Clarification of the Immunization Status of Children and Compliance with State Law for 2016-2017 School Year

The following definitions have been developed by the Illinois Department of Public Health to clarify the difference between (1) being protected against the specific vaccine-preventable diseases and in compliance, (2) being unprotected and in compliance, and (3) being unprotected and in noncompliance.

In addition to being in compliance relative to immunizations, children must receive physical examinations prior to entering Illinois schools for the first time, prior to the date of entering kindergarten or first grade, prior to entering sixth grade, and prior to entering ninth grade. Children who have not received physical examinations, as required, are considered to be in noncompliance whether or not they have received the required immunizations.

a Children with certain chronic conditions or immunosuppressive conditions are recommended to receive a dose of pneumococcal polysaccharide vaccine (PPV23) in addition to PCV13 two months after the last PCV7 or PCV13.

b CDC now recommends that for children with certain chronic conditions or immunosuppressive condition with no history of PPSV23 vaccination, administer PPSV23 at least 8 weeks after the most recent dose of PCV13.
