# Today's Discussion on Reporting for Students Placed Outside the District

2

- **Overview** of Site-Based Expenditure Reporting
- **Specific requirements** associated with students placed outside the district
- **Implications** for district reporting

# An Advisory Group contributed to the implementation of Site-Based Expenditure Reporting

3

Founding Advisory Group members included representatives from:

- District superintendents
- School business officials
- Statewide professional organizations

Since 2017, the Advisory Group has expanded to also include representatives from:

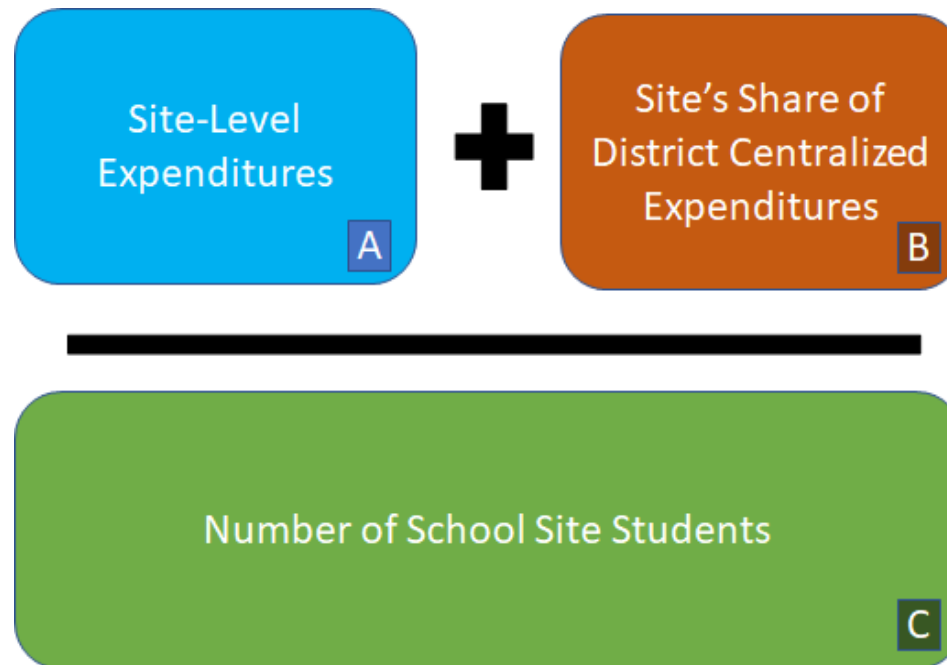

- Principals
- Parents
- Teachers
- Statewide and regional advocacy organizations

# This is the calculation of total per-pupil expenditures for a given school site

4

Per-pupil expenditures reported for each school shall comprise:

# District's data collection produces this data table

This level of reporting detail are the only mandated collection. Visualizations are limited to these data and contextual data. LEAs may also optionally submit narratives and notation of allocation methodologies.

# Reporting Requirements for Students Educated Outside the District

# Where should students educated outside the district be reported?

7

Students placed and/or served outside of the Home LEA, regardless of reason, shall be ***included in the Home LEA student count, along with associated expenses***. Examples include (but are not limited to):

- Students receiving special education services at either public or private centers
- Students attending vocational centers

Expenses typically include:

- Tuition (Part 100 Expenditure Codes 1910 – 1922 for Private Tuition; 4100, 4200, 4300, or 4400, which is used all for other tuition payments outside of Private Tuition)
- Transportation (Part 100 Expenditure Code 2550, as it pertains to students placed outside the district)

# How should these students and their costs be reflected in reporting?

8

LEAs have two options for reporting *students* educated outside the district and their associated expenditures\*

Option 1: Create a *separate reporting site* that captures students and their outplacement costs

Option 2: Embed students in their home school sites.

If utilizing Option 2, LEAs have two options for allocation of expenditures to sites

A. Allocate \$ directly to these home sites (select schools, on a per-pupil basis, using outplaced students)

B. Allocate \$ across all sites (all schools, on a per-pupil basis, using all pupils)

\*If an LEA has 10 or fewer students placed outside the district, the LEA **must utilize Option 2**

# Which option should an LEA use?

If an LEA has 10 or fewer students placed outside the district, the LEA must utilize Option 2 (embed within home sites). Otherwise, LEAs should select the methodology that best suits their district’s reporting goals.

