

PD+ for Providers

Available on August 29, 2022

What is PD+?

PD+ is an interactive system that will house information about all professional development available for Illinois educators and approved Illinois professional development providers. The goal of PD+ is to provide a “one-stop shop” for educators to search for and register for professional development and to assist providers in the recordkeeping process. PD+ will provide statewide equitable access to professional development offered through ISBE-approved professional development providers and will include a complete listing of all professional development activities being offered by approved providers. Educators will be able to search using filters to narrow results by topic, location, cost, etc. The system will also track the completion of professional development hours for educators, eliminating the need for manual entry by individual educators into ELIS. In addition, the system will allow for yearly registration mandated by Illinois School Code for all approved providers and will allow providers to update their contact information.

PD+ is modernizing your professional development!

PD+ includes many enhanced features that will assist you with tracking and offering you professional development throughout the state.

- ✓ Easy to navigate system
- ✓ Readily accessible through IWAS
- ✓ Push notifications available
- ✓ Automated tracking for all required professional development forms
- ✓ Designed based upon professional development provider feedback

How will I use PD+ as a provider?

- ✓ To offer professional development activities for educators throughout the state
- ✓ To register annually as a professional development provider
- ✓ To track ISBE-required professional development forms electronically vs. on paper
- ✓ To streamline and automate the annual audit process
