

Illinois

Grades 4 and 8 Public Schools State Report Reading 2019

This report provides selected results for Illinois' public school students at grades 4 and 8 from the 2019 National Assessment of Educational Progress (NAEP) assessment in reading. Results are reported by average scale scores and by NAEP achievement levels (*NAEP Basic*, *NAEP Proficient*, and *NAEP Advanced*).

State-level results in reading are available for 13 assessment years (at grade 4 in 1992 and 1994, and at both grades 4 and 8 in 1998, 2002, 2003, 2005, 2007, 2009, 2011, 2013, 2015, 2017, and 2019), although not all states may have participated or met the criteria for reporting in every assessment year. All 50 states, the District of Columbia, and the Department of Defense Education Activity (DoDEA) schools participated in the 2019 reading assessment at grades 4 and 8.

For more information about the assessment, visit the NAEP page of the NCES website at: <https://nces.ed.gov/nationsreportcard/>, which contains

- *The Nation's Report Card™, Reading 2019*,
- The full set of national, state, and district results in an interactive database, and
- Released test questions, scoring guides, and item-level performance data.

NAEP is a project of the National Center for Education Statistics (NCES), reporting on the academic achievement of elementary and secondary students in the United States.

KEY FINDINGS FOR 2019

Grade 4:

- In 2019, the average reading scale score for fourth-grade students in Illinois was 218. This was not significantly different from that for the nation's public schools (219).
- The average scale score for students in Illinois in 2019 (218) was not significantly different from that in 2003 (216) and was not significantly different from that in 2017 (220).
- In 2019, the percentage of students in Illinois who performed at or above *NAEP Proficient* was 34 percent. This was not significantly different from that for the nation's public schools (34 percent).
- The percentage of students in Illinois who performed at or above *NAEP Proficient* in 2019 (34 percent) was not significantly different from that in 2003 (31 percent) and in 2017 (35 percent).
- In 2019, the percentage of students in Illinois who performed at or above *NAEP Basic* was 64 percent. This was not significantly different from that for the nation's public schools (65 percent).
- The percentage of students in Illinois who performed at or above *NAEP Basic* in 2019 (64 percent) was not significantly different from that in 2003 (61 percent) and in 2017 (66 percent).

Grade 8:

- In 2019, the average reading scale score for eighth-grade students in Illinois was 265. This was higher than that for the nation's public schools (262).
- The average scale score for students in Illinois in 2019 (265) was not significantly different from that in 2003 (266) and was not significantly different from that in 2017 (267).
- In 2019, the percentage of students in Illinois who performed at or above *NAEP Proficient* was 35 percent. This was greater than that for the nation's public schools (32 percent).
- The percentage of students in Illinois who performed at or above *NAEP Proficient* in 2019 (35 percent) was not significantly different from that in 2003 (35 percent) and in 2017 (36 percent).
- In 2019, the percentage of students in Illinois who performed at or above *NAEP Basic* was 74 percent. This was not significantly different from that for the nation's public schools (72 percent).
- The percentage of students in Illinois who performed at or above *NAEP Basic* in 2019 (74 percent) was not significantly different from that in 2003 (77 percent) and was smaller than that in 2017 (77 percent).

The U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, and National Assessment of Educational Progress (NAEP) have provided software that generated user-selectable data, statistical significance test result statements, and technical descriptions of the NAEP assessments for this report. Content may be added or edited by states or other jurisdictions. This document, therefore, is not an official publication of the National Center for Education Statistics.

Introduction

What Was Assessed?

The National Assessment of Educational Progress (NAEP) reading assessment uses literary and informational texts to measure students' reading comprehension skills. Students read grade-appropriate passages and answer questions based on what they have read. Performance results are reported for the nation overall, for states and jurisdictions, and for 27 districts participating in the Trial Urban District Assessment (TUDA). The 2019 NAEP reading assessment was the second digitally based assessment. In 2017, the NAEP reading assessment transitioned from a paper-based assessment (PBA) to a digitally based assessment (DBA) at grades 4 and 8. A multi-step process was used for the transition from PBA to DBA, with the careful intent to preserve trend lines that show student performance over time. The process involved administering the assessment in both the DBA and PBA formats to randomly equivalent groups of students and ensured that the results from the 2017 and 2019 reading assessments could be compared to results from previous years. The 2019 reading DBA continues the reading trend line that extends back to 1992.

The NAEP Reading Assessment Framework

The [National Assessment Governing Board](#) oversees the development of NAEP frameworks that describe the subject-specific knowledge and thinking skills to be assessed in each subject and how the assessment questions should be designed and scored. The development of the [NAEP reading framework](#) was guided by scientifically-based reading research. The framework defines reading as a dynamic cognitive process that involves understanding written text, developing and interpreting meaning, and using meaning as appropriate to the type of text in the assessment. The framework also guides the types of texts included in the assessment and specifies cognitive targets for assessment questions. The same framework that has guided assessment development since 2009 was used to guide development of the 2019 DBA.

Types of Text

Research on the nature of texts suggests that readers attend to different aspects of texts as they read different text types; that is, the nature of texts affects reading comprehension. The reading framework includes two types of texts to be used in the assessment: literary and informational. Literary and informational texts for the NAEP reading assessment are distinct categories for two reasons: (1) the structural differences that mark the texts, and (2) the purposes for which students read different texts. Each text type includes various genres.

Literary texts include fiction, literary nonfiction, and poetry.

Informational texts include exposition, argumentation and persuasive texts, and procedural texts and documents.

Reading Cognitive Targets

The term *cognitive target* refers to the mental processes or kinds of thinking that underlie reading comprehension. The framework specifies that assessment questions for both literary and informational texts measure one of the three cognitive targets.

- **Locate and Recall:** When locating or recalling information from what they have read, students may identify explicitly stated information or may focus on specific elements of a story.
- **Integrate and Interpret:** When integrating and interpreting what they have read, students make complex inferences within and across texts; they may explain character motivation, infer the main idea of an article, or infer and explain the theme of a story.
- **Critique and Evaluate:** When critiquing or evaluating what they have read, students consider the text critically by viewing it from numerous perspectives; they may evaluate overall text quality or the effectiveness of particular aspects of the text.

The proportion of the assessment questions devoted to each of the three cognitive targets varies by grade to reflect the developmental differences of students.

Assessment Design

The assessment contains reading materials that were drawn from sources commonly available to students both in and out of the school environment. These authentic materials were considered to be representative of students' typical reading experiences. Students read grade appropriate passages in two blocks during the reading assessment. A combination of multiple-choice and constructed-response questions was used to assess students' understanding of the passages. Released NAEP reading passages and questions, along with student performance data by state, are available on the NAEP website at <https://nces.ed.gov/nationsreportcard/itmrlsx/>.

Who Was Assessed?

All 50 states, the District of Columbia, and the Department of Defense Education Activity (DoDEA) schools participated in the 2019 reading assessment at grades 4 and 8. In order for assessment results to be reported to the public, the overall participation rates for schools and students must meet guidelines established by the National Center for Education Statistics (NCES) and the National Assessment Governing Board (Governing Board). A minimum of 85 percent participation is required for schools in each subject and grade combination. Participation rates for the 2019 reading assessment are available on the NAEP website at <https://www.nationsreportcard.gov/reading/about/samples?anchor=footer&grade=4>.

The schools and students participating in NAEP assessments are selected to be representative both nationally and for public schools at the state level. The comparisons between national and state results in this report present the performance of public school students only. In NAEP reports, the category "nation (public)" does not include DoDEA or Bureau of Indian Education (BIE) schools.

How Is Student Reading Performance Reported?

