish words that have at least two consonant-vowel syllables</td>
</tr>
</tbody>
</table>

**Examples**

- Sings some words of familiar song **A la rueda, rueda** or **Cucú cantaba la rana.**
  (A song that focuses on beginning and ending sounds.)
- Participates in a chant that emphasizes syllables, **“Uno, dos, tres, cho. Uno dos, tres, co. Uno dos, tres, la. Uno dos tres, te. Chocolate. Bate. bate, chocolate.”**
- Sings some words of a familiar rhyming song **Naranja dulce** with a peer.
- Claps out the words while communicating, **“Yo soy Elena.”**
- Fills in the rhyming word **“mañana,”** in response to teacher saying, **“Sana, sana, colita de rana. Si no sana hoy, sanará. . . .”** while putting a bandage on a cut.
- Communicates, **“Ana,”** in response to the teacher asking whose name rhymes with “rana” during a rhyming name game.
- Taps out syllables of each word while communicating “**ga-to, ra-ta, ca-sa,”** with matching picture cards.
- Blends two consonant-vowel syllables to form the words, **“vaso, foto, lupa,”** in response to the teacher saying the syllables in each word separately, **“va-so, fo-to, lu-pa,”** during a small group science activity.
- Claps out syllables for own name and communicates, **“Ca-ri-na.”** Then counts the total number of syllables, 3, during a teacher-guided small group activity where children sort their names by number of syllables.
- Claps out and communicates syllables for the words, **“a-gua” and “e-le-fan-te”** with matching picture cards for support.
- Segments words by clapping syllables and communicating, **“a-be-ja, a-ra-ña, a-la-ña,”** while participating in animal riddles in a small group with the teacher.
- Blends syllables to make the words **“pa-an,”** **“pa-pan,”** and **“pa-pan,”** during a word game with the teacher prompting, **“pia-no, tor-ta, fies-ta.”**
- Sings, **“Mónica y Michelle”** into a play microphone in response to teacher asking, **“¿Puedes cantar los nombres que empiezan con ‘c’ (letter sound)?”**
- Identifies groups of objects in the classroom with same initial syllable such as **me-** for “mesa” and **Melissa” or la- for “lámpara,” “lámpara,” and “Lara” in response to teacher prompt.
- Finds different objects in a jar with same sounds in the final syllable such as, **sa-** in “mesa” and “pesa” or **pa-** in **“sopa” and “copa”** or **sa-** in **“sapo” and “zapato.”**
- Recites a poem with peers in a low voice, shouting out words that begin with the same syllable, **co-** or **po-** “Cocodrilo, come poco, muy poquito, poco a poco…” in response to teacher prompt.
- Sings, “**Mónica y Michelle” into a play microphone in response to teacher asking, “¿Puedes cantar los nombres que empiezan con ‘c’ (letter sound)?”**

---

1. The rhymes and songs listed in the examples are common to Spanish-speaking countries of the Americas; the titles have not been translated into English.

2. Child segments a monosyllabic word into two syllables to maintain consonant-vowel, consonant-vowel structure. This error is common for this level of a child’s Spanish language and literacy development.

- **Child is emerging to the next developmental level**
- **If you are unable to rate this measure, explain here:**
Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Discovering Spanish</th>
<th>Exploring Spanish</th>
<th>Developing Spanish</th>
<th>Building Spanish</th>
<th>Integrating Spanish</th>
</tr>
</thead>
<tbody>
<tr>
<td>Makes marks and scribbles using a variety of writing tools (e.g. pencil or marker on paper, chalk on sidewalk, etc.)</td>
<td>Writes marks and letter-like symbols; and Writes own name in Spanish</td>
<td>Writes simple Spanish words using one or more letters or letter-like symbols for each syllable</td>
<td>Writes Spanish words that differ from one another in the use of a single letter or the pattern of letters used for each syllable</td>
<td>Writes simple sentences in Spanish to communicate ideas to others, often with errors</td>
</tr>
</tbody>
</table>

**Examples**

- Imitates writing when signing in at arrival (writing looks like a zigzag line).
- Makes marks and scribbles when writing a message on a get-well card to one of her peers.
- Writes own name on his work using shapes and symbols.
- Uses a combination of letters and letter-like symbols to write a grocery list of a few items during dramatic play and then communicates to peer in Spanish about the items on the list.
- Makes a card for her father and includes the word “papá,” and communicates, “Es la pa- de papá.”
- Writes, “oi kome pbaana” to represent “Hoy comí banana.” (Incorporates the “p” [letter sound] from English in Spanish writing for “b” [letter sound]. Uses the letter K instead of C.)

Child is emerging to the next developmental level, explain here:

</tr>
</tbody>
</table>

Examples:

- Separates blocks into a blue pile and a green pile, leaving a few green blocks in the blue pile.
- Sorts rocks into two piles, big and small, after a neighborhood walk.
- Picks out toy trucks from a basket of toys and sets them on a nearby shelf, and then picks out toy cars from the basket and sets them on a different shelf.
- Separates a pile of toy animals by kind (e.g., dogs, cats, and birds).
- Puts crayons, pencils, and markers into different containers.
- Sorts a group of big squares and little squares into two piles by using eye gaze to indicate where an adult should put each square.
- Sorts buttons by color, and then sorts all of them again by shape or size.
- Sorts shoes based on color, and then re-sorts all of them by type (e.g., slippers, boots, tennis shoes).
- Sorts flannel-board pieces by type (e.g., shoes, pants, and shirts), and then re-sorts all of them by what is worn on a hot day and what is worn on a cold day.
- Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).
- Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).
- Sorts buttons by color, and then sorts all of them again by shape or size.
- Sorts shoes based on color, and then re-sorts all of them by type (e.g., slippers, boots, tennis shoes).
- Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).
- Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).
- Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).
- Places a variety of apples into three bowls based on color, counts the number of apples in each bowl and communicates, “The most apples we have are green, then red, then yellow.”
- Sorts cards used to track the weather during the month and counts the number of cards in each category to report how many sunny, cloudy, and rainy days there were that month.
- Organizes the forks and spoons, and communicates, “We have more spoons than forks and more small spoons than large spoons.”

<td>Solves simple everyday problems involving numbers by counting up to 10 objects using one-to-one correspondence; and Recites numbers correctly, up to 20</td>
<td>Recites numbers in order up to 100 by ones and by tens, starting at any given number; and Counts at least 20 objects correctly using one-to-one correspondence; and Demonstrates understanding that teen numbers are composed of ten and additional ones (10-19); and Reads and writes two digit numerals up to 100</td>
<td></td>
</tr>
</tbody>
</table>

**Examples**

- Communicates a desire for two apple slices after noticing that a peer has two apple slices.
- Communicates, “Three dogs,” while looking at a picture of three dogs.
- Communicates, “Now I have one bear and you have one,” while giving a peer a counting bear.
- Counts out loud, “One, two, three, four, five,” saying the next number as the next cup is placed on the table.
- Chants numbers from one to 10 in order while waiting for a drink at the water fountain.
- Counts, “One, two, three,” out loud while pointing to each of three squares on a light box.
- Counts ducks in a story book, “One, two, three, four, five,” and then communicates that there are five.
- Communicates that there are six cubes after counting a collection of six cubes.
- Counts four pencils and says, “Four,” when asked how many pencils there are.
- Counts six chairs, then counts seven children, and communicates, “We need one more chair.”
- Counts accurately to 20 while marching.
- Counts on fingers to determine how many pencils to get so that each child at a table of six has one.
- Counts days on a number chart continuously up to 100 marking the 100th day of school on the class calendar.
- Arranges 25 small rocks in a line, and counts them in order, one at a time.
- Separates 14 flowers into two groups, 10 and 4, and communicates, “All together there are 14.”
- Writes down the number “12” to indicate how many peers like red apples.
- Counts 34 straws by first counting three bundles of ten straws, “ten, twenty, thirty,” and then counts four loose straws “31, 32, 33, 34,” and writes down that there are “34” straws.
- Draws six circles and marks ten lines in each circle and communicates, “There are sixty all together.”
- Communicates, “93 is bigger than 85,” and places a “>” symbol between the numbers.
- Counts by tens up to 100 and then continues by ones “101, 102, 103, 104, 105, 106, 107, 108, 109, 110.”

