## ISBE SIS File Format Layouts Overview

This document provides the ISBE SIS file format layouts for the different types of data that will be collected in ISBE SIS. The data will be collected based on file type, e.g., student demographics, exit student enrollment, and assessment pre-ID. Formats for text (comma delimited), csv (comma separated value), and XML methods are provided for each file type. Sample import and export files are presented following the layout descriptions for each file type. Additionally, the ISBE SIS Data Elements document provides the SIS Data Elements and the approved codes and indicators used in creating each batch file.

This document describes the details for the ISBE SIS file format layout, including:

- File Naming Standards
- File Header Format
- File Body Format (Text (.txt), Excel (.csv) XML(.xml))
- Result Codes and Result Messages

Each type of data submitted to ISBE SIS (e.g., Student Demographics) will have a separate file format layout that will collect a unique set of information. The different file type layouts are provided following the file naming standards and file header format.

### *1.1 File Naming Standards*

The import and export files should follow the following file name formats:

Import File Name Format:

#### Text

RCDTS or District Name+\_ + Date(mmddyyyy) +\_+ File Identifier.txt  
e.g. 500821040020000\_06222005\_001.txt  
e.g. Chatham\_06222005\_001.txt

#### Excel

RCDTS or District Name+\_ + Date(mmddyyyy) +\_+ File Identifier.csv  
e.g. 500821040020000\_06222005\_001.csv  
e.g. Chatham\_06222005\_001.csv

#### XML

RCDTS or district name+\_ + Date(mmddyyyy) +\_+ File Identifier.xml  
e.g. 500821040020000\_06222005\_001.xml  
e.g. Chatham\_06222005\_001.xml

If more than one file is submitted on the same date, the file identifier is used to differentiate the individual files.

Text

e.g. 50082104002\_12152004\_001.txt

e.g. 50082104002\_12152004\_002.txt

Excel

e.g. 50082104002\_12152004\_001.csv

e.g. 50082104002\_12152004\_002.csv

XML

e.g. 50082104002\_12152004\_001.xml

e.g. 50082104002\_12152004\_002.xml

## 1.2 File Header Format

Each import file must contain a header as the first row of the batch import file. All fields in the defined header row will be mandatory. If the file is in a text format (.txt or .csv), the header row will be delimited by a carriage return and followed by the student records. The header row must contain the following fields:

Name	Type	Max. Length	Mandatory/Optional	Description
File Type	String	30	M	Type of data submitted (e.g., Student Demographics). See below for complete list.
Total Number of Records	String	10	O	Total number of records in the import file, not including the header row.
File Name including extension	String	40	M	Name of import file being sent to ISBE SIS. Note: Must match actual file name to meet upload validation.
File Sent Date	String	10	M	Date file is sent to ISBE SIS (mm/dd/yyyy).
RCDTS	String	15	M	RCDTS of district submitting file to ISBE SIS. Note: Must match RCDTS of IWAS login of the user submitting the file.

File types currently accepted include:

- 504 Plan
- ACCESS Assessment Correction
- ACCESS Correction
- ACT/PreACT Pre-ID
- ACT/PreACT Correction
- Adjusted Cohort Graduation Rate

- Birth To Three Indicators
- Birth To Three Caregiver

### 1.3 File Body Format

#### 1.3.1 504 Plan Collection

This file format pertains to the data submitted to ISBE SIS when submitting information for 504 Plan collection. The batch import file must conform to the order and data type listed in the table on the following page with exception to the Result Code and Result Message fields. The Result Code and Result Message fields will be appended to each record by the ISBE SIS system for the batch export file. Refer to the ISBE SIS Data Elements document for the approved codes and definitions.

#	Field	Type	Max. Length	Mandatory/Optional
1	Student ID	String	9	M
2	SAP ID	String	50	O
3	Legal Last Name	String	30	M
4	Legal First Name	String	30	M
5	Birth Date	String	10	M
6	RCDTS Home School	String	15	M
7	RCDTS Serving School	String	15	M

### 1.3.3 ACT/PreACT Secure Pre-ID File Format

**THIS SECTION ONLY APPLIES TO THOSE STUDENTS WHO WERE INVOLVED IN SAT TESTING (GRADES 9, 10, and 11, and 12 if required to test).**

This file format pertains to the data submitted to ISBE SIS when submitting information for ACT/PreACT Secure Pre-ID. The batch import file must conform to the order and data type listed in the table below, with exception to the Result Code and Result Message fields. The Result Code and Result Message fields will be appended to each record by the ISBE SIS system for the batch export file. Refer to the ISBE SIS Data Elements document for the approved codes and definitions.