The 2019 state results are compared to results from 12 earlier assessments at grade 4 and from 10 earlier assessments at grade 8.

Scale Scores: Student performance is reported as an average scale score based on the NAEP reading scale, which ranges from 0 to 500 for grades 4 and 8. Because NAEP scales are developed independently for each subject and for each content area within a subject, the scores cannot be compared across subjects or across content areas within the same subject. Results are also reported at five percentiles (10th, 25th, 50th, 75th, and 90th) to show trends in performance for lower-, middle-, and higher-performing students.

NAEP Achievement Levels: NAEP achievement levels are performance standards that describe what students should know and be able to do. Results are reported as percentages of students performing at or above three achievement levels (*NAEP Basic*, *NAEP Proficient*, and *NAEP Advanced*). Students performing at or above the *NAEP Proficient* level on NAEP assessments demonstrate solid academic performance and competency over challenging subject matter. It should be noted that the *NAEP Proficient* achievement level does not represent grade-level proficiency as determined by other assessment standards (e.g., state or district assessments).

Interpreting the Results

NAEP achievement-level setting is based on the judgments of a broadly representative panel of teachers, education specialists, and members of the general public. The authorizing legislation for NAEP requires that the achievement levels be used on a trial basis until the Commissioner of the National Center for Education Statistics (NCES) determines that the achievement levels are reasonable, valid, and informative to the public (20 USC § 9622(e)(2)(C)). The NCES Commissioner's determination is to be based on a congressionally mandated, rigorous, and independent evaluation. The latest evaluation of the achievement levels was conducted by a committee convened by the National Academies of Sciences, Engineering, and Medicine in 2016. The evaluation concluded that further evidence should be gathered to determine whether the achievement levels are reasonable, valid, and informative. Accordingly, the NCES Commissioner determined that the trial status of the achievement levels should be maintained at this time. Read more about how [NAEP achievement levels](#) are set. In 2018, the National Assessment Governing Board issued a revised Policy Statement clarifying that the *NAEP Proficient* level is not intended to reflect grade-level performance expectations but is specific to performance on NAEP assessments. Read the [Governing Board Policy Statement here](#).

- *NAEP Basic*, one of the three NAEP achievement levels, denoting partial mastery of prerequisite knowledge and skills that are fundamental for performance at the *NAEP Proficient* level. NAEP also reports the proportion of students whose scores place them below the *NAEP Basic* achievement level.
- *NAEP Proficient*, one of the three NAEP achievement levels, representing solid academic performance for each NAEP assessment. Students reaching this level have demonstrated competency over challenging subject matter, including subject-matter knowledge, application of such knowledge to real-world situations, and analytical skills appropriate to the subject matter.
- *NAEP Advanced*, one of the three NAEP achievement levels, denoting superior performance beyond *NAEP Proficient*.

The NAEP achievement levels are cumulative; therefore, students performing at the *NAEP Proficient* level also display the competencies associated with the *NAEP Basic* level, and students at the *NAEP Advanced* level demonstrate the competencies associated with both the *NAEP Basic* and the *NAEP Proficient* levels.

As provided by law, NCES, upon review of congressionally mandated evaluations of NAEP, has determined that NAEP achievement levels are to be used on a trial basis and should be interpreted with caution. The NAEP achievement levels have been widely used by national and state officials. The reading NAEP achievement-level descriptions are summarized in Figures 1-A and 1-B .

**Figure
1-A**

The Nation's Report Card 2019 State Assessment

Descriptions of fourth-grade NAEP achievement levels for 2019 NAEP reading assessment

NAEP Basic Level (208) *Fourth-grade students performing at the NAEP Basic level should be able to locate relevant information, make simple inferences, and use their understanding of the text to identify details that support a given interpretation or conclusion. Students should be able to interpret the meaning of a word as it is used in the text.*

When reading **literary** texts such as fiction, poetry, and literary nonfiction, fourth-grade students performing at the *NAEP Basic* level should be able to make simple inferences about characters, events, plot, and setting. They should be able to identify a problem in a story and relevant information that supports an interpretation of a text.

When reading **informational** texts such as articles and excerpts from books, fourth-grade students performing at the *NAEP Basic* level should be able to identify the main purpose and an explicitly stated main idea, as well as gather information from various parts of a text to provide supporting information.

NAEP Proficient Level (238) *Fourth-grade students performing at the NAEP Proficient level should be able to integrate and interpret texts and apply their understanding of the text to draw conclusions and make evaluations.*

When reading **literary** texts such as fiction, poetry, and literary nonfiction, fourth-grade students performing at the *NAEP Proficient* level should be able to identify implicit main ideas and recognize relevant information that supports them. Students should be able to judge elements of an author's craft and provide some support for their judgment. They should be able to analyze character roles, actions, feelings, and motivations.

When reading **informational** texts such as articles and excerpts from books, fourth-grade students performing at the *NAEP Proficient* level should be able to locate relevant information, integrate information across texts, and evaluate the way an author presents information. Student performance at this level should demonstrate an understanding of the purpose for text features and an ability to integrate information from headings, text boxes, and graphics and their captions. They should be able to explain a simple cause-and-effect relationship and draw conclusions.

NAEP Advanced Level (268) *Fourth-grade students performing at the NAEP Advanced level should be able to make complex inferences and construct and support their inferential understanding of the text. Students should be able to apply their understanding of a text to make and support a judgment.*

When reading **literary** texts such as fiction, poetry, and literary nonfiction, fourth-grade students performing at the *NAEP Advanced* level should be able to identify the theme in stories and poems and make complex inferences about characters' traits, feelings, motivations, and actions. They should be able to recognize characters' perspectives and evaluate characters' motivations. Students should be able to interpret characteristics of poems and evaluate aspects of text organization.

When reading **informational** texts such as articles and excerpts from books, fourth-grade students performing at the *NAEP Advanced* level should be able to make complex inferences about main ideas and supporting ideas. They should be able to express a judgment about the text and about text features and support the judgments with evidence. They should be able to identify the most likely cause given an effect, explain an author's point of view, and compare ideas across two texts.

NOTE: The scores in parentheses in the shaded boxes indicate the lowest point on the 0 to 500 scale at which the NAEP achievement-level range begins.

**Figure
1-B**

The Nation's Report Card 2019 State Assessment

Descriptions of eighth-grade NAEP achievement levels for 2019 NAEP reading assessment

NAEP Basic Level (243) Eighth-grade students performing at the NAEP Basic level should be able to locate information; identify statements of main idea, theme, or author's purpose; and make simple inferences from texts. They should be able to interpret the meaning of a word as it is used in the text. Students performing at this level should also be able to state judgments and give some support about content and presentation of content.

When reading **literary** texts such as fiction, poetry, and literary nonfiction, eighth-grade students performing at the NAEP Basic level should recognize major themes and be able to identify, describe, and make simple inferences about setting and about character motivations, traits, and experiences. They should be able to state and provide some support for judgments about the way an author presents content and about character motivation.

When reading **informational** texts such as exposition and argumentation, eighth-grade students performing at the NAEP Basic level should be able to recognize inferences based on main ideas and supporting details. They should be able to locate and provide relevant facts to construct general statements about information from the text. Students should be able to provide some support for judgments about the way information is presented.

NAEP Proficient Level (281) Eighth-grade students performing at the NAEP Proficient level should be able to provide relevant information and summarize main ideas and themes. They should be able to make and support inferences about a text, connect parts of a text, and analyze text features. Students performing at this level should also be able to fully substantiate judgments about content and presentation of content.

