High School	Online	107,067	32.2	87,951	17.5
	Paper	17,726	50	15,797	25.1

*There are differences in online and paper scoring. Variables that may have influenced outcomes include the characteristics of the schools tested and the students' interaction with technology as a tool. As such, when comparing online and paper test results, recognition of these differences is important. Additionally, when analyzing the different ways in which students reacted to the online and paper testing, the district's approach to administering the test should be taken into consideration.
