 - Kevin Scheufele

The full ISBE Site-Based Expenditure Reporting team is available at **site-based@isbe.net** for questions not answered by the guidance or supporting materials.

Agenda

3

- Remind me: What is Site-Based Expenditure Reporting?
- Highlights of FY 2022 Reporting Guidance
- Supports Available for FY 2022 Reporting

Remind me: What is Site-Based Expenditure Reporting?

ESSA Site-Based Expenditure Reporting was implemented in FY 2019 for the first time

5

ESSA requires that SEAs report on their Report Card:

*“The per-pupil expenditures of Federal, State, and local funds, including **actual personnel expenditures** and actual non-personnel expenditures of Federal, State, and local funds, **disaggregated by source of funds**, for each local educational agency and **each school** in the State for the preceding fiscal year.”*

FY 2022 Reporting Window: July 1 – August 16
(Editing continues through August 31.)

Successful Implementation

6

The Education Trust

Most states are not reporting data that are complete, accessible, and allow stakeholders to assess spending equity.

1 

- Only Illinois included all the elements that we consider important for assessing school funding equity.

41 
9 

- Most states, but not all, have all the elements that are required by ESSA.

17 

- Only 17 states included spending comparisons.

5 

- Only 5 states include visualizations of spending for all schools in the state or district based on student need.

Illinois
State Board of
Education

Additional Reminders

ILLINOIS REPORT CARD

TELL YOUR STORY ABOUT INVESTMENTS & STUDENT OUTCOMES

EXPLORING Site-Based Expenditure Reporting

Districts and communities can see school-by-school spending data on the Illinois Report Card with multiple years of data displayed.

The data visualizations invite inquiry and dialogue about the relationships between spending, student outcomes, and student characteristics within a district. When exploring the data, remember that differences in spending between schools can arise from many factors, including positive ones. For example, a commitment to equity may result in tailoring resources based on student needs. The Questions to Consider listed below give examples of where dialogue may go as stakeholders in your community have productive conversations about the Report Card visualizations. When facilitating conversations in your community, also consider more open-ended inquiries with sentence starters like:

- I notice...
- I wonder...
- So, what do we do?

You may also encourage stakeholders to contact key district leaders as they share their observations and seek deeper understanding.

Report Card Visualizations

- The District and School Report Cards display the spending per student at each school in the district in a bar graph. The data can be disaggregated by source of funds and by expenditure type: site-level vs. centralized. The display includes Evidence-Based Funding information for additional context. View multiple years of data side-by-side on the School Report Card.

Questions to Consider

- Might schools be funded the same or differently, based on the school's local context?
- Could any of these typical drivers of school-by-school spending differences be affecting the data?
 - Additional resources for special student populations
 - Curriculum, schedule, or school improvement decisions
 - Programs at certain schools
 - School size variances
 - Strategic plan/priority investments
 - Teacher salary schedule differentiated by longevity or other factors in accordance with collective bargaining agreements
- How has spending changed over time?

ILLINOIS REPORT CARD

TELL YOUR STORY ABOUT INVESTMENTS & STUDENT OUTCOMES

SCHOOL FINANCES: Site-Based Expenditure Reporting

Each year, the Illinois Report Card displays school-by-school spending for every district in the state.

Why

Site-based expenditure reporting offers a yearly look at where dollars go. Since these school-by-school spending data have been reported for several years, school communities can examine patterns and changes to resource allocation over time. Additionally, spending data can deepen local dialogue about how dollars can best serve students, acknowledging that the financial data alone rarely tell the whole story. Exploring the spending data in context can support greater understanding of the relationship between financial investments and student outcomes. It may also inform discussions of equity within a district. Site-based expenditure reporting is required by the federal Every Student Succeeds Act.

Who is included?

All districts - including School District 428, operated by the Illinois Department of Juvenile Justice - and charter schools authorized by the Illinois State Board of Education are required to report per-pupil expenditures at the school level.

What is reported?

