

Working together to get fiber to your district

EducationSuperHighway is partnering with **the State of Illinois**, the **Illinois State Board of Education**, **Illinois Department of Innovation and Technology**, **Illinois Century Network**, and **Learning Technology Centers** to enable high-speed Internet in every classroom in Illinois so that all students can take advantage of the promise of digital learning. For nearly every school district in Illinois, fiber is the only technology that can affordably deliver fast network speeds today and continue to scale cost-effectively to meet the growing bandwidth needs of the future.

Our approach

We provide – **at no cost** – the expert resources and time needed to upgrade your school district to a fiber network that supports your digital learning goals.

A school district fiber project includes the following steps:

- We build a plan to **upgrade your network** based on your district's circumstances and provider options.
- We help you **build a case for funding** so that all stakeholders understand the budget needed for the upgrade.
- We assist you in **selecting the best provider** during the RFP process.
- We **support implementation** of your new network.

What are the benefits of working together?

District fiber projects with EducationSuperHighway are provided free of charge to districts that currently do not have fiber and are committed to upgrading their networks for digital learning.

Our fiber project teams are made up of highly qualified experts with specialized network technology and network procurement skills. The team can support all aspects of your process - from providing contacts and context that enable quick wins through to supporting you with a complex fiber build.

High-speed broadband can unlock the power of technology to personalize learning for students, empower teachers, connect parents, and ensure equal educational opportunity for all.

If you are committed to implementing a robust network to support your students' learning goals, we can help.

We want to help you upgrade your district's network to high-speed fiber.