When reading **literary** texts such as fiction, poetry, and literary nonfiction, eighth-grade students performing at the NAEP Proficient level should be able to make and support a connection between characters from two parts of a text. They should be able to recognize character actions and infer and support character feelings. Students performing at this level should be able to provide and support judgments about characters' motivations across texts. They should be able to identify how figurative language is used.

When reading **informational** texts such as exposition and argumentation, eighth-grade students performing at the NAEP Proficient level should be able to locate and provide facts and relevant information that support a main idea or purpose, interpret causal relations, provide and support a judgment about the author's argument or stance, and recognize rhetorical devices.

NAEP Advanced Level (323) Eighth-grade students performing at the NAEP Advanced level should be able to make connections within and across texts and to explain causal relations. They should be able to evaluate and justify the strength of supporting evidence and the quality of an author's presentation. Students performing at the NAEP Advanced level also should be able to manage the processing demands of analysis and evaluation by stating, explaining, and justifying.

When reading **literary** texts such as fiction, literary nonfiction, and poetry, eighth-grade students performing at the NAEP Advanced level should be able to explain the effects of narrative events. Within or across texts, they should be able to make thematic connections and make inferences about characters' feelings, motivations, and experiences.

When reading **informational** texts such as exposition and argumentation, eighth-grade students performing at the NAEP Advanced level should be able to infer and explain a variety of connections that are intratextual (such as the relation between specific information and the main idea) or intertextual (such as the relation of ideas across expository and argument texts). Within and across texts, students should be able to state and justify judgments about text features, choice of content, and the author's use of evidence and rhetorical devices.

NOTE: The scores in parentheses in the shaded boxes indicate the lowest point on the 0 to 500 scale at which the NAEP achievement-level range begins.

Assessing Students With Disabilities and/or English Language Learners

Testing accommodations, such as extra testing time or individual (rather than group) administration, are provided for students with disabilities (SD) and/or English language learners (ELL) who could not fairly and accurately demonstrate their abilities without modified test administration procedures. In 1996, administration procedures were introduced at the national level allowing certain accommodations for students requiring such accommodations to participate.

In state NAEP reading assessments prior to 1998, no testing accommodations or adaptations were permitted for SD and/or ELL students. In 1998, NAEP was administered using a split sample of schools—one sample in which accommodations were permitted for SD and/or ELL students who normally received them and another sample in which accommodations were not permitted. Therefore, there were two different sets of results available for 1998, and both are shown in the tables in this report. Please note that bullet statements only reference the results from the 1998 assessment where accommodations were permitted. Results for the assessment years where accommodations were not permitted in state NAEP reading assessments (1992 and 1994) are reported in the same tables as the results where accommodations were permitted (1998, 2002, 2003, 2005, 2007, 2009, 2011, 2013, 2015, 2017, and 2019).

2019 NAEP Digitally Based Reading Assessment

The 2019 NAEP digitally based reading assessment was designed to continue reporting trends in student performance dating back to 1992, while keeping pace with the new generation of classroom environments in which digital technology has become an increasing part of students' learning. The 2019 assessment content was developed with the same [reading framework](#) used to develop the 2009 through 2015 paper-based assessments and the 2017 digitally based assessment.

Most of the content administered in the 2019 digitally based reading assessment was also used in the 2015 paper-based assessment. The previously used passages and questions were adapted to fit a tablet screen. While the presentation of content changed, the content itself did not change. Of the 17 passages and question sets at grade 4 and 19 passages and question sets at grade 8 administered, one set at each grade was newly developed for 2019. The newly developed questions were also based on the NAEP reading framework which has guided assessment development since the 2009 assessment.

The assessment was administered on tablet computers supplied by NAEP using a secure, local NAEP network. This allowed the NAEP administrators to create a stable administration environment that would not be influenced by school-based equipment or school internet connectivity, thereby maintaining consistency across the assessed schools. Students were able to interact with the tablets via touchscreen, with an attached keyboard, or using a stylus provided by NAEP. The digitally based reading assessment provided students with online tools, such as look-back buttons to take them back to the passage and a highlighter to mark information in the passage. See how [the reading assessment was presented to students](#). At the beginning of the assessment session, students viewed an [interactive tutorial](#) that provided all the information needed to take the assessment on tablet; for example, it explains how to navigate between the reading text and questions, how to progress through questions, and how to indicate answers for multiple-choice questions. The interactive nature of the tutorial allowed students to familiarize themselves with the digital delivery system before beginning the actual assessment.

In addition to the digitally based assessment, a random subsample of students was administered the complete 2015 paper-based version of the assessment in 2017. NAEP administered the assessment in both modes—paper-based and digitally based—in all the sampled schools to investigate potential differences in performance between students taking the assessment on a tablet and students taking the paper-based assessment. However, in schools with fewer than 21 students, all students were assigned to either the digitally or paper-based assessment. Each participating student, however, took the assessment in only one mode. See how a reading passage and questions looked in the [paper mode](#) and how the same set looked in the [digital mode](#).

After the administration of the assessment, the National Center for Education Statistics (NCES) conducted rigorous analyses of the data and aligned the 2017 results to previous assessment years using a two-step process.

- First, common item linking was used to calculate the trend line from 2015 to 2017 based on the paper-based assessment results. This kind of linking was possible because the majority of 2017 assessment questions were also administered in 2015 and showed the same statistical properties.
- Second, common population linking was used to align the 2017 paper-based assessment results with the 2017 digital assessment results. This kind of linking was possible because the samples of students for each assessment mode were randomly equivalent; that is, each random sample included students from the same school, ensuring that the students' educational experiences and characteristics were equivalent.

Once the common population linking aligned the digital results to the paper results on the national level, the analyses evaluated whether the linking allowed for fair and meaningful comparisons for national student groups as well as for states and districts. These evaluations supported making trend comparisons between the digital assessment and previous paper-based assessments for subgroups, states, and districts.

These analyses—common item linking based on paper results and common population linking of paper results to digital results—enabled NCES to successfully maintain the reading trend line while transitioning to digital assessment in 2017 and to continue the trend line for the 2019 and subsequent digital assessments.

Interpreting the Results

The scores and percentages in this report are estimates based on samples of students rather than on entire populations. In addition, the collection of questions used at each grade level is only a sample of the many questions that could have been asked to assess the skills and abilities described in the NAEP framework. Comparisons over time or between groups are based on statistical tests that consider both the size of the differences and the standard errors of the two statistics being compared. Standard errors are margins of error, and estimates based on smaller groups are likely to have larger margins of error. The size of the standard errors may also be influenced by other factors such as how representative the assessed students are of the entire population. Statistical tests that factor in these standard errors are used to determine whether the differences between average scale scores or percentages are significant. All differences were tested for statistical significance at the .05 level using unrounded numbers.

NAEP sample sizes have increased since 2002 compared to previous years, resulting in smaller standard errors. As a consequence, smaller differences are detected as being statistically significant than were detected in previous assessments. In addition, estimates based on smaller groups are likely to have relatively large standard errors. Thus, some seemingly large differences may not be statistically significant. That is, it cannot be determined whether these differences are due to sampling error, or to true differences in the population of interest.

Differences between scores or percentages are discussed in this report only when they are significant from a statistical perspective. Significant differences between 2019 and prior assessments are marked with a notation (*) in the tables. Any differences in scores within a year or across years that are mentioned in the text as "higher," "lower," "greater," or "smaller" are statistically significant.

Score or percentage differences or gaps cited in this report are calculated based on differences between unrounded numbers. Therefore, the reader may find that the score or percentage difference cited in the text or tables may not be identical to the difference obtained from subtracting the rounded values shown in the accompanying tables or figures.

