Guidance Focus: Reporting for Students Educated Outside the District

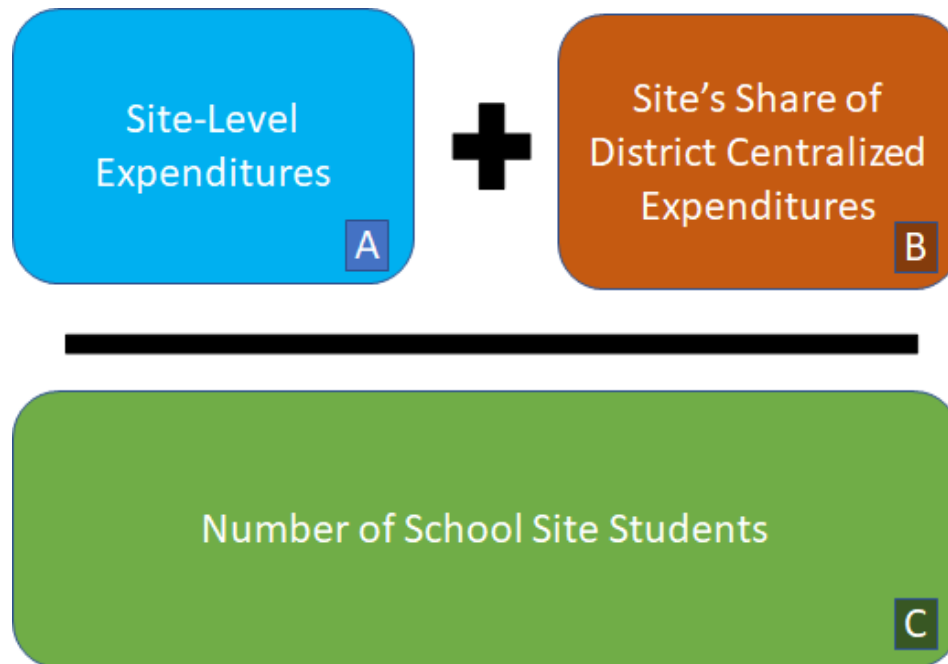

2

- **Overview** of Site-Based Expenditure Reporting.
- **Specific requirements** associated with students placed outside the district.
- **Implications** for district reporting.

Formula: Calculating Total Per-Pupil Expenditures for Each School

3

Per-pupil expenditures reported for each school shall be composed of:

Sections A and B must be disaggregated by source of funds – federal vs. state/local (with state and local combined).

Privately-funded expenditures, such as philanthropically funded expenditures, should be included in the state/local category.

Reporting Requirements for Students Educated Outside the District

Reporting Responsibility for Students Educated Outside the District

6

Students placed and/or served outside of the Home LEA, regardless of reason, shall be ***included in the Home LEA student count, along with associated expenses***. Examples include (but are not limited to):

- Students receiving special education services at either public or private centers
- Students attending vocational centers

Expenses typically include:

- Tuition (Part 100 Expenditure Codes 1910 – 1922 for Private Tuition; 4100, 4200, 4300, or 4400, which is used all for other tuition payments outside of Private Tuition)
- Transportation (Part 100 Expenditure Code 2550, as it pertains to students placed outside the district)

Reporting Options

7

LEAs have two options for reporting *students* educated outside the district and their associated expenditures.*

Option 1: Create a *separate reporting site* that captures students and their outplacement costs.

Option 2: Embed students *in their home school sites*.

If utilizing Option 2, LEAs have two options for allocation of *expenditures* to sites.

A. Allocate \$ directly to these home sites (select schools, on a per-pupil basis, using outplaced students).

B. Allocate \$ across all sites (all schools, on a per-pupil basis, using all pupils).

*If an LEA has 10 or fewer students placed outside the district, the LEA ***must utilize Option 2.***

Reporting Options: Considerations

8

If an LEA has 10 or fewer students placed outside the district, the LEA must utilize Option 2 (embed within home sites). Otherwise, LEAs should select the methodology that best suits their district's reporting goals.

Reporting Options

Underlying Principle

Considerations

Option 1 (separate "site")

Educating these students is a significant investment and may be something the LEA wants to *highlight* for the community.

- How does seeing these variable costs interact with the LEA's and community's understanding of equity?

Option 2 (embed within home sites)

This cost represents a service *available* to all sites and all students (like other centralized costs), and investments in those of highest need benefit *all* sites and students.

- What effect does embedding these costs within sites have on equity conversations within an LEA and its community?
- If selected, should costs be allocated only to home sites or across all sites?

Sample District Data: Comparison of Options and Reporting Impact

- Three options:
 - Option 1: A separate “site” is created, which includes student count and expenditures associated with students placed outside the district.
 - Option 2a: Student count is embedded in the home sites (ES1 and ES2 in this example); associated expenditures are allocated to these sites.
 - Option 2b: Student count is embedded in the home sites (ES1 and ES2); associated expenditures are allocated to *all* sites, per pupil.