District reports include the school's share of centralized expenditures, broken down by the expenditure's source of funds: federal vs. state and local. The local category includes any privately or philanthropically funded expenditures, such as donations from a parent group or grants from a foundation. The per-pupil expenditures reflect regular and ongoing K-12 educational expenses; other expenses are reported separately as exclusions. Districts also have the opportunity to submit a written narrative to provide context for the data.

Where is it reported?

Visitors to the Report Card will find the site-based expenditure data under the School Finances tab on both the District Report Card and the School Report Card.

Value Proposition for Site-Based Expenditure Reporting

8

- **Resource allocation will be more readily accessible** *to schools and stakeholders.*
- *Empowers LEAs and communities to* **assess and improve equity.**
- *Enables LEAs and communities to* gain a better understanding of the **relationship between student outcomes and financial resources.**
- *Enables LEAs, schools, and the state to* **identify evidence-based best practices and opportunities to foster innovation** between peers.

Thank you, Advisory Group!

Highlights of FY 2022 Reporting Guidance

Guidance available at
www.isbe.net/site-based.

Questions Addressed in Annual SBER Guidance

10

No Changes
to Guidance

1. What entities must report? For what students?
2. What student count should be used? Are there any exceptions?
3. How do we handle special circumstances, such as students educated outside the district or charter schools?
4. What does the reporting process look like and what approaches are available?

Updates
and/or
Clarifications

5. What expenditures must be included/should be excluded?

1. What entities must report? For what students?

11

Reporting Entities Included

Local Education Agencies that serve or place at least one student in the 2021-22 school year.

Includes state-authorized charter schools.

Note: All charter schools authorized under a district LEA will be reported as individual school sites under the district LEA.

Entities Exempted from Reporting

For FY 2022, the following sites will not be required to provide site-based expenditure data:

- Cooperatives, including special education cooperatives (These students will be reported by their Home LEA.)
- Regional Safe Schools
- Laboratory Schools
- Illinois School for the Deaf
- Illinois School for the Visually Impaired
- Illinois Math and Science Academy
- Philip J. Rock Center and School
- Illinois Center for Rehabilitation and Education

1. What entities must report? For what students?

12

Student:

- Any child age 3 through 21 in grades pre-K* through 12 served by an Illinois public education institution or placed to a private facility by a public education institution.

School/Site:

- Any public education institution within an Illinois LEA that serves students in grades pre-K* through 12.

Home LEA

- The LEA responsible for a student's education based on his/her residence.

Serving LEA

- The LEA providing education services to a student; services may be provided to both resident and non-resident students.

**Refers to prekindergarten students for whom a district incurs costs.*

2. What student count should be used? Are there any exceptions?

13

Reporting Entities must include every student served by the school in the per-pupil calculations, with the following notes and exceptions:

- **Students will be reported according to their SIS enrollment status (Percent of Day Attended or Full-Time Equivalent).** For example, a half-day kindergarten student shall be counted as 0.5.
- The average of the **proportional** student count on October 1 and March 1 of the reporting year will be used.
- If a student is educated **outside** the district (whether placed at a private institution, another LEA, or any other entity), that student shall be included in the count of the Home LEA
- **IWAS will provide enrollment reports for every site based on SIS records. Reporting Entities can use these pre-prepared enrollment counts or adjust them as necessary.**

3. How do we handle certain special circumstances?

14

Charters authorized within an LEA

Charter schools should be reported as a site. LEAs will need to collect expenditure reporting from charter schools in a manner that allows the LEA to report for those schools and not double-count costs.

Students educated outside the district (outplacement)

Students placed and/or served outside of the Home LEA, regardless of reason, shall be included in the Home LEA student count, along with associated expenses. LEAs may report outplacement costs either by (1) creating a separate reporting site that captures all outplacement costs and students; or (2) embedding these students and the respective costs in their home school sites.

Whichever option is selected, it should be applied consistently for all outplacements within the LEA. LEAs with 10 or fewer students placed outside the district must utilize option 2.

Prekindergarten sites and classrooms

Pre-K, but not child care nor birth-3, is included in Site-Based Expenditure Reporting. Pre-K centers are considered sites and therefore must be included in Site-Based Expenditure Reporting as their own sites. Pre-K classrooms within grade schools have no special treatment. LEAs may optionally call out these students and expenditures.

