Summary

The Jasper School addition consists of 10 new classrooms added on to the existing Junior High School building. Also included is an all purpose room, cafeteria, and toilets. Areas of the present building were re-designed to accommodate a music room, library, science room and computer lab. This facility is constructed with concrete footings and foundation, steel frame, brick exterior, concrete block interior and terrazzo flooring. Also incorporated in the construction is energy saving light fixtures and individual heating and cooling equipment for each area.
