SCHOOL SUCCESS TASK FORCE MEMBERS AND PARTICIPANTS

Co-Chairmen

Representative William Davis, 30th District

Senator William Delgado, 2nd District

Members

Shayne Aldridge, Statewide Organization Representing School Board Members (November 2011 – September 2013)

Christine Boyd*, Department of Corrections (November 2011 – September 2013)

Dr. Seymour Bryson, Organization Representing African-American Families (November 2011 – November 2013)

Maria Capoccia, Illinois Lieutenant Governor's Office (November 2011 – September 2013)

Ava Carpenter-McPike*, Public Member Representing Parents (November 2011 – September 2013)

Kye Gaffey, Department of Juvenile Justice (November 2011 – August 2013)

Twin Green*, Community Organization Representing School Aged Children (November 2011 – September 2013)

Leslie Juby¹*, Appointment by President of Senate (November 2011 – September 2013)

Jennifer Loudon*, Chicago Public Schools (June 2012 – March 2013)

Debra Dyer, Department of Children & Family Services (December 2012 – September 2013)

Matt Rodriguez, Public Member Representing Educational Personnel (November 2011 – September 2013)

Karrie Rueter, Department of Human Services (November – September 2013)

Dr. Arthur Sutton*, Illinois Board of Higher Education (November 2011 – September 2013)

V. Sue Taylor*, Illinois State Board of Education (November 2011 – September 2013)

Jason Tyszko, Department of Commerce and Economic Opportunity (November 2011 – June 2013)

Illinois State Board Of Education – Agency Representatives

David Andel, Division Administrator, Special Education Services (November 2011 – September 2013)

Elizabeth Hanselman, Assistant Superintendent of Specialized Instruction, Nutrition and Wellness (November 2011 – September 2013)

Cynthia Riseman, Government Relations (November 2011 – December 2012)

Illinois African-American Family Commission

Dr. Terry Solomon* (November 2011 – September 2013)

¹ Best Practices Sub-Committee Chair

*Denotes individuals who served on the Best Practices and/or the Recommendation/Report Sub-Committee(s)

Illinois School Success Task Force Report Brief

The School Success Task Force was created by HJR 5 in the 96th General Assembly to:

- Examine issues relating to suspensions, expulsions, and truancies,
- Make recommendations regarding State Board of Education policies, and
- Make recommendations to re-engage students in learning and building partnerships with parents, community, organizations, and stakeholders.

The Task Force studied a sample of school district policies; administered a survey to 43 high performing public high schools (over 40% free/reduced lunch and less than 10% reported suspensions/expulsions); held seven public hearings to get stakeholder input; reviewed information from other states; convened a Best Practices Sub-committee; and received information from outside entities.

The Task Force analyzed how students are impacted by the achievement gap between affluent and low income students, the relationships between students and teachers, and the individual school culture and environment. The Task Force found no significant difference in discipline policies across the state, but found a difference in district and school administration and enforcement. The Task Force determined that:

- Schools need to have proper staffing, including mental health professionals and highly qualified teachers, and on-going professional development.
- Schools need to create safe and supportive learning environments with high educational expectations that keep students from participating in at risk behavior.
- School policies need to move away from reactive, punitive discipline consequences and focus instead on proactive, positive strategies that differentiate between subjective and objective student behaviors.
- Students who are suspended should be provided appropriate, ongoing academic and behavioral instruction at the student's grade level.

The Task Force determined that behaviors leading to student discipline issues include bullying, poor academic performance, lack of interest in school, behavioral issues, family problems, financial issues, homelessness, and poverty. The Task Force analyzed how schools can overcome financial, personnel, and program constraints through community relationships and partnerships. Absenteeism causes among students were also explored and various conclusions were made regarding absences. The Task Force determined that absenteeism may be attributed to:

- Older children providing childcare to younger siblings.
- A lack of positive role models in the school and community with whom the students can identify.

- The removal of recess and non-team sports, which provided students with skills such as team building and conflict management.
- The inaccessibility to libraries and lack of access to educational materials.

The Task Force analyzed programs that are administered through ISBE and the Regional Offices of Education and determined the following programs were successful in reaching at-risk students and providing students with resources towards graduation and college or career readiness: Alternative Learning Opportunities Program, Regional Safe School Programs, and Truancy Alternative and Optional Education Program. The Task Force recommends these programs be fully funded and expanded to reach a greater number of at-risk students. The Task Force also encourages the use of data-proven programs including Balanced and Restorative Justice, Roots of Empathy, literacy programs, and Positive Behavior Intervention Systems (PBIS).

The Task Force determined that adequate funding of education in Illinois should be a priority, through increased state or federal funding or local grants for school districts. The Task Force encourages vocational opportunities, arts, music, humanities, and STEM education to provide opportunities to students whose assets and aptitudes cannot be measured by traditional testing. The Task Force recommends reducing the reliance on high stakes testing, and instead recommends that educators be allowed to focus on teaching critical thinking and problem solving skills that will be necessary for students to succeed after high school.

The Task Force recommends that the General Assembly provide oversight to implement the recommendations from this task force.