3. How do we handle certain special circumstances?

15

Cooperative high schools,
partnership school

Students attending Paris Cooperative High School, Bismarck-Henning Rossville-Alvin High School, or Dunham STEM Partnership School will be reported along with their associated expenditures by their placing Home LEAs in a separate site.

Students attending
nonpublic schools

In some cases, an LEA may provide services for one or more students attending nonpublic schools. If the LEA includes the nonpublic students within its proportional student enrollment count, then its associated expenditures should be reported as part of the per-pupil calculation. If the students are not within the student enrollment count, the expenditures should be reported as an exclusion.

In other cases, dollars may flow through the LEA to nonpublic schools without the LEA claiming any nonpublic students within their enrollment. Here, these dollars should be reported as an exclusion. Any expenditures that fall within the exclusions reporting categories should be reported within the total exclusions amount.

3. How do we handle certain special circumstances?

16

Reporting expenditures from federal stimulus

Any LEA expending federal stimulus funds in FY 2022 must include the expenditures in FY 2022 Site-Based Expenditure Reporting. Any funding included within per-pupil calculations should be reported as federally funded. LEAs will use the usual exclusion rules to decide what expenditures are reported through per-pupil calculations vs. through total exclusions. LEAs will use the usual site-level vs. district-centralized guidance to decide how to report expenditures in the per-pupil calculations.

County juvenile detention centers

Students placed in county juvenile detention centers and the centers themselves will not be reported by the LEA in which the detention center is located. Any expenditures incurred by the LEA for center administration should be excluded from reporting. If an LEA knows its total dollar amount expended for the detention center, these expenditures should be excluded. If obtaining the actual expenditure amount is overly burdensome, LEAs can exclude their reimbursement for Section 18-3 Regular Orphanage claims for county juvenile students.

Reporting guidance flexibilities are designed for LEAs to best reflect their actual service delivery

17

If your LEA's actual service delivery has changed little since FY 2021:

- Consider making the same or very similar reporting decisions in FY 2022 as you did in FY 2021.
- **Consistent longitudinal data** will be more valuable for you and your community.