**Child is emerging to the next developmental level**

</tbody>
</table>

**Examples**

- Communicates, “Now we have three,” when adding a third snail to the two collected from the yard.
- Communicates, “Only two left,” when an adult removes a torn bean bag from a group of three bean bags.
- Gives one of two cars to another child, and then communicates, “I have one and you have one.”
- Adds one counting bear to a group of four, and counts, “I have one . . . two . . . three . . . four . . . five.”
- Removes two of seven ducks from a flannel board and counts the remaining ducks, and then communicates that there are five left.
- Adds two cars to a train with four cars, counts the number of cars, and communicates that there are now six cars.
- Watches an adult add two markers to a group of four markers, counts the total number, and communicates that there are six.
- Communicates, “I had four hair clips, but I gave one to my sister. Now I have three.”
- Holds up five fingers on one hand and three fingers on the other hand and counts to self, “1, 2, 3, 4, 5, 6, 7, 8,” when presented with a word problem about how many balloons you would have if you were given five balloons and then three more balloons.
- Solves the problem: “7 + 2,” presented on a worksheet by drawing seven circles, then drawing two more circles, and counting the total number of circles.
- Removes three cars and counts the number of cars left: “1, 2, 3, 4, 5, 6, 7,” and replies “7” when adult asks, “You have 10 cars, if I took 3 away, how many would you have left?”
- Writes the equation “11 + 3,” then counts aloud, “11, 12, 13, 14,” and replies “14,” when presented with a word problem about a child who has 11 balloons and gets three more balloons. (count–on strategy)
- Communicates, “12 minus 2 is 10, and then 10 minus 1 is 9,” when explaining her solution to the problem: “12 minus 3.” (make a 10 strategy)
- Communicates, “8 plus 2 is 10, so it is two,” when presented with the subtraction problem: “10 minus 8.” (subtraction is inverse to addition strategy)
- Communicates, “7 plus 3 is 10 and then 2 more is . . . 10, 11, 12. There are 12,” when solving the equation: “7 plus 2 plus 3.” (make a 10 and count–on strategies)

### REQUIRED MEASURE

- Child is emerging to the next developmental level

<td></td>
</tr>
<tr>
<td>Identifies growing patterns (i.e., patterns that increase with every repetition) by describing their numeric or geometric progressions</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Examples**

- **Building**
  - Lines up toy farm animals in the same order as a peer does.
  - Repeats series of actions of touching head, shoulders, knees, and toes during the song “Head, Shoulders, Knees, and Toes.”
  - Creates a simple repeating pattern using two different stamps, such as circle, star, circle, star.
  - Claps, stomps, and then repeats.
  - Paints pairs of green and yellow dots, making a pattern of two green, two yellow, two green, two yellow (numbers of dots may not be consistent).
  - Continues a simple repeating pattern of drumbeats started by an adult.
  - Builds a fence out of blocks, continuing the pattern begun by a peer: tall block, short block, tall block, short block.
  - Extends a simple repeating pattern of colors on a computer, using a touch screen.
  - Add cubes to continue red-yellow-blue pattern.
  - Makes up a rhythmic sequence by clapping, patting, and stomping.
  - Makes a fruit kebab in a repeating sequence of banana, strawberry, blueberry, banana, strawberry, blueberry, like a fruit kebab that another child is eating.
  - Observes the square-circle-circle pattern on the rug and communicates, “Square, circle, circle repeats over and over.”
  - Creates a movement pattern of jump-clap-clap to match the musical sounds of drum-cymbal-cymbal.
  - Strings beads in a red-red-blue-blue pattern and communicates, “It’s the same like that one with green-green-purple-purple, but with different colors.”
  - Communicates, “This is the smallest square and then it is getting bigger and bigger,” when describing the progression in a square growing pattern.
  - Communicates, “Here there is one circle, then there are two more circles and here there are three more circles, so the next one will have four more circles.”
  - Points to a growing pattern they built in a group activity and communicates, “This house has one square and one triangle, this one has two squares and two triangles, and this house has three squares and three triangles.”

- **Integrating**

**Child is emerging to the next developmental level**

#### Examples

- **Acts on objects to cause a specific result**
  - Communicates, "The ice melted and made water because it's hot in the sun."
  - Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."
  - Communicates when seeing ducks flying overhead, "The ducks are leaving because it is getting cold and the water they swim in will become ice and they won’t have anywhere to swim."
  - Communicates during lunch, "I eat my whole sandwich because food makes me full of energy, and then I can run really fast."
  - Communicates, "The ice melted and made water because it's hot in the sun." during outdoor play.
  - Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."
  - Communicates when seeing ducks flying overhead, "The ducks are leaving because it is getting cold and the water they swim in will become ice and they won’t have anywhere to swim."
  - Communicates during lunch, "I eat my whole sandwich because food makes me full of energy, and then I can run really fast."

- **Acts in ways that take into account an anticipated result**
  - Gets rocks to hold paper down during an outdoor art activity on a windy day.
  - Puts hands over ears before someone pops a balloon or makes another type of loud noise.
  - Covers or shields eyes when an adult is going to turn on a light.
  - Communicates that the lettuce in the garden is all gone and that maybe a rabbit ate it.
  - Communicates, "The ice melted and made water because it's hot in the sun."
  - Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."
  - Communicates when seeing ducks flying overhead, "The ducks are leaving because it is getting cold and the water they swim in will become ice and they won’t have anywhere to swim."

- **Offers possible explanations for why certain actions or behaviors result in specific effects**
  - Points to wilted leaves on a plant and communicates that the plant needs water.
  - Communicates that the lettuce in the garden is all gone and that maybe a rabbit ate it.
  - Communicates, "The ice melted and made water because it's hot in the sun."
  - Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."

- **Shows understanding that variations in actions or degrees of actions with the same objects or materials cause different results**
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."
  - Communicates when seeing ducks flying overhead, "The ducks are leaving because it is getting cold and the water they swim in will become ice and they won’t have anywhere to swim."
  - Communicates during lunch, "I eat my whole sandwich because food makes me full of energy, and then I can run really fast."

- **Shows understanding that effects may arise from causes that are not easily perceived or that actions can cause an effect that causes another effect**
  - Communicates, "The ice melted and made water because it's hot in the sun."
  - Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."

- **Conducts investigations to gather evidence to support ideas about causes of observable events**
  - Communicates, "The ice melted and made water because it's hot in the sun."
  - Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."

- **Earlier**
  - Communicates, "The ice melted and made water because it's hot in the sun."
  - Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."

- **Middle**
  - Communicates, "The ice melted and made water because it's hot in the sun."
  - Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."

- **Later**
  - Communicates, "The ice melted and made water because it's hot in the sun."
  - Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
  - Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
  - Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."

**Examples**

- Pours water into a water wheel to make it spin.
- Puts a toy car in a tube and watches it roll out the other end when the tube is tilted.
- Pulls or directs an adult to pull a tab in an interactive book.
- Gets rocks to hold paper down during an outdoor art activity on a windy day.
- Puts hands over ears before someone pops a balloon or makes another type of loud noise.
- Covers or shields eyes when an adult is going to turn on a light.
- Communicates, "The ice melted and made water because it's hot in the sun."
- Points to wilted leaves on a plant and communicates that the plant needs water.
- Communicates that the lettuce in the garden is all gone and that maybe a rabbit ate it.
- Communicates, "The ice melted and made water because it's hot in the sun."
- Communicates, "If I kick the ball harder, it will go really far!" during outdoor play.
- Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
- Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."
- Communicates when seeing ducks flying overhead, "The ducks are leaving because it is getting cold and the water they swim in will become ice and they won’t have anywhere to swim."
- Uses a ruler to measure how far a marble travels on the ground each time it rolls down a ramp of a different height.
- Keeps track of the effect of light on plants by taking daily pictures of one plant placed near a window and a similar plant placed in a shaded area away from the window.
- Pushes a ball with varying strength (big, medium, and small force) to knock down pins. Predicts, "A bigger push will make the ball speed up, and then more pins will fall down."
- Communicates, "We need to wash our hands with soap to get rid of the germs so we don't get sick."
- Communicates, "We need to recombine tubes to make the ball come out in the other direction and explains, "When the ball comes out this way it hits the wheel and makes it turn."
- Communicates when seeing ducks flying overhead, "The ducks are leaving because it is getting cold and the water they swim in will become ice and they won’t have anywhere to swim."