Illinois School Success Task Force Report to Illinois General Assembly

OVERVIEW

Education is the pathway to individual, family and community well-being. Students often experience personal and social challenges while pursuing educational goals. Students in every age group are subject to peer pressure and, as part of maturation, engage in activities that bring them to the attention of school personnel for behaviors that are not consistent with pro-social development. As a result, students may find themselves in violation of school codes and subject to disciplinary action; including suspension and expulsion or students may stop attending school and become truant.

Each school district is authorized to suspend and expel students who are deemed guilty of disobedience or misconduct. However, Illinois has no state policies and procedures for school boards to follow in discharging their responsibilities. Students of color, particularly African American and Hispanic students, are disproportionately disciplined, suspended and expelled from schools when compared to white students.

The goal of the report to the Illinois General Assembly is to present the findings of the School Success Task Force (Task Force) related to the data that indicates a disproportionate number of students of color, particularly African Americans and Hispanic, suspended, expelled, and truant from schools. The goal is also to recommend practices and public policies to re-engage students in learning and building partnerships with parents, community organizations, and stakeholders.

Several research studies have reported a correlation between high school dropout rates and the number of students suspended, expelled, and truant.² According to the American Civil Liberties Union's (ACLU's) report on "Best Practices for Dismantling the School to Prison Pipeline," students who are suspended or expelled are far more likely than other students to dropout. Moreover, these students are three times more likely to be incarcerated than their peers.³ Research findings have reported that the main reasons students dropped out of school includes being bullied,⁴ poor academic performance, a lack of interest in school, behavioral problems, family problems, and financial issues (SSTF Public Hearings).

² Suhyun Suh, Jingyo Suh, and Irene Houston, *Predictors of Categorical At-Risk High School Dropouts*, 85 Journal of Counseling and Development 196, 196-203 (Spring 2007)

³ Stanczyk, Alexandra. *Best Practices for Dismantling the School to Prison Pipeline*. American Civil Liberties Union of Georgia. August 2007. Print.

⁴ Daniels, Ellen. *University of Virginia Study Links Prevalence of Bullying, Teasing to High Drop Out Rates*. UVA Today. October 31, 2012.

The increasing number of students who are suspended, expelled, and truant is of great concern in the African-American and Hispanic communities. According to the Illinois State Board of Education, a total of 72,156 students were suspended during the 2012 school year; of this number, 29% were White, 45% were African-American, and 22% were Hispanic.

SCHOOL SUCCESS TASK FORCE AND OBJECTIVES

The students of Illinois deserve a learning environment that promotes academic success, accountability for behavior in educational settings that are free of bias, and focus-based on emotional, physical and psychological age appropriate needs.

The report will summarize the results of public hearings held, report the findings of a study conducted by the Task Force, review practices and policies from other states, and make key recommendations to eliminate racial disparities in disciplinary actions and to reduce student suspension, expulsion, and truancy rates for all students, particularly for students of color.

The School Success Task Force is a State of Illinois, uncompensated body of key stakeholders appointed by the Governor, Senate President, Speaker of the House, and representatives from several State agencies and commissions appointed by their respective directors or secretaries. Its members represent a broad range of research, practice, and policy expertise in education, criminal justice, and community prevention services.

The Task Force sought input from school districts, education advocates, and community providers seeking to improve the education outcomes and performance of at-risk students or students targeted by school personnel to address anti-social behavior including violence, substance abuse, and criminal activities.

Based on the enacting legislation, the Task Force's mandated objectives were:

- **EXAMINE** issues and make recommendations related to current State Board of Education policies regarding suspensions, expulsions, and trancies.
- **STUDY** how current State Board of Education policies impact students statewide.
- **STUDY** information on how school districts create, interpret, and administer their own disciplinary policies.
- **HEARING** testimony from school officials, parents, students, and community-based providers on the effects of suspension and expulsion policies; and
- **STUDY** annual reports on the number of children who reenroll in school after being suspended and expelled, by age, race, and education level.

VISION OF THE TASK FORCE

The School Success Task Forces has a vision that all students experience school success. The Task Force wishes to utilize the following mandates of HJR 5 as the center focal point of this vision.

- Each school board will identify different strategies and approaches to help educators work effectively with the families of students of color.
- School districts will promote professional development and other learning opportunities to equip school personnel with the skills and knowledge necessary to reduce factors that often contribute to suspensions, expulsions, and trancies.
- School leaders will engage community-based organizations and parents in their ongoing efforts to encourage youths to adopt and practice positive social behaviors that will allow them to be successful in school and in their communities.

DEVELOPMENT OF RECOMMENDATIONS

The Task Force convened regular meetings to address barriers to school success and examined school districts policies for managing disciplinary behavior. A Best Practice Sub-Committee was created that examined state data on suspension, expulsion, and truancy. The Best Practice Sub-Committee also reviewed the correlation between poverty and free/reduced lunch data to help examine the suspension rates.

