# ENGLISH LANGUAGE LEARNERS (ELL) IN ILLINOIS 

## 2005 ELL STUDENT STATISTICAL REPORT

Data Analysis and Progress Reporting Division Illinois State Board of Education

## INTRODUCTION

This statistical report describes the English language learners (ELL) or LEP students enrolled in Illinois public schools in school year 2004-2005, in terms of their grade levels, native languages spoken, concentration of ELL population in counties across the state, and participation of ELL students in district programs designed to serve their educational needs. This report also includes the proficiencies of ELL students on local English language proficiency assessments and IMAGE (Illinois Measure of Annual Growth in English), a state achievement test designed for ELL students. In addition, the performance of ELL students (who were transitioned out or mainstreamed from district state-funded bilingual programs) on the state achievement tests, such as, the ISAT (Illinois Standards Achievement Test), and the PSAE (Prairie State Achievement Examination) are presented in this report. English language learners (ELL) and limited-English proficient (LEP) are used interchangeably in this report.

## BACKGROUND

The Illinois School Code requires that one of two types of programs be provided for all K-12 limited English proficient (LEP) students to help them become proficient in English so that they can transition into the mainstream education curriculum.

## Transitional Bilingual Education (TBE)

In 1973, legislation was passed requiring school districts to offer a Transitional Bilingual Education program whenever there are 20 or more LEP students with a common native language enrolled in an attendance center. TBE programs must be taught by certificated teachers who are fluent in the native languages spoken by the students.

## Transitional Program of Instruction (TPI)

A Transitional Program of Instruction may be provided in lieu of a TBE program whenever there are fewer than 20 LEP students of the same native language at an attendance center. A TPI program must always be made available to any LEP student if a TBE program is not otherwise available. TPI programs may provide a wide range of services. Examples of TPI services include instruction in English as a Second Language (ESL), the use of tutors and aides in the classroom, and other native language resource persons.

With the passage of No Child Left Behind (NCLB), districts with state-funded TBE and/or TPI programs could also apply for and receive additional supplemental funding from Title III of NCLB [the Language Instruction Programs for Limited English Proficient Students (LIPLEPS) and, in some instances, from the Immigrant Education Program (IEP)].

## How are ELL (LEP) students identified?

At the time of enrollment, school districts are required to identify students who may be limited English proficient. Districts are required to administer a home language survey to determine the languages spoken in the student's home and the languages the student speaks. Once students with non-English language backgrounds are identified, districts are then required to conduct individual language assessments to determine whether or not the students are limited English proficient.

The individual English language proficiency assessment measures students' listening, speaking, reading, and writing skills. Students are considered limited English proficient and eligible for bilingual education services if their individual language assessment indicates that:
a) their performance on a nationally normed English-language-proficiency test is below the 50th percentile (or its equivalent), or
b) their performance is at or above the 50th percentile on a test equivalent to a nationally normed English language proficiency test, but other performance indicators such as results of criterionreferenced or locally developed tests, teachers' evaluations of performance, samples of a student's work, and/or information received from family members and school personnel show that they are unable to succeed in English-only classes, or
c) when no nationally normed English language proficiency test can be administered, a review of other performance indicators shows they are unable to succeed in English-only classes, or they are more than one year behind the average of district/grade level peers in any required subject.

Students identified as LEP from these tests are eligible for placement in bilingual education programs.

## Annual Examinations of ELL Students

The law (105 ILCS 5/14C-3) (from Ch. 122, par. 14C-3, Sec. 14C-3) also requires that these students identified as LEP are to be tested for their oral comprehension, speaking, reading, and writing of English annually. The law further stipulates that no school district shall transfer a child of limited English-speaking ability out of a program in transitional bilingual education prior to his third year of enrollment therein unless the parents of the child approve the transfer in writing, and unless the child has received a score on said examination reflecting a level of English language competencies appropriate to his or her grade level.

In FY05 and in prior years, districts could use any of four state-approved norm-referenced commercial English language proficiency assessments, namely, the Language Proficiency Test Series (LPTS), Language Assessment Scale (LAS), Idea Proficiency Test (IPT), or the Maculaitis II (MACII), to assess their LEP students annually. Starting in FY06, however, districts can only use the ACCESS for ELLs ${ }^{\text {TM }}$, a statewide standards-based, criterion referenced English language proficiency test designed to measure English language learners' social and academic proficiency in English.

## Bilingual Census

The Bilingual Census, which provides information on a) the number of non-English language background students, and b) the number of non-English language background students identified as having limited English proficiency, is collected by each attendance center at the beginning of the school year and submitted to ISBE by the end of September of each year. The students having limited English proficiency are referred to as LEP students and are eligible to be served in TBE/TPI programs. Districts that enroll ELL or LEP students are required to submit the Annual Student Report (ASR).