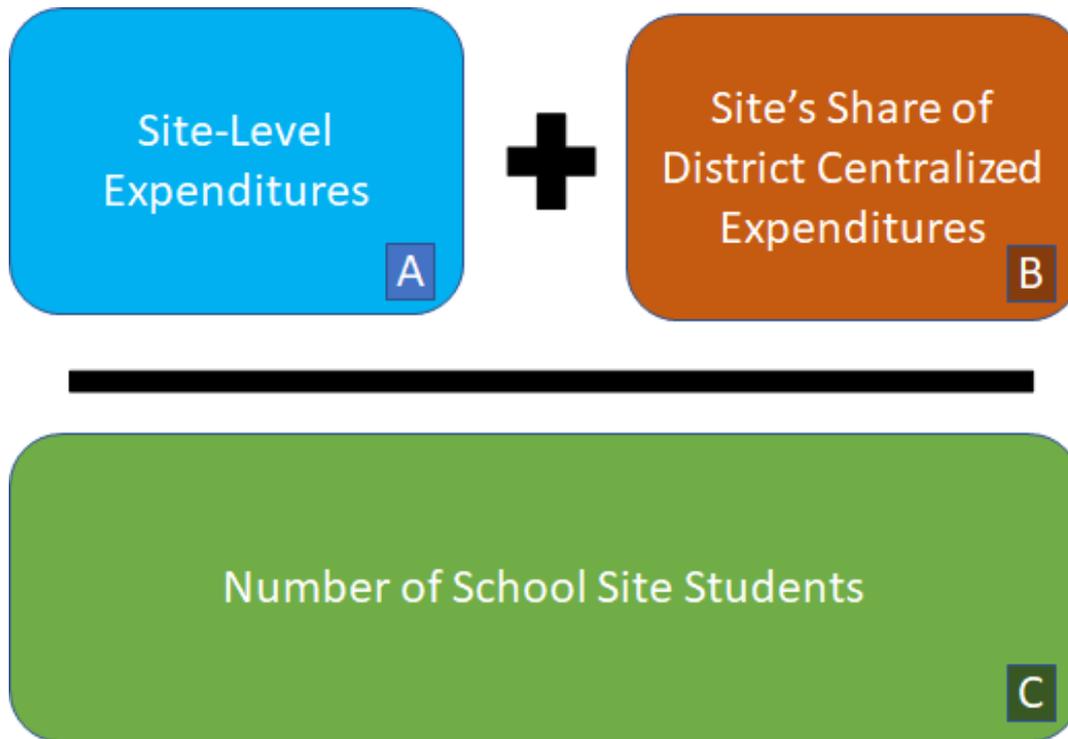

If your LEA's actual service delivery has changed significantly since FY 2021 and/or you realized better ways to reflect it:

- You may change your reporting decisions to more accurately reflect FY 2022 reality.
- Consider providing **optional narrative** to give context on why the data may look different in FY 2022 than in FY 2021.

4. What does the reporting process look like and what approaches are available?

18

Per-pupil expenditures reported for each school shall be composed of:

Importantly, per ESSA, Sections A and B must be disaggregated by source of funds – federal vs. state/local (with state and local combined).

4. What does the reporting process look like and what approaches are available?

		Site-Level Per-Pupil Expenditures			District Centralized Per-Pupil Expenditures			Total Per-Pupil Expenditures				
Sites	Enrollment	State and Local		Subtotal	State and Local		Subtotal	State and Local		Total	Exclusions	Total Expenditures
		Federal	Local		Federal	Local		Federal	Local			
PK Ctr	50	\$500	\$8,020	\$8,520	\$660	\$3,514	\$4,175	\$1,160	\$11,534	\$12,695		
ES1	300	\$344	\$5,148	\$5,493	\$529	\$2,781	\$3,310	\$874	\$7,929	\$8,803		
ES2	250	\$231	\$5,445	\$5,677	\$457	\$3,095	\$3,552	\$688	\$8,540	\$9,229		
MS1	250	\$320	\$5,356	\$5,676	\$361	\$3,499	\$3,861	\$681	\$8,855	\$9,536		
HS1	320	\$458	\$6,910	\$7,368	\$371	\$2,919	\$3,290	\$829	\$9,829	\$10,658		
Total	1,170	\$353	\$5,861	\$6,213	\$440	\$3,071	\$3,511	\$793	\$8,931	\$9,724	\$2,330,361	\$13,707,753

4. What does the reporting process look like and what approaches are available?

20

ISBE IWAS Online Tool

- Users upload an expense template and use advanced filtering to allocate expenditures.
- Site-level expenditures are calculated entirely within IWAS.

Vendor Reports

- Some accounting systems produce site-level spending figures on behalf of districts.
- Users may enter the required data from these reports either through an Excel template or manually through an Add/Edit screen.

Off-Sheet Calculations

- Reporting entities may conduct independent calculation to determine per-pupil expenditures at each site.
- As with figures derived from vendor reports, users may submit their data in IWAS through an Excel template or manually through the Add/Edit screen.

Data Calculation Template: Retired as of FY 2022

21

- **ISBE will no longer support use of the data calculation template for site-based reporting.**
 - The data calculation template was an ISBE-created Excel sheet that districts could use to complete their expenditure reports. We encourage all LEAs that formerly used the data calculation template to use the ISBE IWAS Online Tool in FY 2022.

"The built-in tool provided within the application was fantastic! Once I uploaded the data from our software it was super easy to allocate the funds using the query tools to disaggregate different account code ranges. Thank you, ISBE, for providing this tool - it was extremely helpful and cut down significantly on the time required to prepare this report."

IWAS Online Tool for Single Sites *New*

22

Due to the relative simplicity of reporting for single-site LEAs, ISBE has enhanced the IWAS Online Tool to automate key elements of the reporting process for single-site districts.