INFORMATION GATHERED

- **Seven public hearings** were convened in school districts across the state. Students, parents, educators, and community leaders shared information with the Task Force in Cicero (May 2013), East St. Louis (May 2013), Carbondale (June 2012), Springfield (June 2012), Rockford (July 2012), Aurora (August 2012), and Chicago Heights (August 2012), on the impact of suspensions, expulsions, and truancy on students' opportunity to learn, the unequal application of disciplinary rules, and the importance of developing and engaging parents, faith leaders, and the community at-large in creating a pro-social school community.
- **System and practice interventions presentations were provided by key stakeholders** including the Erickson Institute, Chicago Public Schools, Kane County Regional Office of Education Alternate Schools/Safe Schools/Truancy Alternative Program, Georgia Department of Special Education, Voices of Youth in Chicago Education (VOYCE), Illinois Virtual School, Alton Middle School Positive Behavioral Interventions and Supports Program, and the Illinois Association of School Boards to identify best practices, teacher training, and areas of change.

- **Several schools completed a survey in May 2013** to examine school district suspension and expulsion data. Using a rubric of public high schools with 40% of the student body qualifying for free/reduced lunches (federal guidelines determine 40% free/reduced lunch rates indicate at-risk schools), and a 10% or less suspension rate, 42 schools were identified as successfully balancing high poverty with low suspension/expulsion rates. The survey focused on the climate of successful schools in the areas of disciplinary authority, behavioral expectations, and current supports and interventions.

EMERGING THEMES AND RECOMMENDATIONS

When reviewing the data from the public hearings, the Task Force general meetings, survey results, and supplemental research, the Task Force was able to identify four focus areas: Practice, Partnership, Programs, and Public Policy.

PRACTICE

The Task Force defined Practice as anything relating to the school's policies and procedures that contribute to its overall environment.

- Central themes from the research indicate: the importance of understanding and reflecting individual school cultures (e.g. Do teachers/administrators look like me? Can teachers understand what I am trying to say? Do they relate to my background?)
- The importance of understanding the need for on-going professional development (e.g. Do teachers understand classroom management? Are they positive role models who create meaningful relationships with their students? Can they differentiate instruction to reach all levels of student ability? Can staff communicate and overcome language barriers? Can they identify high risk students?)
- Differentiating between subjective and objective student behaviors (e.g. Are insubordination or uniform violations treated the same way as bringing a weapon to school?)
- The importance of proper staffing, including mental health professionals and highly qualified teachers (e.g. Are there trained staff members who can understand students' socio-emotional needs or recognize negative external influences such as poverty, homelessness, bullying, domestic violence, and racism? Are teachers experts in the areas in which they teach?)
- The importance of creating high educational expectations for at-risk students (Pathways to College, 2007; SSTF Public Hearings, 2012 – 13).

Creating a safe and supportive learning environment is key to keeping students from participating in behaviors that lead to suspension and expulsions (VOYCE, 2013; Schoolwartz,

D. Leflore-Porter, L. 2013). Additionally, moving away from reactive, punitive, discipline consequences and focusing instead on proactive, positive strategies that create expectations for acceptable student behavior, teach problem solving and contracting, are equitable and fair, and encourage social justice, reduces the number of discipline referrals that ultimately end in student suspension or expulsion (SSTF Public Hearings 2013; Brunette, A. 2010, Peterson, R. 2005). Furthermore, assessing a school's environmental climate is integral in determining why negative behaviors occur (e.g. insubordination in a classroom, racial tensions, bullying, fighting, etc.), where and when they occur (e.g. fighting in an unsupervised hallway, threatening of teachers before, during, or after class, etc.), and how discipline is handled (e.g. by teacher, dean of students, police). (*DISMISS*, 2005; Survey, 2013).

Multiple suspensions and expulsions lead to lost learning time, exacerbating the achievement gaps, and indirectly reinforce negative behavior.⁵ To address these concerns, it is important not only to provide ongoing instruction and appropriate grade level coursework to students during in-school suspension, but also to provide instruction on skill building related to student misbehavior (Peterson, 2005; SSTF Public Hearings 2012 – 2013). Furthermore, it must be recognized that punitive disciplinary actions unfairly remove some students from the traditional classroom setting and place them into more restrictive and harmful environments, such as the juvenile justice system, creating a School-to-Prison Pipeline that is difficult to break (SSTF Public Hearings, US Departments of Education and Juvenile Justice, 2013).

“Besides the obvious loss of time in the classroom, suspensions matter because they are among the leading indicators of whether a child will drop out of school, and because out-of-school suspensions increase a child's risk for future incarceration.”⁶

PRACTICE RECOMMENDATION: SCHOOLS

Research indicates that there are many successful strategies a school can employ to reduce the number of suspensions and expulsions, create a strong sense of student safety and well-being, and boost achievement gaps among high-risk students. Schools need to develop strong communication with parents and students to establish behavior and academic expectations as well as a uniform disciplinary standard (SSTF Public Hearings, Brunnette, Ferlazzo, 2009, Advancement Project). Teachers need continuing professional development in areas such as classroom management skills, cultural diversity, differentiated instruction, teaching of critical thinking and problem solving skills, and conflict resolution. Moreover, schools need to abolish

⁵ “The Department of Public Instruction also concluded that the performance of suspended students on yearly testing declined as the total numbers of days spent out of school due to suspension increased” DisMISS Project (Disproportionate Minority Involvement of Suspended Students) North Carolina Department of Juvenile Justice – Center for Prevention of School Violence. November, 2005.

