

Teacher Vacancy Grant Methodology Explanation & List of 100 Districts Selected – UPDATED August 2026

Eligibility for Selection or Exclusion

Districts in Evidence-Based Funding (EBF) Tiers 1, 2, 3 (as calculated for fiscal year 2026) were considered for possible award. Districts in Tier 4 were excluded as were the 466 districts that reported having no unfilled teaching positions at the beginning of the 2025-2026 school year; those districts are ineligible for this program.

District Selection

A total of 100 districts were selected for proposed awards based on the highest counts of unfilled teaching (not administrative or school support) positions and to ensure that 60% (60) of proposed awards went to rural districts and 40% (40) of proposed awards went to urban districts. The 60/40 split is aligned to the composition of all Tier 1, 2, and 3 districts in the state. [National Center for Education Statistics](#) locale classifications were used to determine which districts were rural and which were urban. Table 1 below compares districts that were selected for award with districts not selected for award. Table 2 provides information about EBF tier of the selected districts.

NCES locale classifications were broken into two categories, rural and urban. For Teacher Vacancy Grant eligibility selection: Rural categories included locale codes 31, 32, 33, 41, 42, and 43 and Urban codes included 11, 12, 13, 21, 22, and 23.

Table 1 consists of data for all districts that meet the selection criteria, both selected districts and not selected districts.

Table 1: Comparison of Districts Receiving and Not Receiving an Award

Metrics	Selected Districts (100)	Districts not Selected (226)
Total Count of Unfilled Teaching Positions	2062.06	445.4
Average Count of Unfilled Teaching Positions	20.62	1.97
Median Count of Unfilled Teaching Positions	8.00	2
Range of Counts of Unfilled Teaching Positions	668.5	5.7
Average Vacancy Rate for Teachers	9.45	2.95
Median Vacancy Rate for Teachers	8.89	1.81
Range of Vacancy Rates for Teachers	29.12	34.66

Table 2: Selected Districts and Districts With/Without at Least One Unfilled Teaching Position by EBF Tier:

Tier	Districts receiving an award
1	41
2	51
3	8
4	0

Calculation of Proposed Awards with Variable Base Funding

In order to allocate funding for selected districts with lower counts of unfilled teaching positions, the proposed awards use three different base funding levels determined by the count of reported unfilled teaching positions in each selected district. Selected districts with more than 11 unfilled teaching positions receive a base funding level of \$125,000, selected districts with between six and ten reported unfilled teaching positions receive a base funding level of \$65,000, and selected districts with fewer than six unfilled teaching positions receive a base funding level of \$45,000.

In addition to base funding, each selected district receives a variable funding level determined by awarding \$3,336.47 per reported unfilled teaching position. The total proposed funding for each selected district is equal to their base funding plus the specific variable funding calculated based on unfilled positions reported by that district. Two examples are shown below.

Chicago Public Schools reported 672 unfilled teaching positions, so that allocation would be calculated as follows.

$$\$125,000 + (\$3,336.47 \times 672) = \$2,367,107.84$$

Cerro Gordo CUSD 100 reported 3.5 unfilled teaching positions, so that allocation would be calculated as follows.

$$\$45,000 + (\$3,336.47 \times 3.5) = \$56,677.65$$

All allocations are rounded to the nearest dollar

FY 2027 Teacher Vacancy Grantee Convening and Data Analysis Funding

A small portion of the allocation, \$100,000, has been set aside to hold a convening of recipient districts to share strategies utilized with Teacher Vacancy Grant funds. A portion of this allocation will also be set aside to fund data collection and analysis.