Please join the webinar for single-sites on June 28 to learn more.

Additional IWAS Enhancements for All Users

23

- **Start Page:** After viewing the welcome screen, users will be asked a series of questions designed to recommend a reporting approach and to assist with uploading the required documentation.
- **Vendor-Specific Recommendations:** Depending on the district's accounting software, IWAS may suggest vendor-specific file names to facilitate transfer into IWAS upload templates.
- **Targeted Support Requests:** Users that need additional support will find help request forms embedded at key stages within the reporting process. For example, if a user is struggling to transfer data from an expenditure report into the IWAS expense template for upload, the user may use the form to describe the issue and to attach supporting documentation. ISBE's site-based team will monitor help requests to provide timely support.

Data Quality and Accuracy

24

Errors Preventing Submission

Embedded within the IWAS reporting system are certain data quality checks that flag known reporting errors and prevent LEAs from submitting final expenditures with errors. For example, if a district reports no federally sourced expenditures at any site, IWAS will prevent submission of the report. Importantly, ISBE's site-based team distinguishes between true reporting errors and expenditure data that may fall outside of a normal range but are otherwise accurate. In these cases, IWAS will flag potentially concerning data, but the district will still be allowed to submit the report. For example, if a single site has per-pupil expenditures greater than \$40,000, IWAS will notify the district. Nevertheless, the district may submit the report.

If a district is prevented from submitting the report due to a data quality check, yet it believes that it is reporting accurately, the district may contact the site-based team at site-based@isbe.net.

Intent:

1. Reduce post-submission outreach to districts to correct known errors.
2. Improve data quality and accuracy.

Embedded in IWAS since 2019.