⁶ Losen, Daniel J. and J. Gillespie. *Opportunities Suspended: The Disparate Impact of Disciplinary Exclusion from School*. Center for Civil Rights Remedies at The Civil Rights Project at UCLA. August, 2012.

or re-visit Zero Tolerance policies that lead to unnecessary and sometimes indiscriminate suspensions and expulsions (Skiba, R. 2000; SSTF Public Hearings). Data shows that implementation of tiered, proactive support systems, such as Response to Intervention (RtI) and Positive Behavioral Interventions and Supports (PBIS), classroom support systems, such as Roots of Empathy and Balanced and Restorative Justice (BAR), and parent support systems such as Parent Cafes and Parent Universities, reduces the instances of negative behaviors while focusing on positive results (May Survey, 2013, SSTF Public hearings, Skiba, R., Losen, D. Gillespie, J.).

PARTNERSHIPS

Successful schools cultivate relationships within their local communities. As financial constraints force schools to cut back on staff, student services, programs, and extracurricular activities, local partnerships can help by targeting key areas to assist schools. In addition to declining state funding, schools are also faced with growing populations of homeless students, rising poverty levels, and social issues that affect student performance.

During the public hearings, parents, school officials, and community members spoke to the importance of providing supports to struggling families. Parents reported that older children, who should be attending school, were instead at home providing childcare while the parent(s) worked. They mentioned that local libraries, dealing with financial constraints of their own, were no longer open after school hours to allow students access to educational materials. Concerns raised also included the removal of recess and non-team sports that prevented students from learning valuable skills such as teambuilding and conflict management. Additionally noted was a lack of positive role models within the community and schools with whom at-risk students could identify.

Several community organizations have come forward to assist schools and students. The community organizations have trained literacy volunteers to tutor students before, during, and after school; provided personal care products and uniforms to homeless and poverty-stricken students to encourage a sense of belonging and self-esteem; organized non-competitive team sports that not only provide supervised play but also encourage the formation of key social skills necessary for future success; and provided successful, identifiable community leaders to act as mentors inside and outside school.

PARTNERSHIP RECOMMENDATION: COMMUNITY

Social capital, the focus on key social relationships that have productive benefits, is created when partnerships are developed between parents, schools, municipalities, and local businesses with the goal of student success. Factors that contribute to the overall success of most students

include a nurturing family and community engagement, which may include home visits, Parent Universities, and creating a community organizational model.

PROGRAMS

When students are unable to perform in the traditional school setting, whether due to disciplinary problems, socio-emotional issues, or truancy, it is important to keep them academically engaged in order to keep them actively engaged in the school learning environment. Currently, the Illinois State Board of Education has several programs that specifically target at-risk students. Among the programs offered are the Truants' Alternative and Optional Education Program (TAOEP)⁷, the Regional Safe School Programs (RSSP)⁸, and the Alternative Learning Opportunities Programs (ALOP)⁹.

Truants' Alternative and Optional Education Program (TAOEP)

The Truants' Alternative and Optional Education Program is a comprehensive community-based competitive grant funded program that serves students with attendance problems and/or dropouts up to and including those who are 21 years of age. This program provides truancy prevention and intervention services and/or optional education programs. TAOEP programs primarily provide truancy prevention and intervention services by integrating resources of the school and community to meet the needs of students and offer modified instructional program or other services designed to prevent students from dropping out of school.

There are 72 grantees including the Chicago Public Schools. These programs are located in urban, suburban, and rural areas of the state. Grantees may include public school districts, Regional Offices of Education, community college districts, charter schools, area vocational centers, and public university laboratory schools that have been approved by the Illinois State Board of Education. Individual programs may serve any combination of students in grades kindergarten through age 21. The ages of attendees and types of programs are based upon local needs and defined within the grant application. In FY 2013, over 20,000 students were served by TAOEP funds.

TAOEP programs serve as part-time or full-time options to regular school attendance, offer modified instructional programs, or other services designed to prevent students from dropping out of school. Programs funded under the TAOEP grants serve students who are identified as truants, chronic truants, dropouts, or potential dropouts. An Individualized Optional Education Plan (IOEP), which is a written document that outlines an individual's academic, vocational,

⁷ <http://www.isbe.net/spec-ed/html/taoep.htm>

⁸ http://www.isbe.net/spec-ed/html/regional_safe_schools.htm.

⁹ <http://www.isbe.net/spec-ed/html/alop.htm>

and/or life skill needs, as well as goals and objectives and various educational and social experiences need to reach those goals and objectives, is required for each student participating in a TAOEP funded program. There are two types of educational services that may be offered for TAOEP programs. One type is an Optional Education Program that provides a modified instructional program that incorporates the Illinois Learning Standards and, as appropriate to the student's needs, work-based learning and career development, and is established by school board policy. The second option is the provision of supplemental services that provide students enrolled in the regular school program with supports (e.g., tutoring, mentoring, health services, home visits, counseling) that are needed to increase their attendance rates or prevent them from dropping out of school. TAOEP funded programs may provide either Optional Education or supplemental services or they may provide a combination of both of these options.

Since 2009, there has been a 43% cut in the TAOEP budget line. This has had a significant impact on the number of students and the types of services that the TAOEP programs can provide.

