Attention!

Please read carefully before entering and saving data.

1. For Kindergarten, the 'Total Student Count in Selected Grade' must equal the 'Number of Students in the Selected Grade Who Require an Eye Examination'.

2. For grades other than Kindergarten, the 'Total Student Count in Selected Grade' typically will not equal the 'Number of Students in the Selected Grade Who Require an Eye Examination' because, for these other grades, an eye examination is required only for students who have never attended an Illinois school. For example, you have 25 students in grade 5. Of these 25, four students came from out-of-state and one student was home schooled before entering grade 5 at your school; none of these five previously attended an Illinois school. In this case, you should enter "25" in the 'Total Student Count in Selected Grade' field and "5" in the 'Number of Students in the Selected Grade Who Require an Eye Examination' field.

3. The sum of numbers in fields 'a' through 'g' (i.e., a + b + c + d + e + f + g) must equal the number entered in the 'Number of Students in the Selected Grade Who Require an Eye Examination' field.
