

High School Students Taking Community College Courses School Year 2006-2007 Report

To comply with Section 2-3.144 of the Illinois School Code (formerly Section 2-3.142 and, before that, Section 3-14.27), as well as Section 10-21.4 or 34-8, high school and unit district superintendents are required to complete and submit to the Illinois State Board of Education an annual survey that documents the number of high school students taking community college courses and the names of the courses taken.

For school year 2006-2007, 544 high school and unit districts completed and submitted the High School Students Taking Community College Courses survey between April and September 2007. Among these reporting districts, 142 districts reported no students taking community college courses and the remaining 402 districts reported that 33,626 high school students took courses offered by the community colleges. Of the 632,910 high school students recorded in 2007-2008, approximately 5 percent took courses offered by the community colleges. Appendix A provides data on the number of students, by gender and race, in each of the districts where students enrolled in community college courses.

High school and unit districts reported a total of 48 Illinois community colleges that offered courses to their high school students. The number of high school students who took courses from these community colleges ranges from 10 students at the Wilbur Wright City College in Chicago to 2,895 students at the Lewis and Clark Community College in Godfrey. Among the 48 community colleges, approximately 42 percent (20 colleges) offered courses to more than 500 high school students. Eight community colleges, including all seven Chicago city colleges, offered courses to fewer than 100 high school students during school year 2006-2007. Appendix B lists these community colleges, along with the number of high school students, by gender and race, enrolled.

There were 29 community college courses taken by 33,626 high school students, with about half of the students taking more than one course. Therefore, districts recorded 50,521 course enrollment counts for the 29 courses. The number of students taking each of these courses ranges from 1 student taking the military technologies course to 12,113 students taking the computer and information science course. Approximately 62 percent (18 courses) of the 29 courses served more than 500 high school students each; three courses were taken by fewer than 30 students. One course—conservation and renewable natural resources—had been offered by the community colleges in the past but had no high school students enrolled in school year 2006-2007. Appendix C lists the course names and the number of high school students, by gender and race, enrolled.

For further information regarding high school students taking community college courses, contact Ms. Niann Chern in the Illinois State Board of Education, Data Analysis and Progress Reporting Division, at 217/782-3950 or nchern@isbe.net.