5. What expenditures must be included/should be excluded?

25

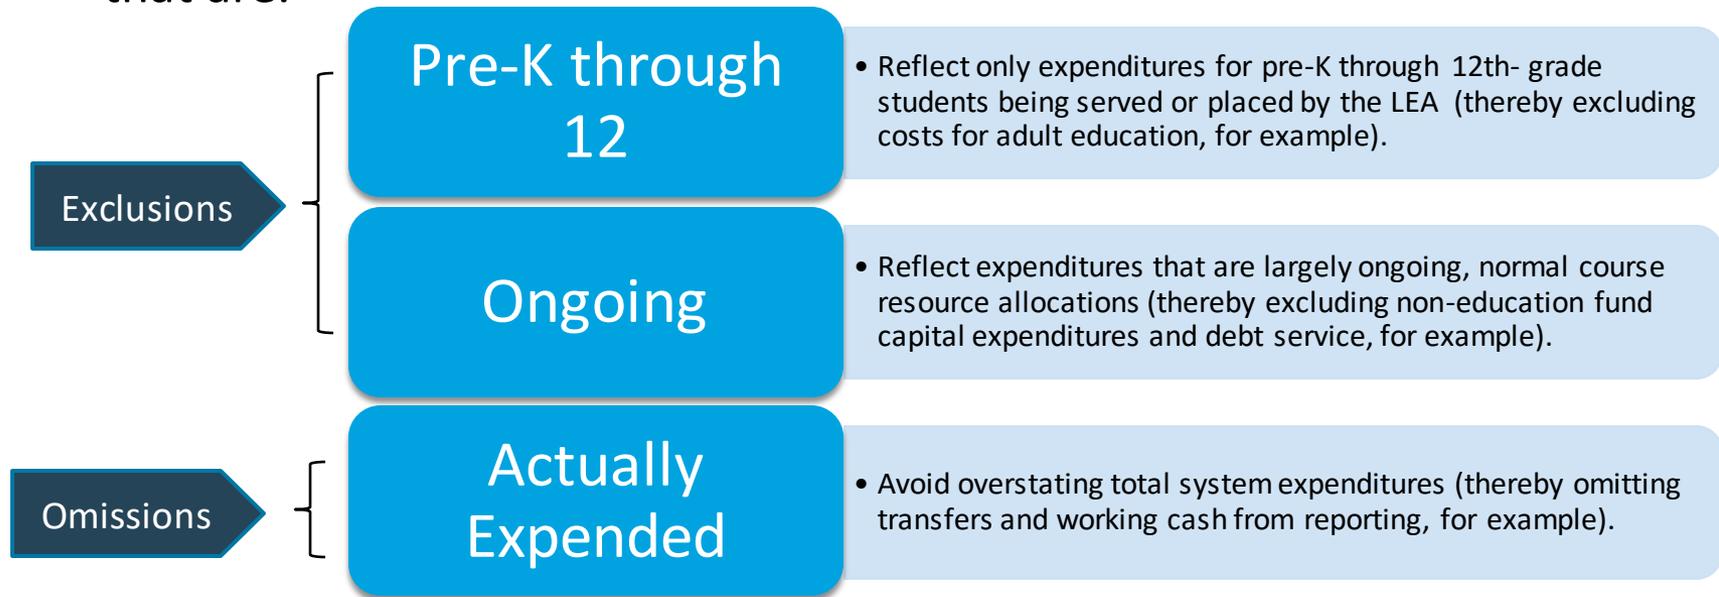

All district expenditures, including, but not limited to, personnel costs, transportation, security, administration, and those that are funded privately, should be included in the numerator within either (A) site-level expenditures or (B) the site's proportional share of the district's centralized expenditures. Certain expenditures should be excluded from the per-pupil expenditures reported and will instead be reported as a lump sum in the category of "exclusions." Certain other accounts, such as those related to transfers or working cash, should be omitted entirely from reporting.

Why are some expenditures excluded and others omitted from reporting?

26

The intent behind these exclusions and omissions is to reflect expenses that are:

Exclusions from Per-Pupil Calculations

1. **Fund 30:** Bond and Interest Fund (Debt Service Fund)
2. **Fund 60:** Site and Construction/Capital Improvements Fund
3. **Fund 90:** Fire Prevention and Safety Fund
4. **Function 1300:** Adult/Continuing Education Programs
5. **Function 3000:** Community Services
6. **Functions 4130, 4230, and 4330:** Payments to Other Governmental Agencies for Adult/Continuing Education Programs
7. **Function 5000:** Debt Services
8. **Object 500:** Capital Outlay except for those in Fund 10 (Education), which should be included
9. **County Juvenile Detention Center Expenditures:** The costs incurred by any school district to administer or outsource services for a county juvenile detention center within its geographic boundaries shall be excluded for site-based expenditure reporting
10. **Legacy Pension Obligations**

Omissions from Site-Based Expenditure Reporting

- 1. Fund 70: Working Cash Fund** -- Transfers and working cash are not expenditures and therefore should be omitted. Once the working cash and/or transferred dollars are expended, they become subject to site-based expenditure reporting.
- 2. Function 1115: Tuition Payments to Charter Schools** -- District-authorized charter school expenditures will be reported in the charter school's site-based expenditure section. This tuition payment to charters should be omitted to avoid overstating total system expenditures.
- 3. Function 1999: Student Activity Fund Expenditures** -- These expenditures are not directed by the LEA and therefore should be omitted from reporting.
- 4. Reimbursable Expenditures (in some cases):** Reimbursable expenditures should be omitted only in cases in which the reimbursement comes from an LEA that is reporting the expenditure as part of its own site-based expenditure reporting. In these cases, if both LEAs were to report the expenditure, total system expenditures would be overstated.
- 5. Expenditures Paid On Behalf of LEA:** Payments that are not paid by the LEA but are rather paid by outside entities on behalf of the LEA (such as Teachers' Retirement System payments made by the state of Illinois on behalf of LEAs) should be omitted from Site-Based Expenditure Reporting.

Identifying Exclusions and Omissions

29

- LEA accounting may differ from the ISBE Part 100 Chart of Accounts; in this case, ***LEAs should exclude or omit expenditures meeting the intent of exclusions and omissions*** on the previous slides.
 - For example, if adult/continuing education programs are accounted for in a different function than Function 1300, expenditures for these programs should still be excluded.

Supports Available for FY 2022 Reporting