The reader is cautioned against making simple causal inferences between student performance and the other variables (e.g., race/ethnicity, gender, and type of school location) discussed in this report. A statistically significant relationship between a variable and measures of student performance does not imply that the variable causes differences in how well students perform. The relationship may be influenced by a number of other variables not accounted for in this report, such as family income, parental involvement, or student attitudes.

NAEP 2019 Reading Overall Average Score and NAEP Achievement-Level Results for Public School Students

Overall reading results for public school students from Illinois are reported in this section, as well as regional and national results. The regions defined by the U.S. Census Bureau are Northeast, South, Midwest, and West (<https://nces.ed.gov/nationsreportcard/hsts/tabulations/regions.asp>). Trend data by region are not provided for assessment years prior to 2003.

Prior to 1998, testing accommodations were not provided for SD and/or ELL students in NAEP state reading assessments. For 1998, results are displayed for both the sample in which accommodations were permitted and the sample in which they were not permitted. Subsequent assessment results were based on the more inclusive samples. In the text of this report, comparisons to 1998 results refer only to the sample in which accommodations were permitted.

Overall Average Scale Score Results

Student performance is reported as an average scale score based on the NAEP reading scale, which ranges from 0 to 500 for grades 4 and 8.

Tables 1-A and 1-B show the overall performance results of grades 4 and 8 public school students in Illinois, the nation, and the region. Prior to 2003, the list of states that comprise a given region for NAEP differed from the list used by the U.S. Census Bureau, which has been used in NAEP from 2003 onward. Therefore, the data for the state's region are given only since 2003. The first column of results presents the average scale score on the NAEP reading scale. The remaining columns show the scores at selected percentiles. Percentiles indicate the percentages of students whose scores fell at or below a particular score. For example, the 25th percentile defines the cut point for the lowest 25 percent of students within the distribution of scale scores.

Grade 4 Average Scale Score Results

- In 2019, the average scale score for students in Illinois was 218. This was not significantly different from that for students across the nation (219).
- In Illinois, the average scale score for students in 2019 was not significantly different from that in 2017 (220). However, the average scale score for students in public schools across the nation in 2019 was lower than that in 2017 (221).
- In Illinois, the average scale score for students in 2019 was lower than the score in 2015. However, it was not significantly different from the scores in 2003, 2005, 2007, 2009, 2011, 2013, and 2017.

Grade 8 Average Scale Score Results

- In 2019, the average scale score for students in Illinois was 265. This was higher than that for students across the nation (262).
- In Illinois, the average scale score for students in 2019 was not significantly different from that in 2017 (267). However, the average scale score for students in public schools across the nation in 2019 was lower than that in 2017 (265).
- In Illinois, the average scale score for students in 2019 was not significantly different from the scores in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.

**Table
1-A****The Nation's Report Card 2019 State Assessment**

Average scale scores and selected percentile scores in NAEP reading for fourth-grade public school students, by year and jurisdiction: Various years, 2003–2019

Year and jurisdiction		Average scale score	10th percentile	25th percentile	50th percentile	75th percentile	90th percentile
2003	Nation (public)	216*	167	193*	219*	243*	262*
	Midwest ¹	220	172*	198	223*	246*	264

Overall NAEP Achievement-Level Results

Student results are reported as the percentages of students performing relative to performance standards set by the Governing Board. These performance standards for what students should know and be able to do were based on the recommendations of broadly representative panels of educators and members of the public.

Tables 2-A and 2-B show the percentage of students at grades 4 and 8 who performed below *NAEP Basic*, at or above *NAEP Basic*, at or above *NAEP Proficient*, and at *NAEP Advanced*. Because the percentages are cumulative from *NAEP Basic* to *NAEP Proficient* to *NAEP Advanced*, they may sum to more than 100 percent. Only the percentage of students performing at or above *NAEP Basic* (which includes the students at *NAEP Proficient* and *NAEP Advanced*) plus the students below *NAEP Basic* will sum to 100 percent.

Grade 4 NAEP Achievement-Level Results

- In 2019, the percentage of Illinois' students who performed at or above *NAEP Proficient* was 34 percent. This was not significantly different from the percentage of the nation's public school students who performed at or above *NAEP Proficient* (34 percent).
- In Illinois, the percentage of students who performed at or above *NAEP Proficient* in 2019 was greater than the percentage in 2005, but was not significantly different from the percentages in 2003, 2007, 2009, 2011, 2013, 2015, and 2017.
- In 2019, the percentage of Illinois' students who performed at or above *NAEP Basic* was 64 percent. This was not significantly different from the percentage of the nation's public school students who performed at or above *NAEP Basic* (65 percent).
- In Illinois, the percentage of students who performed at or above *NAEP Basic* in 2019 was not significantly different from the percentages in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.

Grade 8 NAEP Achievement-Level Results

- In 2019, the percentage of Illinois' students who performed at or above *NAEP Proficient* was 35 percent. This was greater than the percentage of the nation's public school students who performed at or above *NAEP Proficient* (32 percent).
- In Illinois, the percentage of students who performed at or above *NAEP Proficient* in 2019 was greater than the percentages in 2005 and 2007, but was not significantly different from the percentages in 2003, 2009, 2011, 2013, 2015, and 2017.
- In 2019, the percentage of Illinois' students who performed at or above *NAEP Basic* was 74 percent. This was not significantly different from the percentage of the nation's public school students who performed at or above *NAEP Basic* (72 percent).
- In Illinois, the percentage of students who performed at or above *NAEP Basic* in 2019 was smaller than the percentages in 2013, 2015, and 2017, but was not significantly different from the percentages in 2003, 2005, 2007, 2009, and 2011.

**Table

Comparisons Between Illinois, the Nation, and Participating States and Jurisdictions

All 50 states, the District of Columbia, and Department of Defense Education Activity schools (DoDEA) participated in the 2019 reading assessment at grades 4 and 8. References to "jurisdictions" in the results statements may include states, the District of Columbia, and DoDEA schools.

Comparisons by Average Scale Scores

Figures 2-A and 2-B compare Illinois' 2019 overall reading scale scores at grades 4 and 8 with those of public schools in the nation and all other participating states and jurisdictions. The different shadings indicate whether the average scale score of the nation (public), a state, or a jurisdiction was found to be higher than, lower than, or not significantly different from that of Illinois in the NAEP 2019 reading assessment.

Grade 4 Average Scale Score Comparison Results

- The average scale score for students in Illinois was higher than 6 jurisdictions, not significantly different from 29 jurisdictions, and lower than 16 jurisdictions.