Examples:
- Watches a new fish in the tank closely for several minutes, then calls a peer over to watch the fish, too.
- Notices a drooping plant and comments, “How can we make it better?” and tries different ways to support it, such as holding it or leaning it against something.
- Observes a squirrel outside for awhile, and then asks, “Where did it go?” after the squirrel went up a tree.
- Indicates that a “roly-poly” bug will roll up into a ball if touched, and then checks by touching it.
- Communicates that when you add water to flour, that the flour will be sticky, during a small group activity led by an adult.
- Predicts that paint will turn purple while watching an adult mix together blue and red paint.
- Predicts that a rock is heavier than a shell, and then uses a balance scale to show that the rock is heavier.
- Communicates that a tennis ball will go down the ramp faster than a plastic ball, but more slowly than a golf ball, and then rolls the balls several times to see which reaches the bottom first.
- Participates in making a chart of how much the temperature changed each day, during a small group activity led by an adult.
- Asks an adult, “How do you know if a fruit is really a fruit?” After adult responds that fruit have seeds, plans with adult to open up several different types of fruits to see if they all have seeds.
- Participates in making a chart to compare change, over time, in the growth of bean plants, and communicates, “I think this bean plant grew taller because it got more sun next to the window.”
- Participates in setting up a chart to observe how long it will take for a silkworm to create a cocoon and turn into a butterfly.
- Asks an adult, “How much will the temperature change?” After adult responds that fruit have seeds, plans with adult to open up several different types of fruits to see if they all have seeds.
- Participates in making a chart to compare change, over time, in the growth of bean plants, and communicates, “I think this bean plant grew taller because it got more sun next to the window.”
- Participates in setting up a chart to observe how long it will take for a silkworm to create a cocoon and turn into a butterfly.
- Measures the height of bean plants, and then finds a book to see how tall the bean plants will grow.
- Places different materials (i.e., wax paper, cardboard, clear plastic) in front of a beam of light and records the level of transparency (e.g., block all of the light, blocks some of the light, or allows the light to pass through).
- Records how the sun appears to move by observing sunny areas of the yard in the morning, noon, and afternoon and then predicts how the sun will move across the sky the next day.
- Determines how much the temperature changes throughout the day by observing and recording the temperature on the thermometer at the beginning, middle, and end of the day.

©2017 California Department of Education, with additional enhancements created in collaboration with the Illinois State Board of Education
### Documentation and Communication of Inquiry

**Developmental Domain:** Cognition: Science (COG: SCI)

**COG: SCI 3: Documentation and Communication of Inquiry**

Child develops the capacity to describe and record observations and investigations about objects (living and nonliving things) and events, and to share ideas and explanations with others.

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier</strong></td>
<td><strong>Earlier</strong></td>
</tr>
<tr>
<td><strong>Middle</strong></td>
<td><strong>Middle</strong></td>
</tr>
<tr>
<td><strong>Later</strong></td>
<td><strong>Later</strong></td>
</tr>
</tbody>
</table>

**Communicates similarities or differences in the characteristics of objects**

- Records information in simple ways (e.g., drawings, models, words dictated to an adult) about observations or investigations
- Includes details when recording observations or investigations
- Participates in recording detailed information by tallying, charting, simple graphing, or making complex drawings;
  - and
  - Communicates about findings, related ideas, or simple explanations
- Identifies patterns by summarizing recorded data (e.g., tallies, charts, simple graphs) in order to describe detailed findings to others
- Constructs thoughtful explanations based on recorded evidence and communicates explanations to others

**Examples**

- Communicates, "This one has a leaf, but that one doesn’t," after an adult asks, “How are our plants doing?”
- Gathers several rocks while outside and communicates which are heavy and which are light.
- Communicates, “The grapefruit is big. The lemon is small.”
- Uses sign language to describe what a worm feels like and what a caterpillar feels like.
- Looks at an ant through a magnifying glass, and then draws a simple picture of what it looked like.
- Holds and looks at a caterpillar closely, and asks an adult to write down, “It’s wiggling. It tickles.”
- Takes photos each week of what happens with sunflower seeds that were planted and puts the pictures together in a book.
- Draws a picture of a butterfly and communicates about its body parts, showing the head, legs, and four wings.
- Glues pumpkin, watermelon, and apple seeds on a page and communicates which is biggest and which is smallest.
- Observes a bird nest and tries to create a model nest, using clay, twigs, and other materials.
- Draws a picture of a recent rainstorm, including clouds, slanted raindrops, puddles, and lightning, and shares it with peers.
- Collaborates in collecting data, using tally marks to show objects that stick to a magnet and objects that do not, and shares results in a discussion facilitated by an adult.
- Sorts flannel-board animals into two columns—animals that live in the water and animals that live on land—and communicates, “Some animals that live in the water have fins.”
- Uses tally marks to record other children’s favorite colors. Counts the tallies and states, “Six like green and five like pink. Green is the most favorite color.”
- Observes a chart that groups animal habitat into two columns, labeled “land” and “water,” and communicates, “Some animals are in both columns because they can live on land and in water.”
- Shows a graph of an experiment with a ramp and communicates, “When we made the ramp higher the car went really fast, but when it was lower the car didn’t go very fast.”
- Uses tally marks to record the level of transparency of different materials placed in front of a beam of light and then communicates, “You can’t see the light beam when the cardboard is in front of it because cardboard doesn’t have any holes.”
- Reviews a chart that shows the measurements of a plant placed near the window and a plant placed in the closet and explains, “The one in the closet did not grow because it did not have sunlight.”

- Observes a graph about the speed of cars going down ramps of different heights and communicates, “We need to make the ramp really high to make the car go fast because the higher ramp gives the car more power.”
- Records the level of transparency of different materials placed in front of a beam of light and then communicates, “You can’t see the light beam when the cardboard is in front of it because cardboard doesn’t have any holes.”
- Reviews a chart that shows the measurements of a plant placed near the window and a plant placed in the closet and explains, “The one in the closet did not grow because it did not have sunlight.”

**Child is emerging to the next developmental level**

If you are unable to rate this measure, explain here:
## COG:SCI 4: Knowledge of the Natural World

Child develops the capacity to understand objects (living and nonliving things) and events in the natural world, including how they change and their characteristics.

### Mark the latest developmental level the child has mastered:

<table>

<td><em>Demonstrates knowledge of the relationship between what living things need to survive and where they live</em></td>
</tr>
</tbody>
</table>

### Examples

- Communicates, “My puppy likes to eat a lot because he’s growing and getting bigger.”
- Communicates, “The clouds are moving so fast. They cover the sun and then I can’t see it.”
- Communicates, “It needs lettuce to grow. All animals need food; after reading a book about a rabbit.”
- Communicates, “I saw cactus in the desert. Cactus don’t need a lot of water so they can live in the desert.”
- Touches wet ground and communicates, “Muddy.”
- Communicates that a worm is long and wiggly.
- Identifies different animal sounds when visiting a zoo or farm.
- Observes that the water is below the roots in a sweet-potato jar and adds more water.
- Observes that lemons are sour and oranges are sweet, when tasting lemons and oranges.
- Communicates, “Animals live in shells, but not in rocks.”
- Observes the sky and communicates, “The sun is always in the front yard in the morning and in the back yard in the afternoon.”
- Communicates, “You find worms in the dirt and bees on the flowers.”
- Communicates, “Fish can breathe underwater, but we have to hold our breath.”
- Communicates that a friend fell down and hurt a knee and that the knee has to be covered until it is all better.
- Communicates, “Because fish live under water, they need gills to breathe.”
- Communicates, “Fish can breathe underwater, but we have to hold our breath.”
- Communicates, “The eggs became tadpoles, and then the tadpoles grew into frogs.”
- Observes the sky and communicates, “The sun is always in the front yard in the morning and in the back yard in the afternoon.”

### Knowledge of the Natural World

©2017 California Department of Education, with additional enhancements created in collaboration with the Illinois State Board of Education
### Developmental Domain: PD – Physical Development

#### PD 1: Perceptual-Motor Skills and Movement Concepts

Child moves body and interacts with the environment, demonstrating increasing awareness of own physical effort, body awareness, spatial awareness, and directional awareness.

