

PD+ for Educators

Available on August 29, 2022

What is PD+?

PD+ is an interactive system that will house information about all professional development available for Illinois educators and approved Illinois professional development providers. The goal of PD+ is to provide a “one-stop shop” for educators to search for and register for professional development. PD+ will provide statewide equitable access to professional development offered through ISBE-approved professional development providers and will include a complete listing of all professional development activities being offered by approved providers. Educators will be able to search using filters to narrow results by topic, location, cost, etc. The system will also track the completion of professional development hours for educators, eliminating the need for manual entry by individual educators into ELIS.

PD+ is modernizing your professional development!

PD+ includes many enhanced features that will assist you with tracking your professional development progress for license renewal.

- ✓ Easy to navigate system
- ✓ Readily accessible through ELIS
- ✓ Push notifications available
- ✓ Designed based upon Illinois educator feedback
- ✓ How-to-videos available
- ✓ Visual progress bar to track the status of your professional development activities throughout the state.

How will I use PD+ as an educator?

- ✓ To record professional development activities taken prior to the availability of PD+
- ✓ To locate professional development activities that best suit your areas of interest and expertise
- ✓ To register for professional development activities throughout the state
- ✓ To house necessary documents used in the case of an audit