Regional Safe School Program (RSSP)

The Regional Safe School Program (RSSP) serves expulsion-eligible, suspension-eligible, and expelled students administratively transferred from their home school to RSSP. One purpose of the program is to meet the particular educational needs of disruptive students more appropriately and individually in alternative educational environments.

There are 48 grants representing 47 Regional Offices of Education (ROEs) and the Chicago Public Schools. Grantees may run the RSSP programs or contract with local school districts or with third parties to run the programs. Individual programs may serve students in grades 6-12 or any combination of grades 6-12 based upon local needs and decision-making by the ROEs and local school districts. In FY 2013 over 4,000 students were served by RSSP. Currently, there are approximately 80 RSSP sites in Illinois located in urban, suburban, and rural areas of the state.

The Regional Safe School Programming is based upon best practices for alternative programs. Each student has an Alternative Education Plan (AEP) and positive outcomes include: reduction in disruptive behavior, regular attendance, coursework completion and credit received, advancement in grade level, return to home school, grammar or high school graduation and where appropriate, completing a program leading to taking and passing the GED test. Behavior modification training and other counseling, life skills training, community services, and work-based learning experiences are aspects of RSSP. Computerized learning systems may supplement the primary academic instruction or may be used as the primary method of instruction.

Since 2009, there has been a 67% cut in the RSSP budget line. This has had a significant impact on the number of students and the types of services that the RSSP programs can provide.

Alternative Learning Opportunities Program (ALOP)

Alternative Learning Opportunities Program (ALOP) serves students in grades 4 through 12, who are at-risk of academic failure, with a broader range of academic, behavioral, and social/emotional interventions needed to meet the Illinois Learning Standards and to complete their education in a safe learning environment. These programs also serve students who have been administratively transferred due to expulsion or suspension in excess of 20 days. ALOP services address a broader range of academic, behavioral, and social/emotional interventions designed to increase the academic achievement levels of students so that they are able to meet the Illinois Learning Standards and complete their education in a safe learning environment. ALOPs are designed to address individual learning styles, career development, and social services that will enable students to successfully complete their education.

ALOP programs may only be established with a school district, through an ISBE approval process. A school district may operate its own program or may contract with one or more entities to operate the ALOP. Such entities may include health, mental health, or human service organizations, workforce development boards or agencies, juvenile detention programs, programs operated by the Illinois Department of Corrections, and other appropriate agencies or organizations that can serve students whose needs are not being met by the regular school program.

There are currently 32 approved (some with multiple sites) Alternative Learning Opportunities Programs that provide educational opportunities for students in grades 4 through 12 in various school districts throughout the state. Students in ALOP programs may receive services through the age of 21 if they intend to graduate from high school or qualify to participate in the High School Equivalency Testing program. While programs can differ from district to district, the overall focus remains on identifying students at-risk for academic failure and providing assistance to allow them to catch-up and transition into the general education program or to post high school opportunities. Each student enrolled in an ALOP program is required to have an individual education plan, referred to as a Student Success Plan (SSP). These plans must be based on an assessment of the student's educational and social functioning and skills and must also establish goals and objectives for satisfactory performance in the program. When appropriate, the plans take into account the social norms and behaviors specific to the student's cultural and linguistic background. SSPs have an additional specific list of requirements that must be addressed for each student and must be agreed upon by the student, program, and the student's parent or guardian.

There currently are no grant funds available for ALOP programs. However, General State Aid is available. Approved ALOPs may count supplemental services and certain instructional activities as part of the five (5) clock hours of school hours required by the Illinois School Code.

PROGRAM RECOMMENDATION: ILLINOIS STATE BOARD OF EDUCATION AND REGIONAL OFFICES OF EDUCATION ALTERNATIVE PROGRAMS

Based on evidence and correlating data presented to the School Success Task Force by the Regional Offices of Education and the Illinois State Board of Education, the Regional Safe School Program (RSSP) and the Truants' Alternative and Optional Education Program (TAOEP) have encountered high rates of success within their respective program areas. Therefore, the Task Force recognizes these models as Best Practices for alternative education, and supports their efforts. The Task Force further recommends that these programs be fully funded so that they may continue to serve at-risk students and expand their scope to be able to serve all qualifying students throughout the state.

PUBLIC POLICY

Research confirms the large role that economic advantage and disadvantage plays in student success. Gaps in test scores between affluent and low-income students have grown approximately 40% in the past 50 years¹⁰ (U.S. Department of Education, SSTF Public Hearings). Current financial climates have prevented states from providing adequate funding for education and early childhood programs that can provide interventions for students who require more supports to succeed (SSTF Public Hearings). Hugely successful and important programs such as Regional Safe Schools Program (RSSP) and Truants' Alternative and Optional Education Programs (TAOEP) have seen debilitating budget cuts over the last few years. Funding for RSSP is down 66% with TAOEP funding down 43%. These programs are highly successful in working with at-risk youth as they concentrate on truancy, chronic truancy, dropouts, potential dropouts, academically at-risk, suspension, and expulsion eligible students.

The current lack of funding has also caused schools to eliminate key student support positions, such as mental health professionals, social workers, and reading specialists, who provide on-going assistance for at-risk youth (SSTF Public Hearings, Supportive Schools Discipline Webinar Series, 2013). Additionally, early education programs designed to identify and help at-risk students before they enter school have suffered significant financial setbacks.