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Earlier</td>
</tr>
<tr>
<td>Middle</td>

<td>Later</td>
<td>Later</td>
</tr>
</tbody>
</table>

- **Tries different ways to coordinate movements of large or small body parts**
- **Adjusts aspects of movement (e.g., effort, spatial, directional) in relation to people and objects, with adult guidance**
- **Anticipates and adjusts aspects of movement (e.g., effort, spatial, directional) on own in relation to people and objects in familiar spaces**
- **Maintains spacing of body in relation to coordinated movements of others while coordinating own body movements**
- **Adjusts movement of body in time and space to meet the requirements of structured physical play activities, including games and dance**

**Examples**

- Changes movements when shaking the parachute during gym or recess.
- Starts and stops movements of different body parts during a freeze-dance game.
- Moves over, under, around, and through large objects in an obstacle course, sometimes bumping them.
- Avoids bumping into orange cones on a path for wheel toys by moving around them, after an adult points to the cones.
- Raises knees high when following an adult marching.
- Moves away from a nearby child after an adult communicates, "Make sure you have enough room to stretch without bumping your neighbor."
- Changes pathway of movement from straight to curved or zigzag when following another child during a game of follow the leader.
- Pedals a wheel toy harder to go faster when catching up to another child on a wheel toy.
- Uses feet to slow self when coming down a ramp.
- Reaches for a small pitcher of milk without bumping into other objects on the table during lunch.
- Carries a large-sized empty box through a doorway, with the help of another child.
- Tries several different ways to move through sections of a new obstacle course.
- Walks carefully after slipping on wet leaves or grass during a nature walk.
- Moves in sync with others who are moving in the same direction while dancing or marching.
- Stands back-to-back with another child, links arms, then walks forward and backward, coordinating movements together.
- Maintains spacing while performing a traditional group folk dance (such as ‘circle dosie-do’).
- Tries to maintain group spacing when moving together down the field toward an opponent’s end during a game.
- Engages in a soccer-type game, maintaining spacing of self in relation to other teammates, and passing ball when another teammate is open.
- Places self in a defensive position in relationship to an opponent approaching a basketball net.
- Maintains group spacing in a sequenced ribbon dance and moves ribbons in unison with other dancers.

*Child is emerging to the next developmental level*

*If you are unable to rate this measure, explain here:*
### PD 2: Gross Locomotor Movement Skills

Child shows increasing proficiency in fundamental locomotor skills (e.g., rolling, crawling, cruising, walking, running, jumping, galloping)

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Developmental Domain: PD – Physical Development</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PD 2: Gross Locomotor Movement Skills</strong></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>

<td><strong>Middle</strong></td>
</tr>
<tr>
<td>Attempts to coordinate movements, in an upright position, that momentarily move whole body off the ground</td>
<td>Coordinates and controls individual locomotor movements, with some success</td>
</tr>
</tbody>
</table>

**Examples**

- Runs with short strides, and sometimes has difficulty stopping.
- Gallops for a few steps at a time.
- Moves along a low balance beam or along the side of a curb, stepping sideways.
- Navigates changes in surface and direction using a mobility aid, such as a walker.
- Runs with long strides, showing arm and leg opposition (e.g., right arm and left leg).
- Crouches down and then jumps forward using both legs.
- Hops on one foot, holding arms out for balance and sometimes putting a foot down in between hops.
- Runs fast with long stride and speed, consistently showing arm and leg opposition (e.g., right arm and left leg).
- Changes direction and stops quickly and easily while running.
- Swings arms back and then forward in preparation for jumping.
- Moves wheelchair through an obstacle course, first going straight, then turning quickly, then turning quickly again.
- Changes body speed and position with quick movements to match rhythmic changes in music.
- Leaps over low objects by varying speed and stride while running.
- Dodges to avoid being touched by another player during a game of tag.
- Uses arms to propel wheelchair through narrow spaces, making adjustments in speed and direction to avoid bumping into objects.
- Moves body while bouncing and catching a ball in response to changes in a rhythmical beat.
- Runs and moves a ball down the field, as in the game of soccer.
- Steps towards the T-ball stand while swinging a bat to hit the ball.
- Plays a modified game of volleyball with a beach ball or large balloon, keeping the object in the air while passing it to a teammate.
Developmental Domain: PD – Physical Development

PD 3: Gross Motor Manipulative Skills
Child shows increasing proficiency in gross motor manipulative skills (e.g., reaching, kicking, grasping, throwing, and catching)

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier</strong></td>
<td><strong>Earlier</strong></td>
</tr>
<tr>
<td><strong>Middle</strong></td>
<td><strong>Middle</strong></td>
</tr>
<tr>
<td><strong>Later</strong></td>
<td><strong>Later</strong></td>
</tr>
</tbody>
</table>

**Examples**

- Practices throwing a ball by bringing it behind the head, sometimes dropping it but continuing the arm motion.
- Bends knees and jumps up to move a parachute or bed sheet that is also being held by others, sometimes losing grasp.
- Swings leg back to kick a stationary ball while standing in place.
- Hands out carpet squares to peers at circle time, sometimes dropping them.
- Catches a stuffed animal, with hands, keeping arms extended and then uses hands to hold onto it.
- Steps and kicks a stationary ball, showing arm and leg opposition (e.g., left foot forward, right arm back), pausing briefly between stepping and kicking.
- Reaches up to take a hat off a hook, pauses to regain balance, and then puts hat on head.
- Uses hands to catch a beanbag tossed to either side of the body.
- Strikes a ball off a cone, using a bat, with a horizontal swing and rotation of upper trunk.
- Runs up to a stationary ball, plants foot next to the ball, and then swings leg for a forceful kick.
- Runs, with arm and leg opposition (e.g., left foot forward, right arm back), to try to catch a butterfly with a net.
- Runs and kicks a moving ball forcefully, showing arm and leg opposition (e.g., left food forward, right arm back), maintaining balance.
- Bounces a ball several times while walking.
- Plays catch with a friend using progressively more force to throw the ball while moving farther away from the friend.
- Moves quickly and precisely to catch a beanbag or tennis ball thrown just outside of reach.
- Plays soccer with peers, moving a ball down the field, kicking the ball to a teammate or goal, and sometimes tossing ball in-bounds.
- Tosses and catches a foam ball with a peer while moving closer to and away from the peer, tossing the ball higher or lower and to the left or right.
- Throws for accuracy and distance and catches fly balls and ground balls while playing T-ball with peers.
- Plays soccer with peers, moving a ball down the field, kicking the ball to a teammate or goal, and sometimes tossing ball in-bounds.
- Uses a hoop, ball, or other manipulative object, while moving in a rhythmic sequence.

Child is emerging to the next developmental level, explain here:

Gross Motor Manipulative Skills

©2017 California Department of Education, with additional enhancements created in collaboration with the Illinois State Board of Education
## Developmental Domain: PD – Physical Development

### PD 4: Fine Motor Manipulative Skills

Child demonstrates increasing precision, strength, coordination, and efficiency when using muscles of the hand for play and functional tasks.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>

#### Examples

- **Building**
  - Manipulates objects with one hand while stabilizing the objects with other hand or with another part of body.
  - Manipulates objects with both hands doing different movements.
  - Manipulates objects using hands with strength, accuracy, and coordination.

- **Integrating**
  - Performs with efficiency a variety of tasks that require precise manipulation of small objects.
  - Performs a variety of tasks with sequential steps that require precise and coordinated use of both hands to manipulate or reposition small objects.

- **Examples**
  - **Building**:
    - Holds play dough with one hand while cutting it with a wooden knife.
    - Steadies a container of block accessories on lap while picking out the tree-shaped blocks.
    - Scoops sand into a container with one hand while holding the container with other hand.
    - Uses scissors to cut out simple shapes (e.g. circle, square) on paper.
    - Pushes a cord through a large bead, using one hand, while moving the bead onto the cord with the other hand.
    - Peels a banana or orange after adult starts the peel.
    - Buttons two to three large front buttons on a shirt.
    - Takes a cap off of a marker by twisting with one hand, then pulling with both hands in opposite directions.
    - Starts the peel on a banana or mandarin orange.
    - Unfastens buckle on chest strap of wheelchair.
    - Fastens snaps on pants made of thicker, stiffer materials, such as denim jeans.

