

Illinois State Board of Education

Thank you for opting in to the NWEA MAP (MAP) Opt In Service for Ed360.

The instructions below outline important tasks to complete to ensure MAP data flows into Ed360.

If these tasks are not completed, MAP data will not be available in Ed360.

- A District Administrator must opt in to MAP **via Ed360** (Homepage > Profile icon > Settings button > Opt In Services section), as well as **complete the [NWEA Permission to Release Data](#)** document.
 - Be sure to complete all open fields, including the last page of the agreement to select which test season data you want to release.
 - After completing the document, it is necessary to **sign and return it to leslie.shotola@nwea.org**.
- For MAP data to display in Ed360, a district employee must ensure the state district ID, state school ID and state student IDs are included in the MAP portal.
 - The State District and State School IDs come from the RCDTS code. The State Student IDs come from ISBE Student Information System (SIS).
 - If the appropriate IDs are not provided, MAP data will not display in Ed360 for the respective student(s). For further assistance with this effort, please email leslie.shotola@nwea.org.

About your access to NWEA MAP data:

- Administrators have a MAP dashboard via the Academics menu. Administrators and Teachers can see MAP data at the classroom level on individual student records via the Assessment History tab.
 - Ed360 provides near real-time (operational) data.
 - Access to Ed360 is based on EIS (Employment Information System) data.
 - It is necessary for your district EIS Coordinator to submit current year employment + position records in EIS.
 - MAP data will not be visible until current year EIS data is submitted, even if EIS data existed for the previous school year.

The Ed360 [Opt In Guide](#), especially pages 3-6, and [Ed360 + EIS](#) video provide further details about how EIS data impacts Ed360. Each resource includes information about Ed360 Roles for each position code, which also influences appropriate access to MAP data.

Data refresh details: MAP data is handled differently than the majority of Ed360 data; MAP data is updated weekly (typically processes Wednesday night and is available next day) not daily.

Please contact the Ed360 Outreach Team at ed360@isbe.net for any questions.