¹⁰ Webinar. Public Hearings. <http://www.ascd.org/publications/books/109074/chapters/how-poverty-affects-behavior-and-academic-performance.aspx>

PUBLIC POLICY RECOMMENDATION: LEGISLATURE

Adequate funding of education is not the only area that needs to be addressed through public policy. There are other areas in which legislators can assist.

Encouraging vocational opportunities, arts, music, and humanities, and STEM education will allow schools to offer more diverse opportunities to students whose assets and aptitudes cannot be determined by traditional testing. Additionally, reducing the reliance on high stakes testing that encourages teaching to the test will allow educators to focus on teaching critical thinking and problem solving skills that will be necessary for students to succeed after high school (SSTF Public Hearings, Paek, P.L., 2008).

Legislators can help prioritize and solve the State education funding issue as well as seek federal funding and local grants for school districts to implement programs such as Balanced and Restorative Justice, Roots of Empathy, literacy programs, multi-tiered systems of support, and other data-proven initiatives.

Finally, legislators can provide oversight to ensure that recommendations from previous task forces (SR 560¹¹, HJR 87¹², and SB 0776¹³) are implemented with data collection and assessment determining success.

¹¹ *Task Force on Eliminating Racial Bias in Suspensions and Expulsions* to examine the causes of the racial gap in suspension and expulsion rates and submit a report to the General Assembly by April 15, 2010.

¹² *Task Force on Re-enrolling Students Who Dropped Out of School* in order to examine and develop ways to address the growing issue of students who left school before earning a high school diploma and submit a report to the General Assembly no later than January 10, 2007.

¹³ *Task Force on the Condition of African American Men in Illinois* to determine the causal factors for the condition of African American men; and to develop strategies to reduce duplication of services and to maximize coordination between State agencies, providers, and educational institutions, including developing benchmarks to measure progress. Requires the Task Force to report its findings and recommendations by December 31, 2008.

**APPENDIX 1: Information from Illinois State Board of Education
Suspensions, Expulsions, and Truants by District 2009-2012**

DATA TABLES

SUSPENSIONS, EXPULSIONS, AND TRUANTS - DATA

Information from Illinois State Board of Education Suspensions, Expulsions, and Truants by District 2009-2012

http://www.isbe.state.il.us/research/htmls/eoy_report.htm.

Successful academic opportunity and retention of Illinois students continues to be worked throughout the system Pre-Kindergarten through 12th grade (PreK-12) of education. A persistent effort to maintain and establish effective strategies and programs to facilitate productive student outcomes is vital. Over the course of the Task Force's tenure, community members ranging from parents, teachers, administrators, state leaders and students have productively worked to communicate and be a part of forums to address relevant issues to further "School Success" in Illinois.

From statewide meetings that have covered policies, educational issues, community testimony and Task Force review of compiled information, the following data is reported on Illinois' rate of suspensions, expulsions and truancy from : www.isbe.state.il.us/research/htmls/eoy_report.htm.

The charted information reported is essential to improving student participation and the development of productive educational outcomes for all Illinois students. The following charts document the rates of suspensions, expulsion, and truancy.

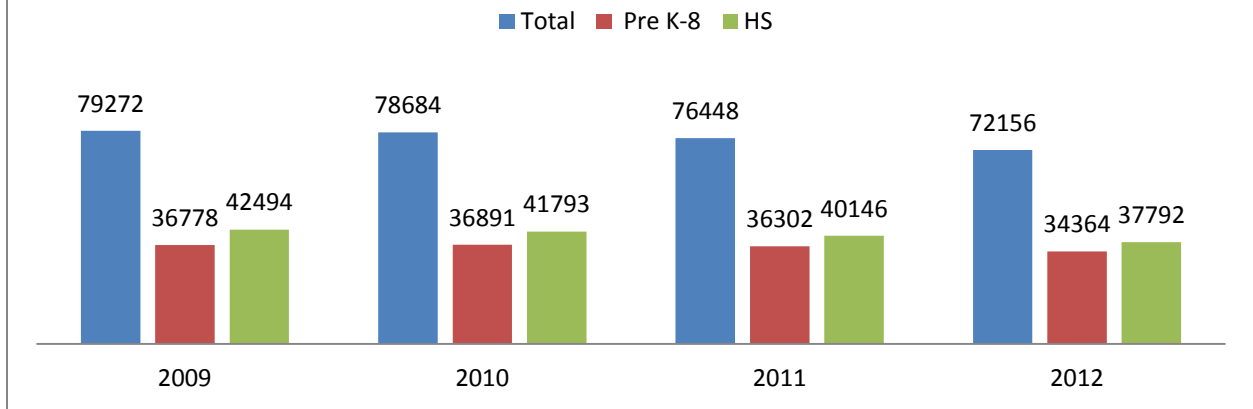

- Student demographics groups have been abbreviated as following:
Hispanic or Latino - H
American Indian or Alaska Native - AM/AN
Asian - A
Black or African American – AA
White – W
Other – O
Multiple Ethnicities – M/E (Data Collection in this category began in 2011)