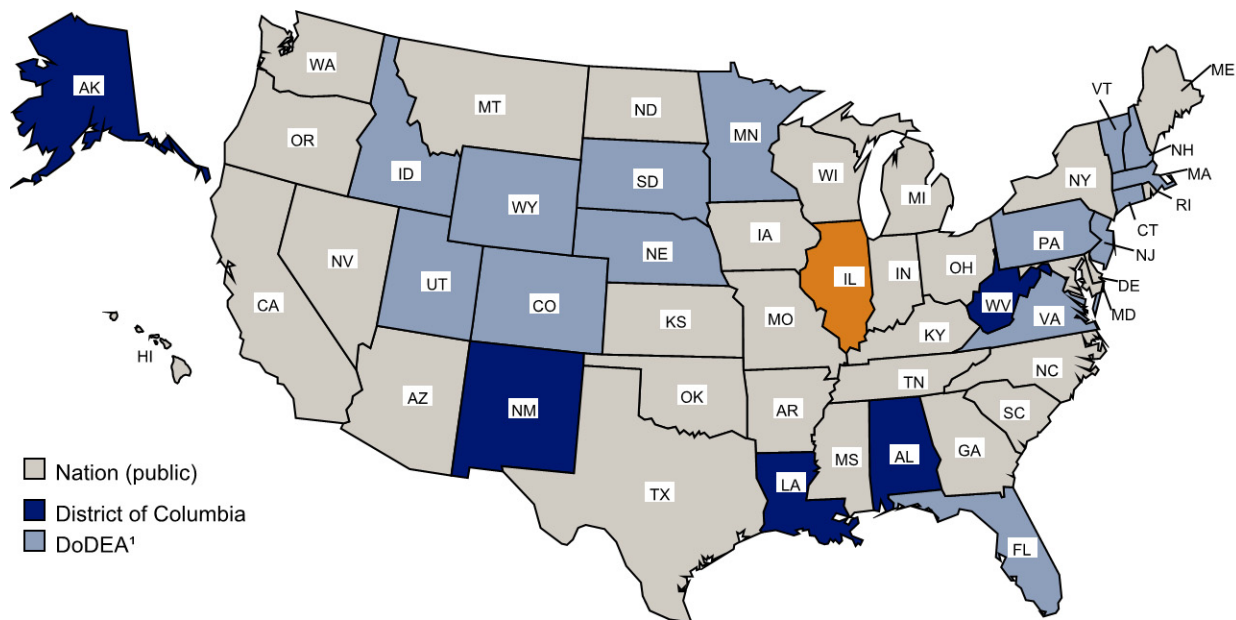

Grade 8 Average Scale Score Comparison Results

- The average scale score for students in Illinois was higher than 16 jurisdictions, not significantly different from 29 jurisdictions, and lower than 6 jurisdictions.

¹ Department of Defense Education Activity (overseas and domestic schools).

NOTE: Significance tests used a multiple-comparison procedure based on all jurisdictions that participated.

SOURCE: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2019 Reading Assessment.

Comparisons by NAEP Achievement Levels

Figures 3-A and 3-B permit comparisons of all jurisdictions (and the nation) participating in the 2019 NAEP reading assessment in terms of percentages of grades 4 and 8 students performing at or above *NAEP Proficient*. The participating states and jurisdictions are grouped into categories that reflect whether the percentage of their students performing at or above *NAEP Proficient* (including *NAEP Advanced*) was found to be higher than, not significantly different from, or lower than the percentage in Illinois.

Note that the selected state is listed first in its category, and the other states and jurisdictions within each category are listed alphabetically; statistical comparisons among jurisdictions in each of the three categories are not included in this report. However, statistical comparisons among states by NAEP achievement level can be conducted online by using the NAEP Data Explorer at <https://nces.ed.gov/nationsreportcard/naepdata/>.

Grade 4 NAEP Achievement-Level Comparison Results

- The percentage of students performing at or above the *NAEP Proficient* level in Illinois was greater than the percentages in 6 jurisdictions, not significantly different from those in 37 jurisdictions, and smaller than those in 8 jurisdictions.
- The percentage of students performing at or above the *NAEP Basic* level in Illinois was greater than the percentages in 6 jurisdictions, not significantly different from those in 28 jurisdictions, and smaller than those in 17 jurisdictions (data not shown).

Grade 8 NAEP Achievement-Level Comparison Results

- The percentage of students performing at or above the *NAEP Proficient* level in Illinois was greater than the percentages in 16 jurisdictions, not significantly different from those in 30 jurisdictions, and smaller than those in 5 jurisdictions.
- The percentage of students performing at or above the *NAEP Basic* level in Illinois was greater than the percentages in 14 jurisdictions, not significantly different from those in 32 jurisdictions, and smaller than those in 5 jurisdictions (data not shown).

Reading Performance of Selected Student Groups

This section of the report presents trend results for public school students in Illinois and the nation by demographic characteristics. Student performance data are reported for

- race/ethnicity
- gender
- student eligibility for the National School Lunch Program
- type of school location (for 2007, 2009, 2011, 2013, 2015, 2017 and 2019)
- parents' highest level of education

NAEP collects information on race/ethnicity, gender, and student eligibility for the National School Lunch Program eligibility from school records. Type of school location is based on standard definitions established by the Federal Office of Management and Budget using population and geographic information from the U.S. Census Bureau. Schools are assigned to these categories in the NCES Common Core of Data based on their physical address. The parents' highest level of education for grade 8 is derived from student questionnaires.

Results for each of the student groups are reported in tables that include the percentage of students in each group in the second column, and the average scale score in the third column. The columns to the right show the percentage of students below *NAEP Basic* and at or above each NAEP achievement level.

Results by students' race/ethnicity and gender include statements about score point differences between student groups (e.g., between White and Black or White and Hispanic students, or between male and female students) in 2019 and in the first assessment year. Because these differences are calculated using unrounded values, they may differ slightly from what would be obtained by subtracting the rounded values that appear in the tables. Statements indicating a narrowing or widening of the gap in students' scores are only made if the change in the gap from the first assessment year to 2019 was found to be statistically significant.

The reader is cautioned against making simple causal inferences about group differences, as a complex mix of educational and socioeconomic factors may affect student performance. NAEP collects information on many additional variables, including school and home factors related to achievement. This information is in an interactive database available on the NAEP website <https://nces.ed.gov/nationsreportcard/naepdata/>.

Race/Ethnicity

Prior to 2011, student race/ethnicity was obtained from school records and reported for the six mutually exclusive categories shown below:

- White
- Black
- Hispanic
- Asian/Pacific Islander
- American Indian/Alaska Native
- Unclassified (not shown in tables)

Students who identified with more than one of the other five categories were classified as "Other" and were included as part of the "Unclassified" category along with students who had a background other than the ones listed or whose race/ethnicity could not be determined.

In compliance with new standards from the U.S. Office of Management and Budget for collecting and reporting data on race/ethnicity, additional information was collected in 2011 so that results could be reported separately for Asian students, Native Hawaiian/Other Pacific Islander students, and students identifying with two or more races. Beginning in 2011, all of the students participating in NAEP were identified as one of the seven racial/ethnic categories listed below:

- White
- Black or African American
- Hispanic
- Asian
- American Indian/Alaska Native
- Native Hawaiian/Other Pacific Islander
- Two or more races

As in earlier years, students identified as Hispanic were classified as Hispanic in 2011 and subsequent assessment years even if they were also identified with another racial/ethnic group. Students who identified with two or more of the other racial/ethnic groups (e.g., White and Black) would have been classified as "Other" and reported as part of the "Unclassified" category prior to 2011, and classified as "Two or More Races" since 2011. Results for these students are presented under the "Two or More Races" category in the graphics and tables in the reports.

When comparing the results for racial/ethnic groups since 2011 to earlier assessment years, the data for Asian and Native Hawaiian/Other Pacific Islander students were combined into the Asian/Pacific Islander category.

Tables 3-A and 3-B show percentage of students and average scale scores by NAEP achievement-level for public school students at grades 4 and 8 in Illinois and the nation, by race/ethnicity.

Grade 4 Average Scale Score Results by Race/Ethnicity

- In 2019, White students in Illinois had an average scale score that was higher than the average scale scores of Black and Hispanic students, but not significantly different from the average scale score of Asian/Pacific Islander students.
- In 2019, the average scale scores of White, Black, and Asian/Pacific Islander students in Illinois were not significantly different from their respective scores in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.
- In 2019, the average scale score of Hispanic students in Illinois was higher than their respective score in 2003, but not significantly different from their respective scores in 2005, 2007, 2009, 2011, 2013, 2015, and 2017.
- In 2019, Black students in Illinois had an average scale score that was lower than that of White students by 28 points. In 2003, the average scale score for Black students was lower than that of White students by 34 points.
- In 2019, Hispanic students in Illinois had an average scale score that was lower than that of White students by 20 points. This performance gap was narrower than that of 2003 (31 points).