Reporting Options	Underlying Principle	Considerations
<b>Option 1 (separate “site”)</b>	Educating these students is a significant investment and may be something the LEA wants to <i>highlight</i> for the community	<ul style="list-style-type: none"><li>• How does seeing these variable costs interact with the LEA’s and community’s understanding of equity?</li></ul>
<b>Option 2 (embed within home sites)</b>	This cost represents a service <i>available</i> to all sites and all students (like other centralized costs), and investments in those of highest need benefit <i>all</i> sites and students	<ul style="list-style-type: none"><li>• What effect does embedding these costs within sites have on equity conversations within an LEA and its community?</li><li>• If selected, should costs be allocated only to home sites, or across all sites?</li></ul>

- Three options:
  - Option 1: A separate “site” is created, which includes student count and expenditures associated with students placed outside the district
  - Option 2a: Student count is embedded in the home sites (ES1 and ES2 in this example); associated expenditures are allocated to these sites
  - Option 2b: Student count is embedded in the home sites (ES1 and ES2); associated expenditures are allocated to *all* sites, per pupil

- Only Option 1 has a separate reporting row for outplaced students. Options 2a and 2b have outplaced students embedded in their home sites (ES1 and ES2 in this example). Outplacement costs stand out as higher than other schools, which is likely typical for this option.
- In Option 2a, ES1 and ES2 have higher total per-pupil costs than in Option 1, since costs of outplacements are assigned to those sites
- In Option 2b, all schools have somewhat higher total per-pupil costs than Option 1, since costs of outplacements are distributed across all sites
- Note that the Total Per-Pupil Expenditures (bottom row) are the same for all three options

# Option 1: Create a separate reporting site that captures all outplacement costs and students

\*Students Educated Outside the District

As shown in the reporting table above, Option 1 creates a separate reporting site to capture all students educated outside the district, their outplacement costs, and any central expenditures associated with supporting students that are outplaced.

\*Students Educated Outside the District

  
 LEA costs incurred by overseeing and supporting outplacement, including transportation and central support, are also assigned to the Outplacement “site” (recommended to be included as *Centralized Expenditures*)

# Option 1: Implications and Considerations

16

- All students and the costs associated with outplacements are included in a separate site.
- Does the LEA feel comfortable separating these students and their associated costs in reporting? What is the value in that separation? Is there potential risk?
- How does seeing these variable costs interact with the LEA's understanding of equity? How could it influence the community's understanding of equity?

# Option 2a: Embed students in their home school sites; expenditures are assigned to home sites as well

Sites	Student Count	Site-Level Per-Pupil Expenditures			District Centralized Per-Pupil Expenditures			Total Per-Pupil Expenditures			Exclusions	Total Expenditures
		Federal	State and Local	Subtotal	Federal	State and Local	Subtotal	Federal	State and Local	Total

As shown in the reporting table above, Option 2a embeds students educated outside the district and all outplacement costs within the home sites of the outplaced students. In this example, students are originally from ES1 and ES2.

# Option 2a: Student Count

Recommended: No outplacement costs are included in site-level per-pupil expenditures.\* All costs will be included as centralized expenditures, as they are not direct expenditures at the site (see next slide).

\*Note that this recommendation is different than Option 1. For Option 1, we recommend recording tuition as *site-level*. Here, ES1 and ES2 are not incurring site-level costs for outplacement, so it makes more sense to show tuition and other expenditures as *centralized*.

# Option 2a: District Centralized Expenditure Allocation

Sites	Student Count	Site-Level Per-Pupil Expenditures			District Centralized Per-Pupil Expenditures			Total Per-Pupil Expenditures			Exclusions	Total Expenditures
		Federal	State and Local	Subtotal	Federal	State and Local	Subtotal	Federal	State and Local	Total

All expenditures explicitly associated with outplacements, including tuition, transportation, and LEA costs incurred from overseeing and supporting outplacement activities, are **allocated to sites based on outplaced student count included in those sites.** Recommended: assign these as centralized expenditures.

As shown in the reporting table above, Option 2b embeds students educated outside the district within the home sites of outplaced students. All outplacement costs are allocated per pupil across all sites.

Recommended: No outplacement expenditures are included in “Site-Level Per-Pupil Expenditures” as they are all being treated as centralized expenditures, allocated across all sites (per pupil, using all pupils)\*

\* ISBE’s recommendation is to include all expenditures as centralized expenditure allocations because no costs are technically incurred at these sites for outplaced students. Note that this is different from Option 1.

# Option 2b: District Centralized Expenditure Allocation

All expenditures explicitly associated with outplacements, including tuition, transportation, and LEA costs incurred overseeing and supporting outplacement activities, are allocated across sites (per pupil, using all pupils). Recommended: assign these as centralized expenditures.

## Option 2: Implications and Considerations

25

- Costs associated with outplacements are treated like centralized expenditures rather than attached to individual sites and students.
- Does the LEA feel comfortable integrating these students and their associated costs in reporting? What is the value in that integration? Is there potential risk?

Other implications to consider?