- **Integrating**
  - Makes a necklace by stringing a variety of small beads with narrow holes.
  - Uses scissors held in one hand to cut a pattern that has angles and curves, pausing to reposition the scissors with the other hand.
  - Rotates pencil within the hand to use the eraser when scribbling with a pencil.
  - Uses scissors to cut more challenging materials such as fabric or cardstock during an art activity.
  - Ties a bow using thick shoelaces.
  - Uses scissors held in one hand to cut a pattern that has angles and curves, while maintaining continuous cutting motion.
  - Ties a bow using thin laces or ribbon.
  - Holds and manipulates multiple marbles in one hand.
  - Holds several cards in one hand while using the other hand to pull out a card to play during a card game.

**Child is emerging to the next developmental level**

- Follows basic safety practices, with close adult supervision
- Follows basic safety practices on own in familiar environments, with occasional adult reminders
- Follows basic safety practices on own in familiar and novel situations
- Communicates an understanding of some safety practices to others
- Identifies potentially unsafe situations and communicates the need to be safe to others
- Identifies potentially unsafe situations and communicates detailed strategies for staying safe to others

<table>
<thead>
<tr>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>▶ Stops and reaches for an adult’s hand when approaching a crosswalk.</td>
</tr>
<tr>
<td>▶ Tries to buckle own seat belt as an adult buckles other children on the bus before going on a field trip.</td>
</tr>
<tr>
<td>▶ Seeks adult assistance to use a step stool in order to obtain an object out of reach.</td>
</tr>
</tbody>
</table>

- Cleans up spills during a cooking activity.
- Waits turn to climb ladder on outside play equipment, with an adult reminder.
- Slows tricycle as a peer approaches.
- Stays behind the boundaries set up by adults to designate the swing-set area.
- Follows classroom safety rules when using scissors, such as holding scissors with blade pointed down.
- Brings helmet for an adult to put on child’s head before riding a tricycle on a family walk.
- Explains, “I wait for the walk sign and hold my mom’s hand before I cross the street.”
- Holds out arm to stop a peer from walking through a spill on the floor.
- Communicates, “Slow down! No running inside!” to a peer.
- Communicates to a peer who is running, “Be careful, you might knock somebody over.”
- Communicates to a peer, “You should be careful when you use scissors.”
- Communicates, “George has climbed a ladder and the ladder is tipping and George could fall,” while reading a *Curious George* book.
- Communicates to a peer, “Be careful so you don’t slip,” in response to water spilled on the floor.
- Communicates to a peer, “I look both ways when I cross the street because I don’t want any cars to hit me, then I go across carefully.”
- Uses a paper towel to mop up water under the drinking fountain while explaining to a peer that she should walk around the water until it dries, because she might slip and fall.
- Communicates to a peer, “You need to walk down the stairs during a fire drill instead of running into me, and watch where you are going, so that everyone gets out safely.”
- Communicates to a peer, “Don’t eat the whole muffin at once, you might choke. Take smaller bites and chew longer.”

---

©2017 California Department of Education, with additional enhancements created in collaboration with the Illinois State Board of Education
**Developmental Domain: HLTH – Health**

**HLTH 2: Personal Care Routines**

Child understands, responds to, and initiates personal care routines and shows increasing knowledge and skills of how and when to apply them.

---

**Mark the latest developmental level the child has mastered:**

<td>Initiates and completes on own some familiar personal care routines</td>
<td>Initiates and completes on own all personal care routines; and</td>
</tr>
</tbody>
</table>

---

**Examples**

- Puts hands under running water and reaches for soap to wash hands and paper towel to dry hands while looking at the picture sequence showing the steps to washing hands above the sink.
- Imitates adult “coughing in elbow” during circle time discussion, but does not contain cough in elbow.
- Rubs lotion on arms after watching adult do so.
- Washes hands quickly, forgetting to rub soap between the fingers, and rinses hands leaving some soap on hands, in response to adult instruction to wash hands with soap and water.
- Brushes sand off legs after being reminded by adult, but misses a few spots.
- Flushes, rinses hands with water but forgets to use soap, and moves away without drying hands, after adult says, “Be sure to flush the toilet before you wash your hands.”
- Follows all steps for washing hands while following picture prompts posted on the wall.
- Coughs and sneezes “in elbow” as a consistent habit and retrieves a tissue if needed, when playing in the classroom or outside on the playground.
- Brushes teeth after meals as part of group and includes all steps with reminders from adult.
- Shows a peer how to wash hands, including using soap, washing between fingers, and rinsing.
- Places dirty spoon in dirty-dish bin and takes a new spoon after dropping spoon on the floor during mealtime.
- Places hat on head, puts shoes on, and asks adult to apply sunscreen before playing outside.
- Points to a spot on her elbow where sunscreen was not applied and indicates that the adult should put more sunscreen on her arm, before going outside.
- Communicates, “I need to wash my finger and put a bandage on it,” after cutting his finger during outdoor play.
- Communicates to peer, “I brush and floss my teeth every night so I don’t get cavities from the food I eat, especially candy.”
- Communicates to a peer, “We need to wear sunscreen and a hat, because otherwise the sun will burn our skin if we stay outside too long.”
- Communicates to peer, “Germs are tiny things you can’t see, but they can hurt you, so we need to wash the germs off our hands before we eat.”
- Communicates to peer, “I sneeze into my sleeve so the germs don’t get out and make someone else sick.”

**Examples**

- Communicates, “I like bananas and apples,” when selecting bananas and apples from a food pyramid.
- Identifies several pretend food items when playing restaurant with a peer.
- Makes different pretend food items, such as a tortilla and a pizza, with play dough.
- Communicates, “This rice is sticky.”
- Communicates, “I like mangoes. They’re sweet.”
- Purses lips together and shakes head, “No,” when offered a slice of lemon to taste while making lemonade.
- Communicates, during pretend play, “First we eat vegetables, and later we can have dessert.”
- Chooses primarily pictures of fruits and vegetables to create a collage of healthful foods.
- Chooses to drink water instead of lemonade during a classroom party.
- Tells a peer, “Milk is good for my teeth.”
- Brings pretend soup to a peer who is pretending to be ill, to make the peer feel better.
- Chooses primarily pictures of fruits and vegetables to create a collage of healthful foods.
- Communicates, “My mama said that I will grow big and strong if I eat my beans.”
- Communicates, “Broccoli is good for you,” when eating broccoli.
- Communicates, “Junk food is bad for your body because it makes you tired.”
- Communicates, “I like carrots, they are good for my eyes.”
- Communicates, “I like apples because when I bite them, they make my teeth feel clean.”
- Communicates, “Milk makes my bones strong,” to another peer drinking milk.
- Communicates, “We need to eat vegetables every day, but not at breakfast.”
- Communicates, “Oranges are good for you they have vitamin C and water in them, but you need to drink water, too.”
- Communicates, “Vegetables are good for you because they have a lot of vitamins and vitamins give us energy.”
- Communicates, “It’s not good to eat only cookies and candy. You need to eat lunch and dinner, too.”

- Communicates, “Milk makes my bones strong,” to another peer drinking milk.
- Communicates, “Junk food is bad for your body because it makes you tired.”
- Communicates, “We need to eat vegetables every day, but not at breakfast.”
- Communicates, “Oranges are good for you they have vitamin C and water in them, but you need to drink water, too.”
- Communicates, “Vegetables are good for you because they have a lot of vitamins and vitamins give us energy.”
- Communicates, “It’s not good to eat only cookies and candy. You need to eat lunch and dinner, too.”