Grade 4 NAEP Achievement-Level Results by Race/Ethnicity

- In 2019 in Illinois, the percentage of White students performing at or above *NAEP Proficient* was greater than the corresponding percentages of Black and Hispanic students, but not significantly different from the percentage of Asian/Pacific Islander students.
- In 2019, the percentages of White and Asian/Pacific Islander students in Illinois performing at or above *NAEP Proficient* were not significantly different from the percentages of their respective peers in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.
- In 2019, the percentage of Black students in Illinois performing at or above *NAEP Proficient* was greater than the percentages of their respective peers in 2003 and 2005, but not significantly different from the percentages of their respective peers in 2007, 2009, 2011, 2013, 2015, and 2017.
- In 2019, the percentage of Hispanic students in Illinois performing at or above *NAEP Proficient* was greater than the percentage in 2005, but not significantly different from the percentages of their respective peers in 2003, 2007, 2009, 2011, 2013, 2015, and 2017.

‡ Reporting standards not met.

* Value is significantly different ($p < .05$) from the value for the same jurisdiction and student group in 2019.

NOTE: The NAEP grade 4 reading scale ranges from 0 to 500. NAEP Achievement levels correspond to the following points on the NAEP reading scales: below *NAEP Basic*, 207 or lower; *NAEP Basic*, 208–237; *NAEP Proficient*, 238–267; and *NAEP Advanced*, 268 or above. At or above *NAEP Basic* includes *NAEP Basic*, *NAEP Proficient*, and *NAEP Advanced*. At or above *NAEP Proficient* includes *NAEP Proficient* and *NAEP Advanced*. Black includes African American, Hispanic includes Latino, and Pacific Islander includes Native Hawaiian. Race categories exclude Hispanic origin. Detail may not sum to totals because of rounding. All differences were calculated and tested using unrounded numbers.

SOURCE: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), various years, 2003–2019 Reading Assessments.

Grade 8 Average Scale Score Results by Race/Ethnicity

- In 2019, White students in Illinois had an average scale score that was higher than the average scale scores of Black and Hispanic students, but lower than the average scale score of Asian/Pacific Islander students.
- In 2019, the average scale scores of White, Black, and Hispanic students in Illinois were not significantly different from their respective scores in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.
- In 2019, the average scale score of Asian/Pacific Islander students in Illinois was higher than their respective score in 2007, but not significantly different from their respective scores in 2003, 2005, 2009, 2011, 2013, 2015, and 2017.
- In 2019, Black students in Illinois had an average scale score that was lower than that of White students by 28 points. In 2003, the average scale score for Black students was lower than that of White students by 29 points.
- In 2019, Hispanic students in Illinois had an average scale score that was lower than that of White students by 19 points. This performance gap was narrower than that of 2003 (26 points).

Grade 8 NAEP Achievement-Level Results by Race/Ethnicity

- In 2019 in Illinois, the percentage of White students performing at or above *NAEP Proficient* was greater than the corresponding percentages of Black and Hispanic students, but smaller than the percentage of Asian/Pacific Islander students.
- In 2019, the percentages of White, Black, and Asian/Pacific Islander students in Illinois performing at or above *NAEP Proficient* were greater than the percentage in 2007, but not significantly different from the percentages of their respective peers in 2003, 2005, 2009, 2011, 2013, 2015, and 2017.
- In 2019, the percentage of Hispanic students in Illinois performing at or above *NAEP Proficient* was greater than the percentages of their respective peers in 2003 and 2007, but not significantly different from the percentages of their respective peers in 2005, 2009, 2011, 2013, 2015, and 2017.

Gender

Results are reported separately for male and female students.

Tables 5-A and 5-B show percentage of students and average scale scores by NAEP achievement-level data for public school students at grades 4 and 8 in Illinois and the nation, by gender.

Grade 4 Average Scale Score Results by Gender

- In 2019, male students in Illinois had an average scale score in reading (215) that was lower than that of female students (221). In 2003, male students in Illinois had an average scale score in reading (214) that was lower than that of female students (219).
- In 2019, male students in Illinois had an average scale score in reading (215) that was not significantly different from that of male students in public schools across the nation (216). Similarly, female students in Illinois had an average scale score (221) that was not significantly different from that of female students across the nation (223).
- In Illinois, the average scale score of male students in 2019 was not significantly different from the scores of male students in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.
- In Illinois, the average scale score of female students in 2019 was not significantly different from the scores of female students in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.

Grade 4 NAEP Achievement-Level Results by Gender

- In the 2019 assessment, 32 percent of male students and 36 percent of female students performed at or above *NAEP Proficient* in Illinois. The difference between these percentages was not statistically significant.
- The percentage of male students in Illinois' public schools who were at or above *NAEP Proficient* in 2019 (32 percent) was not significantly different from that of male students in the nation (31 percent).
- The percentage of female students in Illinois' public schools who were at or above *NAEP Proficient* in 2019 (36 percent) was not significantly different from that of female students in the nation (37 percent).
- In Illinois, the percentage of male students performing at or above *NAEP Proficient* in 2019 was not significantly different from the corresponding percentages of students in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.
- In Illinois, the percentage of female students performing at or above *NAEP Proficient* in 2019 was not significantly different from the corresponding percentages of students in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.

SOURCE: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), various years, 2003–2019 Reading Assessments.

Grade 8 Average Scale Score Results by Gender

- In 2019, male students in Illinois had an average scale score in reading (260) that was lower than that of female students (269). In 2003, male students in Illinois had an average scale score in reading (264) that was lower than that of female students (269).
- In 2019, male students in Illinois had an average scale score in reading (260) that was higher than that of male students in public schools across the nation (256). However, female students in Illinois had an average scale score (269) that was not significantly different from that of female students across the nation (268).
- In Illinois, the average scale score of male students in 2019 was not significantly different from the scores of male students in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.
- In Illinois, the average scale score of female students in 2019 was not significantly different from the scores of female students in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.

Grade 8 NAEP Achievement-Level Results by Gender

- In the 2019 assessment, 32 percent of male students and 40 percent of female students performed at or above *NAEP Proficient* in Illinois. The difference between these percentages was statistically significant.
- The percentage of male students in Illinois' public schools who were at or above *NAEP Proficient* in 2019 (32 percent) was greater than that of male students in the nation (27 percent).
- The percentage of female students in Illinois' public schools who were at or above *NAEP Proficient* in 2019 (40 percent) was not significantly different from that of female students in the nation (38 percent).
- In Illinois, the percentage of male students performing at or above *NAEP Proficient* in 2019 was greater than the corresponding percentages of students in 2005 and 2007, but not significantly different from the corresponding percentages of students in 2003, 2009, 2011, 2013, 2015, and 2017.
- In Illinois, the percentage of female students performing at or above *NAEP Proficient* in 2019 was greater than the percentage of students in 2007, but not significantly different from the corresponding percentages of students in 2003, 2005, 2009, 2011, 2013, 2015, and 2017.

Student Eligibility for the National School Lunch Program

NAEP collects data on eligibility for the federal program providing free or reduced-price school lunches. The free/reduced-price lunch component of the National School Lunch Program (NSLP) offered through the U.S. Department of Agriculture (USDA) is designed to ensure that children near or below the poverty line receive nourishing meals. Eligibility is determined through the USDA's Income Eligibility Guidelines, and data for this category of students are included as an indicator of lower family income. NAEP first collected information on participation in this program in 1996; therefore, cross-year comparisons to assessments prior to 1996 cannot be made.