SUSPENSIONS

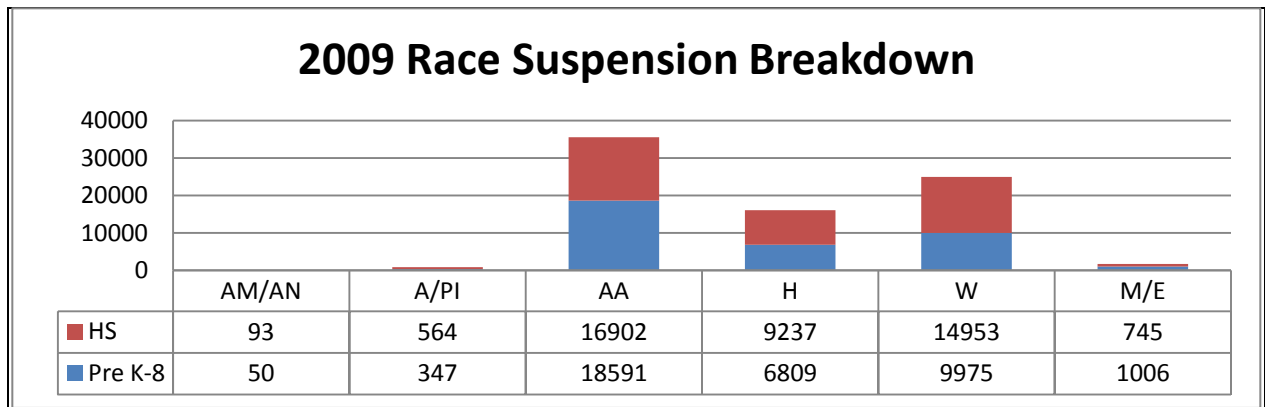

In accordance with numbers from this report for school years ending in 2009, 2010, 2011 and 2012 in the State of Illinois, this report has been derived from www.isbe.state.il.us/research/htmls/eoy_report.htm.

A review of the data from 2009-2012 all schools classified within the Pre-Kindergarten through 8th grades, there has been a consistent decline in the total number of suspensions issued by 6.56%. During the same time period, a review of all schools classified within the 9th through 12th grade (herein referred to as High School or HS), there has been a consistent decline in the number of suspensions issued by 11.07%.

Total Public School Suspensions Issued School Years 2009-2012

- In 2012, High School students accounted for 52.38% of total suspensions compared to 53.61% in 2009, 53.11% in 2010, and 52.51% in 2011
- From 2009-2012 White students were the only group to consistently decline in total suspensions totals at both the k-8 and 9-12 level.
- American Indian students saw the highest suspension rate *increase* at the Pre K-8 Grade level as well at the high school level.
- American Indian students experienced the highest Pre K-8 Grade level suspension rate *increase* at 152.50% from 2010-2011
- American Indian students experienced the highest High School Suspension rate increase at 46.08%
- American Indian K-8 students experienced the highest suspension rate decrease at 9.90% from 2011-2012. (Note: this rate came after an unusually high suspension count the previous year).
- Pacific Indian High School students experienced the highest high school suspension rate decrease at 13.81% from 2010-2011

- Student demographics groups have been abbreviated as following :