</tr>
</tbody>
</table>

---

**Examples**

- Pats tummy, and indicates, “My tummy hurts!”
- Holds up arm and communicates, “I hurt my elbow on the climber.”
- Applies ice pack to an injured elbow when instructed by an adult, “Hold the ice on your elbow.”
- Communicates to an adult that he scraped his knee.
- Puts on an ice pack to an injured arm when instructed by an adult, “Hold the ice on your elbow.”
- Communicates to adult, “We have to go wash it now,” after falling and scraping his hand.
- Communicates, “I don’t feel well,” and lies down on the couch.
- Communicates, “She gave me some medicine. It made my ear all better!” when adult asks what a health care provider did during a recent visit.
- Expresses to an adult that he needs asthma medicine in order to run outside.
- Communicates to an adult that she needs her asthma medicine in order to run outside.
- Communicates, “I went to the doctors and got two shots, one for the flu and one for something else.”
- Communicates, “I need to sleep enough at night so my brain can be rested and ready to learn.”
- Communicates, “I need to sleep enough at night so my brain can be rested and ready to learn.”
- Communicates, “I need to sleep enough at night so my brain can be rested and ready to learn.”
- Communicates, “Exercise makes your heart strong and your muscles strong, so you’ll live a long time.”
- Communicates, “When you eat too much food and don’t exercise, your body can’t use all the food, so it turns into fat.”

| Communicates about or acts out events that just happened;  
and  
Asks about activities that will happen soon | Distinguishes what happened a long time ago from what happened in the recent past  
or  
Distinguishes what will happen in the near future from what will happen much later  
and  
Anticipates events in the weekly schedule,  
or  
Describes the way things were in own past,  
or  
Predicts future events related to personal experience,  
or  
Describes age differences among people (such as family members) |

### Examples

- Communicates about seeing a dog and a squirrel, after coming back from a walk.
- Communicates, “Is it time for snack?” when finishing painting.
- Communicates to an adult, when coming into a room, “We dug in the dirt and planted seeds.”
- Communicates about past events and future events, but is sometimes unclear about how far in the past they happened or how far in the future they will happen.
- Relates past events to one another or to the present;  
and  
Plans for the near future  
and
- Distinguishes the sequence of events that occurred in the past few weeks or months or events that will occur in the next few weeks or months, but has difficulty sequencing events in the distant past or distant future.

- Communicates a picture showing the progression of a plant growing from a seed to a tall plant with flowers, after planting flower seeds.
- Draws a picture showing the progression of a plant growing from a seed to a tall plant with flowers, after planting flower seeds.
- Distinguishes the sequence of events that occurred in the past few weeks or months or events that will occur in the next few weeks or months, but has difficulty sequencing events in the distant past or distant future.

<tr>
<td>Recognizes changes in familiar environments or in the people associated with them (e.g., a new adult in the classroom)</td>
<td>Recognizes the routes between familiar locations</td>
</tr>
</tbody>
</table>

- **Examples**
  - Asks, “Who’s that?” when a peer’s grandma comes to visit.
  - Looks closely at new block-shaped pictures attached to a shelf before placing blocks on the appropriate shelf, during clean-up time.
  - Communicates to an adult, “Where are the puzzles?” after going to the shelf where puzzles are usually kept and finding that the puzzles are not there.
  - Goes to area with dress-up clothes after noticing peer wearing something newly added to the dress-up area.
  - Communicates, “We go that way,” while on the way down the hall from the classroom to the bathroom.
  - Uses a communication board to ask to go by a favorite playground, when planning a walk.
  - Communicates, “This is the wrong way!” when a familiar adult takes a different route to the park during a group walk.
  - Communicates that school is close to child’s house, but child’s aunt’s house is far away.
  - Communicates, after passing the post office while on a neighborhood walk with an adult, that they are almost to the fire station.
  - Communicates about driving in a car to see one grandma who lives nearby, but going on a plane to see another grandma who lives far away.
  - Communicates, “It snows where my auntie lives, but not here because it’s hot.”
  - Draws pictures of houses on farms and apartments in cities after an adult reads a story about different types of homes where people live.
  - Describes a trip to a farmers’ market and communicates, “That grocery store is outside! Not like our grocery store.”
  - Communicates, “Children play soccer here, but in Mexico everyone loves and plays soccer and they call it futbol!”
  - Draws a simple map of familiar areas of the school, although the relative distances between rooms and other landmarks may be inaccurate.
  - Asks an adult to help identify the location of her home, school, and familiar shopping area, on a map of the local community, and traces the routes between them and their relative distances.
  - Locates own country on the globe with an adult’s help, and then asks several questions to try to understand about relative distances to other countries and continents.

- Uses words or gestures to express desires in some conflict situations, but requires adult assistance to communicate constructively and resolve conflict
- Uses appropriate words and actions to express desires in some conflict situations, often seeking adult assistance to resolve conflict
- Uses appropriate words and actions to express desires in response to conflict situations, and suggests simple cooperative solutions based mainly on own needs
- Considers the needs and interests of others when there is a conflict or attempts to negotiate a compromise

### Examples

- Communicates, "I want the ball," while trying to take a ball away from a peer, but stops after an adult says, "He is using it now. Let's find another one."
- Holds tightly onto a doll until an adult encourages, "Let her know you're not done playing with the baby." Then communicates, "My baby, my turn," to another child.
- Shakes head, "No," and holds onto a scooter when another child indicates wanting to use the scooter, until an adult approaches.
- Communicates, "I'm sitting here," while looking at an adult for support, as another child squeezes onto the same carpet square.
- Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
- Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.
- Communicates to another child in the block area, "I'm playing with the blocks. You can play with the cars."
- Communicates, "You can have a turn after me," to another child who wants to use the big shovel outside in the dirt.
- Responds to a peer's request for crayons by suggesting that they share the box of crayons before sharing.
- Communicates to another child in the block area, "I'm playing with the blocks. You can play with the cars."
- Communicates to a peer wearing the red hat from the dress up area, "I want to wear the red hat, too. How about if you wear it a little longer, then it's my turn?"
- Reports to an adult, "We decided that I can use this corner for my fort. That way it isn't in his way."
- Communicates, "There is only one spot left, why don't you go first?" when a friend also shows interest in working at the science table.
- Suggests building one tower together after a peer takes the bucket of interlocking blocks to another area (and there aren’t enough blocks for them to build separately).
- Communicates, "There is only one spot left, why don't you go first?" when a friend also shows interest in working at the science table.
- Suggests to a friend that they play a game the friend is really good at after the friend lost a competitive game they were playing together.

#### Examples

- Stops building a road with blocks and begins to put away blocks when an adult models for child and sings the “clean up” song.
- Follows the morning routine of putting away belongings, but then needs adult reminder before washing hands and going to the breakfast table.
- Rides on the bike path for several laps on a wheeled toy, after being reminded by an adult to stay on the path so that everyone is safe.
- Cleans up blocks during clean-up time on own.
- Holds hands with a peer while on a neighborhood walk.
- Puts on a smock before painting, without an adult reminder.
- Communicates to an adult, “It’s not fair that I always go last because my name begins with a Z!”
- Communicates while in the reading area that we need to be quiet so that others can read.
- Communicates that it is important to wash hands before preparing food so that we do not spread germs to others.

- Follows expected steps of putting away toys, putting on coat, and sitting on the rug to wait to go outside, after being shown a visual schedule depicting the sequence of steps.
- Suggests to a peer, while holding the class pet, “Let’s take turns. I can hold it now, and you can hold it next”; then, after a few minutes, gives the class pet to the peer.
- Reminds peer that it’s time to clean up for lunch, and then cleans up own art project and washes hands.
- Reminds peers to get in line outside the door before entering the classroom from the play yard.
- Communicates to an adult a new rule that only three people can be in the reading area at one time.
- Suggests making a sign-up list for a popular activity.
- Communicates to a peer where the back of the line is to wait for a turn to look in the microscope.
- Communicates while in the reading area that we need to be quiet so that others can read.
- Communicates that it is important to wash hands before preparing food so that we do not spread germs to others.

- Follows simple group expectations with occasional adult reminders, but needs specific guidance when wanting to do something else or having to stop a preferred activity
- Follows through with group expectations during extended activities, on own most of the time
- Participates in making new group expectations; and Demonstrates understanding of the difference between fair and unfair expectations, at times protesting when expectations seem unfair

</table>

- **Building**
  - Earlier: Combines lines and circles, when painting with paintbrushes, to symbolize familiar things (e.g., houses, trees, people).
  - Middle: Rolls clay into balls, and shapes balls into pretend food, such as tortillas, hot dogs, or pancakes.
  - Later: Glues collage materials on a paper plate using both two-dimensional materials (paper, fabric) and three-dimensional materials (feathers, pine cones, or leaves).

- **Integrating**
  - Earlier: Draws a familiar thing (e.g., sun, flower, house) on paper with a crayon or marker.
  - Middle: Draws human figures (circles with faces) and adds hands and legs extending directly from the circles to show familiar actions, such as reaching and kicking a ball.
  - Later: Tapes two toilet paper rolls together to make binoculars, and then attaches yarn as a neck strap.

