## Site-Based Expenditure Reporting: Vendor-Specific User Directions

Each year, the Illinois State Board of Education (ISBE) Site-Based Expenditure Reporting (SBER) team considers how to improve the annual reporting process for districts. We strive for efficiency and accuracy in our data collection and individualized service to districts that need support. In the fiscal year 2022 collection window, the SBER team introduced a questionnaire on the start page to direct users to the reporting approach best suited to their context. Three reporting approaches are available to districts in the ISBE Web Application Security (IWAS) system:

- 1. ISBE's IWAS Online Tool: This requires the upload of an expenditure report and assists districts in calculating site-level expenditures within IWAS.
- 2. Vendor-Calculated Report: Some vendors produce a Site-Based Expenditure Report or provide tools to assist users in performing the calculations. Depending on the size of the district, data may need to be transferred into an upload template before the report can be uploaded and submitted to ISBE.
- 3. District-Calculated Report: Some districts have their own process for performing the calculations.

Based on the reporting approach selected by the district, IWAS can provide vendor-specific instruction to users, including directions for downloading the report or file they need to complete the Site-Based Expenditure Report. We have noticed in the past that some district officials struggle to identify the most appropriate file to expedite the upload process, and some districts are not fully aware of vendor-specific tools to calculate expenditures. Providing these instructions to users directly within IWAS can facilitate a more efficient annual reporting process.

An example of where these vendor-specific instructions will be presented is below. (See the yellow "Tips" bar.) If you would like instructions for your system to appear in IWAS, please take a few moments to complete the <u>Site-Based Expenditure Vendor Survey</u>. You may also reach out to the SBER team at <u>site-based@isbe.net</u> with questions.
