

Tips for Completing ISBE ISA Correction Template

Always work in the Excel Template/file when making any changes to student information.

DO NOT use a returned .csv file to make any changes to information as the formatting will be lost and errors may result when submitted. See the instructions below on how to copy data from a CSV file into the Excel (XLS) template.

Only the Home school is authorized by ISBE SIS to correct the data for students in their districts in the ISA Correction file for submittal to ISBE SIS.