#### Child is emerging to the next developmental level

<tr>
<td>Middle</td>
<td>Creates sound through instruments, voice, or with objects independently or Demonstrates understanding of how and where music is used within everyday life experiences</td>
</tr>
<tr>
<td>Later</td>
<td>Varies musical qualities (rhythm, pitch, tempo) systematically to create music through instruments, voice, or with objects or Identifies details in music heard or constructed</td>
</tr>
</tbody>
</table>

**Examples**

- Engages in brief segments of musical activities initiated by others, by making musical sounds using voice, body, or instruments
- Engages in extended segments of musical activities initiated by others, by making musical sounds using voice, body, or instruments
- Adapts to changes in the qualities of basic music elements (e.g., faster/slower, higher/lower, louder/softer) by making musical sounds using voice, body, or instruments
- Extends or varies music with new words or sounds through voice, body, or instruments, using basic music elements (e.g., faster/slower, higher/lower, louder/softer)

**Examples of Musical Expressions**

- Hums softly to self a clean-up song with a recognizable melody and sings some words when the song is initiated by an adult.
- Engages in musical activities initiated by others, by making musical sounds using voice, body, or instruments.
- Adapts to changes in the qualities of basic music elements (e.g., faster/slower, higher/lower, louder/softer).
- Extends or varies music with new words or sounds through voice, body, or instruments, using basic music elements (e.g., faster/slower, higher/lower, louder/softer)

- Responds rhythmically, “I see a red bird looking at me,” when adult chants, “Brown bear, brown bear, what do you see?” and then continues to respond to the adult with other chants.
- Engages in extended segments of musical activities initiated by others, by making musical sounds using voice, body, or instruments.
- Adapts to changes in the qualities of basic music elements (e.g., faster/slower, higher/lower, louder/softer).
- Extends or varies music with new words or sounds through voice, body, or instruments, using basic music elements (e.g., faster/slower, higher/lower, louder/softer)

- Sings a familiar song on own, first softly, then loudly.
- Plays a triangle to follow a rhythm of a song, such as short-short-long, short-short-long.
- Taps a familiar triangle to follow a rhythm of a song, such as short-short-long, short-short-long.
- Taps a familiar song on own, first softly, then loudly.

- Strums a guitar or ukulele, or taps a xylophone, along with a song, changing the tempo of the strumming or tapping from faster to slower or slower to faster.
- Taps a triangle to follow a rhythm of a song, such as short-short-long, short-short-long.
- Taps a triangle to follow a rhythm of a song, such as short-short-long, short-short-long.
- Taps a triangle to follow a rhythm of a song, such as short-short-long, short-short-long.

- Mimics the sounds of a musical instrument to extend the chorus of a familiar song.
- Creates sound through instruments, voice, or with objects independently or Demonstrates understanding of how and where music is used within everyday life experiences.
- Plays higher and lower sounds on a xylophone while singing a song and comments, “I’m matching the sound on the xylophone to the words in my new song.”
- Communicates, “I’m matching the sound on the xylophone to the words in my new song.”
- Plays higher and lower sounds on a xylophone while singing a song and comments, “I’m matching the sound on the xylophone to the words in my new song.”
- Communicates, “I’m matching the sound on the xylophone to the words in my new song.”

- Softly sings while rocking a doll to sleep and communicates, “You have to sing quiet so that the baby goes to sleep.”
- Softly sings while rocking a doll to sleep and communicates, “You have to sing quiet so that the baby goes to sleep.”
- Softly sings while rocking a doll to sleep and communicating, “You have to sing quiet so that the baby goes to sleep.”
- Softly sings while rocking a doll to sleep and communicating, “You have to sing quiet so that the baby goes to sleep.”

- Glides a stick along a fence and then stops, taps out a beat on the fence with the stick, then glides the stick across the fence for a count of four, then stops and taps out the same beat on the fence again.
- Glides a stick along a fence and then stops, taps out a beat on the fence with the stick, then glides the stick across the fence for a count of four, then stops and taps out the same beat on the fence again.
- Glides a stick along a fence and then stops, taps out a beat on the fence with the stick, then glides the stick across the fence for a count of four, then stops and taps out the same beat on the fence again.
- Glides a stick along a fence and then stops, taps out a beat on the fence with the stick, then glides the stick across the fence for a count of four, then stops and taps out the same beat on the fence again.

- Hums a variation of sounds in a rhythmic pattern and communicates, “This is how my dad sings when he is doing his work.”
- Communicates, “I’m matching the sound on the xylophone to the words in my new song.”
- Communicates, “I’m matching the sound on the xylophone to the words in my new song.”
- Communicates, “I’m matching the sound on the xylophone to the words in my new song.”

- Uses a rain stick during a song, and explains to peers, “Every time it rains in the song we will move the rain stick to make it sound like it is raining.”
- Uses a rain stick during a song, and explains to peers, “Every time it rains in the song we will move the rain stick to make it sound like it is raining.”
- Uses a rain stick during a song, and explains to peers, “Every time it rains in the song we will move the rain stick to make it sound like it is raining.”
- Uses a rain stick during a song, and explains to peers, “Every time it rains in the song we will move the rain stick to make it sound like it is raining.”

- Shakes maracas to imitate the sound of bees, while stating, “These maracas sound just like bees.”
- Shakes maracas to imitate the sound of bees, while stating, “These maracas sound just like bees.”
- Shakes maracas to imitate the sound of bees, while stating, “These maracas sound just like bees.”
- Shakes maracas to imitate the sound of bees, while stating, “These maracas sound just like bees.”

- Softly sings while rocking a doll to sleep and communicates, “You have to sing quiet so that the baby goes to sleep.”
- Softly sings while rocking a doll to sleep and communicates, “You have to sing quiet so that the baby goes to sleep.”
- Softly sings while rocking a doll to sleep and communicates, “You have to sing quiet so that the baby goes to sleep.”
- Softly sings while rocking a doll to sleep and communicates, “You have to sing quiet so that the baby goes to sleep.”

<tr>
<td>Earlier</td>
</tr>
<tr>
<td>Portrays a familiar character in a simple way, using facial expressions, voice, gestures, or body movements</td>
</tr>
<tr>
<td>Portrays a character with some detail when contributing to an improvised drama based on a story, song, or poem</td>
</tr>
<tr>
<td>Creates and maintains details of a character when contributing to an improvised drama (e.g., dialogue, plot, setting) without adult prompting</td>
</tr>
<tr>
<td><strong>Examples</strong></td>
</tr>
<tr>
<td>➢ Pretends to be a bunny sneaking a carrot out of a garden, after hearing a story about Peter Rabbit.</td>
</tr>
<tr>
<td>➢ Acts out the role of firefighter by wearing a hat and pretending to hold a hose to put out a fire.</td>
</tr>
<tr>
<td>➢ Pretends to be a monster and does a monster dance after hearing the story <em>Where the Wild Things Are</em>.</td>
</tr>
<tr>
<td>➢ Takes a pretend cookie and points to a pretend glass of milk, acting like a mouse, while an adult reads <em>If You Give a Mouse a Cookie</em>.</td>
</tr>
<tr>
<td>➢ Shivers and squints eyes to portray a character walking through the wind and cold rain, after hearing a story about being in cold, wintry weather.</td>
</tr>
<tr>
<td>➢ Communicates, “We can push him in the water. Help me!” as a character in a teacher-led story dramatization of a book about a whale that is stranded on a beach.</td>
</tr>
<tr>
<td>➢ Plays the role of Goldilocks, pretending to try three different beds and communicating that the third one is “just right.”</td>
</tr>
<tr>
<td>➢ Wears an apron and name tag, writes on a pad of paper, and hands out pretend plates and food, while acting out a story about a restaurant created by children.</td>
</tr>
<tr>
<td>➢ Puffs up cheeks and swivels arms around to portray the wind while dramatizing, with peers, a story about a windy day, repeating the actions each time the wind blows in the story.</td>
</tr>
<tr>
<td>➢ Wears a cape and pretends to fly, as a peer repeatedly communicates, “Help!”</td>
</tr>
</tbody>
</table>

| **Integrating**                                           |
| Earlier | Middle | Later |
| Communicates details about a character’s emotions or thoughts when contributing to an improvised drama |
| Considers and builds on ideas of others in creating an improvised drama that includes dialogue, plot and setting |
| Collaborates with peers to plan an extended improvised drama including characters, sequenced plot, relevant dialogue and setting |
| ➢ Extends a plot by creating a new ending during a dramatization of a story about a trip under the sea: “I like the octopus. I’m going to stay in the sea and be her friend because she’s lonely.” |
| ➢ Picks up a basket, pulls stomach, and communicates that everyone will be hungry, so they should stop and get some food, while improvising a drama about a bus trip. |
| ➢ Communicates, “A boat will take too long. I like the idea to take an airplane. It’s faster,” while negotiating with peers about how to cross the ocean in an imaginary journey to Japan. |
| ➢ Communicates details related to character portrayal |
| ➢ Communicates, “A boat will take too long. I like the idea to take an airplane. It’s faster,” while negotiating with peers about how to cross the ocean in an imaginary journey to Japan. |
| ➢ Hunches body forward while pushing a stick in front like a cane and cracks her voice when playing an elderly person. |