## Annual Student Report (ASR)

The ASR collects demographic information on each of the ELL students enrolled in districts. This demographic information includes the student's native language, grade level, gender, birthdates, other services, entry or enrollment dates, exit dates, and/or reason for exiting bilingual education programs. In 2004-2005, the ASR also collects English proficiency data of ELL students for school years 2003-2004 and 2004-2005. The ASR is due to ISBE the end of the fiscal year, specifically, June 30 of each year.

## Numbers reported in Bilingual Census compared to numbers reported in the Annual Student Report

Since the bilingual census is collected at the beginning of the school year and the annual student report (ASR) at the end of the school year, there are many instances where the number of ELL students reported in the ASR is more than the number reported in the bilingual census.

## I. Student Demographics and Program Participation

## II. ENGLISH LANGUAGE PROFICIENCY LEVELS OF ILLINOIS ELL (LEP) STUDENTS

Section 14C-3 of the School Code requires school districts to annually assess the English language proficiency, including aural comprehension (listening), speaking, reading, and writing skills, of all LEP students enrolled in TBE and/or TPI programs. To implement this mandate, ISBE identified and approved four norm-referenced English proficiency tests that school districts must use to assess the English language proficiency of its LEP students: IPT (Idea Proficiency Test), LAS (Language Assessment Scale), LPTS (Language Proficiency Test Series), and Maculaitis II (MACII). The ELPTS (English Language Proficiency Test Series) which for some portions of the test are IMAGE-to-LPTS converted test and is only used by Chicago 299, was also one of those local tests used to assess English language proficiency. Each of these tests are scaled differently from each other, but in general, the scale scores of these four tests could be converted into three proficiency levels: non-English speaker, reader or writer; limited English speaker, reader or writer; and full/competent English speaker, reader, or writer. These annual tests are generally administered by school districts in the spring.

## III. ACHIEVEMENT LEVELS OF ELL (LEP) STUDENTS ON IMAGE (Illinois Measure of Annual Growth in English)

IMAGE is the appropriate state assessment for LEP students in the first three years of bilingual/ESL services (not counting Pre-K or kindergarten), who are not eligible for the IAA. Following are the four performance levels in IMAGE:

Beginning (B) or Warning (W) - Students at this level begin to read and understand short, simple text supported by illustrations or personal experiences. Students begin to communicate ideas in writing through word lists, phrases, or simple sentences.

Strengthening (S) or Below (B) - Students at this level read and understand simple text supported by illustrations or personal experiences. Students maintain a focus in writing through simple or repetitive language.

Expanding (E) or Meeting (M) - Students at this level read text with increasing understanding of abstract and/or unfamiliar content. Students communicate ideas in writing with increased detail, organization, and variety of language.

Transitioning ( $T$ ) or Exceeding ( E ) - Students at this level read and understand an increasingly broad range of materials required for academic success. Students communicate ideas with control of language and writing features required for academic success.

Beginning, Strengthening, Expanding, and Transitioning describe reading performance levels; while Academic Warning, Below Standards, Meeting, and Exceeding describe mathematics performance levels, which are parallel to that of the ISAT/PSAE performance levels. (For more information on ISAT and PSAE, see page 14). At a minimum, an ELL student meets the learning standards at the Expanding (E) or Meeting (M) level.

Chart 2. Percent of ELL Students Who Met/Exceeded Standards in IMAGE-Math by Year in the Program and Grade Level, 2004-2005

# ACHIEVEMENT LEVELS OF ELL (LEP) STUDENTS ON ISAT (Illinois Standards Achievement Test) and PSAE (Prairie State Achievement Examination) 

Both the Illinois Standards Achievement Test (ISAT) and the Prairie State Achievement Examination (PSAE) measure individual student achievement relative to the Illinois Learning Standards. ELL students who transitioned to the regular or mainstream school program are administered either of these tests depending on their grade levels. In 2004-2005, grades 3, 5, and 8 were administered the ISAT-reading and ISAT-mathematics, while grades 4 and 7 were administered the ISAT-science. PSAE is the statewide high school achievement test administered to grade 11 students only. Subject areas covered by PSAE for 2004-2205 were reading, mathematics, and science.

ISAT and PSAE have four performance levels:
Exceeds Standards (E) - Student work demonstrates advanced knowledge and skills in the subject. Students creatively apply knowledge and skills to solve problems and evaluate the results.

Meets Standards (M) - Student work demonstrates proficient knowledge and skills in the subject. Students effectively apply knowledge and skills to solve problems.

Below Standards (B) - Student work demonstrates basic knowledge and skills in the subject. However, because of gaps in learning, students apply knowledge and skills in limited ways.

Academic Warning W) - Student work demonstrates limited knowledge and skills in the subject. Because of major gaps in learning, students apply knowledge and skills ineffectively.
