When are food substitutions reimbursable?

The Child and Adult Care Food Program (CACFP) regulations allow food substitutions for children under certain circumstances. Refer to the chart below to determine requirements for food substitutions and when the meal is reimbursable. Also, refer to the separate document, *Milk and Non-Dairy Milk Substitution Chart*.

Reason for Request	Child Not Disabled Special Dietary Need for Personal Reason (Example: Vegetarian, Religious, or Cultural Preferences) The center/home may provide these substitutions; however, is not required.	Child Not Disabled Medical Condition (Example: Allergy) The center/home may provide these substitutions; however, is not required.		Child with Disability or Life Threatening Allergy The center/home must provide substitution when prescribed by physician.
Type of Request	Parent Request ¹	Parent Request ¹	Physician Statement for Food Substitution Signed by Licensed Physician ² (Must list both food to avoid and food to substitute)	Physician Statement for Food Substitution Signed by Licensed Physician ² (Must list both food to avoid and food to substitute)

				Physician Statement
				(or parent may provide,
				but is not required) ⁴

- 1. Request must identify child's special dietary needs or medical problem.
- 2. Use *Physician Statement for Food Substitution* form.
- 3. Nutrient Standards required for non-dairy milk substitute Calcium (276 mg), Protein (8 g), Vitamin A (500 IU), Vitamin D (100 IU), Magnesium (24 mg), Phosphorus (222 mg), Potassium (349 mg), Riboflavin O(.44 mg), and Vitamin B-12 (1.1 mcg).
- 4. The center/home must provide one component for meal/snack to be reimbursable.
- 5. If, according to the physician's statement, the special formula provided by the parents is the only component the child is allowed to consume, the meals may be claimed for reimbursement when the special formula is prepared and fed by center staff or home provider. If the parent performs this task at the center/home, the meal would *not* be reimbursable.