<tr>
<td>Moves body or body parts through space in response to music, rhythms, others’ movements, or adults’ cues</td>
<td>Tries out a variety of movements through space, with some body control and awareness, in response to music, rhythms, others’ movements, or adults’ cues</td>
<td>Produces dance-like movements with increasing body control and awareness, in response to music tempo, rhythms, others’ movements, or adults’ cues</td>
</tr>
</tbody>
</table>

#### Examples

- Marches around the room in response to drumming by a peer.
- Sways arms while holding a streamer and dancing to music.
- Rolls body on the floor in response to an adult’s cue.
- Moves arms up and down in response to vibrations from music.
- Bends down low and then jumps up high in an attempt to follow an adult’s movements.
- Stops and starts dancing during a freeze-dance game.
- Twirls around to music briefly, maintaining balance.
- Sways, twirls, or leans back and forth to follow movements of peers while listening to music.
- Steps sideways, frontwards and backwards without bumping into peers during a line dance led by an adult.
- Moves slowly, then quickly, in response to changes in music.
- Makes up own dance while listening to music, by tiptoeing, lowering self to floor and rolling on floor, jumping up, and then spinning.
- Moves body slowly, with pauses, in a variety of positions while dancing to music.
- Swings arms smoothly and then moves arms with sharp, jerky movements, in response to drumbeats, while making up a dance.
- Creates an improvised dance using slow heavy movements at the beginning, moving freely in the middle, and running on tiptoes at the end.
- Begins improvised dance with fast running movements and ends with slow slithering movements on the floor.
- Responds, “She started standing tall with big arms and ended in a small ball,” to adult prompt to describe how the dancer started and finished her dance.
- Makes a high shape with his body in response to a teacher prompt to show a shape that is the opposite of the low shape the dancer was in at the end of the dance.
- Creates an improvised dance using standing with open arms and legs, then by alternating jerky and smooth arm and leg movements, and ending with arms and legs closed and back curved.
- Communicates on own initiative after performing a dance, “I started my dance in high shape with my arms above my head and ended in a low shape crouched in a ball on the floor.”
- Paces body movement to rise from a low shape at the beginning of the dance to a high shape within several beats of the drum by the end of the dance.
- Performs an improvised dance by standing with open arms and legs, then by alternating jerky and smooth arm and leg movements, and ending with arms and legs closed and back curved.

○ If you are unable to rate this measure, explain here:
Appendix A: Glossary of Terms and Phrases Used in KIDS (2015)

Assemblage: An artistic composition made from scraps, junk, or odds and ends.

Investigates/Investigation: In the process of scientific inquiry, asking a question and conducting systematic observations or simple experiments to find an answer.

Locomotor Skills: The ability to project the body into or through space.

Manipulative Skills: Also known as object-control skills in which the arms, hands, legs, and feet are used to give force to an object (for example, throwing a ball) or to receive and absorb the force from an object (for example, catching a ball).

Observes/Observation: Gathering information about objects and events by using the senses of sight, smell, sound, touch, and taste and noticing specific details or phenomena that ordinarily might be overlooked.

Onset: The first consonant or consonant cluster in a syllable (e.g., the *h* in the one-syllable word *hat*; the *m* and *k* in the two syllables in the word *monkey*).

Rime. A linguistic term that refers to the portion of a syllable that starts with a vowel. In the word *big*, the rime unit is /ig/. In the word *bring*, the rime unit is /ing/.

</tr>
<tr>
<td>3. Says, “Once I saw a movie about some dogs that traveled to the moon. It was funny!” in response to the teacher asking “What movie did you like best?” (Opinion)</td>
</tr>
</tbody>
</table>

---

¹ The term “utterance,” as opposed to sentences, more accurately reflects how young children speak. Young children may combine words and produce language with different word combinations, but may not speak using complete sentences.
² “Elaborated language” refers to the use of more complex syntax, relative clauses, and vocabulary.
³ Grammatical error in the example is common at this level of a child’s Spanish language development.
⁴ Translation does not communicate the grammatical error in the child’s response in Spanish.

©2017 California Department of Education, with additional enhancements created in collaboration with the Illinois State Board of Education
SPAN 3: Phonological Awareness in Spanish

NOTE: No English translation of examples is provided for this measure because the English words do not illustrate the skills or constructs related to phonological awareness in Spanish.
## SPAN 4: Emergent Writing in Spanish
### Translation of Examples

<table>
<thead>
<tr>
<th>Discovering Spanish</th>
<th>Exploring Spanish</th>
<th>Developing Spanish</th>
<th>Building Spanish</th>
<th>Integrating Spanish</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Imitates writing when signing in at arrival (writing looks like a zigzag line).</td>
<td>1. Copies own name across a large piece of paper using a name card as a reference.</td>
<td>1. Uses a combination of letters and letter-like symbols to write a grocery list of a few items during dramatic play and then communicates to peer in Spanish about the items on the list.</td>
<td>1. Writes, “tigo” in journal, for “wheat” and communicates, “This is the T of Tomás,” after a flannel board activity about The Little Red Hen. (“Tr-i” in “trigo” is a consonant-consonant-vowel syllable.)</td>
<td>1. Writes, “oi kome pbaana” to represent “Today I ate a banana” (Incorporates the “p” [letter sound] from English in Spanish writing for “b” [letter sound]. Uses the letter K instead of C.)</td>
</tr>
<tr>
<td>2. Makes marks and scribbles when writing a message on a get-well card to one of her peers.</td>
<td>2. Writes letter-like symbols that approximate own name on a piece of paper to label a structure she built in the block area.</td>
<td>2. Writes, “mia” in his journal and reads “mill” following an activity focusing on the book Rosie’s Walk. Note: The word “mill” appears in the text of the book.</td>
<td>2. Writes, “paan” on a drawing of Mexican sweet bread and reads, “bread” after a neighborhood walk to the bakery. (“Pan” has only one syllable, consonant-vowel-consonant.)</td>
<td>2. Sounds out the first letter of a word and writes the letter L and says, “L’ [letter sound] is Lucas’ L’ (letter sound),” and then continues sounding out and writing syllables in the words of a simple sentence. (Note: Lucas is a peer in the class.)</td>
</tr>
<tr>
<td>3. Writes own name on his work using shapes and symbols.</td>
<td>3. Writes a string of letters and asks an adult to read it, “Teacher, what does it say here?”</td>
<td>3. Reads, “bed” while gesturing at “ami” that she wrote on a painting and then communicates in Spanish that it is a picture of her bed. (The letters in “ami” are in Marta, the child’s name.)</td>
<td>3. Writes, “amgoso” to label a painting and reads, “El perro y la vaca son amigos.” (“A-” in “amigo” is a syllable that only has a vowel.)</td>
<td>3. Writes, “Vine en tren a sa dego” and reads, “I traveled by train to San Diego” during an activity on travel. (Note: Uses the letter H instead of J.)</td>
</tr>
<tr>
<td>4. Writes marks and letter-like symbols on posts to label paper cups with seeds she just planted; then she “reads” the label on one post communicating “radishes” in English and “radishes” in Spanish (refers to same written marks for both Spanish and English).</td>
<td>4. Makes a card for her father and includes the word “papá,” and communicates, “It’s the pa-of papá.”</td>
<td>4.</td>
<td>4. Writes, “Fiz cupe años” [“Happy Birthday” in Spanish], draws a birthday cake, and puts the paper in a peer’s cubby after the peer’s birthday celebration in class.</td>
<td></td>
</tr>
</tbody>
</table>