Sample District Data: Comparison of Options and Reporting Impact

Sites	Total Per-Pupil Expenditures								
	Option 1			Option 2a			Option 2b		
	Federal	State and Local	Subtotal	Federal	State and Local	Subtotal	Federal	State and Local	Total

- Only Option 1 has a separate reporting row for outplaced students. Options 2a and 2b have outplaced students embedded in their home sites (ES1 and ES2 in this example). Outplacement costs stand out as higher than other schools, which is likely typical for this option.
- In Option 2a, ES1 and ES2 have higher total per-pupil costs than in Option 1, since costs of outplacements are assigned to those sites.
- In Option 2b, all schools have somewhat higher total per-pupil costs than Option 1, since costs of outplacements are distributed across all sites.
- Note that the Total Per-Pupil Expenditures (bottom row) are the same for all three options.

Option 1: Create a Separate Reporting Site that Captures All Outplacement Costs and Students

*Students Educated Outside the District

As shown in the reporting table above, Option 1 creates a separate reporting site to capture all students educated outside the district, their outplacement costs, and any central expenditures associated with supporting students that are outplaced.

Option 1: Student Count

12

Sites	Student Count	Site-Level Per-Pupil Expenditures			District-Centralized Per-Pupil Expenditures			Total Per-Pupil Expenditures			<i>Total Exclusions Expenditures</i>

*Students Educated Outside the District

Actual outplacement tuition expenditures are assigned to the outplaced "site."*

Illinois

* ISBE's recommendation is to include **tuition** as a "site-level" expenditure, as it is most comparable to the expenditures included in other sites' site-level costs. See next slide for other expenditures.

Option 1: District-Centralized Expenditure Allocation

14

Sites	Student Count	Site-Level Per-Pupil Expenditures			District-Centralized Per-Pupil Expenditures			Total Per-Pupil Expenditures			Total Exclusions Expenditures	
		Federal	State and Local	Subtotal	Federal	State and Local	Subtotal	Federal	State and Local	Total

*Students Educated Outside the District

LEA costs incurred by overseeing and supporting outplacement, including transportation and central support, are also assigned to the outplacement “site.”
(Recommended to be included as *Centralized* Expenditures.)

Option 1: Implications and Considerations

15

- All students and the costs associated with outplacements are included in a separate site.
- Does the LEA feel comfortable separating these students and their associated costs in reporting? What is the value in that separation? Is there potential risk?
- How does seeing these variable costs interact with the LEA's understanding of equity? How could it influence the community's understanding of equity?

Option 2a: Embed Students and Expenditures in Home School Sites

16

Sites	Student Count	Site-Level Per-Pupil Expenditures			District-Centralized Per-Pupil Expenditures			Total Per-Pupil Expenditures			Total	
		Federal	State and Local	Subtotal	Federal	State and Local	Subtotal	Federal	State and Local	Total	Exclusions	Expenditures

As shown in the reporting table above, Option 2a embeds students educated outside the district and all outplacement costs within the home sites of the outplaced students.

In this example, students are originally from ES1 and ES2.

Option 2a: Student Count

17

Recommended: No outplacement costs are included in site-level per-pupil expenditures.*
All costs will be included as centralized expenditures, as they are not direct expenditures at the site. (See next slide.)

Option 2a: District-Centralized Expenditure Allocation

19

Sites	Student Count	Site-Level Per-Pupil Expenditures			District-Centralized Per-Pupil Expenditures			Total Per-Pupil Expenditures			<i>Total Exclusions Expenditures</i>

All expenditures explicitly associated with outplacements, including tuition, transportation, and LEA costs incurred from overseeing and supporting outplacement activities, are **allocated to sites based on outplaced student count included in those sites.** Recommended: Assign these as centralized expenditures.

Option 2b: Embed Students in Home School Sites; Allocate Expenditures Across All Sites

20

Sites	Student Count	Site-Level Per-Pupil Expenditures			District-Centralized Per-Pupil Expenditures			Total Per-Pupil Expenditures			Exclusions	Total Expenditures

As shown in the reporting table above, Option 2b embeds students educated outside the district within the home sites of outplaced students. All outplacement costs are allocated per pupil across **all** sites.

Option 2b: Student Count

21

Sites	Student Count	Site-Level Per-Pupil Expenditures			District-Centralized Per-Pupil Expenditures			Total Per-Pupil Expenditures			Exclusions	Total Expenditures

Recommended: No outplacement expenditures are included in “Site-Level Per-Pupil Expenditures” as they are all being treated as centralized expenditures, allocated across all sites (per pupil, using all pupils).*

Illinois
State Board of
Education

* ISBE’s recommendation is to include all expenditures as centralized expenditure allocations because no costs are technically incurred at these sites for outplaced students. Note that this is different from Option 1.

Option 2b: District-Centralized Expenditure Allocation

All expenditures explicitly associated with outplacements, including tuition, transportation, and LEA costs incurred overseeing and supporting outplacement activities, are allocated across sites (per pupil, using all pupils). Recommended: Assign these as centralized expenditures.

Option 2: Implications and Considerations

24

- Costs associated with outplacements are treated like centralized expenditures rather than attached to individual sites and students.
- Does the LEA feel comfortable integrating these students and their associated costs in reporting? What is the value in that integration? Is there potential risk?

Other implications to consider?