**ACT/PreACT Secure Pre-ID**

#	Field	Type	Max. Length	Mandatory/Optional
1	Student ID	String	9	M
2	SAP ID	String	50	O

23	Result Message	String	200	N/A

### 1.3.5 Adjusted Cohort Graduation Rate File Format

#### **THIS SECTION ONLY APPLIES TO THOSE STUDENTS WHO ARE ENROLLED IN GRADES 9-12 ONLY.**

This file format pertains to the data submitted to ISBE SIS to correct student information for the final data files for the Adjusted Cohort Graduation Rate deadlines.

ISBE SIS will provide an Adjusted Cohort Graduation Rates CSV file that includes school data from the SIS demographics and enrollment history in the Student Information System. This file is to be converted into an Excel spreadsheet for review and, if needed, data corrected by the School District. Once the corrections to individual student information relative to the “First Year In 9<sup>th</sup> Grade” or “Exit Type Code” are made, the Excel spreadsheet must be ‘Saved As’ a CSV file and uploaded to SIS via IWAS.

The batch import CSV file must conform to the order and data type listed in the table on the following page with exception to the Result Code and Result Message fields. The Result Code and Result Message fields will be appended to each record by the ISBE SIS system for the batch export file. Refer to the ISBE SIS Data Elements document for the approved codes and definitions.

**Adjusted Cohort Graduation Rates**

#	Field	Type	Max. Length	Mandatory/Optional
1	Student ID	String	9	M
2	SAP ID	String	50	O

5	Birth Date	String	10	M
6	RCDTS for Current Home School	String	15	M
7	RCDTS for Serving School	String	15	M
8	1st School Year in 9th Grade – As of 08/15/2017 this field is no longer able to be updated and will be ignored in the file but must be included to identify the student.	String	4	M
9	Enrollment Exit Type	String	2	M
27	Result Code	String	2	N/A

#	Field	Type	Max. Length	Mandatory/Optional
28	Result Message	String	200	N/A

### 1.3.6 Birth To Three Indicators File Format

This file format pertains to the data submitted to ISBE SIS when submitting information for Birth To Three Indicators Data Collection. The Home School District is the only entity allowed to upload the Birth To Three Indicators.csv file in the ISBE SIS. The batch import file must conform to the order and data type listed in the table below with exception of the Result Code and Result Message fields. The Result Code and Result Message fields will be appended to each record by the ISBE SIS system for the batch export file. Refer to the ISBE SIS Data Elements document for the approved codes and definitions.

**Birth To Three Indicators**

### 1.3.7 Birth To Three Program File Format

This file format pertains to the data submitted to ISBE SIS when submitting information for Birth To Three Program Data Collection. The Home School District is the only entity allowed to upload the Birth To Three Program.csv file in the ISBE SIS. The batch import file must conform to the order and data type listed in the table below with exception of the Result Code and Result Message fields. The Result Code and Result Message fields will be appended to each record by the ISBE SIS system for the batch export file. Refer to the ISBE SIS Data Elements document for the approved codes and definitions.

### 1.3.36 Student Demographic/Enrollment File Format

This file format pertains to the data submitted to ISBE SIS when requesting the Student ID, updating student demographic/enrollment information (SID provided), or creating a new enrollment for an existing student (SID provided). Records to update student information may be included in the same file with records to create a new SID or enrollment. Additionally, all student records do not need to be submitted in each file. The School District may choose to send a file with only new students (request SIDs), or a file to update student information (existing students with a SID).

The Home School District is the only entity allowed to request a SID and submit enrollment information to ISBE SIS, as well as update their student records. Through the batch process the RCDT in the header row of the file must match the RCDT code in the RCDT for Home School field. When a school district submits Student Enrollment data, ISBE SIS will validate that the Percent of Day Attended (PDA) value for serving schools is less than or equal to one (1.00). If the PDA calculation is greater than 1.00, ISBE SIS will reject the new enrollment. While ISBE SIS will accept more than one serving school enrollment for each student (within the PDA calculation guidelines), there may be only one (1) home (resident) school associated with each student.