Hispanic or Latino - H

American Indian or Alaska Native - AM/AN

Asian - A

Black or African American - AA

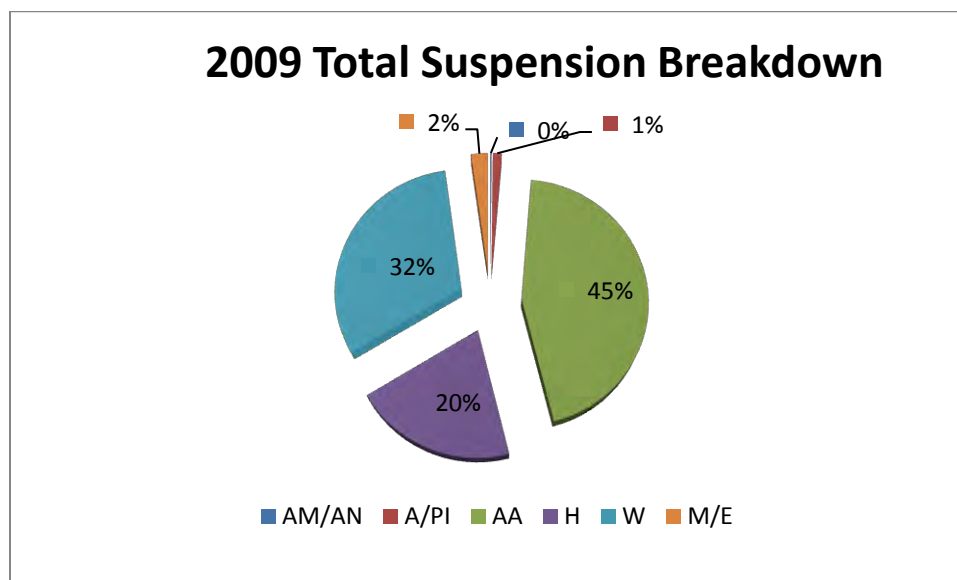

Native Hawaiian or Other Pacific Islander -PI

White - W

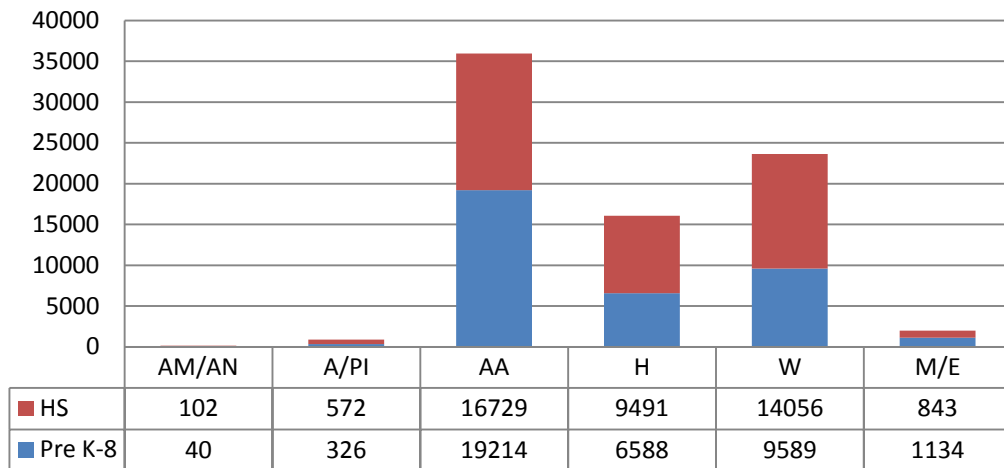

Other – O

Multiple Ethnicities – M/E (Data Collection in this category began in 2011)

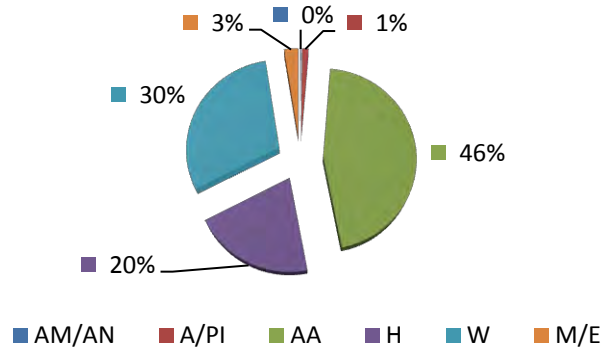

High School grades 9-12 - HS

EXPULSIONS

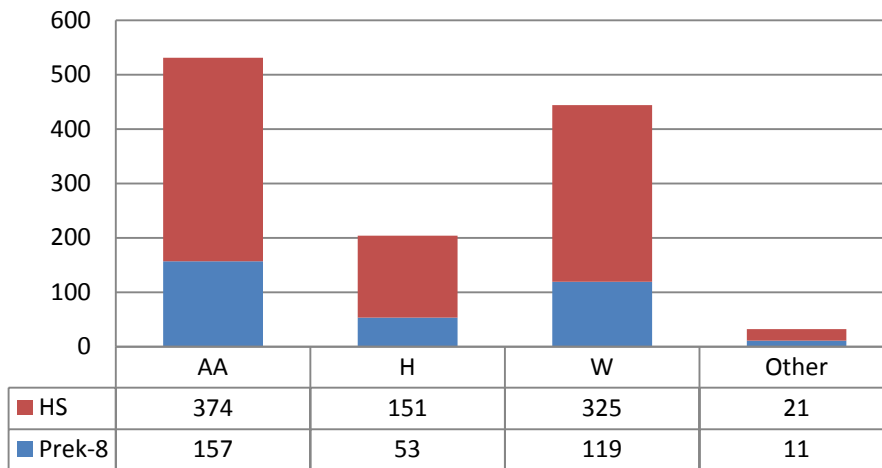

Students identified as being expelled from school from 2009-2012 are charted as following:

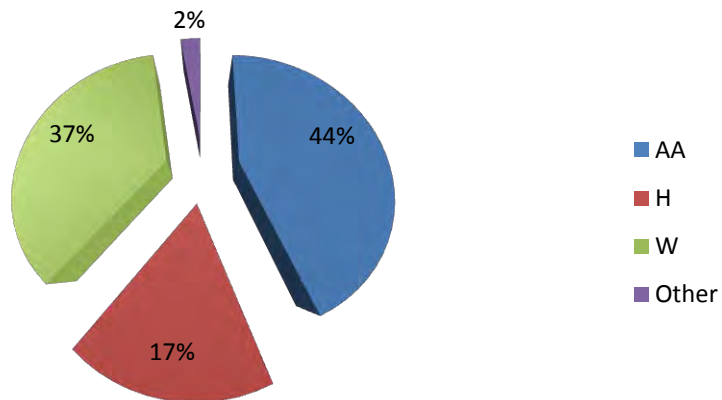

- Total Student Expulsions increased 31.38% from 2009-2012
- Hispanic students experienced the highest student expulsion rate decrease of 37.74% in Pre K-8 students.
- Hispanic students experienced the highest student expulsion rate increase of 34.82% of HS students.
- African American students experienced the highest student expulsion rate decrease of 16.04% of HS students.
- Based on the chart, minority populations represented a significant percentage of expulsions