As a result of the passage of the [Healthy, Hunger-Free Kids Act of 2010](#), schools can use a new universal meal service option, the "Community Eligibility Provision" (CEP). Through CEP, eligible schools can provide meal service to all students at no charge, regardless of economic status and without the need to collect eligibility data through household applications. CEP became available nationwide in the 2014-2015 school year; as a result, the percentage of students in many states categorized as eligible for NSLP may have increased in comparison to 2013. Therefore, readers should interpret NSLP trend results with caution.

Tables 6-A and 6-B show percentage of students and average scale scores by achievement-level data for public school students at grades 4 and 8 in Illinois and the nation, by student eligibility for the NSLP.

Grade 4 Average Scale Score Results by Free/Reduced-Price School Lunch Eligibility

- In 2019, students in Illinois eligible for free/reduced-price lunch had an average reading scale score of 205. This was lower than that of students in Illinois not eligible for this program (233).
- In 2019, students in Illinois who were eligible for free/reduced-price school lunch had an average scale score that was lower than that of students who were not eligible by 28 points. This performance gap was narrower than that of 2003 (35 points).
- Students in Illinois eligible for free/reduced-price lunch had an average scale score (205) in 2019 that was not significantly different from that of students in the nation who were eligible (207).
- In Illinois, students eligible for free/reduced-price lunch had an average reading scale score in 2019 that was higher than that of eligible students in 2003 and 2005, but not significantly different from that of eligible students in 2007, 2009, 2011, 2013, 2015, and 2017.

Grade 4 NAEP Achievement-Level Results by Free/Reduced-Price School Lunch Eligibility

- In Illinois, 21 percent of students who were eligible for free/reduced-price lunch and 50 percent of those who were not eligible for this program performed at or above *NAEP Proficient* in 2019. These percentages were significantly different from one another.
- For students in Illinois in 2019 who were eligible for free/reduced-price lunch, the percentage at or above *NAEP Proficient* (21 percent) was not significantly different from the corresponding percentage for their counterparts around the nation (21 percent).
- In Illinois, the percentage of students eligible for free/reduced-price lunch who performed at or above *NAEP Proficient* in 2019 was greater than the corresponding percentages in 2003, 2005, 2007, 2009, and 2013, but not significantly different from the corresponding percentages in 2011, 2015, and 2017.

Grade 8 Average Scale Score Results by Free/Reduced-Price School Lunch Eligibility

- In 2019, students in Illinois eligible for free/reduced-price lunch had an average reading scale score of 251. This was lower than that of students in Illinois not eligible for this program (278).
- In 2019, students in Illinois who were eligible for free/reduced-price school lunch had an average scale score that was lower than that of students who were not eligible by 27 points. In 2003, the average scale score for students in Illinois who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 27 points.
- Students in Illinois eligible for free/reduced-price lunch had an average scale score (251) in 2019 that was not significantly different from that of students in the nation who were eligible (249).
- In Illinois, students eligible for free/reduced-price lunch had an average reading scale score in 2019 that was lower than that of eligible students in 2015, but not significantly different from that of eligible students in 2003, 2005, 2007, 2009, 2011, 2013, and 2017.

Grade 8 NAEP Achievement-Level Results by Free/Reduced-Price School Lunch Eligibility

- In Illinois, 21 percent of students who were eligible for free/reduced-price lunch and 50 percent of those who were not eligible for this program performed at or above *NAEP Proficient* in 2019. These percentages were significantly different from one another.
- For students in Illinois in 2019 who were eligible for free/reduced-price lunch, the percentage at or above *NAEP Proficient* (21 percent) was not significantly different from the corresponding percentage for their counterparts around the nation (20 percent).
- In Illinois, the percentage of students eligible for free/reduced-price lunch who performed at or above *NAEP Proficient* in 2019 was greater than the corresponding percentages in 2003, 2005, 2007, and 2009, but not significantly different from the corresponding percentages in 2011, 2013, 2015, and 2017.

SOURCE: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), various years, 2003–2019 Reading Assessments.

Type of Location

NAEP results are reported for four mutually exclusive categories of school location: city, suburb, town, and rural. The categories are based on standard definitions established by the Federal Office of Management and Budget using population and geographic information from the U.S. Census Bureau. Schools are assigned to these categories in the NCES Common Core of Data based on their physical address.

In 2007, the classification system was revised; therefore, trend comparisons to previous years are not available. The new locale codes are based on an address's proximity to an urbanized area (a densely settled core with densely settled surrounding areas). The original system was based on metropolitan statistical areas. To distinguish the two systems, the new system is referred to as "urban-centric locale codes." The urban-centric locale code system classifies territory into four major types: city, suburban, town, and rural. Each type has three subcategories. For city and suburb, these are gradations of size—large, midsize, and small. Towns and rural areas are further distinguished by their distance from an urbanized area. They can be characterized as fringe, distant, or remote.

Tables 7-A and 7-B show percentage of students and average scale scores by NAEP achievement-level data for public school students at grades 4 and 8 in Illinois and the nation, by type of location since 2007.

Grade 4 Average Scale Score Results by Type of Location

- In 2019, the average scale score of students in Illinois attending public schools in city locations was lower than the score of students in suburban schools, but was not significantly different from the scores of students in town and rural schools.
- In 2019, students attending public schools in city, suburban, town, and rural locations in Illinois had average scale scores that were not significantly different from the average scale scores of students in city, suburban, town, and rural locations in the nation.
- In 2019, students attending public schools in city, suburban, town, and rural locations in Illinois had average scale scores that were not significantly different from the average scale scores of students in city, suburban, town, and rural locations in 2007, 2009, 2011, 2013, 2015, and 2017 in Illinois.

Grade 4 NAEP Achievement-Level Results by Type of Location

- In 2019, the percentage of students in Illinois' public schools in city locations who performed at or above *NAEP Proficient* was smaller than the percentage of students in suburban schools, but was not significantly different from the corresponding percentages of students in town and rural schools.
- The percentages of students in Illinois' public schools in city, suburban, town, and rural locations who performed at or above *NAEP Proficient* in 2019 were not significantly different from those of students in city, suburban, town, and rural locations in the nation.
- The percentages of students in Illinois' public schools in city, suburban, town, and rural locations who performed at or above *NAEP Proficient* in 2019 were not significantly different from those of students in city, suburban, town, and rural locations in 2007, 2009, 2011, 2013, 2015, and 2017 in Illinois.

Grade 8 Average Scale Score Results by Type of Location

- In 2019, the average scale score of students in Illinois attending public schools in city locations was lower than the scores of students in suburban and rural schools, but was not significantly different from the score of students in town schools.
- In 2019, students attending public schools in city, suburban, and town locations in Illinois had average scale scores that were not significantly different from the average scale scores of students in city, suburban, and town locations in the nation.
- In 2019, students attending public schools in rural locations in Illinois had an average scale score that was higher than the average scale score of students in rural locations in the nation.
- In 2019, students attending public schools in city, suburban, town, and rural locations in Illinois had average scale scores that were not significantly different from the average scale scores of students in city, suburban, town, and rural locations in 2007, 2009, 2011, 2013, 2015, and 2017 in Illinois.