When a school district submits data to update the Student Enrollment record, ISBE SIS will confirm that the enrollment is not in an “exited” status. If an enrollment record is inactive (exited status), ISBE SIS does not allow changes to the enrollment data in the exited enrollment record. When a school district requests an “enrollment exit,” ISBE SIS will exit the student only from that serving school, leaving all other current existing enrollments active.

The batch import file must conform to the order and data type listed in the table on the following page with exception to the Result Code and Result Message fields. The Result Code and Result Message fields will be appended to each record by the ISBE SIS system for the batch export file. If the user is requesting a SID (SID not provided), the SID will be appended if an existing record is found or a new SID is assigned. Refer to the ISBE SIS Data Elements document for the approved codes and definitions.

## ***1.4 Export File***

The ISBE SIS Export file will be returned in the same format with the same data that was provided plus the following for each record:

- New or Returned (Existing) SIDs
- Result Code, and
- Result Message.

**Note:** A 'B3' or 'U4' Result Code is assigned if a student transfers to another district and the losing school district has not exited the student in ISBE SIS. The gaining school district is not able to actively enroll the student in the SIS System. If a 'B3' or 'U4' is assigned, a system generated email is sent to both the school district that the student is currently enrolled, as well as the school district that is attempting to enroll the student. The losing school district is notified that the school district is trying to enroll the student and they must first exit the student. Contact information for the gaining school district is provided. The gaining school district is notified that the student is still enrolled at another school and the losing school must first exit the student before the enrollment is accepted. Contact information for the losing school district is provided.

Although the enrollment is not reflected at the state level until the losing school district releases the student, the gaining school district should still enroll the student based on the school district's current enrollment process.

**TEXT (comma delimited) File Format**

The ISBE SIS batch import and export files will follow a standard format that will be laid out within this document. The file will follow basic ASCII standard and will use a “.txt” extension. The import and export files will be delimited by a carriage return between records, while a comma will separate fields within those records. All fields must be represented with a comma. Blank fields should contain no white space. There is no space following the comma and the beginning of the next field.

## ***1.6 Excel File Format (Saved as CSV – Comma Delimited)***

The ISBE SIS batch process accepts the conversion of an Excel spreadsheet into a comma delimited text (.CSV) format. An Excel template is provided for School Districts to specify whether a student tested or did not test. The Excel template also allows the user to correct any testing information that is either missing or inaccurate as of the last day of assessment testing for grades 3-8 and 11 in the required file format for data submission. The 2007 Assessment Correction Excel spreadsheet (converted from the downloaded CSV file from SIS) includes the header row, as well as all of the required fields for file format. The information in green are field labels and are not available for modification. The School District will need to complete the following information in the Excel spreadsheet:

Row 1 – Columns B through E

Row 3+ – Columns A through AA (each row is one student record) may be updated with the exception of Column C the SID. New students added following the last displayed student record.

Note: Row 2 contains the field names and may not be modified.

The Steps for Creating and Uploading Assessment Data, Tips for Completing Assessment Correction Template, and the Assessment Correction Template are available on the ISBE SIS website – [www.isbe.net/sis](http://www.isbe.net/sis). The template is available as a Windows version and a Mac version.

Once the data are reviewed and modified in the spreadsheet and prior to submission to ISBE, the file must be converted to a .CSV file format. An Excel spreadsheet can be converted to another file format by saving it with the **Save As** command (**File** menu) in Excel. The directions for converting a file to .CSV are listed below.

### **Save a workbook in another file format**

1. Open the Assessment Correction Excel Template, or if you already have the spreadsheet open save the Excel version (.XLS extension).
2. On the File menu click File → Save As.
3. In the **File Name** box, type the same file name as you typed in 1-C.
4. In the **Save as** type list, select CSV (Comma delimited).
5. Click **Save**.
6. When notified that the file may contain features not compatible with CSV, click **Yes** to keep the workbook in the current format and finish saving the file.
7. **Close** the Excel file.
8. When prompted to save your changes to the CSV file during the close function click **No**.

The file has now been converted from Excel to comma delimited (.CSV) and is in the correct format for submission to ISBE.
