FORWARD

The attached report is being submitted in compliance with Section 2-3.145 of the School Code [105 ILCS 5/2-3.145] as amended by PA 095-0555.

Section 2-3.145 [105 ILCS 5/2-3.145] mandates that the ISBE submit to the General Assembly and Governor an annual report that designates school districts' special education expenditures, receipts, and net special education expenditures over receipts. The receipts are to be specified as local, state, and federal. The calculations utilize limited data the Agency receives on school district Annual Financial Reports (AFR), Pupil Transportation Claims, Fall Housing Reports/Student Information System (SIS), and the Funding and Child Tracking System (FACTS) and is not a reflection of school districts' total special education expenditures and receipts.

With implementation of this legislation in FY 2008, there was considerable discussion of the limitations of presenting these calculations and other information.

The following limitations were discussed:

- The exact amount of time devoted to special education programs is not available. While the FACTS Report collects each identified special education student's enrollment in special education, the Educational Environment (EE) for each student defines a range of time the student is receiving regular services. For example, a student with an EE code of 02 is defined as "40% - 79% inside the regular classroom." For such students, ISBE worked with external education entity stakeholders and determined that they be counted as sixty percent (60%) special education.
- For Attendance and Social Work Services, Psychological Services and Other Support Services – Pupil, the percentage of time dedicated to special education would be difficult to determine. Therefore, it was agreed that expenditures would be allocated to special education as follows:
 - Attendance and Social Work Services—90%
 - Psychological Services—90%, and
 - Other Support Services—5%
- Chicago School District 299 receives a predetermined amount of special education funding within their block grant that incorporates special education funding as well as other State funding. Each year, the block grant revenue is reviewed and the percentage dedicated to special education is determined and utilized within their calculations. It is important to note, however, that PA 97-0238 went into effect July 1, 2011 and requires that Chicago School District 299 submit data on grant and Mandated Categorical programs in the block grants in the same manner as other districts. This data has been incorporated in the calculations for Chicago School District 299. The Public Act does not change the current block percentages or the amounts that are due to Chicago School District 299.

The analysis of the Chicago School District Educational Services Block Grant reflects that the district received an average of \$230.2 million more in the Block Grant than they would receive if they were required to file a specific claim for each type of funding in the Block Grant for School Years 2011 – 2012 and 2012 - 2013. An average of \$219.1 million (95.17%) of this is attributed to special education services. The Special Education Report reflects that Chicago School District spent \$53.6 million more in special education dollars than revenue received, or \$915 per student. If the district's Block Grant special education funding was decreased by the \$219.1 million denoted above, Chicago School District's special education expenditures would be \$272.7 million in excess of the revenue they realize. This would equate to \$4,653 per special education student, which is \$490 more than the State net expenditure per child count of \$4,163.

This is the eighth year for this report and these assumptions were followed consistently each year.

Table 1 and Table 2 below designate the districts with the highest and lowest net expenditures per student in FY13. To calculate this amount, the net expenditures for each district were divided by the special education child count in each district.

Eighteen school districts, compared to 22 last fiscal year, realized more special education revenue than incurred expenditures. This could be due to the timing of expenditures and

receipts (state reimbursements for special education are for expenditures incurred by the district in the last fiscal year), the number of students served from one year to the next, or the accounting of expenditures and receipts within the AFR.

The average amount by which the expenditures exceed receipts is \$4,163 per special education student.

Table 3 reflects the total amount calculated for the estimated, net special education expenditures after deduction of a proportionate share of local funds received and specific state and federal funds received.

Because of the requirements for the Maintenance of Effort, the appropriation for State Special Education funding has remained consistent over the past six years. If Maintenance of Effort is not maintained, the State would lose one dollar of federal funding for every State dollar budget reduction for special education. As denoted in Table 4, the appropriation per student has increased each year. The difference between the State Funding in Table 3 and the State Appropriation in Table 4 is attributable to the timing of the revenue received by the districts and the results of the delayed payments.

- D. **Special Education Child Count divided by Total Child Count:** Calculated from information in items A & C above.
- E. **Special Education Child Count (Full-time Equivalent) divided by Total Child Count:** Calculated from information in items B & C, above.

ASSUMPTIONS

- Figures exclude the Municipal Retirement/Social Security Fund. This fund is created if a separate tax is levied to provide resources for the school district's share of retirement benefits for covered employees or a separate tax is levied to provide resources for the district's share of social security and medicare only payments for covered employees. If these taxes are not levied, the payments should be charged to the fund where the salary is charged.
- Figures include expenditures for Bilingual programs, but exclude expenditures from Vocational Education or Title I programs.
- "Flow-Through Receipts from One Local Education Entity to Another Local Education Agency" include only the flow-through monies from federal sources (2200 Account). Similar receipts from state or local sources are excluded (2100 & 2300). However, each school district's related receipts and expenditures will be captured in the calculation.
- The School District AFR may be filed using either the cash or the accrual basis of accounting. Adjustments have not been made for any differences in the recognition/timing of receipts and/or expenditures that result from the basis of accounting used by the school district.
- Rulemaking is required and will be considered to designate a specific accounting code for costs related to the special education director or occupational/physical therapy services.
- Chicago Educational Services Block Grant (3767 Account) is included for the City of Chicago School District 299 with the percent of special education determined annually from the district's total special education funding. This block grant is authorized by the School Code, Section 1D-1.
- The data is limited to the accuracy as reported to ISBE from the districts.
- Attendance/Social Worker and Psychological Services are assumed at 90% special education for all districts. Other Support Services – Pupil are assumed at 5% special education for all districts.
- The percentage of time assumed for special education is the highest percentage allowable for each designated educational environment. For example, if the designated educational environment reports a student is 40 to 79% in the regular classroom, it is assumed that the student is 60% special education.
- The special education pupil transportation expenditures and receipts are obtained from the unaudited Pupil Transportation Claim as submitted by the district.