Grade 8 NAEP Achievement-Level Results by Type of Location

- In 2019, the percentage of students in Illinois' public schools in city locations who performed at or above *NAEP Proficient* was smaller than the percentage of students in suburban schools, but was not significantly different from the corresponding percentages of students in town and rural schools.
- The percentages of students in Illinois' public schools in city, suburban, town, and rural locations who performed at or above *NAEP Proficient* in 2019 were not significantly different from those of students in city, suburban, town, and rural locations in the nation.
- The percentage of students in Illinois' public schools in city locations who performed at or above *NAEP Proficient* in 2019 was greater than that of students in city locations in 2007 in Illinois, but not significantly different from that of students in city locations in 2009, 2011, 2013, 2015, and 2017 in Illinois.
- The percentages of students in Illinois' public schools in suburban, town, and rural locations who performed at or above *NAEP Proficient* in 2019 were not significantly different from those of students in suburban, town, and rural locations in 2007, 2009, 2011, 2013, 2015, and 2017 in Illinois.

Parents' Highest Level of Education

Parents' highest level of education is defined by the highest level reported by eighth-graders for either parent. Fourth-graders were not asked to indicate their parents' highest level of education because their responses in previous studies were not reliable, and a large percentage of them chose the "I don't know" option. Parental education attainment is one component used to measure student's socioeconomic status (SES).

The results by highest level of parental education are shown in Table 8.

Grade 8 Average Scale Score Results by Parents' Highest Level of Education

- In 2019, students in Illinois who reported that a parent had graduated from college had an average scale score that was higher than the average scores of students with a parent in any of the following education categories: some education after high school, graduated from high school, and did not finish high school.
- In 2019, the average scale score for students in Illinois who reported that a parent had graduated from college was higher than the score of students in the nation.
- In 2019, the average scale scores for students in Illinois who reported that a parent had some education after high school, had graduated from high school, or had not finished high school were not significantly different from the corresponding scores of students in the nation.
- In 2019, the average scale scores for students in Illinois who reported that a parent had graduated from college, had graduated from high school, or had not finished high school were not significantly different from the corresponding scores of students in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.
- In 2019, the average scale score for students in Illinois who reported that a parent had some education after high school was lower than the score of students in 2003 and 2013, but not significantly different from the score of students in 2005, 2007, 2009, 2011, 2015, and 2017.

Grade 8 NAEP Achievement-Level Results by Parents' Highest Level of Education

- In 2019, the percentage of students performing at or above *NAEP Proficient* in Illinois who reported that a parent had graduated from college was greater than the percentage for students whose parents' highest level of education was in any of the following education categories: some education after high school, graduated from high school, and did not finish high school.
- In 2019, the percentages of students in Illinois reporting that a parent had graduated from college, had some education after high school, had graduated from high school, or had not finished high school and who performed at or above *NAEP Proficient* were not significantly different from the corresponding percentages of students in the nation.
- In 2019 in Illinois, the respective percentages of students reporting that a parent had graduated from college, had some education after high school, had graduated from high school, or had not finished high school and who performed at or above *NAEP Proficient* were not significantly different from the corresponding percentages of students in 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017.

A More Inclusive NAEP: Students With Disabilities and/or English Language Learners

It is important for NAEP to assess as many students selected to participate as possible. Assessing representative samples of students, including students with disabilities (SD) and English language learners (ELL), helps to ensure that NAEP results accurately reflect the educational performance of all students in the target population, and can continue to serve as a meaningful measure of U.S. students' academic achievement over time.

In March 2010, the National Center for Education Statistics (NCES), working with the National Assessment Governing Board (Governing Board), adopted a new policy to maximize the participation of students with disabilities (SD) and English language learners (ELL).

Today, NAEP continues to explore ways to ensure consistent, inclusive assessment and reporting across all jurisdictions and student populations.

Tables 9-A and 9-B display data for grades 4 and 8 students in Illinois who were identified as SD and/or ELL, by whether they were excluded, assessed with accommodations, or assessed under standard conditions, as a percent of all grades 4 and 8 students in the state.

Tables 10-A and 10-B show the percentages of students assessed in Illinois by disability status and their performance on the NAEP assessment in terms of average scale scores and percentages performing below *Basic*, at or above *Basic*, at or above *Proficient*, and at *Advanced* for grades 4 and 8.

Tables 11-A and 11-B present the percentages of students assessed in Illinois by ELL status, their average scale scores, and their performance in terms of the percentages below *Basic*, at or above *Basic*, at or above *Proficient*, and at *Advanced* for grades 4 and 8.

Tables 12-A and 12-B present the total number of grades 4 and 8 students assessed in each of the participating states and the percentage of students sampled who were excluded.

**Table
9-A****The Nation's Report Card 2019 State Assessment**

Percentage of fourth-grade public school students identified as students with disabilities (SD) and/or English language learners (ELL) excluded and assessed in NAEP reading as a percentage of all students, by assessment year and testing status: Various years, 1998–2019

Where to Find More Information

The NAEP Reading Assessment

More information about the 2019 NAEP reading assessment and the results can be found on the NAEP website at <https://nces.ed.gov/nationsreportcard/reading/>. The individual snapshot reports for each participating state and other jurisdictions are also available in the state results section of the website at <https://nces.ed.gov/nationsreportcard/states/>.

The *Reading Framework for the National Assessment of Educational Progress*, on which this assessment is based, is available at the National Assessment Governing Board website at <https://www.nagb.gov/naep-frameworks/reading.html>.

The NAEP Data Explorer (NDE)

The NAEP Data Explorer (NDE), available at <https://nces.ed.gov/nationsreportcard/naepdata/>, is an interactive database with which users can design and create tables and perform tests of statistical significance. The NDE includes student, teacher, and school variables for all participating districts, states, and the nation. Data tables are also available for participating districts, with all contextual questions cross-tabulated with the major demographic variables.

Technical Documentation on the Web (TDW)

The [Technical Documentation on the Web \(TDW\)](#) section of the NAEP website is written for researchers and assumes knowledge of educational measurement and testing. TDW contains information about the technical procedures and methods of NAEP: how the assessment is designed and conducted, and how data are analyzed.

Publications on the inclusion of students with disabilities and/or English language learners

References for a variety of research publications related to the assessment of SD and/or ELL students may be found at <https://nces.ed.gov/nationsreportcard/about/inclusion.asp#research>.

To order publications

Some recent NAEP publications related to reading are accessible via the reading page of the NAEP website (<https://nces.ed.gov/nationsreportcard/reading/>, under "Reading Publications"). These and others are available through the IES Publications and Products Search site at: <https://ies.ed.gov/pubsearch/>. Publications can also be ordered from:

Education Publications Center (ED Pubs)
U.S. Department of Education
P.O. Box 22207
Alexandria, VA 22304

Call toll free: 1-877-4ED-Pubs (1-877-433-7827)
TTY/TDD: 1-877-576-7734
FAX: 1-703-605-6794
Order online at: <https://www.ed.gov/edpubs/>.

The NAEP State Report Generator was developed for the NAEP 2019 reports by Phillip Leung, Patricia Donahue, Marc Berger, Rick Hasney, Ming Kuang, and Amy De Santo.

What is the Nation's Report Card™?

The Nation's Report Card™ informs the public about the academic achievement of elementary and secondary students in the United States. Report cards communicate the findings of the National Assessment of Educational Progress (NAEP), a continuing and nationally representative measure of achievement in various subjects over time.

Since 1969, NAEP assessments have been conducted periodically in reading, mathematics, science, writing, U.S. history, civics, geography, and other subjects. NAEP collects and reports information on student performance at the national, state, and local levels, making the assessment an integral part of our nation's evaluation of the condition and progress of education. Only academic achievement data and related background information are collected. The privacy of individual students and their families is protected.

NAEP is a congressionally authorized project of the National Center for Education Statistics (NCES) within the Institute of Education Sciences of the U.S. Department of Education. The Commissioner of Education Statistics is responsible for carrying out the NAEP project. The National Assessment Governing Board oversees and sets policy for NAEP.
