

Rec'd 1/18/2017

Hi, Megan! I'm back! We need to get the same enrollment numbers again for FY2016 as we are updating the Illinois 60 by 25 network data site. Same as before:

- Total used to calculate the percentage for the Middle School Students Passing Algebra 1 as I assume that is different from the enrollment numbers. For the 60x25 dashboard they want us to calculate a "community-wide" percentage, which means we need to tally the numbers from those districts and come up with the new percentage.
- I also need the 9th grade enrollment for 2016 so I can calculate a community-wide percentage for Freshmen on Track.
- 12th grade enrollment to do a community-wide graduation rate.
- for 3rd, 5th, 8th and 11th grades, separately, the PARCC test taking total by district with the RCDT

Thanks much! I may need a new FOIA form.
